--- On commencing at 9.30 a.m.

THE CHAIRMAN: Mr. Secretary, it is practically 9.30. I think we might as well start. I doubt if we will have a much larger audience than we have got, despite the notoriety of this particular case. If you would be so kind as to introduce our visitors to us, we will get under way.

THE SECRETARY: Yes, Mr. Chairman. This morning we have a brief from the Anaconda American Brass Limited. Mr. A.R. McGinn, Secretary and Treasurer of the company, together with his associates, is here. He will introduce his associates and, as well, we have Mr. R.M. Skinner who is representing the firm of Clarkson, Gordon and Company. Mr. Skinner will be speaking to the brief.

I would like to enter this brief into the record as Exhibit No. 68.

--- EXHIBIT NO. 68: Submission of Anaconda American Brass Limited.

SUBMISSION OF ANACONDA AMERICAN BRASS LIMITED

Appearances: Mr. A.R. McGinn
Mr. W.G. Peaker
Mr. G. Laurence
Mr. R.M. Skinner
Mr. J.S. Vanderploeg

THE CHAIRMAN: Good morning, Mr. McGinn, Mr. Skinner, gentlemen. We have read your submission with a great deal of interest. As a matter of fact, it is as good reading as anything which I have had before me. Perhaps that is because the subject is not altogether unfamiliar.

1 Usually in these matters we like the participants
2 to say whatever they wish to say.

3 We have prepared a number of questions and to do
4 justice to this important matter, with the care and thought
5 and the interest you put into it, we have asked our Legal
6 Adviser and counsel, Mr. Stewart, to lead the questions.
7 That does not preclude us from asking questions, too, so
8 you will get it on all fronts.

9 It seemed to me that you were more apt to
10 receive the questions in a logical order, and a profes-
11 sional will, perhaps, phrase them a little better than the
12 amateurs up here.

13 In all events, we would be very glad to hear
14 anything, Mr. McGinn, that you would care to say before we
15 start our review of your submission.

16 MR. MCGINN: I have no remarks to make. Before we
17 start, I would just like to introduce our people here.
18 Mr. Peaker from our firm. Mr. Laurence from our firm and,
19 as you know, Mr. Skinner from the Clarkson Company.

20 THE CHAIRMAN: Thank you very much. Don't bother
21 to stand, gentlemen. Most people don't. You have
22 described your company here. I believe we know who you
23 are and the reason why you are here.

24 Mr. Stewart, will you proceed?

25 MR. STEWART: Thank you, Mr. Chairman. Gentlemen,
26 I would like, if you have no objection, to start these
27 questions not with the subjects that you expressly dealt
28 with at the beginning of your submission, but with what you
29 say with regard to LIFO, and the first section that I would
30 like to deal with is the section starting on page 16 and

1 going on to page 28, where you are dealing with the appli-
2 cation of the LIFO method to companies such as Anaconda.

3 My first question would be this: would you
4 consider that there would be general agreement in the
5 accounting profession that the LIFO method is a suitable
6 method for a business or a taxpayer such as Anaconda?

7 MR. SKINNER: Mr. Stewart, I think so, without
8 doubt. One can never say there is one hundred per cent
9 agreement but no doubt there would be general agreement
10 that this is a suitable method.

11 MR. STEWART: I am sure, Mr. Skinner, you are
12 familiar with Bulletin No. 5 of the Canadian Institute of
13 Chartered Accountants which was issued in November, 1950,
14 and which deals with the meaning of the term "cost" as
15 used in inventory valuation. You, in fact, quoted from
16 Bulletin No. 5 in this submission.

17 May I ask if you are in general agreement with
18 what is said in that bulletin?

19 MR. SKINNER: Yes, we are.

20 MR. STEWART: You quote, at the bottom of page 17
21 of your brief, one paragraph from that bulletin, which I
22 don't think I need read, but I observe that the following
23 paragraph reads this way: "If, in calculating the cost of
24 an inventory at any time, a method of cost determination
25 has been used which results in a figure for cost which
26 differs materially from the figure which would result if
27 the then recent cost had been used (as frequently happens
28 when the LIFO method is used) the method followed in deter-
29 mining cost should be disclosed on the financial statements."

30 Would you agree with that statement?

1 MR. SKINNER: Yes, we would agree with that. I
2 may say we do, in the company's own balance sheets, we do
3 use the LIFO method.

4 MR. STEWART: Thinking in this regard, not neces-
5 sarily of Anaconda, but of companies generally which may
6 be attracted by the LIFO method, do you consider that they
7 are attracted to it basically because they have costs
8 which are appropriately matched against revenues or do
9 they take into account the possibility that this particular
10 method will provide them with some kind of protection or
11 hedge against inflation?

12 MR. SKINNER: That is a question which is
13 dangerous to answer, using the term "that is generally
14 approached in this way." I have said that there is general
2 15 agreement that in the particular circumstances of the
16 Anaconda company, in the way it does its business, the
17 LIFO method is appropriate. Some accountants certainly
18 would go beyond that and feel that because of inflation or
19 the possibility of inflation it is desirable to use a LIFO
20 method which prevents showing profit which may not be
21 realized in a cash form so long as the business itself is
22 continuing.

23 I would say that that view is quite widely
24 accepted in the United States. It has been urged here but
25 not, perhaps, to the same degree. The interest very
26 recently along these lines seems to be more from the stand-
27 point of taxes that are computed in the export markets, the
28 feeling being that perhaps they are bearing a heavier tax
29 burden than some other competitors in other countries and
30 that this method of income determination, if there was

1 continuing inflation, would have the same advantages for
2 them as for their competitors.

3 MR. STEWART: I observe, at the bottom of page
4 19, Mr. Skinner, you put it very succinctly this way.
5 You say: "The LIFO method of inventory accounting results
6 in charging latest cost against sales revenues and, there-
7 fore, clearly reflects our method of doing business and
8 results in a proper determination of our income."

9 Now, I put this to you: may the results of the
10 LIFO method not be that after a period, inventories may be
11 taken into account for this purpose at a figure which is
12 far removed from current replacement costs?

13 MR. SKINNER: Yes. That is obviously true if
14 the price of the commodities in the inventory have
15 increased substantially over the years.

16 MR. STEWART: You have been somewhat critical of
17 the decision of the Privy Council in the Anaconda case
18 decided in 1955 and I would like, in that connection, to
19 refer to certain sections of the Reasons for Judgment in
20 that case with which, I am sure, you are familiar, because
21 I would like to get your comments on what they said and I
22 will start with a paragraph which begins towards the end
23 of the judgment. I think it's the fifth last paragraph.

24 The statement that is made there is this: "Their
25 Lordships do not question that the LIFO method, or some
26 variant of it, may be appropriate for the corporate
27 purposes of a trading company. Businessmen and their
28 accountant advisors must have in mind not only the fiscal
29 year with which alone the Minister is concerned. It may
30 well be prudent for them to carry in their books stock

1 valued at a figure which represents neither market value
2 nor its actual cost but the lower cost at which similar
3 stock was bought long ago. A hidden reserve is thus created
4 which may be of use in future years. But the Income Tax
5 Act is not in the year 1947 concerned with the years 1948
6 or 1949: by that time the company may have gone out of
7 existence and its assets been distributed."

8 Then, in the next paragraph, about halfway
9 through, they say this: "Again, though their Lordships
10 recognize that this appeal must be determined by reference
11 to Canadian law, they notice that in the U.S.A. in a case
12 in which the so-called 'base stock' method was under discus-
13 sion, Mr. Justice Brandeis used words which are apt to
14 describe the LIFO method. 'In years of rising prices the
15 base stock method causes an understatement of income for
16 it disregards the gains actually realized through liquida-
17 tion of low-price stock on a high-price market. This
18 method may, like many reserves which businessmen set up
19 in their books for their own purposes, serve to equalize
20 the results of operations during a series of years.'"

21 Then they refer to the American case in which
22 that statement was made, and they go on: "In this passage
23 the distinction is nicely made between what is permitted
24 for tax purposes and what a prudent businessman may think
25 fit to do."

26 And then, if I go back to the second paragraph
27 preceding the first one I have read from, in the closing
28 portion of the paragraph I find these three sentences:
29 "An expert witness called for the company observed that
30 he did not imagine any of the company's witnesses would

1 claim for a minute that there was a quantity of metal then
2 on hand acquired in the year 1936 equal to the quantity
3 which was valued at the then cost. Yet there was no less
4 than six-and-a-half million pounds of copper in the 1947
5 closing inventory to which the 1936 cost was ascribed.
6 He might have added that year by year the same thing
7 would happen so long as the business went on and existing
8 stocks were not seriously diminished in 1987 as in 1947
9 the closing inventory would carry stock to which 1936
10 costs would be ascribed. This illustrates clearly the
11 LIFO method and shows how far it has travelled from the
12 conception which has prevailed in the assessment of income
13 for tax purposes."

14 I read those, Mr. Skinner, simply to support my
15 suggestion to you that the Privy Council, rightly or
16 wrongly, was concerned with the fact that under the LIFO
17 method, as they say, the 1936 costs might still be in
18 effect fifty years later in the costing of inventory
19 for tax purposes. The court did not suggest that this
20 was wrong for corporate purposes, but they were concerned
21 whether it was appropriate for tax purposes where you are
22 concerned not with the fortunes of the company over a
23 period of years, but with income which, rightly or wrongly
24 again, is calculated on an annual basis.

25 I wondered if, perhaps, you could comment on that
26 situation.

27 MR. SKINNER: I think I might start by reference
28 to the last sentence in the paragraph that you read, which
29 was to the effect, in the Privy Council judgment, that this
30 illustrates clearly the LIFO method and shows how far it

1 has travelled from the conception which has prevailed in
2 the assessment of income for tax purposes.

3 One of our fundamental points put before this
4 Commission is that it is not at all clear what the concep-
5 tion of income which has prevailed for tax purposes is.

EMT/ss 1 In this particular judgment we find the
2 passage not very far from the end in which it is stated
3 in the second place the account of profit and loss to
4 be made up for the ascertaining of that difference must
5 be framed consistently with the ordinary principles of
6 commercial accounting so far as applicable, and in
7 conformity with the rules of the Income Tax Act, or of
8 that Act as modified by provisions in schedules of the
9 Acts regulating excess profit duty as the case may be.

10 For example, ordinary principles of commercial
11 accounting require that in the profit and loss account
12 of merchants' or manufacturers' business, the values of
13 the stock in trade at the beginning and at the end of
14 the period covered by the account should be indicated at
15 cost or market price whichever is lower. Although there
16 is nothing about this in the taxing statutes.

17 In other words, the Privy Council went this
18 far: They say there is nothing in the taxing statutes
19 which says how inventory shall be valued, but the ordinary
20 commercial principles of accounting state that the
21 inventory shall be brought in at cost or market, whichever
22 is lower.

2 23 In this particular case, however, it was our
24 contention that the ordinary commercial principles of
25 accounting held that the cost which was relevant for this
26 company was the cost which was determined under the LIFO
27 method of accounting. It was this that the initial
28 committee of the Privy Council did not agree with. They
29 went part way in saying income should be determined in
30 accordance with commercial accounting principles, and then

1 having arrived at the phrase "cost or market", they said
2 we then must find out what the actual cost of the actual
3 goods in inventory is. Whatever the state of the law
4 may be on this point, it is our contention that you do
5 not arrive at a consistent and a useful definition of
6 income by taking a phrase and, shall we say, determine
7 it this way, and then take a word and define that
8 word and apply it in a rather mechanical way.

9 Our contention is that for purposes of income
10 taxation one should look at the result rather than at the
11 specific word in the process of arriving at the result
12 in determination whether the result is a proper definition
13 of income for taxation purposes. We feel that one of
14 the problems with the Canadian Income Tax Act is that
15 it is not clear what we are trying to get at, what
16 income we are trying to tax. It is not defined. We
17 start with an undefined phrase that income is profits.
18 We look to commercial practices, what is profits, but
19 then in particular cases, and far too many of them in our
20 opinion, we depart from business practice in the
21 determination of profits and state this is not satisfactory
22 for taxation purposes. Nowhere is it stated in any ----
23 to my knowledge nowhere is it stated in any comprehensive
24 way what is income, what is the definition of income
25 which is to govern for taxation purposes, and we think
26 that this is a matter which falls squarely within the
27 boundaries of this Commission's terms of reference.

28 Our own view on the subject is that the funda-
29 mental definition of income subject to tax must conform
30 to the ordinary business definition of income as determined

1 by recognized accounting methods. We think, however, that
2 you must for purposes of certainty in the Act put in
3 specific rules such as is done with the capital cost
4 allowance regulations, but that these rules should be
5 framed in conformity with the principles which are
6 arrived at in the ordinary commercial accountancy method.

7 MR. STEWART: I take it it is also part of your
8 argument that the courts can be circumscribed by decisions
9 which were made many years ago, and that whereas I think
10 may be applicable here, a new accounting concept or
11 principle develops because I believe LIFO is a concept
12 of quite recent origin. One could hardly expect the
13 Courts to apply successful cases which were decided at
14 an earlier stage to the new situation which arises
15 through the development of these new principles.

16 MR. SKINNER: Yes, that would be precisely
17 our view.

18 MR. STEWART: Well now, I think I should also
19 ask you to comment on some findings which were made by
20 the United Kingdom Royal Commission on the Taxation of
21 Profits and Income in 1955, because they were not subject
22 to the same disadvantage as the Privy Council in that they
23 did not have to take into account earlier judicial
24 decisions.

25 It seems to me on reading a portion of their
26 report which deals with inventory valuation, that they,
27 too, were concerned about the fact that under LIFO
28 inventories may be taken into account at prices which
29 were established long ago. I think I might refer you in
30 this connection to page 145 of their report and to numbered

1 paragraph 473 where they say that they do not think that
2 a universal adherence to FIFO should be required, but they
3 go on and I quote:

4 "We think that an adequate control is
5 secured for this purpose if effect is given to
6 the principle that despite rising prices there
7 is no permanent exclusion from taxable income
8 of an element to reflect the fall in the
9 purchasing power of money."

10 Now, that is the end of the quotation I propose
11 to make from that particular paragraph, but you will
12 remember that the Commissioners went on to set out in
13 Appendix 2 to their report their suggestions as to
14 appropriate methods of valuing stock in trade. That
15 appendix starts at page 477 of their report, and in that
16 appendix, in paragraph 2 they proceed to set out what
17 methods of valuation they recommend. When they deal with
18 cost they suggest that the taxpayer should have a number
19 of alternatives. I think I might mention them.

20 The first was actual cost of identifiable
21 parcels; the second was FIFO; the third was moving average;
22 the fourth was the standard cost basis and the fifth
23 was what I think we would call the retail method. I
24 observe in passing that they did not include there the
25 LIFO method. Then they have a couple of paragraphs dealing
26 with market and the lowering cost of the market and then
27 they make a suggestion in Clause 4 the first part of
28 which I think I might read:

29 "Where base or standard quantities of
30 raw materials, work in progress or finished goods

1 are proved to the satisfaction of the Board of
2 Inland Revenue that the right of appeal on the
3 part of the taxpayer to the Board of Referees
4 to be essential to the proper function of a
5 business, those quantities of the same or similar
6 goods may be valued on the base stock principle
7 adapted so that any net additions to the
8 quantity of stock held are brought into the
9 stock valuation at the average cost of the
10 additions."

11 Then they go on and deal with the treatment of
12 fluctuations and the size of the inventory, but that I
13 think is essentially the base stock or modified base
14 stock system. Now, those I think are the only methods
15 recommended by that Commission, and again I am bringing
16 this out, because it does seem to me, as I say, that they
17 were concerned about the propriety of the LIFO method,
18 partly at any rate because of the fact that under that
19 method inventory is continued to be taken into account
20 at a cost which was determined many years before the year
21 presently being taken into account for tax purposes, and
22 also I mention it partly because, as I said, that Commission
23 was not circumscribed by earlier court decisions.

24 In actual fact as you will recall the Anaconda
25 litigation, when this report came out, had just reached
26 the Exchequer Court of Canada stage and was not --- well,
27 if the appeal from the Exchequer Court had actually been
28 argued, the Supreme Court decision had not come out and
29 certainly it had not got to the Privy Council.

30 I wonder if you would comment further on the

1 appropriateness of LIFO for tax purposes having regard
2 to what the U.K. Commission said?

3 MR. SKINNER: First as to your point that the
4 U.K. Commission was concerned about the danger of a
5 permanent exclusion from taxable income, my recollection
6 was that they felt, as they said in this sentence in
7 paragraph 473, that adequate control is secured if
8 effect is given to the principle that despite rising
9 prices there is no exclusion from taxable income of an
10 element to reflect the fall in purchasing power of money.
11 They then went on to say that paragraphs 8, 9, 10 and 11
12 of the schemes for inventory valuation which they
13 proposed were designed to meet the contingency, to meet
14 this contingency to, and I quote "generally speaking they
15 secure that stock provisions no longer required because
16 of this contingency should be written back to taxable
17 profit".

18 MR. STEWART: Weren't the contingencies they
19 were concerned with there, or at any rate the ones that
20 they mention, realizations of stock or changes in the
21 nature of stock owing to alterations in traders' business
22 or cessations of business owing to change of ownership?

23 MR. SKINNER: As I read that, they were concerned
24 and perhaps we have put a different interpretation on it,
25 they were concerned that while income might be properly
26 stated year by year on the LIFO or the base stock method,
27 if ever there was a cessation of business and a realization
28 of the stock, that this should be brought into tax.
29 Of course, this would automatically follow under the
30 LIFO method or the base stock method unless there were

1 special provisions --- I beg your pardon, this might not
2 also follow, because it might be a gain on realization
3 of a business as a whole. But in any event they recommended
4 safeguards against the possibility of tax being avoided
5 upon ultimate realization, and I think that would be
6 reasonable in any scheme here as well.

C/PB/dpw

1 I might point out, with the method which was
2 recommended by the Radcliffe Committee, and to which they
3 didn't give the name of LIFO, it was more or less a process
4 of progressive averaging costs of the basestock inventory
5 as it was built up. That method, which is precisely the
6 one we have suggested in Appendix A as being a convenient
7 way to meet the problem that we have talked about under
8 the theoretical term of LIFO.

9 MR. STEWART: I suppose the results may be some-
10 what similar, but I suggest to you if the Royal Commission
11 had intended to endorse LIFO it would have been very simple
12 indeed, if they had, to include it in its appendix after
13 it approved the first-in, first-out method.

14 MR. SKINNER: Well, they just actually -in this
15 recommendation they didn't give the name of the method they
16 proposed. I suppose they would say it wasn't LIFO because
17 it differed in mechanics from the traditional LIFO. They
18 point out it avoids the necessity of identifying any reduc-
19 tion with a particular layer as stock is required under the
20 U.S.A. system. I suppose this is how you get away from the
21 problem that you have old goods in inventory, the problem
22 you have been suggesting we are particularly concerned with.
23 This would be acceptable to this company; in fact, it is
24 what it has recommended as an administrative vehicle for
25 achieving the same goal of reasonable income determination.

26 MR. STEWART: Well then, do I understand that you
27 are indicating now that you would be happy with the equiva-
28 lent or substantial equivalent of that?

29 MR. SKINNER: The method recommended by the
30 Radcliffe Committee, yes.

2 1 MR. STEWART: Would it be the case that the
3 essential difference between the base stock method and the
4 LIFO method is that under base stock your valuation of
5 your basic industry may be reached quite arbitrarily,
6 quite independently of actual cost of that inventory,
7 whereas under the LIFO method your opening inventory is
8 costed on a historical cost basis?

9 MR. SKINNER: That is right. As I understand
10 it the base stock method might start with completely
11 artificial prices.

12 THE CHAIRMAN: Mr. Stewart, before you move on
13 to another subject, there is a question I would like to
14 ask with regard to this distinction between the use of LIFO
15 as the best determination of income and as an inflation
16 measure, which I think was what you had in mind a minute
17 ago.

18 MR. STEWART: Yes, I was getting to that.

19 THE CHAIRMAN: You carry on.

20 MR. STEWART: No, please go ahead.

21 THE CHAIRMAN: It seems to me one must, in
22 approaching this subject, think of it under two heads.
23 Frankly, I had no difficulty with LIFO whatsoever as the
24 best method for determining income under certain circum-
25 stances as set by you under the heading "Classical Tests,"
26 I think. As I suppose influenced the Radcliffe Commission
27 it became used as a protection against anti-inflationary
28 costs, and of course, the whole base of its use in the
29 States was greatly broadened. It became apparent to all
30 concerned how extremely useful it would be in this connec-
tion. What, therefore, concerns me, if one were restricted

3 1 to the classic test very few taxpayers in the country
2 would be able to take advantage of it. Would the rest
3 of the community not have a just complaint when in infla-
4 tionary circumstances they would not receive the same
5 protection as those who were able to qualify because of
6 the peculiar circumstances of their business or, stated
7 otherwise, wouldn't those who are able to qualify not
8 only receive the benefit of the best accounting as is
9 their due, but they would also receive some protection
10 against inflation whereas others wouldn't; is there any
11 way of avoiding that?

12 MR. SKINNER: The question is one, really,
13 whether the commodities which are in the inventory of
14 those companies who qualify are commodities which will
15 vary with the general price level and be subject to infla-
16 tionary trend. It is probably impossible to make any
17 completely positive statement in this regard, but certainly
18 to take the case of the Anaconda company and its principal
19 raw material, copper, the price of this commodity has not
20 affected the general price trend, at least for a matter of
21 the ten years I looked back at, and probably for a few
22 years before that.

23 There was an increase, certainly, between the
24 period of the depth of the depression and the immediate
25 post-war period in view of the pent-up supply situation at
26 that time. This was, it seemed to me, not so much evidence
27 of general inflationary trend, although it affected all
28 commodities, but rather the peculiar post-war conditions.

29 One that was observed, the price of copper,
30 although fluctuating widely, has never shown a long-term

4 1 upward trend.

2 I was just looking last night at the actual
3 result, and I find if we take the ten years, the most
4 recent ten years which are covered in our submission,
5 income determined under the LIFO method would actually
6 have been higher than income determined under the FIFO
7 method. In any particular year there was a tremendous
8 difference. There was one when FIFO income was 50% of
9 the LIFO income and the two following years when the FIFO
10 income was one-third and one-quarter of the LIFO income.
11 Over the whole period, as I say, it was practically on an
12 even keel. The indication is that this, in other words,
13 this particular commodity, with which this company deals,
14 is hardly responsive to the general inflationary trend.
15 It has a price behaviour all its own. I think you might
16 generate that, probably, in thinking of commodities
17 which tend to be quoted, primarily, commodities which tend
18 to be quoted on the world commodity market.

19 I thought it was interesting when we were looking
20 at the taxation system of other countries to notice, for
21 example, in France that the base stock method was returned
22 there as being particularly adaptable to these listed
23 commodities which are either bought in the world market
24 or local raw materials, the prices of which are closely
25 related to world market fluctuations as listed in Appendix
26 B. You will notice that copper is among them. I don't
27 know if that completely answers your question. This is our
28 view on these particular commodities.

29 THE CHAIRMAN: It probably goes as far as I can
30 expect you to. I have observed in the Privy Council

5 1 judgment they speak of 1936 costs remaining in the inven-
2 tory. If those costs are still there, a figure that is a
3 little over 25 years ago, I would have thought that the
4 change of the value wouldn't have been given effect to
5 if 1936 costs still remain. Well, there may be an answer
6 to that. Perhaps it is an index for change of value or
7 something like that. Perhaps one could say there shouldn't
8 be inflation; that is the Government's responsibility.
9 Thank you.

10 MR. STEWART: Mr. Skinner, could we get your
11 reaction to this question: is it, in fact, unreasonable, in
12 a period of rising prices, to require a taxpayer to bring
13 into account as a FIFO system does these inventory profits
14 if those profits have not, in fact, been realized, notwith-
15 standing that if prices decline there will be a correspon-
16 ding loss?

17 MR. SKINNER: I don't really think they have been
18 realized in any realistic sense. That line of thinking
19 begins on visualizing business as something you can get
20 into and get out of quickly; if the value of your stock
21 increases in monetary terms you can easily realize that
22 and get out of the business and go on and do something
23 else. I don't think that is particularly relevant to
24 modern economy. The majority of business goes in and is
25 in to stay. I don't, therefore, think you can get too far
26 away from the concept of a system of profits taken out of
27 the business.

28 MR. STEWART: Looking at pages 21 and 22 of
29 your submission you have dealt with the ten-year period
30 ending with 1962 for your particular company. I quite

6 1 appreciate that what concerns you about the FIFO method
2 is the fluctuation in profits which occurs as a result of
3 fluctuation in raw material prices, and these fluctuations
4 are set out for the years 1954 to 1958 at the top of page
5 22. Those are only five of the years of the ten-year
6 period. I observe from page 21 that in the years 1959 to
7 1962 there is not too tremendous a variation in the
8 spreads as between the LIFO assumption on the one hand
9 and the FIFO assumption on the other. I have been
10 wondering whether we should infer from that that during
11 those four years the price of copper was fairly constant
12 or whether the narrowness of the spreads is to be explained
13 by some other factor.

14 MR. SKINNER: This is the last four-year period?

15 MR. STEWART: Yes.

16 MR. SKINNER: This is explained by the fairly
17 steady price pattern of copper in that period, yes.

18 MR. STEWART: As a matter of interest, if we
19 are dealing with world prices here or with prices which
20 are a matter of public knowledge, what is the approximate
21 price of copper at the present time? Let me emphasize I
22 don't want the answer to this question if it is not a
23 matter of public knowledge.

24 MR. SKINNER: Thirty-one and one-half cents per
25 pound Canadian.

26 MR. STEWART: Again, so that we can indicate the
27 nature of the problem we are concerned with here, the
28 Privy Council decision referred to the price which your
29 company was taking into account for the 1947 taxation year,
30 and referred to the fact that the price of copper in 1936

7 1 was $7\frac{1}{2}$ cents per pound.

2 MR. SKINNER: That is right.

3 MR. STEWART: Well now, I go on to that illustra-
4 tion that you give on pages 24 and 25 of your submission
5 in which you compare the results of LIFO and FIFO on
6 certain assumptions. I observe from that, in this hypo-
7 thetical case, your opening inventory and your closing
8 inventory would appear to be the same, and that your
9 opening price and your closing price would appear to be
10 the same.

11 Now, this is a hypothetical question, but I am
12 sure you will have considered it. Suppose, in this illus-
13 tration of yours, or suppose that, in fact, the prices in
14 the last year with which we are concerned fell below the
15 opening price, I take it that the effect would be that
16 profit computed on the LIFO basis would exceed that computed
17 on the FIFO basis. What do you suggest should take place
18 in such circumstances? Do you consider more particularly
19 that if a person is permitted to use LIFO for tax purposes
20 he must adhere to cost or would you continue the option of
21 lowering cost of market?

22

23

24

25

26

27

28

29

30

MR/ss 1 MR. SKINNER: In the United States, of course,
2 I believe I am correct in this, they are limited to cost
3 for tax purposes, if they adopt LIFO.
4 I have never been able to see this in my own
5 thinking on the matter. I have always thought of FIFO
6 and LIFO as being two independent means of arriving at costs
7 each being justified in their own particular circumstances,
8 and that if the lower cost or market option would be
9 applicable to one, it should be applicable to the other.
10 MR. STEWART: I observe at the end of Appendix
11 C to your submission you do make a suggestion in that
12 regard.
13 MR. SKINNER: That is right.
14 MR. STEWART: You suggest that if LIFO costs
15 could be reduced, that if the market subsequently
16 increased, then costs should be taken into the increase as
17 well. The taxpayer would gradually go back to his
18 original cost basis.
19 MR. SKINNER: That is right. I think that would
20 be necessary.
21 THE CHAIRMAN: Not necessarily gradually either.
22 MR. SKINNER: No, probably would go back.
23 THE CHAIRMAN: If the market recovered the next
24 year the extent it had climbed the year before, it would
25 go back the next year.
26 MR. STEWART: Quite so. At the bottom of page
27 27, Mr. Skinner, and at the top of page 28, you refer to
28 submissions to the Department of Finance which were made
29 by a group of lawyers and accountants. Might I ask if
30 the Anaconda Company was represented in that group?

1 MR. SKINNER: Yes, it was, sir. Rather I should
2 say its solicitors and auditors who act for the Anaconda
3 Company were in that group. The company itself was not.

4 MR. STEWART: Appendix A, in fact I take it
5 from what you have said earlier from the point of view
6 of the Anaconda Company, would be a satisfactory change in
7 the income tax regulations?

8 MR. SKINNER: Yes, sir.

9 THE CHAIRMAN: Might I just add one word there:
10 Would that be satisfactory irrespective of the fact it
11 provides for no reduction to market? At least I don't
12 think it provides for a reduction to market.

13 MR. SKINNER: That is right, it doesn't. I
14 think all I can say it would be less satisfactory, but
15 perhaps something to --- just satisfactory.

16 MR. STEWART: I am not quite clear whether you
17 are saying that you would prefer that the regulation be
18 provided for reduction to market?

19 MR. SKINNER: Yes. I think that would be the
20 preference of any taxpayer really.

21 MR. STEWART: Commencing on page 28, you deal
22 with the proposition the LIFO method might be made avail-
23 able to taxpayers generally and I would ask you there, at
24 the outset, the same question that I asked when we began
25 this morning, namely, in your opinion would there be
26 general agreement in the accounting profession as to the
27 suitability of this extension?

28 MR. SKINNER: I find it hard to answer that,
29 because I don't know of any poll that has ever been taken.
30 I would think there would certainly be some people who

1 might disagree.

2 MR. STEWART: I think that is a fair answer.

3 May I ask you this: Are we to take it that you are in
4 fact recommending the extension to taxpayers generally?

5 MR. SKINNER: Well, I think the position of
6 this company is that it is not taking that position.
7 It feels this is a matter of almost an economic policy.
8 These are not the fields which it really explored.

9 THE CHAIRMAN: To make quite sure we all under-
10 stand the question, Mr. Stewart, when you say generally,
11 you are using it as opposed to the restriction which we
12 normally say is subject to the classical test?

13 MR. STEWART: That is correct. As I understand
14 this brief, in the section commencing on page 16, and
15 going on to page 28, the Anaconda Company is dealing with
16 the application of LIFO to a relatively small group of
17 which it would be one. Is that correct, Mr. Skinner?

18 MR. SKINNER: That is correct.

19 MR. STEWART: Whereas commencing on page 28 the
20 submission goes on to deal with the pros and cons of the
21 extension of the system, or the method to taxpayers
22 generally. That is correct?

23 MR. SKINNER: Yes.

24 MR. STEWART: I was struck by one statement, Mr.
25 Skinner, page 30 and it may be that this is just a matter
26 of semantics, but in the last sentence of paragraph 46 you
27 appear to suggest that for certain taxpayers LIFO is the
28 only measure of income. Do you mean that, or do you mean
29 that LIFO is the method which will most fairly reflect
30 that income?

1 MR. SKINNER: I think that would be a better
2 way of putting it. This is the best measure of income,
3 or it most fairly reflects income.

4 MR. STEWART: I think that is perhaps quibbling
5 on words. In the following paragraph, paragraph 47, you
6 deal with certain reasons for the general extension of
7 LIFO to taxpayers generally and you suggest, among other
8 things, that LIFO if it were so extended might have a
9 smoothing effect on the economy.

10 Now, I would like, in that connection, to
11 refer you again to certain extracts from the Radcliffe
12 Report of 1955, and I am going to ask you to comment on
13 these extracts, if you would care to.

14 I will read, first of all, from page 143,
15 numbered paragraph 468:

16 "It would be an incomplete survey that
17 ignored the general economic significance of
18 FIFO in contrast with other methods of computing
19 profits. Its effect is to impose a relatively
20 higher tax charge at a time of rising prices,
21 and a relatively lower charge when prices fall:
22 This is its main importance since stock prices
23 being likely to fall as well as rise over a
24 period, it is not easy to make valid generaliza-
25 tions as to which of the possible methods is
26 the most reliable revenue producer. Associated
27 with rising prices at home..." and I think
28 they undoubtedly mean domestic..."FIFO has attractions
29 in its tendency to repress business activity:
30 With falling prices its attraction is its

1 opposite tendency. Associated with rising
2 external prices, its economic value must be
3 more debatable, for while it tends to intensify
4 that shortage of liquid funds which was a
5 recent phenomenon, its influence can be
6 beneficial in relieving an exceptional strain on
7 the country's balance of payments."

8 That is the end of paragraph 468. I think I might also read
9 paragraph 470:

10 "Our conclusion is that it would not be
11 advantageous for the tax system to contain a
12 requirement that all businesses must use a
13 single prescribed method in valuing their stock
14 in trade for the purpose of computing taxable
15 profits. That makes it irrelevant to consider
16 further the question whether, if there were to be a
17 single method, FIFO would be the most suitable
18 one."

19 Then I draw your attention to this
20 sentence in particular: "No doubt it..." meaning FIFO
21 "...has solid advantages from the general economic stand-
22 point but the gist of what we have been trying to stress
23 is that businesses are so various in nature that what is
24 the most suitable method to reflect the true annual profits
25 of one cannot be expected to be the most suitable method
26 for every other."

27 Now, I have read those paragraphs, because it
28 seemed to me that in 1955, at any rate, it was considered
29 from an economic point of view that FIFO had certain
30 advantages. Your submission here stresses the possible

1 economic advantages of LIFO. Now, are these two documents
2 consistent or inconsistent in your opinion?

3 MR. SKINNER: It seems that there is an inconsis-
4 tency. One would hardly claim to be a professional
5 economist. As I read the Radcliffe Committee Report it
6 seems to rest on the proposition that if you keep
7 businesses short of cash in a period of rising business
8 activity, this will tend to restrain any excesses in
9 the boom period.

10 To what extent this is true, I don't know. I
11 would think merely from personal observation that business
12 confidence has a great deal more to do with the decisions
13 in general of improving the economy than the particular
14 cash situation. Undoubtedly it is important.

15 I might just point out the sentence in the
16 Radcliffe Committee Report following on the one you read
17 which says that: "On the other hand we must characterize
18 as largely theoretical these generalizations about the
19 relevance of taxation policy or accounting technique
20 to the actual course of action of businessmen and a
21 great deal of allowance must be made for the fact that
22 decisions have to be taken long before their tax
23 consequences can be ascertained."

24 I don't think we can stress as being
25 an earth-shaking conclusion that the use of LIFO generally
26 has a stabilizing effect. I think we would have to state
27 that such conclusions, with any degree of assurance,
28 would require a lot more data and study than we certainly
29 had available to us.

30 THE CHAIRMAN: Couldn't you make your point,

1 Mr. Skinner, by stating the best method of determining
2 income surely would produce the best result when the
3 economy is either going down or coming up?

4 MR. SKINNER: I certainly think that that is
5 a very valid point to make, Mr. Chairman.

6 MR. STEWART: Mr. Chairman, that concludes the
7 questions which I had contemplated asking on LIFO itself,
8 and if you agree, I might use the limited time remaining
9 to deal with some of the earlier parts of the brief.

10 THE CHAIRMAN: Before you get off LIFO, I have
11 got one question which I wrote down right at the
12 beginning. I think it is important in this matter. We
13 do know that the use of LIFO would be quite restricted
14 by virtue of the three tests which are generally laid
15 down for LIFO. It is very hard to know just how restrictive
16 this would be. In my own practice as an accountant, I
17 have not seen many cases which required LIFO and which
18 would be able to meet the test.

19 Mr. Skinner; have you or your clients ever, at
20 any time, tried to take a census of the eligible people
21 for LIFO or could you as an accountant form any opinion as
22 to what the numbers would be?

23 MR. SKINNER: Well, we attempted in this group
24 which we mentioned here to put forward the proposal some
25 years ago, or we made representations to the Department of
26 Finance to ascertain how many taxpayers might be affected
27 and we had to conclude that it was very difficult to make
28 any statement which was more precise than there did not
29 seem there would be many.

30 We could think of industries which seemed to be

1 most probable, such as the non-ferrous and metal processors
2 generally. I had some notes here. Possibly the steel
3 companies. The sugar refinery industry, probably. Possibly,
4 but not certainly the oil refineries. When you got into
5 individual cases, it was very difficult, as you say, to
6 find more than one or two that would appear to be
7 applicable.

8 THE CHAIRMAN: Yes. It was my own impression
9 that the number would be quite small, but I never devised
10 any means of getting at it, and it may be that the staff
11 of this Commission should do a little work on this and if
12 so, they might address themselves to yourself or your
13 client as being the people in Canada who probably have
14 given more consideration to this matter than anybody
15 else.

16 If you could be of any help in that way, we
17 would appreciate it.

18

T/dpw 1 MR. SKINNER: We would be delighted to be of any
2 help that we can.

3 THE CHAIRMAN: Is there anything else on LIFO?

4 COMMISSIONER GRANT: Just one question which I
5 would like to ask. I am looking at the hypothetical
6 illustration of results of using LIFO as shown on Schedule
7 B, profit and loss, shown following page 24. Actually,
8 it is page 25. This is a hypothetical profit and loss
9 set-up, Mr. Skinner. Do the figures used there ~~have any~~
10 bearing on the proportion or number of times ~~which your~~
11 inventory is turned over?

12 MR. SKINNER: Yes, this would ~~be~~ reasonably
13 typical.

14 COMMISSIONER GRANT: So that your inventory is
15 turned over roughly eight times a year?

16 MR. SKINNER: No. In our illustration the
17 inventory was around ten million, and the sales wanted
18 from thirty-four million to thirty-nine million. These
19 are in pounds. This is a turnover of about between three
20 and four times.

21 COMMISSIONER GRANT: I am looking at your dollar
22 value.

23 MR. SKINNER: I think you would get a more precise
24 definition of turnover if you look at volume, physical
25 volumes. Ten million pounds of inventory.

26 COMMISSIONER GRANT: So that your inventory,
27 then, is turned over on a tonnage or poundage basis. How
28 many times?

29 MR. SKINNER: Between three and four times. In
30 other words, we have three to four months' supply on hand

2 1 in raw material and in process, various stages of produc-
2 tion.

3 COMMISSIONER GRANT: So that the relatively
4 narrow turnover of inventory would have a bearing on your
5 leaning towards LIFO?

6 MR. SKINNER: Yes, but to put it another way,
7 the relatively high investment required in inventory makes
8 it more important for this company to, in effect, hedge
9 its holding by matching sales prices with raw material
10 prices.

11 COMMISSIONER GRANT: The large inventory which
12 you consider necessary to keep on hand ---

13 MR. SKINNER: That is correct.

14 COMMISSIONER GRANT: Has that any bearing in your
15 particular industry to strike situations which, from time
16 to time, do develop outside the country?

17 MR. SKINNER: I am informed it does not have
18 any particular bearing.

19 COMMISSIONER GRANT: I am just trying to relate
20 your particular industry to other industries, which might
21 not be confronted with such a situation, but which would
22 be in similar manufacturing as you are.

23 MR. SKINNER: I would suspect if other industries
24 have a similar cycle of manufacture, they are going to have
25 a similar turnover situation.

26 COMMISSIONER GRANT: Except that if their raw
27 materials are available to them, say, completely under
28 their own ownership and management and so on, they might
29 not consider it necessary to carry such a large inventory.

30 MR. SKINNER: I would doubt that, because

3 1 strikes can occur internally as well as externally if that
2 were the fact that was under consideration.

3 MR. STEWART: Mr. Skinner, time will permit me
4 to ask only a few general questions on the earlier part of
5 your brief. The first of them is this: you are advocating
6 the elimination of the tax on corporate income, but I am
7 not entirely clear from your brief as to what you think
8 should happen to that income. Are you suggesting that it
9 should escape tax completely? Are you suggesting that it
10 should escape tax until such time as it is distributed to
11 the shareholders? Are you suggesting the income should be
12 imputed to the shareholders as it is earned, or are you
13 carefully staying away from any of those questions?

14 MR. SKINNER: We are suggesting that the corpora-
15 tion income tax must be largely passed on in prices and in
16 the long run simply on the basis that any individual busi-
17 nessman or group of businessmen, when contemplating an
18 investment in the business project, have an alternative;
19 namely, indirect investment covering bonds or any of the
20 other media of investment. Therefore, they must compare
21 the returns between the two avenues of investment and any-
22 thing which they receive from a corporation will be taxed
23 in their hands just as bond interest would be.

24 Therefore, in making the comparison it is the net
25 they can receive after corporation income tax which will
26 be the relevant factor in deciding whether or not to go
27 ahead with the project.

28 MR. STEWART: May I just interject there? You
29 are referring to an investor. Let us consider the position
30 of the manager of a company. Are you suggesting that when

4 1 he determines prices for his products he treats the corpo-
2 ration income tax, in effect, as an expense?

3 MR. SKINNER: I am suggesting that he, as well
4 as the investor, he as the agent, the investor is looking
5 for a return on capital, and the return that is relevant
6 is the return after taxes. You must take this into account
7 when considering a new project. Now, obviously, once he
8 is committed, the laws of supply and demand are going to
9 take over and quite different decisions will apply in the
10 short run.

11 THE CHAIRMAN: The answer to your question is
12 obviously in the affirmative, but I would have thought
13 Anaconda prices would have been established on the inter-
14 national market rather than domestically, and the change
15 of the Canadian tax rate would therefore not be affected
16 by change in prices, and that it might well be said that
17 in the case of a company trading outside of Canada, or
18 products trading outside of Canada, the prices of them in
19 Canada are determined by international markets and that
20 taxes are more apt to be borne by shareholders. Is that
21 not so?

22 MR. SKINNER: We are not thinking in terms of
23 just Anaconda's position. This is a generalization.

24 THE CHAIRMAN: I was asking you primarily,
25 though, with regard to Anaconda, because of that you have
26 more particular knowledge, or I am assuming that, because
27 you are discussing the affairs of Anaconda.

28 MR. SKINNER: Yes, to the extent that there is
29 this international competition, that would be correct.

30 THE CHAIRMAN: I raise the question because it

4 1 was discussed previously, and I wished to know whether you
2 were in line with statements made previously.

3 MR. SKINNER: I do not think we have additional
4 comment on that. Certainly, the Canadian tax is not going
5 to affect the world price - Canadian tax as such. However,
6 we do have taxes in other countries as well, and to some
7 extent there is a similarity of pattern.

8 MR. STEWART: I am afraid I interrupted you. I
9 think you were going to deal with my earlier question which
10 was, in effect; if we eliminate the corporate income tax,
11 what do you suggest the tax treatment, if any, should be
12 on corporate income?

13 MR. SKINNER: Yes. I was coming rather the long
14 way round to answer your question.

15 MR. STEWART: Please go in your own way.

16 MR. SKINNER: Well, what I was getting at is
17 that it is relevant where the burden of taxation lies in
18 answering that question. If it is correct that the taxa-
19 tion, corporate taxation, is passed on in terms of prices,
20 then presumably, again over a period, prices would adjust
21 themselves to an elimination of corporation income tax.
22 That is, the prices which the businessmen would charge
23 although, of course, you would have to put other taxes on
24 probably to replace that loss of revenue, other forms of
25 taxation.

26 Therefore, what I am really saying is that the
27 situation is not much different with or without the corpo-
28 rate income tax. You would still have the essential tax
29 which would be borne by the shareholders, the tax on income
30 received by them, and you would still have the question of

5 1 undistributed profits to deal with, but I think you have
2 that question now.

3 MR. STEWART: Well, I wish we had an opportunity
4 of pursuing that a little further, but I think I would like
5 you, if you do not mind, to go on to another part of your
6 brief. I was not quite clear whether you are suggesting
7 in this brief that in our income tax legislation in this
8 country we should attempt some exact and detailed definition
9 of income.

10 MR. SKINNER: We are suggesting that the defini-
11 tion of income almost inevitably should run in step with
12 commercial accounting practice, but we go beyond that to
13 say, for reasons of certainty, and for reasons of admini-
14 strative convenience, it is desirable to have specific
15 sections spelled out which are in conformity with the
16 spirit and intent and philosophy of commercial practice
17 in determination of profits.

18 Now, this, it seems to me, is just expressing a
19 perfect thing. It is not as difficult a job as it might
20 be made out to be. It does depend on clearing away a lot
21 of the relics of the past both from accounting and from
22 legal precedent.

23 MR. STEWART: Then, are you suggesting that the
24 principle should be embodied in the legislation specifi-
25 cally that business income be determined for tax purposes
26 in accordance with accepted accounting principles and
27 practices, subject always to express provisions of the Act?

28 MR. SKINNER: Well, as we have pointed out in
29 here, subject to express provisions of the Act almost
30 tends to become of prime importance.

6 1 MR. STEWART: You have just fairly conceded, I

2 think, there would have to be some express provisions

3 dealing with such matters as depreciation.

4 MR. SKINNER: Yes, but what I am saying; it is

5 more important to make conformity with the best commercial

6 practice, in effect, through those specific sections than

7 it is to put in a section which says it is the intent that

8 it shall be determined in accordance with the best account-

9 ting practice, because this would be ineffective unless it

10 is borne out, unless it is supported by a specific section.

11 MR. STEWART: We had before us some weeks ago,

12 on a preliminary appearance, a Committee of Canadian

13 Institute of Chartered Accountants, and if my recollection

14 is correct the Chairman or a member of the Commission asked

15 that Committee a somewhat similar question and the further

16 question to this effect: if there was a general principle,

17 or general provision, in the Act that except as expressly

18 otherwise provided income should be determined according

19 to accepted accounting principles and practices, account-

20 tants would be able to agree on what those principles and

21 practices were.

22 I think it is probably fair to say that the

23 Committee of Accountants which was present on that occasion

24 found, or some of them found, some difficulty in saying

25 that there would be agreement, but I think they went away

26 stating that they would give that particular proposition

27 some further thought and would deal with it in their subse-

28 quent submission to the Commission.

29 I just give you that by way of background because,

30 as you can see, I am wondering what your answer to the

7 1 question would be.

2 MR. SKINNER: Well, my personal view, as I stated,

3 I think there are generally accepted accounting principles.

B/ss 1 There is a diversity in application to meet
2 specific circumstances, and also for change as conditions
3 are changing. The method of accounting followed in 1900
4 is quite different from the methods which are being
5 developed to meet more complex business situations today.

6 MR. STEWART: Isn't it likely there would be
7 differences between income as computed for corporate
8 purposes and income as computed for taxation purposes?
9 I have in mind, for example, the fact our present system
10 of capital cost allowance permits reductions for tax
11 purposes which may not be taken for corporate purposes.
12 There may be expenses which are perfectly proper corporate
13 expenses which may not be treated as reasonable for tax
14 purposes and so on.

15 MR. SKINNER: Well, I think those are two
16 different things.

17 MR. STEWART: I am sure they are.

18 MR. SKINNER: On those specific examples I don't
19 think there should be a difference between an expense
20 which is perfectly legitimate for corporation expense and
21 an expense which is legitimate for taxation purposes. An
22 expense is an expense, and it is a deduction from income,
23 but there may be a difference in the way in which the
24 expense is allowed and for the timing. The tax statute
25 may set rates to make it easy to administer the Act.

26 MR. STEWART: What you are suggesting may come
27 down to this, that expenses which are legitimate for
28 corporate purposes should also be allowed, if Parliament
29 in its wisdom chooses to permit incentive provisions
30 or otherwise additional expenses be allowed for tax

1 purposes you would have no objection?

2 MR. SKINNER: We refer to the matter of incentives
3 here. That gets into the field of policy to which we
4 have some reservations. Our point really is you should
5 arrive at an income figure and then if you wish to go
6 and to give incentives, well that is the prerogative of
7 Parliament. Our view would really be that the provision
8 of incentives in the Income Tax Act is almost riding two
9 horses. You pay a tax on income and you take it away
10 again. This may be the best way of doing it, but ...

11 MR. STEWART: I quite appreciate that in your
12 brief you put the proposition that tax incentives should
13 be used sparingly and when they are used they should be
14 available to everyone and not to limited groups. As a
15 matter of interest, do you consider our present system of
16 capital cost allowance for tax purposes could properly
17 be classified as incentive legislation?

18 MR. SKINNER: There are certain aspects of it
19 which contain incentives. By and large, I would say not
20 tremendously. It may have been when it was introduced in
21 1949. I think the increasing pace of obsolescence in
22 equipment is catching up with the rates which are allowed
23 in the capital cost system. These can vary a great deal
24 from industry to industry and there as an example of what
25 I mentioned that you have one rule which is administratively
26 convenient and providing the shoe doesn't pinch too
27 tightly in any case, it works well.

28 MR. STEWART: I suppose it is arguable that
29 even this general rule can be discriminatory. I suppose
30 we have what might be described as capital intensive and

1 labour intensive industries and the capital cost allowance
2 means much more to the first type than it would to the
3 second.

4 MR. SKINNER: If the capital cost allowance do,
5 in fact, embody an incentive they are discriminatory in
6 that sense, but I really think those responsible for
7 framing the legislation have to look at those problems
8 one by one and they should have always in mind the best
9 accounting practice. There may well be a sort of
10 difficulty as you mentioned between capital cost allowance
11 and depreciation which are arrived at either for reasons
12 of convenience or because it is felt desirable to give
13 an incentive.

14 MR. STEWART: Mr. Chairman, we are well past
15 the hour and I think ...

16 THE CHAIRMAN: I think there is one thing on the
17 matter of incentives. I don't want to go by it. I want
18 to take the time and see if I can understand it. I was
19 quite startled by the suggestion that a certain type of incentive
20 reduces itself largely to produce an "incentive on the
21 cheap". It is quite a catchy phrase. I have been always a
22 little concerned myself with the cost to the Government
23 of certain incentives which are given on a really broad
24 base. I suspect that seldom when we see the application
25 of the incentive does it, in fact, result in a change of
26 judgment and only seldom is it what is intended to be
27 accomplished by the incentive. The net is spread very wide
28 and, in fact, sometimes catches only a few. The
29 "incentive on the cheap" is, I think, the kind where the
30 benefit of the incentive will be reaped by those who

1 actually do what the Government wishes them to do. I have
2 in mind primarily one thing which you point your finger
3 at, namely, the addition of 50% of the amount of capital
4 cost expenditures on research. It would seem to me
5 this is a pretty effective kind of incentive.

6 MR. SKINNER: Quite a lot of money is spent on
7 research.

8 THE CHAIRMAN: To some extent caused by this
9 incentive. If that is so, it probably is an incentive on
10 the cheap, because tax abatement isn't being
11 cast broadly around catching a few. Is that what you
12 intend by the phrase "on the cheap"?

13 MR. SKINNER: By the phrase "on the cheap" we
14 mean simply that the taxpayer who set up a research
15 program in 1960 received no abatement because of the way
16 it is written, but the one who sets it up in 1963 does
17 receive an advantage, and this can only be justified on
18 the basis in the short run there is a real need for some
19 sort of a shot in the arm. It seems to me obvious there
20 is a discrimination between the taxpayer who has paid in
21 1960 and the one who did it stimulated.

22 THE CHAIRMAN: I think one must very readily
23 admit there is a discrimination, but would there not
24 always be a discrimination when laws are changed without
25 retroactive effect, sometimes to the detriment and some-
26 times to the benefit of the taxpayers? Perhaps this is
27 such an aggravated case of discrimination that
28 you are entitled to point your finger at it. I am not
29 sure. That was all I wished to cover there, Mr. Stewart.

30 COMMISSIONER WALLS: I would like to go back to

1 page 4, paragraph 7 where apparently you suggest as an
2 alternative to the corporation tax increased sales tax,
3 although you state it would have to be gradually over a
4 period of time. Now, first of all, I presume Anaconda
5 as a firm pays very little sales tax because your
6 product is rarely an end product; am I correct in that?

7 MR. SKINNER: That would be correct.

8 COMMISSIONER WALLS: I beg your pardon?

9 MR. SKINNER: That would be correct.

10 COMMISSIONER WALLS: What I am interested in
11 knowing, if you are going to attempt to replace the
12 corporation tax predominately with sales tax, do you
13 favour it by doubling the percentage of sales tax or would
14 you rather increase sales tax less and eliminate the
15 exemptions, some of which, I guess, would indirectly
16 affect your business; that is building supplies?

17 MR. SKINNER: I think we have to answer that
18 we have not gone into this question of how you would
19 replace. We use sales tax as an example. It might be by
20 a completely different method of expenditures or payroll
21 deductions or something else. We haven't attempted to go
22 into that area, realizing it is of interest to you, but
23 also realizing that other people will be speaking to
24 the whole pattern of the tax system.

25 COMMISSIONER WALLS: I just thought having
26 made the recommendation, perhaps you had given some
27 thought to it.

28 MR. SKINNER: I am afraid as so many who appear
29 before you we are anti some things, but not so clear on
30 what we favour.

1 COMMISSIONER WALLS: Thank you. That is all I
2 have.

3 THE CHAIRMAN: I don't think we have any more
4 questions up here. You are complete, Mr. Stewart?

5 MR. STEWART: Thank you, Mr. Chairman, yes.

6 THE CHAIRMAN: Have you anything else you would
7 like to add?

8 MR. VANDERPLOEG: Mr. Chairman, I was interested
2 9 in Mr. Stewart's remarks in reading from the Radcliffe
10 Report about the effect of FIFO taxation on the rising
11 market and creating more taxation for us on account
12 of unwise business expenditures. In fact it gives the
13 Government more money, which they don't always spend too
14 wisely. The Government are not noted for spending
15 wisely.

16 Another point he mentioned was that the LIFO
17 was fairly youthful, a fairly callow youth.

18 THE CHAIRMAN: I am sorry, I didn't hear you?

19 MR. VANDERPLOEG: He mentioned the LIFO system
20 was a fairly callow youth. It is at least 30 to 40 years
21 old. I daresay there has been more business done in the
22 years since then than was ever done in the years all
23 together before that. For comparison I might mention
24 I read recently that the U.S. budget envisions more
25 spending than all the U.S. budgets previously to the year
26 1920. While it is youthful in years, it is not youthful
27 in its application in business.

28 THE CHAIRMAN: Thank you, yes.

29 MR. STEWART: Mr. Chairman, I might quite agree
30 the life of LIFO appears to be about 30 to 40 years. I

1 was really raising this point because some of the recent
2 decisions which were referred to by the Privy Council
3 in the Anaconda case went back considerably more than
4 that.

5 MR. VANDERPLOEG: Things change, of course, and
6 new things have to be resorted to to take care of them.
7 I would like to mention too there was a question if there
8 was a census on LIFO. I believe there was a study by the
9 U.S. Chartered Accountants' Association, or whatever the
10 name is, which approved LIFO, and it was sent, I believe,
11 to a great many American firms in the States. Perhaps
12 our Chairman will recall that.

13 THE CHAIRMAN: No, I am sorry I don't. I do
14 know that at the time it was introduced in the States that
15 there was a firm belief in that country that its use
16 would be restricted to what we contemplate in Canada,
17 or what you are contemplating in Canada, although that
18 didn't transpire at all. It became much broader. I wasn't
19 aware there was a census.

20 MR. VANDERPLOEG: I recall that the Crown Counsel,
21 one of the Crown witnesses, Mr. Thompson, I believe, who
22 was opposed to LIFO --- his firm in Canada was opposed
23 to LIFO and his firm in the States was for it.

24 There is another point I would like to bring up.
25 Maybe this is being a bit vindictive. Appeals to the
26 Privy Council were abolished by Parliament in 1949,
27 September I believe it was, and the then Prime Minister
28 said it was a campaign issue and the country supported it.
29 The Minister of Justice, I think it was Mr. Garson, said
30 appeals to the Privy Council was a touch of colonialism

1 for Canada and should have been abolished long ago. I
2 think the Prime Minister said it sounds as if our Courts
3 and our lawyers are not smart enough. Then four years
4 later, 1955, the same Government that abolished the
5 appeals took this to the Privy Council. In the intervening
6 years our lawyers and Courts became less smart instead
7 of smarter, you see. To be sure there was a hedge in their
8 abolishing it. They said either party could take it to
9 Privy Council if it was then under consideration by our
10 Courts. Surely that reservation wasn't to be used by the
11 Government.

12 THE CHAIRMAN: We note your observation. I think
13 we will stop on that point.

14 MR. VANDERPLOEG: I would like to make these
15 points. Thank you very much.

16 THE CHAIRMAN: Thank you very much indeed. We
17 are indeed grateful to you gentlemen for bringing this
18 submission to us. We would have been extremely disappointed
19 if you hadn't drawn our attention to LIFO, although I
20 rather suspect somebody else would have. We will
21 certainly give the matter consideration before we report.
22 I don't think it is an easy matter at all. I think we
23 will have to spend a little time with it. We thank you
24 very much, and if as we go forward we need help, we may
25 address ourselves again to you, or to you, Mr. Skinner.
26 In the meantime, many thanks.

27 We will stand down for five minutes, Mr.
28 Secretary.

29 ---Short recess.
30

R/dpw 1 THE CHAIRMAN: Mr. Secretary, would you introduce
2 our visitors to us?

3 THE SECRETARY: Mr. Chairman, Commissioners, we
4 have before us Mr. and Mrs. E.W. Oddleifson of Bayfield,
5 Ontario, and associated with them is Mr. Stanley McConnell
6 of Toronto, Ontario. These people have prepared a brief
7 which you have received and Mrs. Oddleifson was going to
8 speak to the brief.

9 I would like to enter it into the record as
10 Exhibit No. 69.

11
12 --- EXHIBIT NO. 69: Submission of Mr. and Mrs. E.W.
13 Oddleifson and Mr. R.S. McConnell.

14 THE CHAIRMAN: Thank you, Mr. Secretary. Good
15 morning, Mrs. Oddleifson and gentlemen. We have read your
16 submission, which we found interesting, and we have a few
17 questions to put to you. Before doing so, if there is any-
18 thing you would like to say to it, we would be very glad to
19 hear it; to summarize it or speak to it. There is no need
20 to read it.

21 MRS. ODDLEIFSON: Thank you. Mr. Chairman and
22 Commissioners, I would like to thank you for inviting us
23 here. We are very glad to come. I think we just represent,
24 say, the Canadian individual.

25 We have no corporation or institution behind us.
26 We have been students of the economic picture for a number
27 of years. Mr. McConnell has written a number of books on
28 the subject and we feel he is the prime mover in getting
29 our submission to you.
30

2 1 I do not think I have anything to add to the
3 brief. Mr. McConnell has a few words he would like to
4 say and we have some additional submissions which will be
5 made, I understand, at the proper time, as well as the
6 brief you already have.

7 THE CHAIRMAN: Would you tell us what directed
8 your interest to this? Mr. McConnell, you pointed out,
9 is an author of books on economy. Do you teach?

10 MRS. ODDLEIFSON: No.

11 MR. McCONNELL: No, I do not teach economics.
12 I approached it from a rather novel point of view. I
13 graduated in engineering from the University of Toronto;
14 that is a way back, and architecture was my particular
15 department.

16 Shortly after the First World War I became
17 greatly interested in economic problems which were very
18 cruel at that time and from about 1930 on, I think I have
19 devoted practically all my time to studying, research and
20 writing on that subject. That explains my interest.

21 THE CHAIRMAN: What are some of your books?

22 MR. McCONNELL: Well, the first one I called "A
23 World on Gold Rations." The next one was "Bitter Fruit,"
24 an audit of the capitalistic system.

25 Then I wrote one called "Now Take Canada"
26 which was in a popular style, conversational style, which
27 I tried to simplify what is, to most people, a rather
28 abstruse subject, and after that, just about the end of
29 the Second World War, I had a book come out called "I
30 Speak for the Centre" which was dealing partly with the
ideological problem and the relation of the economics to

3 1 that problem.

2 I have written about twenty different manu-
3 scripts that I couldn't get published. The last one
4 published was a little booklet called "And Deliver Us From
5 Inflation" and that one I will be glad to leave several
6 copies here, if it would be of interest to the Commission.

7 THE CHAIRMAN: Thank you. I would like to read
8 it. Shall we proceed?

9 MR. McCONNELL: Do you want to shoot some ques-
10 tions at us?

11 THE CHAIRMAN: That is what I had in mind, unless
12 there is anything else you would like to say to us before
13 we do.

14 MR. McCONNELL: I had prepared a little summary
15 of our whole brief which I suppose would take about two or
16 three minutes to read.

17 THE CHAIRMAN: By all means.

18 MR. McCONNELL: It would, perhaps, give you a
19 picture of what we are driving at. The title of this
20 little brief is "Consumer Taxes: An Economic Deterrent."

21 We are appearing before the Tax Commission on
22 behalf of the Canadian consumer who is usually inarticulate.
23 Consumer taxes sometimes referred to as indirect or hidden
24 taxes are not a new feature in our economy but dating from
25 the Second World War; they have expanded to the point where
26 they represent over 64% of the total revenue collected by
27 the Government.

28 I took those figures from the Dominion Bureau of
29 Statistics and worked it out on that basis.

30 Such taxes include customs and excise duties,

4 1 federal and provincial sales taxes and corporation taxes.
2 They are levied at various points in the productive and
3 distributive chains and are usually compounded several
4 times before they are finally paid by the consumer at the
5 retail level. They are much greater than the nominal
6 rates would indicate.

7 The effect of these taxes is to slow down the
8 economy at a time when the Government is seeking ways and
9 means to stimulate it. A personal income tax merely trans-
10 fers purchasing power from the private to the public sector
11 and has therefore no appreciable effect on prices. That
12 is to say, if the taxpayer does not spend the money, the
13 Government spends it and so the total expenditures would
14 approximate the same thing. That is, with the direct
15 income tax but consumer taxes do have a secondary effect;
16 namely, raising the price level of all goods on which they
17 are levied, and thus do double the real burden of the tax.

18 That is our chief contention; that the consumer
19 taxes do double the real burden of the tax and, inciden-
20 tally, infringe on one of Adam Smith's four principles of
21 taxation. Perhaps I should apologize for bringing Adam
22 Smith into it.

23 THE CHAIRMAN: Not at all.

24 MR. McCONNELL: We are leaving copies here of
25 his four principles of taxation. The one to which I am
26 referring now is No. 4: "Every tax ought to be so contrived,
27 as both to take out and keep out of the pockets of the
28 people as little as possible over and above what it brings
29 into the public treasury of the state. A tax may either
30 take out or keep out of the pockets of the people a great

5 1 deal more than it brings into the public treasury."

2 Now, consumer taxes are paid once at the wicket,
3 when you buy your groceries, whatever it is, but they
4 automatically raise the whole price level of the country
5 and therefore we believe or claim that is double taxation.
6 It is not efficient taxation.

7 To continue: Apart from this they are inequitable
8 as they bear most heavily on the lower income groups.
9 They distort the whole system of values and economic
10 rewards in the community, encourage tax evasion and negate
11 the free operation of market incentives under the law of
12 supply and demand. They are, in effect, a statutory markup
13 of the price of goods.

14 The obvious effect of this is to make Canadian
15 industry less competitive both in domestic and foreign
16 markets, which in turn contributes to our balance of pay-
17 ments problem, which, last year, gave Mr. Diefenbaker a
18 headache. It is a rather serious problem.

19 As a debtor nation, Canada must soon correct
20 this imbalance or suffer unpleasant consequences. A revi-
21 sion of the tax system to lower production costs would be
22 a long step in this direction.

23 I was interested to compare the American tax
24 revenue with our own and I found out that in the United
25 States 47% of the national revenue is collected via
26 consumer taxes while in Canada the corresponding figure
27 is 64%, so we evidently rely very much more here on the
28 consumer tax than they do in the States.

29 In the States about 55% of the national revenue
30 is raised by the direct income tax which, in our brief,

6 1 we claim to be the equitable system of taxation.

2 COMMISSIONER WALLS: May I interrupt you? I
3 don't wish to interrupt your statement, but in these
4 figures on the United States you are
5 quoting, are you not, federal sales tax? You are
6 not taking into consideration the amount collected by the
7 States as sales tax?

8 MR. McCONNELL: No. This refers merely to the
9 federal taxes.

10 COMMISSIONER WALLS: I think if you had the
11 amount as it is collected by their States you would not
12 get the adverse comparison, perhaps, that you do.

13 MR. McCONNELL: Well, perhaps not, although all
14 the States have sales taxes - I would not be prepared to
15 say as to that without looking into it further.

16 COMMISSIONER WALLS: Do these figures include
17 corporation taxes?

18 MR. McCONNELL: Yes, we include as consumer taxes
19 the corporation taxes.

20 COMMISSIONER WALLS: I am sorry, go ahead now.

21 COMMISSIONER BEAUVAIS: In both Canada and the
22 States in your figures?

23 MR. McCONNELL: Yes.

24 COMMISSIONER GRANT: I have a table here, Mr.
25 McConnell, which gives the distribution of tax levies at
26 all levels of government which would be the state,
27 national and municipal levels.

28 MR. McCONNELL: Yes, that should be very useful.

29 COMMISSIONER GRANT: If you would like, I will
30 read these.

7 1 MR. McCONNELL: Yes.

2 COMMISSIONER GRANT: As between Canada and the
3 States. In the United States 65.5% of the taxes came
4 from income tax.

5 MR. McCONNELL: That is overall?

6 COMMISSIONER GRANT: Overall. All levels of
7 government. 14.2% capital tax, and 22.3% tax on consump-
8 tion. Canada: 48.8% income; 17.1% capital - a large
9 measure of that comes from municipal taxes; 34.1% consump-
10 tion.

11 MR. McCONNELL: Yes, that more or less bears out
12 my figures in detail. That covers all levels of taxation
13 so, apparently, that would show that in the States they
14 rely more upon direct income tax than we do and less upon
15 consumer taxes. Would that be your interpretation?

16 THE CHAIRMAN: Yes, we would accept that.

17 MR. McCONNELL: So, in that respect, at least,
18 I think that they are probably ahead of us. However, to
19 continue: In these times everyone, including the Government,
20 tries to live on inflation, which I would call monetary
21 and price manipulation. We find it a very lean diet. In
22 writing up the price of goods, the Government creates a
23 greater demand for money while lowering the effective demand
24 for wealth. When a recession comes, there is a demand for
25 so-called "easy money." We try to monetize recovery.
26 Interest rates are lowered and the money supply increased
27 by the banking system. This new money is available for
28 loans to business and industry.

29 The question arises, then, how does this new
30 money get into circulation? Well, the banks, let us say,

8 1 loan it out to business and industry who want to expand
2 their plant, or for some other productive purposes, but
3 if the consumer demand is lacking, business is not going
4 to expand its facilities. The only way to stimulate the
5 production is to make it easier for the consumer to buy,
6 and that bears directly on the problem of inflation which
7 apparently no one yet has been able to remedy or to stop.

T/dpw 1 Just to give you a little example of our thinking
2 along those lines, according to the Dominion Bureau of
3 Statistics, they give the gross national product of
4 Canada for the year 1961 as thirty-six billion dollars
5 plus. That is just in round figures, thirty-six billion
6 dollars.

7 Now, included, to make up that thirty-six
8 billions, there is included an item of some four-and-a-half
9 billion in the form of hidden taxes or consumer taxes.
10 So that is listed as an asset. Another item included in
11 that thirty-six billions, is listed as consumption
12 allowances; now, capital consumption allowances would
13 indicate that that is depreciation of capital, so I
14 claim it has no place in a realistic picture of what our
15 gross national product might be.

16 If we deduct those two items from the gross
17 national product, we get a figure of something like
18 twenty-seven billions. Now, that is in terms of today's
19 dollar, but if you put it in terms of the 1939 dollar,
20 that big gross national product shrinks to about thirteen
21 billion.

22 Now, there is a big difference. Where has the
23 money gone? The President of the U.S. Steel Corporation
24 - what is his name?

25 THE CHAIRMAN: Mr. Blough.

26 MR. McCONNELL: Yes, Mr. Blough. He referred
27 to their profits as phantom profits because he found out,
28 the company found out, when they wanted to replace equip-
29 ment that had been installed, say, 20 years ago, they
30 would have to pay two or three times the depreciation that

1 had been allowed out of profits, so that the profits they
2 thought they had made he designated as phantom profits.

3 I claim that our figure for gross national
4 product of thirty-six billion dollars, although it might
5 give rise to some complacency and looks good in print, is
6 largely phantom figures. If we were to express it in
7 terms of real wealth, it would, as I have pointed out
8 here, shrink to about thirteen billion in terms of 1939
9 dollars, because we know that since 1939 the purchasing
10 power of the dollar has shrunk more than 50%.

11 That is just by way of illustration of how
12 figures - they say figures don't lie, but sometimes they
13 do.

14 Well, to continue, we point out that consumer
15 taxes are inequitable. They are inequitable because the
16 man of low income spends most of his money in the grocery
17 store at the retail level, so he pays proportionately
18 much higher tax than the man who has considerable means.

19 Now, this disease of inflation is very subtle
20 and almost incurable, apparently, but as we have pointed
21 out in our brief the Government is partly responsible for
22 it because all taxes levied on goods raise the prices
23 accordingly and lower the purchasing power of our dollar.

24 So, now, we have these problems confronting us:
25 unemployment, imbalance of international payments, deficit
26 financing, rising taxation at all levels, and a rather sick
27 and lagging economy.

28 Now, that is the problem with which our new
29 government must deal. If these problems are to be met,
30 policies should be directed to increasing rather than

3 1 reducing the purchasing power of the dollar. To do that
2 we suggest that sales taxes and consumer taxes should be
3 lightened in favour of the personal income tax. Now,
4 admittedly, that is not considered very expedient.
5 Apparently, human nature being what it is, if you do not
6 see it go out, you do not realize it so you do not react,
7 but the Government imposing added personal income tax
8 might possibly run into quite a bit of opposition.

9 The first target, I think, should be the sales
10 tax which was a wartime emergency measure that has never
11 been rescinded. Now, if the Government would grasp this
12 nettle firmly, it would set an historical precedent of
13 government vacating a tax field which it had once occupied.
14 There are not many tax fields remaining for governments
15 today outside of the poll tax, but I think the sales tax
16 would be a good place to start to reduce consumer taxes.

17 It would be a powerful stimulant to the national
18 economy. It would lower all our costs, placing Canadian
19 industry in a better competitive position, and also
20 increasing the buying power of the state's own revenue.

21 Now, I have not very much more to add, but if
22 we might venture to add a fifth principle to Adam Smith's
23 four principles of taxation, it would be this: the state
24 should tax people rather than goods. Any tax which
25 appears in the price of goods tends to disrupt the vital
26 economic processes by lowering the purchasing power and
27 productivity.

28 What the state really wants is not more tax money
29 but more national wealth to tax, at lower rates, if possible.

30 That is a brief summary of our submission, and

4 1 if there are any questions we will be very glad to answer
2 them.

3 MR. ODDLEIFSON: Could we include, Mr. Chairman,
4 the copies of this particular brief as an exhibit?

5 THE CHAIRMAN: By all means.

6 MR. ODDLEIFSON: Or it is an addendum, rather.
7 Also, we do have listed the four principles of Adam
8 Smith.

9 THE CHAIRMAN: We have Adam Smith's writings.

10 MR. McCONNELL: Yes, they would have those.

11 THE CHAIRMAN: If you would like to put them in,
12 we would be glad to have them.

13 MR. ODDLEIFSON: Perhaps in a slightly different
14 way than Adam Smith wrote it, but basically the same.

15 THE SECRETARY: The summary, additional pertinent
16 information, will be Exhibit 70, and Exhibit 71, Adam
17 Smith's principles.

18
19 --- EXHIBIT NO. 70: Summary and additional pertinent
20 information to the submission of
21 Mr. and Mrs. E.W. Oddleifson and
Mr. R.S. McConnell.

22 --- EXHIBIT NO. 71: Adam Smith's principles of taxation.

23
24 THE CHAIRMAN: Thank you, Mr. McConnell, for
25 your summary. This is rather interesting in that it has
26 certainly pointed out to us that a great resurgence of
27 French economy is due to exactly the opposite of what
28 you are recommending; namely, they have placed great
29 weight on consumption taxes. Roughly 65% of their total
30 budget is received in that way as opposed to about 35% in

5 1 Canada, and their economy moves forward very quickly.
2 There may be other reasons for this, of course, and they
3 raise a lot of their consumption tax money by way of value-
4 added tax.

5 MR. McCONNELL: Yes.

6 THE CHAIRMAN: Which may not pyramid. I am not
7 sure. I do not think it has a great pyramiding effect.
8 By the way, I point out, sir, sales tax commenced in
9 Canada about the year 1922 or 1923.

10 MR. McCONNELL: As far back as that?

11 THE CHAIRMAN: Right. We were one of the first
12 countries who adopted universal federal sales tax.

13 MR. McCONNELL: One of the sad features about
14 that is this: with those taxes levied at various points
15 in the production pipeline, they compound themselves.
16 One tax is built on another tax, and so on, so that by the
17 time it reaches the eventual consumer, the tax has been
18 multiplied - just as an illustration.

19 COMMISSIONER WALLS: Would you not get rid of
20 pyramiding if the sales tax was moved forward to the
21 retail level?

22 MR. McCONNELL: If they were left at the retail
23 level?

24 COMMISSIONER WALLS: Would you get away, then,
25 from pyramiding?

26 MR. McCONNELL: Yes.

27 THE CHAIRMAN: I think Mr. McConnell is directing
28 himself to pyramiding of tax rather than to pyramiding of
2 29 profit on tax. I have never myself been concerned about
30 pyramiding of taxes. It seems to me the fact that one tax

6 1 is imposed on something else which itself contains taxes
2 simply means that the rate of tax is not stated in as high
3 a rate as it would be if it were placed back on the
4 original base.

5 However, I am very much concerned about something
6 that is represented to us, that a great deal of the pyra-
7 miding of profits on tax, and if profits are greater
8 because of consumption of taxes, the taxpayer is paying
9 more than he would otherwise pay and the merchants are
10 making more money than they would otherwise make. So we
11 have asked merchants if that pyramiding were removed, if
12 they would receive less profits. Do you think they would?

13 MR. McCONNELL: Perhaps this would answer your
14 question, if I might deviate a little, but I will try to
15 get back to it. This is from the Excise Tax Act: general
16 sales tax of 8% is levied by the Government of Canada on
17 the sale price of goods manufactured in Canada and on the
18 duty-paid value of imported goods. This tax, together
19 with an additional rate of 3% imposed under the Old Age
20 Security Act, is payable at the manufacturer's level at
21 the time of delivery to the purchaser or by the importer
22 at the time of importation.

23 Well, I understand that that 8% tax levied on
24 goods coming into the country is on top of the duty,
25 whatever that might be, and then the 3% Old Age Security
26 tax is on top of those two taxes, whatever they might be.

27 THE CHAIRMAN: That is not correct. The 8%
28 and 3% are added together.

29 MR. McCONNELL: That makes 11%. Well now, let
30 us say that the next step in the distributive chain might

7 1 be the wholesaler. Not in all cases, I know, because they
2 do not always go through a wholesaler, but if they do the
3 wholesaler would add his percentage markup to that, to the
4 cost of the goods, plus 11%. He adds his markup, which is
5 a percentage markup, I believe.

6 Then, he would pass it on to the retailer, and
7 the retailer would add a percentage markup to that accumu-
8 lated total. No doubt his profits, as you have suggested,
9 are larger because of the taxes than they would otherwise
10 have been. That is, if he has a fixed markup. Of course,
11 I realize that our distributive machinery has altered
12 greatly in the past generation, let us say. It is changing,
13 but the principle is there. I think if anyone were to
14 take a selected stage of goods and commodities and follow
15 them through from the time they enter the country or from
16 the time they are manufactured, follow them through right
17 to the retail shelves, you would find the markup would be
18 surprising.

19 THE CHAIRMAN: I have a pretty good idea what
20 the markup is because we have asked those kinds of ques-
21 tions. The answers have left us, to some extent, unsatis-
22 fied as to whether or not any merchants have increased
23 their earnings because if there is pyramiding obviously
24 someone is making more money because of tax. I do not
25 think we have been able to completely satisfy ourselves
26 on that score, and I think we could only do that by a
27 pretty factual statement as to what occurs when the tax
28 is changed.

29 MR. McCONNELL: Yes. It is a little difficult to
30 follow through. If we could realize what consumer taxes

Q are doing to us and doing to our economy, I think the
2 people down at Ottawa would find some way of ameliorating
3 the situation.

4 COMMISSIONER WALLS: I notice, Mr. McConnell, in
5 your opening remarks you state that the sales tax had an
6 adverse effect on Canadian industry in expanding abroad,
7 or at least I understood you to say that. Now, surely
8 that is not correct in that, first of all, there is no
9 sales tax on the product that is shipped abroad, and
10 secondly, there is no sales tax on the machinery or produc-
11 tion in producing the product, so sales tax, really, has
12 had no implication on any of our products that are exported.

13 MR. McCONNELL: You mean on our competitive posi-
14 tion?

15 COMMISSIONER WALLS: That is right.

16 MR. McCONNELL: Yes, I would agree with that. I
17 did not know that goods shipped abroad were exempt.

18 COMMISSIONER WALLS: I see.

19 MR. McCONNELL: So that would just leave the
20 domestic field. That statement would apply, then, only to
21 the domestic field.

22 COMMISSIONER WALLS: Yes, that is right. Then,
23 on page 4, surely the inflow of capital from the United
24 States does the very opposite of creating deficits in
25 Canadian foreign exchange, as you mention. That is in the top
26 paragraph on page 4. I would like you to explain why you
27 feel this inflow of capital creates a foreign exchange
28 deficit for Canada.

29 MR. McCONNELL: Is this the part referred to:
30 "Seeking to escape the high taxes imposed in the United

9 1 States"?

2 COMMISSIONER WALLS: No, it is right in the
3 centre. "They come to Canada, and although a measure of
4 employment is created, they tend to pre-empt the field
5 of Canadian investment. This leads to deficits in
6 Canada's foreign exchange." Now, surely the inflow of
7 capital has the opposite effect, does it not?

8 MR. McCONNELL: Well, that may be a bit ambiguous
9 there. What I really meant was that the interest and
10 dividends on this capital to be transferred later would
11 affect our balance of payments. It would complicate our
12 balance of payments. I am taking this from an American
13 magazine, "Newsweek" - by the way it is rather uncomplimen-
14 tary to our former Prime Minister.

I/PB/ss 1

2 Canada's total trade deficit with the United
3 States is about seven million dollars a year. Above this
4 is a further six million dollars paid out to the United
5 States in the form of interest and dividends on American
6 investments in Canada. That is what I referred to there.

7 COMMISSIONER WALLS: I see.

8 MR. McCONNELL: It was dividends on this capital.

9 COMMISSIONER WALLS: I just have one more
10 question to ask you, and that is where you refer to sales
11 tax being complicated administrative machinery. Now, it
12 might be complicated. I don't see it is more complicated
13 than others. Certainly it is about the most inexpensive
14 method of collection. It is about one-half of one percent
15 our cost of collecting sales tax and excise tax in
16 Canada, which is a great deal less than the cost of
17 collecting our other taxes.

18 MR. McCONNELL: That is not large. I would have
19 thought it would be much greater.

20 COMMISSIONER WALLS: No. We have the figures
21 and that is the percentage. You will agree that that
22 argument is not very valid where it shows it is the least
23 expensive method of collection of tax.

24 MR. ODDLEIFSON: Is this one-half of one percent
25 of 3%?

26 COMMISSIONER WALLS: One-half of one percent of
27 the collection; in other words, it is \$5.00 per \$1,000.00
28 collected.

29 MR. ODDLEIFSON: Sales tax is 3%.

30 COMMISSIONER WALLS: Sales tax is 8%, Federal
tax.

1 MR. McCONNELL: Federal is 8%.

2 COMMISSIONER WALLS: Plus excise tax of either
3 or 10 or 15 %.

4 THE CHAIRMAN: It would be easier, perhaps, would
5 it not, to determine the amount of sales and the amount
6 of income, sales opposed to income.

7 MR. ODDLEIFSON: We feel that the percentage
8 does not matter. It is the way it is collected and how it
9 is collected, from whom, that it appears in the price of
10 goods and as a result increases the price of the goods
11 themselves. The amount is not a significant thing with
12 us. It is the fact that it is there.

13 COMMISSIONER WALLS: I agree with that statement
14 in part. My point was in the brief you stated it was
15 complicated.

16 MRS. ODDLEIFSON: I think, perhaps, we were
17 thinking in terms of what it does to the little merchant,
18 the small grocer who has to put in the expensive accounting
19 machinery. It must be a terrible headache.

20 COMMISSIONER WALLS: I think your simile is
21 unfortunate, because food is exempt from Federal sales tax.
22 The grocer wouldn't have to worry about that. In most
23 provincial tax food is also exempt.

24 MRS. ODDLEIFSON: I am speaking of the small town
25 where one store handles a lot of things.

26 THE CHAIRMAN: The general merchant.

27 COMMISSIONER WALLS: Fine.

28 MRS. ODDLEIFSON: And the antagonism it causes.

29 THE CHAIRMAN: You have a point, there is no
30 doubt about it. It is a nuisance to the small merchant,

1 but I suspect income tax returns are a nuisance to him
2 also.

3 MRS. ODDLEIFSON: When you can make it clear to
4 people that they have to pay, it is equitable, I don't
5 think anybody would object to paying for things that they
6 owe, but to have things taken away from them, that they
7 feel is not right. I see it from a woman's point of view,
8 of course, and to me it is faulty housekeeping. If we
9 keep using expedients to clean our house and let dust
10 collect under the rug, eventually we are going to have
11 to leave the house. I think any woman realizes worn out
12 tools are not going to keep the house clean. If we are
13 going to continue to use these things that are not doing
14 the job, and are not making our individual homes happy
15 places, something should be done about it.

16 THE CHAIRMAN: Your simile is apt if one accepts
17 the views you put forward as to consumption tax.

18 MRS. ODDLEIFSON: I see the whole thing as a
19 picture. I see it not only as tax inflating, but every-
20 thing we do practically inflating and causing our dollar to
21 die. Mr. McConnell sees it in a literary way. He writes
22 a book. My husband, he is an engineer and he looks for
23 scientific removal of the effect. I see it as a picture.
24 I would be glad to show it to you if you would like to
25 see it.

26 THE CHAIRMAN: I don't know whether I want to
27 take the time. What is it that you wish to show?

28 MRS. ODDLEIFSON: I have a chart.

29 THE CHAIRMAN: Showing the effect of inflated
30 tax?

1 MRS. ODDLEIFSON: Everything.

2 MR. ODDLEIFSON: A maze is what they call it.

3 THE CHAIRMAN: Would you hold it up?

4
5 --Mrs. Oddleifson shows Commission chart.

6
7 THE CHAIRMAN: I think that is very nice. Have
8 you shown it to our press table?

9 MRS. ODDLEIFSON: I think you should be a woman
10 really to see this. I think of it as tyranny of the tea
11 table. We are too busy having pink teas and socials and
12 so on. Ladies, I know they are necessary, but can't we
13 cut them down a little.

14 THE CHAIRMAN: Thank you very much indeed.

15 MRS. ODDLEIFSON: You are welcome.

16 THE CHAIRMAN: I think you put something before
17 us which is most interesting. We certainly don't wish to
18 top it. I think it is a very good note on which to end
19 this session. Thank you very much indeed.

20 MR. McCONNELL: Thank you for giving us the
21 opportunity of presenting our brief.

22 THE CHAIRMAN: It was very kind of you to come.

23 MRS. ODDLEIFSON: Thank you for your interest.

24 THE CHAIRMAN: Mr. Secretary, do you have any
25 further business?

26 THE SECRETARY: I want to enter one more brief
27 into the record, the brief from Mr. Ronald Dorn, 82 West
28 Humber Boulevard, Rexdale, Ontario. I will enter this
29 brief into the record as Exhibit No. 72.

1 -

2 ---EXHIBIT NO. 72: Brief of Mr. Ronald Dorn.

3

4 THE CHAIRMAN: Thank you. We will stand over

5 until Tuesday morning at 9:30.

6 THE SECRETARY: That is correct, and we will

7 hear the submissions of the Ontario Credit Union League

8 Limited and the Retail Merchants' Association of Canada.

--- On commencing at 9.30 a.m.

THE CHAIRMAN: Mr. Secretary, even though the clock has not yet reached half-past nine, if our visitors would like to start, I think we are all ready here.

THE SECRETARY: Mr. Chairman and Commissioners, this morning we have a brief from the Ontario Credit Union League Limited. The officers of the League are with us this morning. Mr. J.M. Hallinan is General Manager. He will speak to the brief and introduce his colleagues. I would like to enter this brief into the record as Exhibit No. 73.

--- EXHIBIT NO. 73: Submission of the Ontario Credit Union League Limited.

SUBMISSION OF THE ONTARIO CREDIT UNION

LEAGUE LIMITED

Appearances: Mr. J.M. Hallinan
Mr. C. Creswell
Mr. James Turley
Mr. John Burton

THE CHAIRMAN: Thank you, Mr. Secretary. Good morning, Mr. Hallinan and gentlemen. We have received your submission and have read it with a great deal of interest. We have some questions to put to you, and for that purpose we have asked our legal adviser and counsel, Mr. Stewart, to attend this morning. We have considered this a most important submission that you have made. We do not ask Mr. Stewart to lead the questioning in all cases; only those which we think are of great importance, or perhaps technically difficult. Under these circumstances

1 we wish to make sure that we have explored your submission
2 fully.

3 Usually we ask our visitors if they care to say
4 something before we start questioning. There is no need
5 to read the submission. We have already done that, and it
6 is entered into the record without reading. However, if
7 you care to speak to it, summarize it or amplify it or any-
8 thing that you please, we will be very glad to hear from
9 you. In the meantime, Mr. Hallinan, would you care to
10 introduce your associates in this matter?

11 MR. HALLINAN: Thank you, Mr. Chairman and
12 Commissioners. On my extreme right is Mr. Clint Creswell,
13 Supervisor of Examinations for the Ontario Credit Union
14 League Limited. On my immediate right is Mr. James Turley,
15 Director of Field Services for the Ontario Credit Union
16 League. On my left is Mr. John Burton, Assistant Super-
17 visor of Examinations for the League, and who has been
18 chiefly responsible for the drafting of this submission.

19 I would like, first of all, to sincerely thank
20 you for giving us the opportunity of sitting down with you
21 this morning to go over our submission. We are prepared
22 insofar as we are able to attempt to answer any questions
23 that the Commission may have.

24 I have had the opportunity of reading the obser-
25 vations made by The Honourable Senator Vaillancourt
26 and basically we are in complete agreement with the senti-
27 ments he has so ably expressed on the subject. I think in
28 resume our brief indicates our desire to maintain the
29 status quo in respect to taxation affecting credit unions
30 in this province, in our League.

1 We have based our arguments largely on the
2 reasons that we had in 1945 when the last Royal Commission
3 on Taxation met. That Commission, as you know, unanimously
4 recommended to the Government, and, in turn, enacted the
5 tax law respecting credit unions. We are still of the
6 opinion that the same principles obtain now as obtained
7 then, and it is basically on that philosophical and socio-
8 logical approach that we have made this submission, Mr.
9 Chairman.

10 THE CHAIRMAN: Thank you, sir. We will ask Mr.
11 Stewart if he will start our questioning. Mr. Stewart, are
12 you ready?

13 MR. STEWART: Yes, thank you, Mr. Chairman. Mr.
14 Hallinan, I wonder if you could indicate to the Commission
15 at the outset how long you personally have been with the
16 credit union movement?

17 MR. HALLINAN: I have been personally associated
18 with this League since 1942. It would be a matter of 21
19 years. For the first five years it was on a voluntary
20 basis either as Director or editor of the newspaper.
21 Since 1947 I have been full-time manager of this League.

22 MR. STEWART: Now, I have before me a pamphlet
23 or a booklet which is entitled Credit Union Year Book, 1962,
24 and which appears, from the back cover, to have been issued
25 by the Credit Union National Association, which I gather
26 is an international organization with headquarters in
27 Madison, Wisconsin. Are you familiar with that book?

28 MR. HALLINAN: Yes, I am, sir.

29 MR. STEWART: I observe on page 61 of the book
30 you are mentioned as one of the Canadian organizations from

1 whom information about credit unions can be obtained.

2 MR. HALLINAN: That is correct.

3 MR. STEWART: And I observe, on page 60, that
4 there is a chart with regard to the organization of the
5 Credit Union National Association. I am sorry I have only
6 one copy of this book and I should perhaps show you what I
7 am referring to as I go along. This chart on page 60,
8 which sets out the organization of the credit union move-
9 ment in diagrammatic form says this at the bottom of the
10 page: CUNA, which I take it is the abbreviation of Credit
11 Union National Association ---

12 MR. HALLINAN: That is right.

13 MR. STEWART: --- is an association of leagues
14 of credit unions; leagues are voluntary due-supported
15 associations of the credit unions in any state, province,
16 country or other governmental unit having its own laws.

17 Then there is a reference to CUNA Mutual Insurance
18 Society and CUNA Supply Co-operative, and it states that
19 these are service organizations affiliated with CUNA, the
20 parent body. Now, is that a fairly accurate description
21 of the structure of the movement?

22 MR. HALLINAN: Yes, it is, sir.

23 MR. STEWART: And your League, the Ontario Credit
24 Union League, is one of these leagues which are associated
25 in the national organization?

26 MR. HALLINAN: That is correct.

27 THE CHAIRMAN: Do you mean international or
28 national?

29 MR. STEWART: They call it national, Mr. Chairman,
30 but I think international would be better. Mr. Hallinan,

1 I see that there are references here to Australia, Carib-
2 bean, Central America, Ireland, the Pacific Islands and
3 South America as well as Canada and the United States
4 where, presumably, operations are carried on.

5 MR. HALLINAN: That is right.

6 MR. STEWART: Now, there is a great deal of
7 information in this booklet, Mr. Hallinan, about the
8 credit union movement in Canada. Would you say that in your
9 opinion that information is basically correct?

10 MR. HALLINAN: Yes, I would say so.

11 MR. STEWART: Well now, this information does
12 show, as I see it, that there has been a quite remarkable
13 growth of the credit union movement in Canada in recent
14 years, and I would like to refer to certain aspects of that
15 growth as set out in this book.

16 I find, on page 52, for example, that if we take
2 17 the year 1945 as your starting point, in 1945 there were
18 2,219 credit unions in Canada, whereas in 1960 there were
19 4,413. It is about double the 1945 figure.

20 MR. HALLINAN: That is right.

21 MR. STEWART: And in 1945 there were 590,000
22 members, and in 1960 there were 2,544,000 members, which
23 is over four times as many.

24 MR. HALLINAN: That is right.

25 MR. STEWART: In 1945 the savings in these
26 Canadian credit unions aggregated \$139,000,000, whereas in
27 1960 the corresponding figure is \$1,194,000,000, which, of
28 course, is over eight times as much.

29 MR. HALLINAN: That is right.

30 MR. STEWART: Then, if I go to page 54 of this

1 book I find that in 1945 the total assets of the Canadian
2 credit unions amounted to some \$45,000,000, whereas in
3 1960 they amounted to \$1,299,000,000, which again would
4 be - well, I think in this case it would probably be nine
5 times as much. Is that also correct?

6 MR. HALLINAN: Yes, that is true.

7 MR. STEWART: On page 55, when we deal with the
8 average savings for each member of the credit unions in
9 Canada, in 1945 the figure was \$235, and in 1960 it was
10 \$470, which is exactly twice as much.

11 MR. HALLINAN: Yes, sir.

12 MR. STEWART: Then, going back to page 52, in
13 1945, with 2,200 credit unions and 590,000 members, the
14 average number of members would be something under 300 per
15 credit union.

16 MR. HALLINAN: Yes.

17 MR. STEWART: In 1960, however, the number would
18 have grown, the number per credit union would have grown
19 to approximately 600 per credit union.

20 MR. HALLINAN: Yes, sir.

21 MR. STEWART: Now, when I go to the earlier part
22 of the book I find some figures for 1961. On page 6 I
23 find that in 1961 there was an increase of 174 in the
24 number of credit unions in Canada.

25 MR. HALLINAN: That is correct.

26 MR. STEWART: In 1961 the aggregate membership
27 of credit unions in Canada was just over 2,700,000. This
28 is on page 7. It also appears on page 7 that in 1961 the
29 percentage of the Canadian population which were members of
30 credit unions was 14.7%.

1 MR. HALLINAN: That is the national average.

2 MR. STEWART: Yes.

3 MR. HALLINAN: I might just point out the Ontario
4 average is a little below that of the national average.

5 MR. STEWART: Yes, I am going to come to Ontario,
6 if I may, in just a minute, and I will be very interested
7 in that figure. Then, again, looking at page 11 of this
8 booklet, in 1961 the total assets of the Canadian credit
9 unions amounted to \$1,468,000,000.

10 MR. HALLINAN: Yes.

11 COMMISSIONER PERRY: Those figures would be as
12 at the end of the year, would they?

13 MR. HALLINAN: Yes, they would.

14 COMMISSIONER PERRY: December 31st.

15 MR. STEWART: The witness says yes, Mr. Perry.
16 Now, Mr. Hallinan, have you, by any chance, corresponding
17 information as at the end of 1962, or is that ready yet?

18 MR. HALLINAN: The 1962 figures for Ontario are
19 not available yet.

20 MR. STEWART: So that the figure for Canada would
21 not be available either?

22 MR. HALLINAN: No.

23 MR. STEWART: Then going for a moment to your
24 brief as filed, I would refer in particular to paragraph 14
25 where you indicate there that in 1949 there were 423 active
26 credit unions in Ontario with total assets in excess of
27 \$21,000,000. By 1962 the number had risen to more than
28 1,450, with total assets of approximately \$275,000,000.

29 I observe that the number of unions in Ontario
30 has increased in that 13-year period to three times the

1 1949 figure, and that the assets have increased to about
2 thirteen times the 1949 figure.

3 MR. HALLINAN: Yes.

4 MR. STEWART: Then, if I can go back to this
5 exhibit, Mr. Hallinan - I am sorry, I called it an exhibit
6 because I am going to identify this booklet as an exhibit
7 for the purposes of this inquiry - looking at page 38 I
8 find that particulars of the members of credit unions in
9 Canada are broken down province by province, and there we
10 find a figure for Ontario of 1,396 credit unions - this is
11 in 1960 - with a total membership of 538,000, and I find
12 in Quebec that there are 1,470 unions with a total member-
13 ship of 1,339,000 people. Do you confirm those figures?

14 MR. HALLINAN: Yes, I do.

15 MR. STEWART: Now, could you perhaps give some
16 explanation of the fact that the number of members in
17 Quebec in 1960 was over two-and-a-half times as great as
18 the number in Ontario?

19 MR. HALLINAN: The explanation I could give for
20 that, sir, would be the fact that the Quebec figures
21 include not only the English-speaking credit unions, but
22 also Caisses Populaires, and in Quebec we regret to admit
23 that they had about a 40-year start on us. Caisses Popu-
24 laires in Quebec started by Desjardins in 1900, and grew
25 very much more rapidly than in Ontario. In fact, the
26 Ontario growth did not really commence until the passing of
27 the Credit Union Act in 1938. It was just in the 22-year
28 period from, say, 1940 until now - 23-year period - that the
29 credit unions have taken on.

30 MR. STEWART: It has been suggested to me that

1 the credit union movement in Canada in the early years,
2 and I suppose this statement may relate particularly to
3 Quebec, consisted of small rural credit unions. Would
4 you indicate whether or not you would agree with that
5 statement?

6 MR. HALLINAN: From my knowledge of the situation,
7 sir, that would be substantially correct.

8 MR. STEWART: I take it, then, from what you said
9 that you would not anticipate that the larger number of
10 members in Quebec will continue; that you would anticipate
11 that membership in Ontario will gradually overtake that in
12 Quebec?

13 MR. HALLINAN: I would think so, judging by the
14 development in this province during the past ten years. I
15 might point out, in explanation of that, that the develop-
16 ment in Ontario, according to the figures in paragraph 14,
17 has been largely in the industrial credit unions, whereas,
18 as you have suggested, the development in Quebec has been
19 largely rural.

20 Another thing that would help to increase the
21 credit union movement in the industrial area in this
22 province is the continuing growth of industry, and the
23 thing that would militate against the development of
24 community-type credit unions in Ontario is the arbitrary
25 figure of 6,000 that the Department of Insurance in this
26 province have set as maximum potential that they will
27 grant a charter.

28

29

30

B/MC/ss

1 MR. STEWART: Thank you very much. Now, in
2 this Credit Union Yearbook I find some other figures
3 which I would like to ask you to confirm or otherwise.
4 On page 56, which relates to Canada, there is a break-
5 down of installment credit by types of institutions. The
6 first year quoted on here, the first year for which
7 figures are given, is 1953, and the last year is 1960.
8 Then the figures are given for six different types of
9 institutions: The sales finance companies, the small
10 loan companies, the department stores, other retail
11 dealers, chartered banks, personal loans and the credit
12 unions.

13 I observe from this that for a period of seven
14 years the loans by the sales finance companies have
15 increased from \$516,000,000.00 to \$828,000,000.00; those
16 by the small loan companies from \$176,000,000.00 to
17 \$544,000,000.00. I think I might observe in passing
18 that in the case of the sales finance companies that
19 seems to represent about a 60% increase; in the case of
20 the small loan companies the increase is about 200%.
21 Then in the department stores the 1953 figure is
22 \$167,000,000.00, and the 1960 figure is \$368,000,000.00,
23 which seems to be an increase of about 120%. The other
24 retail dealers have gone up from \$516,000,000.00 to
25 \$670,000,000.00, which is an increase of about one-third.
26 The chartered banks have gone up from \$308,000,000.00 to
27 \$857,000,000.00, which is something under 200% increase.
28 The credit unions have gone up from \$129,000,000.00 to
29 \$425,000,000.00, which is an increase of roughly 233%,
30 and is the largest percentage increase from the 1953 figure.

1 Would you agree with that?

2 MR. HALLINAN: Yes, I would.

3 MR. STEWART: And in 1960, credit unions
4 supplied 11.5% of the installment credit supplied by this
5 group of institutions throughout the country. Is that
6 correct?

7 MR. HALLINAN: Yes.

8 MR. STEWART: Now then, Mr. Hallinan, I have
9 not been able to find this figure in this pamphlet issued
10 by the Credit Union National Association, but I have been
11 informed that in 1961 the personal savings of Canadians
12 were divided among four types of institutions somewhat as
13 follows: The four types I have in mind are the chartered
14 banks, the trust and loan companies, the savings banks,
15 and the credit unions. The figures that have been
16 supplied to me indicate that 75.1% of personal savings
17 were in the chartered banks, 6.8% in the trust and loan
18 companies, 4.9% in savings banks, and 13.2% in credit
19 unions.

20 Now, it is perhaps unfair to ask you to agree
21 or disagree with those figures, but as far as the credit
22 union operation is concerned, that is 13.2% of personal
23 savings, would you think that was approximately correct?

24 MR. HALLINAN: From any information I had, sir,
25 I would suggest that it would be approximate.

26 MR. STEWART: Thank you very much. Now, looking
27 again at your brief, Mr. Hallinan, I now have before me
28 paragraph 46, which is on page 16. You indicate there that
29 the normal rate of interest charged by the majority of
30 Ontario credit unions is 1% per month on the unpaid balance

1 of a loan. Is that correct?

2 MR. HALLINAN: That is correct, sir.

3 MR. STEWART: Could you tell me what the
4 effective rate per annum is of 1% per month on the unpaid
5 balance.

6 MR. HALLINAN: Could I have the permission of
7 the Chair to ask Mr. Burton to supply that information?

8 THE CHAIRMAN: Yes.

9 MR. BURTON: Is that compounded?

10 MR. STEWART: No, simple.

11 MR. BURTON: It is approximately 12% per annum
12 simple interest.

13 MR. STEWART: Is simple interest what we should
14 be taking into account then?

15 MR. BURTON: 6.5% on the principal if repaid
16 monthly installments in one year. There is a comparison
17 with the banks' usual 6%.

18 MR. STEWART: The usual charge is one-half of
19 1% above the bank rate of 6%?

20 MR. BURTON: Taken on the principal, that is
21 correct, yes.

22 MR. STEWART: You also indicate in paragraph 69
23 of the brief, and I am looking at the top of page 25,
24 that you do pay a rebate. In 1961, the average rebate
25 paid by Ontario credit unions was approximately 16%.

26 MR. HALLINAN: That is correct.

27 MR. STEWART: Now again, if we were trying to
28 determine the effective rate on loans made to people who
29 got that average rebate, do I take it that we would
30 reduce the 6.5% by 16%?

1 MR. HALLINAN: That is correct.

2 MR. STEWART: And then for the members of your
3 credit unions who paid the 1% per month and obtained this
4 average rebate in 1961, the effective interest rate would
5 be something under 6%.

6 MR. HALLINAN: Yes.

7 MR. STEWART: It would be approximately, I
8 suppose, 5.5%.

9 MR. BURTON: Yes, that is correct, Mr. Stewart.
10 Some credit unions don't pay any rebate and another
11 credit union might pay as much as 25 or 30. A 10% rebate
12 would bring it down to less than the general bank rate of
13 6%.

14 MR. STEWART: Of course, when we talk about the
15 bank rate as being 6%, that is the maximum rate that the
16 banks are permitted to charge.

17 MR. BURTON: Yes.

18 THE CHAIRMAN: Mr. Stewart, I am not very clear
19 on the relationship between 1% per month and 6½% per
20 year and it may be that my multiplication does not work
21 fast enough to comprehend it. On a loan of \$100.00, as
22 I understand it, the payment might be \$1.00 per month
23 average of twelve months, or in all throughout the year,
24 the borrower would have paid \$12.00. Now, I don't think
25 that is equivalent to \$6.50 at the end of the year.

26 MR. BURTON: The interest works out \$1.00 per
27 hundred, or 1% per month on the reducing balance. If
28 you borrowed \$100.00 from the credit union and repaid it
29 in twelve equal monthly installments, you would finish
30 up paying \$6.50 interest based on a 360-day year.

1 THE CHAIRMAN: \$6.50 is the payment one makes
2 for obtaining \$100.00 at the beginning of the year, which
3 \$100.00 is paid for fully at the end of the year by
4 equal payments of capital monthly.

5 MR. BURTON: In other words, you will pay \$6.50
6 for use on an average of \$50.00 throughout the year.

7 MR. STEWART: At the beginning of the year, do
8 you receive \$100.00, on the Chairman's example, or \$100.00
9 less a pre-payment for the first month?

10 MR. HALLINAN: You receive \$100.00.

11 THE CHAIRMAN: Your comparison with the bank
12 rate is not altogether valid, Mr. Stewart. You were
13 talking of a bank rate that would be 6% on non-reducing
14 balance. Is that correct?

15 MR. STEWART: That is correct, although I am not
16 quite sure how these gentlemen reached that 6% figure
17 which is, as I said, the top figure which the banks can
18 charge. Perhaps Mr. Burton could explain.

19 MR. BURTON: Yes, I think I can clarify it by
20 referring to recent advertisements in the Toronto papers
21 by the Bank of Nova Scotia and the Toronto Dominion Bank
22 and I believe that other banks are offering the same
23 service which is a fully-insured loan. As an example,
24 the Bank of Nova Scotia advertises you can borrow \$1,000.00
25 for one year and you pay back in total, this is not a
26 discount loan, you pay back \$1,060.00. In other words,
27 going back to the other illustration of \$100.00, instead
28 of paying \$6.50 you pay \$6.00. There is the bank's 6%.

29 COMMISSIONER WALLS: You are paying \$60.00 on
30 an average of \$500.00 loan throughout the year.

1 MR. BURTON: From the bank, and \$65.00 on
2 \$500.00 average from the credit union.

3 THE CHAIRMAN: I understand, Mr. Burton.

4 MR. STEWART: I would like, if I may, Mr.
5 Hallinan, to look at Appendix 4 to your brief so that I
6 can be sure I understand exactly what appears there. On
7 the second page of that appendix it appears the expenses
8 which you specify for the year 1961 amounted to 36.9%
9 of the gross income of the unions whose returns are
10 reflected in this chart. Is that correct?

11 MR. HALLINAN: Yes.

12 MR. STEWART: And your net income therefore
13 was 63.1% of your gross income. I was curious to know
14 why it was that you stated on the next line, the next
15 line salaries and Honoraria as a percentage of total
16 expenses and the overall figure is 28.4%. What significance
17 is there to that in your thinking?

18 MR. BURTON: This last line on page 2 was
19 merely for the guidance of our credit unions. In the
20 last few years as they have grown large enough to employ
21 full-time personnel they have often wanted to know how
22 much they should pay out in salaries, how much they could
23 economically pay out in salary and Honoraria and we have
24 set a general rough guiding line as not more than 20% of
25 gross income, or not more than 50% of expenses, regarding
26 those as maximums. That was the only purpose for
27 including that.

28 MR. STEWART: Thank you. And now then, I look
29 at Appendix 3 to your brief and I realize, of course, that
30 Appendix 3 contains statistics which were prepared by

1 the Ontario Department of Insurance, whereas Appendix 4
2 sets out statistics for members of your League. However,
3 I take it that broadly speaking if we want to follow
4 through what happens to the net income of your Credit
5 Unions, and I am referring now to the 63.1% in Appendix 4,
6 we can find that roughly from Appendix 3. In other
7 words, about just halfway down Appendix 3 I find the
8 figure for income \$21,800,000.00 odd and then I find
9 expenses of \$9,300,000.00 and net earnings of \$12,489,000.00.

10 Now, before I go further, I take it that the
11 \$9,392,000.00 on Appendix 3 corresponds generally to
12 the 36.9% which I refer to on Appendix 4. Is that
13 correct?

14 MR. BURTON: Yes.

15 MR. STEWART: So that when we want to determine
16 what happens to the 63.1% we then look further down
17 Appendix 3 and we find that 20% goes to the guarantee
18 funds and then there is a figure of \$8,900,000.00 odd
19 which goes back to the members in one form or another.
20 That appears to be, according to my calculations, about
21 72% of that net income and then there is another million
22 and sixty-five thousand dollars which is added to the
23 other funds and reserves. Is that the general picture?

24 MR. BURTON: Yes, Mr. Stewart. Maybe we should
25 just clarify one point. There is a little difference
26 between these Government statistics and our own statistics
27 on Appendix 4. On Appendix 4 it is indicated that these
28 are statistics for 1,236 credit unions, whereas the
29 Government's statistics are based on reports of 1,315.

One of the reasons is there are a few French-speaking

1 credit unions which are not members of our League. There-
2 fore we don't include their statistics. There are also
3 seventy-odd Caisses Populaires.
4 In Ontario only three or four of them are members of this
5 League. Most of them are in the French-speaking north,
6 and if you have seen the statistics of the Caisses Popu-
7 laires in Quebec, you will realize they might change our
8 statistics from the Government statistics which includes
9 some Caisses Populaires. Apart from that we would agree
10 with you.

MR. STEWART: Thank you, Mr. Burton. I am really
11 at the moment just attempting to make sure that I under-
12 stand the general application of these funds. At the
13 bottom of Appendix 3 you deal with the type of disposition
14 which may be made of the figure of 1,065,000 dollars, and
15 there are four possible uses referred to. One is donations,
16 one is educational funds, one is other funds and reserves,
17 and the last consists of honoraria to officers who are not
18 paid out of expenses. Can you tell me what is the amount
19 of educational funds on that list?

MR. BURTON: Yes, Mr. Stewart. As referred to in
21 the brief, paragraph 31, on page 11, the section of the
22 Credit Union Act reads:

23 "A credit union may by resolution of the
24 members provide that, after making provision
25 for the guarantee fund and before declaring
26 a dividend, an amount not exceeding 5% of the
27 net earnings be set aside in a special fund
28 to be used for such educational purposes as
29 are specified in the resolution."

30 In other words, a credit union may set aside 5%

1 of its net earnings after providing 20% guarantee fund
2 reserve for educational purposes. These are not, in this
3 case, charged as an expense but are set aside out of net
4 earnings.

5 MR. STEWART: What do you mean by "educational
6 purposes"?

7 MR. HALLINAN: There are two phases, Mr. Chairman.
8 One is educating the present membership to the many advan-
9 tages of using the service of the credit union. That is
10 a program that increases the membership of the credit union
11 and makes the members make better use of it.

12 Another phase in our educational program, which
13 is rather recently introduced, is known as the family
14 financial counselling. Programs are put on for the benefit
15 of members, teaching them how best to use their money. The
16 other aspect of the educational fund in a credit union
17 would be to spend funds in programs that would induce
18 people that are eligible for membership in credit unions
19 to take out membership in the credit union. They are the
20 basic purposes of the educational fund of credit unions.

21 MR. STEWART: Basically these monies are used to
22 maintain your present membership and, if possible, increase
23 it?

24 MR. HALLINAN: That is correct.

25 MR. STEWART: Looking at Appendix 3, I observe
26 that the first item under liabilities and members' equities
27 is shares, and that the amount shown opposite the word
28 "shares" on this statement, and I appreciate this is not
29 your statement; it is a governmental statement - that the
30 amount is \$183,583,300.

1 Now, have you any idea, either as regards the
2 credit unions whose affairs are reflected here or as
3 regards those which are members of your League, what pro-
4 portion of that \$183,000,000 represents original subscrip-
5 tions for shares by members and to what extent it repre-
6 sents dividends?

7 MR. BURTON: Mr. Stewart, I do not think we have
8 any idea to enable us to answer that question intelligently.

9 MR. STEWART: Do I understand your procedure to
10 be that the dividends that you do pay are basically credited
11 to the members' accounts?

12 MR. BURTON: That is correct, yes.

13 MR. STEWART: And if, therefore, I am a member
14 of a credit union and I have subscribed for a particular
15 number of shares, and at the end of my first year of member-
16 ship I am credited with a dividend, does the number of
17 shares I hold increase or is the amount which is to the
18 credit of my share account simply increased?

19 MR. BURTON: The dividend is credited to your
20 share account. The share value is \$5, but they are not
21 shares in the same way as another corporation. If you have
22 \$52 in the share account, you have ten \$5 shares and \$2
23 subscription towards the eleventh. If you get a dividend
24 on that of, shall we say, \$2, it increases the amount to
25 \$54. You still only have ten shares but you have \$4 on
26 subscription towards the eleventh share.

27 This division into shares is merely convenience.
28 There is no certificate. There is nothing in the same
29 sense as another corporation.

30 MR. STEWART: In effect, if, through payment, I

1 subscribe for ten shares for a total of \$50, and without
2 any further subscription on my part, the amount of the
3 credit of my share account increased to, say, \$80, I
4 would, in effect, be treated as owning 16 shares in the
5 credit union?

6 MR. BURTON: Yes, certainly. I might point out,
7 if you wished at any time to withdraw any of the share
8 dividend money credited to your share account, you would
9 be entitled to do so. Some credit unions do do it; some
10 of the larger ones may do it for university and community
11 purposes.

12 MR. STEWART: The next item in Appendix 3, under
13 that heading of liabilities, is deposits, and that amounts
14 to about \$47,000,000. That figure of \$47,000,000 is
15 roughly one-sixth of the total liabilities shown of
16 \$266,000,000.

17 Would that percentage of deposits have been
18 fairly constant over the last few years, or has the percen-
19 tage of deposits increased or decreased in Ontario in
20 relation to total liabilities?

21 MR. BURTON: I would say that it is increasing
22 a little, and although it is an irregular pattern, if you
23 refer to Appendix 4 you will find some of the large credit
24 unions running into the three million group have a much
25 higher percentage of deposits than the smaller and the
26 much larger credit unions. Generally speaking, there may
27 be a slight increase, but not spectacular.

28 MR. STEWART: On these deposits I observe from
29 paragraph 23 of your brief that if a deposit is what you
30 call a regular deposit, you pay, or your unions pay, from

1 three to five per cent, and if it is a deposit for a
2 personal order, the rate varies from nil to 3%.

3 Would you mind explaining to me what that second
4 type of deposit is? What is a deposit for personal order?

5 MR. BURTON: Well, a credit union that wishes to
6 provide personal chequing service, such as a bank provides,
7 the member, in addition to his share account, may have a
8 deposit account on which he can draw cheques.

9 MR. STEWART: I see.

10 MR. BURTON: And the amount he has sometimes has
11 interest allowable upon it, and sometimes not, but this is
12 a strictly personal chequing service which exists in
13 comparatively few credit unions in Ontario.

14 MR. STEWART: Looking again at Appendix 3 there
15 are three items, and the last three items of liabilities,
16 guarantee fund, other funds and reserves, undivided
17 earnings, which appear to amount to approximately
18 \$24,000,000, are roughly 9% of the liabilities.

19 Would it be fair to say that these three items
20 are, in fact, reserves for the benefit of the membership
21 as a whole?

22 MR. HALLINAN: I would say definitely yes. The
23 guarantee fund particularly, which is by far the largest
24 of the reserves, is set up to offset any possible losses
25 on loans to members, thereby affording a protection to
26 the general membership.

27 The other funds in reserves, the educational
28 one has been explained, and some credit unions looking
29 towards the day when they would purchase their own building,
30 have set up building reserves, and then the balance of the

net earnings, of course, are distributed pro rata to the membership.

MR. STEWART: When we come to this question of dividends, Mr. Hallinan, is there a normal rate of dividend which the Ontario Credit Union attempts to pay?

MR. HALLINAN: Yes, I would say that the average is around 4%. It has increased slightly over the past year. I remember about 20 years ago the average dividend paid was about 3½%. In more recent years I would suggest the dividend would hover slightly above 4%.

MR. STEWART: Then I gather from paragraph 45 of your brief, which is at the bottom of page 15, that after you provide for your 20% guarantee fund, you then determine what dividend can be paid. Let us take the dividends first. Does the determination of the dividend rate precede any provision for rebate on loan interest?

MR. HALLINAN: Not as a general rule. The Board of Directors of a credit union, after they have set aside the statutory reserve, usually draw up a resolution to be recommended to the annual meeting, and it usually includes the recommended dividend and the interest rebate.

MR. STEWART: So that the two come more or less contemporaneously?

MR. HALLINAN: That is correct.

MR. STEWART: I asked that question because you do say in paragraph 45 that a credit union pays a reasonable return on the members' savings, and if there are sufficient net earnings remaining, makes a rebate of loan interest.

MR. HALLINAN: Yes. Well, that can be explained by the fact that the Board of Directors of the credit

1 union makes a resolution. Now, in the preparation of
2 that resolution, the Board would say, "Well, all right,
3 a fair return would be, say, 4%. Now, if anything is
4 left over, what amount of rebate may we offer?" It is the
5 Board that decides that before it brings a resolution to
6 the annual meeting.

7 MR. STEWART: As far as your deposits are
8 concerned, you start off with a particular rate, and the
9 rate of interest you pay depositors does not vary from then
10 on.

11 MR. HALLINAN: It is at the pleasure of the
12 Board of Directors. The Board of Directors has the authority
13 to set the interest rate that the credit union will pay on
14 deposits. Now, they may vary it from time to time.

15 MR. STEWART: Yes, but I may not have made my
16 question plain. Let us suppose that the Board of one of
17 your credit unions is dealing now with the results of
18 operations for 1962, and it finds it has certain net
19 income available, and it sets aside this amount for the
20 guarantee fund. Then it will determine a rate of dividend
21 for 1962. It may determine a rebate on loan interest for
22 1962, but does it also consider its own sort of retroactive
23 increase in interest on deposits for 1962?

24 MR. HALLINAN: It could, but that is not
25 generally so. Usually the interest on deposits is deter-
26 mined early in the year.

27 THE CHAIRMAN: You are not moving on, Mr. Stewart?
28 Have you finished with that?

29 MR. STEWART: If you have any questions, Mr.
30 Chairman.

1 THE CHAIRMAN: I have a question at this point.

2 I understand that this meeting of the Board of Directors
3 at the end of the year is to decide and it does decide
4 the distribution of the net earnings as between share-
5 holders and borrowers. In fact, very seldom does it make
6 any adjustment on deposit accounts. What are the general
7 considerations which a Board takes into account in coming
8 to its conclusions as to the distribution? I would have
9 thought that would be rather difficult, and I would like
10 to know what are the usual determinants which the Board
11 would consider?

12 MR. BURTON: If I may answer that, Mr. Chairman,
13 one of the considerations, of course, is the past. Shall
14 we pay 4% this year or shall we pay $4\frac{1}{4}\%$? Another considera-
15 tion is the relationship between the borrower and the saver,
16 and it may well be if a credit union does not have suffi-
17 cient borrowers, in other words it has surplus money, then
18 it may consider an increased rebate on loan interest to
19 encourage further borrowing, or if it is the other way
20 around, if they have no trouble getting money out and can't
21 get enough money in, they may say, "Let's give a higher
22 dividend this year and keep the rebate down," and try and
23 encourage savers.

24 They try to balance the situation up because the
25 ideal is always to loan out just what your members put in;
26 not to have to borrow or to have too much surplus. These
27 are the main factors I would think.

28 THE CHAIRMAN: Mr. Stewart, I let you get beyond
29 the statutory reserves, and I had a question on that which
30 I think I should have injected at that time, perhaps. The

1 20% guarantee fund established by statute continues,
2 apparently, indefinitely to accrue at the rate of 20% of
3 income.

4 It occurs to me as this goes on it could well
5 exceed the assets if it is in no way related to the assets.

6 MR. HALLINAN: If I may answer that, there is
7 provision in the Act which says that once a guarantee fund
8 equals 10% of the assets of the credit union, the credit
9 union, in that year, is not required by law to set aside
10 the 20%.

11 THE CHAIRMAN: Thank you.

12 COMMISSIONER GRANT: I noticed: last year, you
13 increased your guarantee fund by about 27%. The allotment
14 of 20% of your loans came to \$2,497,975 which is about
15 27% increase:

16 MR. BURTON: Yes. Of course, we do not know
17 here the amounts which may come to be written off out of
18 that increase. The increase is 27%, but at the end of the
19 next year quite a bit of that increase may have been
20 written off from bad debts.

21 MR. STEWART: May I just ask a question about
22 that 27% figure? At least, I understood Mr. Grant to
23 say 27%, and the figure of \$2,497,975 appears to me to be
24 20%, not 27% of the 12,489,000.

25 COMMISSIONER GRANT: I am referring to the
26 guarantee fund, the nine million.

27 MR. STEWART: Yes, I see. That is, however, the
28 aggregate reserve in the guarantee fund, not the amount
29 that was allocated in respect to 1961.

D/MC/ss 1

COMMISSIONER GRANT: I see in 1961 it was

2 increased by \$2,497,000.00, which is 27% of the total.

3 MR. STEWART: I see. I beg your pardon.

4 COMMISSIONER GRANT: Which struck me as being
5 a rapid increase in one year. I was wondering if that
6 was to be maintained, my thinking was along the lines of
7 the Chairman, that fund could go to a very large figure.

8 MR. BURTON: My answer to that, Mr. Grant,
9 may be a better guide would a percentage of outstanding
10 loans. Although the guarantee fund has grown that much,
11 the total loans in the credit union have also grown in
12 the year. Appendix 4, at the foot of the first page, we
13 show the guarantee fund as percentage of shares and
14 deposits and also as a percentage of loans. One is 4.68%
15 and one 4.69%. It may be that the guarantee fund was a
16 little low and now it is being brought up to a more normal
17 percentage. As Mr. Hallinan pointed out, there is
18 provision against the guarantee fund becoming too large.

19 COMMISSIONER GRANT: Have you the figures to the
20 end of 1962? We just have them for 1961. Have you any
21 figures as to what the total loans were at the end of
22 1962?

23 MR. BURTON: No, they are being processed now.
24 They are not yet available.

25 MR. HALLINAN: They are likely to be available
26 in September. We have some university students that come
27 in the Summertime and work on statistics for us.

28 THE CHAIRMAN: Would this be a good time to break
29 off? I have a telephone call to make, and I would like to
30 break some time in the morning.

1 MR. STEWART: As you wish.

2 THE CHAIRMAN: I would prefer it now if it would
3 suit all concerned.

4
5 ---The Hearing was adjourned for ten minutes.

6
7 THE CHAIRMAN: Will you continue, Mr. Stewart.

8 MR. STEWART: Thank you, Mr. Chairman. Mr.
9 Hallinan, there is one other subject on which I would like
10 to get some information from you as to facts. Perhaps
11 we can turn to page 26 of your brief, the paragraph
12 beginning about halfway down the page where you deal with
13 the question of delinquent loans.

14 Now, you say there at the end of 1961 there were
15 delinquent loans aggregating about 5% of loans outstanding
16 and that roughly \$2,300,000.00 of those loans, or 1.1% of
17 loans outstanding, were in default for more than six
18 months, six months or more, and loans aggregating
19 \$574,000.00 were written off during the year.

20 Now, I would like to refer you to this pamphlet
21 issued by Credit Union National Association, and in
22 particular to page 30, where this statement is made:

23 "Because of their very nature as well
24 as their safeguards, credit unions have an out-
25 standing record of safety. Especially remarkable
26 is the repayment of personal loans which are
27 the credit unions' chief investment. Less than
28 one-fifth of one percent of these loans prove
29 uncollectable based on the experience of many
30 years. The members honour their obligation to

1 their fellow members."

2 Now, are you suggesting in your brief that the
3 experience in Ontario is essentially different from the
4 experience that is reflected in that statement?

5 MR. BURTON: No, Mr. Stewart, I think the
6 apparent discrepancy there is accounted for by this fact
7 that the reference in our submission that 1.1% of loans
8 outstanding had been delinquent for six months or more,
9 part of the explanation could be that we are calling a
10 loan seriously delinquent on which no amount of principal
11 has been paid for six months or more, but in many cases
12 payments of interest could be made. In some cases all
13 the interest could have been paid and a large proportion
14 of the loans which are delinquent six months or more in
15 given time are ultimately collected or very seriously
16 reduced.

17 We would say our experience in Ontario is quite
18 average. We haven't any exact figures, although individual
19 credit unions do in some cases. That is the explanation.

20 MR. STEWART: Now, I would like to go back to
21 page 20 of your brief and I find there in paragraph 56
22 you set out certain quotations from the report of the
23 Royal Commission on Co-operatives which made its report
24 in 1945. Now, I think from the figures that were quoted
25 from the booklet earlier it would be clear that in 1945
26 the assets of credit unions in Canada were approximately
27 10% and the number of members of credit unions in Canada
28 was approximately, let us say, 20% of the corresponding
29 figures for today. Is that fair enough?

30 MR. BURTON: That is right.

1 MR. STEWART: And I think you mentioned that
2 in Ontario this type of organization became practically
3 possible only in 1938, so between 1938 and 1945 I suppose
4 the movement in Ontario was just getting off the ground?

5 MR. HALLINAN: That is correct.

6 MR. STEWART: Now, we have also I think agreed
7 from this pamphlet that at the present time credit unions
8 are supplying about $11\frac{1}{2}\%$ --- when I say at the present
9 time, I mean at the end of 1961 --- credit unions were
10 supplying about $11\frac{1}{2}\%$ of the installment credit of this
11 country and they held about 13.2% of the personal savings
12 of Canadians. Is that correct?

13 MR. HALLINAN: That is right.

14 MR. STEWART: Well then, Mr. Hallinan, I would
15 be interested in your comment on this: Having regard to
16 this growth which has occurred and to the percentages of
17 installment credit and personal savings which credit
18 unions represent today in Canada, have they not become a
19 very significant element in the financial life of Canada
20 and are they not in fact actively competing with the
21 banks and other financial institutions for the deposit
22 of the small saver and for the consumer-type loans?

2 23 MR. HALLINAN: That is a very good question,
24 sir. I would suggest in answer to the first question we
25 do believe that the credit union movement is playing a
26 very significant part in the economy of this great
27 country. In answer to your second question, we would
28 rather look on it as other financial institutions competing
29 with us.

30 MR. STEWART: In any event, there is competition.

1 MR. HALLINAN: Depends which way you look at it.
2 We feel by organizing credit unions and their very
3 tightly knit bond of association, people create a measure
4 of economic security, being able to do it for themselves
5 and by themselves. It is what other financial institu-
6 tions up until recently were not able to do. Until
7 recent years the Chartered Banks showed no interest what-
8 ever in personal loans. Added to that the Credit Union
9 movement, through the institution of its own mutual
10 insurance society has been able to provide loan protection
11 and life savings insurance for the members. Many years
12 afterwards, when other financial institutions saw that
13 we made a success, they are coming into it. Very
14 recently the banks gave that loan protection insurance.
15 I understand some of the Trust Companies are offering
16 premium life insurance on their savings.

17 We feel now as we did in 1945, that the reasons
18 that prompted the Royal Commission of that date to make
19 the observations they did then are just as valid today.
20 We believe credit unions are performing a highly useful
21 function in assisting people who are unable to take
22 effective advantage of savings and loan facilities
23 provided by other lending institutions.

24 MR. STEWART: One of the portions of the 1945
25 report which you quoted at the bottom of page 20, Mr.
26 Hallinan, is this: "We" --- that is the Royal Commission
27 of 1945 --- "...are satisfied that that the credit unions
28 perform a highly useful function in assisting people
29 who are unable to take effective advantage of savings and
30 loan facilities provided by other lending institutions."

1 Now, is it not the case now that there are
2 more alternative sources of loans available to the small
3 man than there were in 1945?

4 MR. HALLINAN: I think that is a fair statement.

5 MR. STEWART: Is it not also the case that if
6 the small man wishes to place his money out on deposit or
7 loan he is not lacking in facilities at the moment outside
8 the Credit Union movement?

9 MR. BURTON: Well, it is true, Mr. Stewart,
10 that there may be more facilities for the small man now,
11 particularly as Mr. Hallinan said, because they have had
12 to raise the sights in the small loan field and the
13 insurance field on loans and savings. There is still
14 quite a bit true in these words from the Royal Commission
15 in 1945. For instance, if many of our new members were
16 to go to the bank for a loan, the bank which offers an
17 insured loan at a slightly less cost than the credit
18 union, if he has not been in his present employment for
19 two years very likely he won't get the loan. In the
20 bank's advertisement they have six boxes for check marks
21 and if you can put "Yes" to each box, you can be reasonably
22 sure you are eligible for a loan.

23 Therefore, to us it means it is much harder
24 for a credit union member to obtain a loan from that
25 bank than from his own credit union where he would not
26 have to pass those six tests. There is still quite a lot
27 of validity in the co-operatives' contention back in
28 1945.

29 As far as the finance companies are concerned,
30 the rates, of course, are generally quite a bit higher than

1 the credit union.

2 MR. STEWART: Let me put this to you, because
3 what we are here for essentially is to get your reaction
4 to questions of this nature. If it is the case, as it
5 appears to be, that the dividends and interest you pay
6 your shareholders and depositors are more or less
7 comparable with the rates of return they could obtain else-
8 where on shares and loans or deposits, and if what you
9 charge for loans you make to others is also comparable
10 with rates of interest charged by other forms of lending
11 institutions, then if you are not paying the taxes which
12 they do, are you open to the suggestion that your
13 operations must be less efficient than theirs?

ET/dpw 1 MR. BURTON: I don't quite get the point of the
2 question.

3 MR. STEWART: Let me rephrase it. If there is
4 another type of institution whose shares one of your
5 members can buy from which he will get approximately the
6 same rate of dividend return he gets from you, if there
7 is another type of institution in which he can deposit his
8 monies if he wishes to, from which he gets more or less
9 the same rate of return as he does from you, by the same
10 token if there is a borrower and he can borrow from some
11 other institution at very much the same rate as he borrows
12 from you, now that other institution, let us assume, is
13 paying tax at the ordinary corporate rate. You people,
14 at the moment, are not paying tax at all.

15 Now, it seems to me, as I say, that it is a
16 pertinent question and certainly it is one on which I
17 would like to get your reaction. If these other people
18 can absorb the corporate tax and still compete with you
19 both on what comes in and what goes out, so to speak, are
20 you operating as efficiently as they are?

21 MR. BURTON: I think the answer to that, Mr.
22 Stewart, may be that in some of the smaller credit unions
23 the operation might not be so efficient, but certainly
24 with the larger ones it is probably just as efficient as
25 the small loan companies. Of course, as far as the small
26 loan companies are concerned, they are presumably able to
27 pay a good return to their investors, but their loan
28 interest rate, on the average, is considerably higher than
29 the average credit union, and again you really have to
30 separate the smaller and larger credit union because many

1 of the larger credit unions are actually returning 20 or 25
2 or even more per cent of the interest charged to members,
3 which in some cases reduces it to 4 or $4\frac{1}{2}$ per cent compared
4 with the banks' six. Therefore, the borrowers are getting
5 a much better deal. It is a demonstrable fact in the very
6 large credit unions in Ontario, and I speak for them
7 generally, the larger they get the more efficient they
8 operate. Their expense ratio to gross income is much
9 lower, and they can often return maybe 5% on shares and
10 25 to 30 per cent on the interest, so I think you must
11 differentiate between the small struggling credit union
12 just trying to serve its small number of members as effi-
13 ciently as possible and the bigger credit union which has
14 a full-time paid staff.

15 Many of the small credit unions work purely on
16 a voluntary staff basis, so naturally you do not get such
17 an efficient operation. I think that would be your
18 answer.

19 MR. STEWART: Thank you very much, and if time
20 permits I will come back to that. Let me ask you this:
21 in what way does a credit union differ from a service
22 co-operative?

23 MR. HALLINAN: I would say one big difference,
24 Mr. Chairman, is that a credit union is limited to dealing
25 only with its own members. It is not permitted by law to
26 deal with the public generally. That, in my opinion, is
27 what the basic difference is.

28 MR. STEWART: Of course, a service co-operative
29 does not have to go outside its own membership, does it?

30 MR. HALLINAN: But I think one of their

1 principles is open membership, and in a credit union there
2 is no such thing as open membership.

3 MR. STEWART: Well now, Mr. Hallinan, what I was
4 leading up to with that question, as you can imagine, is
5 this: if the operations of a credit union are essentially
6 the same as those of a service co-operative, why should
7 credit unions not be taxed in the same way as co-operatives?

8 MR. BURTON: By a service co-operative you mean
9 the co-operative ---

10 MR. STEWART: Which provides a service of one
11 kind or another to its members.

12 MR. BURTON: You include there a trading co-opera-
13 tive dealing in production and distribution?

14 MR. STEWART: No, I do not think that type would
15 be called a service co-operative.

16 MR. BURTON: You are referring to the like of the
17 medical co-operative?

18 MR. STEWART: I suppose that would be an example,
19 yes.

20 MR. BURTON: Is it not true that the medical
21 co-operatives are exempt from tax? I am not certain of
22 this, but I believe the true service co-operatives are
23 often exempt under the Income Tax Act.

24 MR. STEWART: Without deciding that, let me just
25 see if I can give you some other suggestions as to what
26 would be included under the expression "service co-opera-
27 tive."

28 THE CHAIRMAN: Are you seeking a definition of a
29 service co-op?

30 MR. STEWART: Well, in effect, yes, or examples

1 of it.

2 THE CHAIRMAN: I think Mr. Walls can give you
3 one very quickly.

4 COMMISSIONER WALLS: If by this type of co-op you mean
5 one that the recipient of the patronage refund is taxable,
6 is one that is incorporated and servicing a line of busi-
7 ness that the members are in. That is probably not the
8 clearest wording, but I mean it is selling produce for
9 which the man depends on his livelihood, and that is the
10 type of co-operative where a recipient pays tax on
11 patronage dividend.

12 MR. HALLINAN: Any credit union dividend received
13 by the members is taxable in the member's hands.

14 MR. STEWART: I agree.

15 MR. BURTON: If that is the definition of
16 service co-op, is it not true that business is not confined
17 to the membership? The business may be confined to the
18 membership as far as buying produce of the growers, for
19 instance, but it is not confined to the membership as
20 regards the selling of that produce through the co-opera-
21 tive.

22 COMMISSIONER WALLS: It is only a co-operative
23 selling the produce of the grower.

24 MR. BURTON: But it is selling to the public.

25 COMMISSIONER WALLS: Or selling to the whole-
26 saler or selling to whichever medium of trade, but it is
27 a co-operative selling the produce of its members.

28 MR. BURTON: So we would point out an important
29 difference here between the service co-operative and credit
30 union. A credit union deals solely with its members. It

1 receives money from its members and it loans to its
2 members whereas the service co-op receives produce from
3 its members but then it sells them to all and sundry accor-
4 ding to the type of co-operative it is.

5 MR. STEWART: Mr. Chairman, I think I might read
6 another definition of service co-operative. I take this
7 from the booklet entitled "Recent Growth in Canadian
8 Co-operatives," published by the Canadian Tax Foundation
9 in 1962. That book contains three articles, the second of
10 which is entitled "Postwar Taxation on Canadian Co-opera-
11 tives," and was published in 1959.

12 At the bottom of page 3 of the second article I
13 find this statement:

14 "The group listed as service co-operatives
15 represents a miscellaneous collection of
16 activities including housing, rural electri-
17 fication projects, medical insurance, trans-
18 portation, recreational facilities, telephones,
19 restaurants, frozen food lockers, boarding
20 houses and other activities including the
21 operation of farm machinery and farms."

22 Now, I am not sure, Mr. Chairman, if Mr. Walls
23 would agree with that list or not.

24 COMMISSIONER WALLS: I am sorry, I was not
25 listening. I was looking it up to get the exact quotation
26 of what I just said and I was not listening. I apologize.

27 MR. STEWART: Not at all. I do not know that
28 this is too important, but perhaps you could glance at
29 this sentence and let me know if the co-operatives referred
30 to there are service co-operatives under your understanding

1 of the term.

2 COMMISSIONER WALLS: Yes. Perhaps I should
3 clarify my position. What you have got here and what you
4 quoted as an interpretation of service co-operatives is
5 quite correct. What I thought that you were attempting to
6 get at was the type of co-operative on which it is demanded
7 that on the patronage dividend the recipient is taxable,
8 and the two are not necessarily the same thing.

9 MR. STEWART: No, I quite agree. I think we are
10 on common ground, Mr. Walls. In the case of the credit
11 union the dividend paid to the member is taxable just as
12 patronage dividend is in the case of a co-operative.

13 What I am suggesting to you for comment is that
14 a credit union may perhaps be regarded as a co-operative
15 which is providing a particular type of financial service
16 to its members, and do I take from what you have said so
17 far that the only distinction you would draw between a
18 credit union and a service co-operative is that a credit
19 union confines its operations to its own members?

20 MR. BURTON: So do many of the service co-opera-
21 tives. The medical co-operative, the housing co-operative
22 - both of them are tax exempt and confine their operations
23 to membership only.

24 MR. STEWART: Some of these other so-called
25 service co-operatives, I take it, are not tax exempt?

26 MR. BURTON: No. Trading co-operatives and so
27 on are taxable.

28 MR. STEWART: Do you suggest as you confine your
29 operations to your members only, this differentiates you
30 from the ordinary run of co-operatives for tax purposes?

1 MR. HALLINAN: I would say that is a correct
2 statement, sir.

3 MR. STEWART: Now, when we come down to a
4 comparison of credit unions, not only with co-operatives,
5 but with the other types of financial institutions with
6 which you appear to compete, or if you prefer, which are
7 attempting to compete with you, why is it that you think
8 that they should be taxed but you should not?

9 MR. HALLINAN: We have no opinion on their status.
10 We maintain that any financial institution that operates
11 in the manner of a credit union should be treated exactly
12 like a credit union.

13 To go back to an earlier question of yours, Mr.
14 Stewart, you suggested that an individual person now
15 could invest money and get a similar return and almost get
16 the same deal when it came to borrowing. I do not think
17 that is quite true. I would like to amplify the remarks
18 that Mr. Burton made.

19 Many of our larger credit unions are able to
20 render their members a much more reasonable, cheaper
21 service than they can borrow the money from any other
22 financial institution. I am thinking of some of our
23 larger credit unions that can pay a return of, say, 4 to
24 5 per cent and either reduce their interest rates three-
25 quarters of one per cent or at the end of the year I have
26 known of a credit union in the city who have given a rebate
27 of 35%.

28 Now, that is an exception. It is not the
29 general rule, but the trend is in that direction, which
30 means that the net cost of that loan to that individual

1 member is considerably lower than he could get it from
2 any other financial institution.

3 We are, therefore, doing that member a real
4 service. We are increasing his purchasing power and
5 generally assisting society.

6 MR. STEWART: Let me come back to Appendix 3,
7 Mr. Hallinan. It relates to some 1,315 credit unions,
8 and the amount of income shown is some \$21,000,000. That
9 is gross income. Then after expense, the amount of income
10 shown, the amount of net income, is some \$12,489,000.
11 That would appear to work out on the average at just under
12 \$10,000 per credit union. If I divide \$12,489,000 by
13 1,315 I think I get something just under \$10,000. Do you
14 agree with that?

15 MR. HALLINAN: That is right, sir.

16 MR. STEWART: Now, on that basis - and I realize
17 that I am talking now about averages and that there will
18 be some below average and there will be some above average
19 if the average credit union in Ontario were taxed as an
20 ordinary corporation under the Income Tax Act, it would be
21 taxed at the low rate of corporate tax which applies to
22 corporations with taxable income up to \$35,000.

23 Now, my question is this: if that is the fact,
24 and if the average credit union were subjected to a tax in
25 Ontario of 23% on its income of \$10,000, would that, in
26 fact, have a serious adverse effect on the operations of
27 that union?

28 MR. BURTON: Mr. Stewart, first of all, if, for
29 instance, the Government decided to tax credit unions the
30 same as other financial concerns in 1964, 1965, it is very

1 doubtful whether such profit figures or net earning
2 figures as are shown in these statistics would appear
3 because the majority of credit unions will presumably do
4 what some are beginning to do already, and reduce their
5 interest rates from 1% to three-quarters, which is one of
6 the things they would do to cut down their net earnings.

7 MR. STEWART: Yes, but you are suggesting what
8 they would do - I think the expression which is commonly
9 used is "price out" in the case of co-operatives, at any
10 rate? Would that, in fact, be necessary, Mr. Burton,
11 when what you are talking about is 23% of \$10,000 in the
12 average case or a tax of \$2,300 per annum?

13 MR. BURTON: Yes, because the credit union
14 people feel that they are borrowing their own money, and
15 this is true of the credit union movement. They put their
16 money in and the same people borrow it. Some do not
17 borrow, of course. Some save more than others, but they
18 are borrowing one another's money, and therefore they
19 would say, if it were to be taxed, we must, as near as
20 possible, operate at cost. This is a very legitimate way
21 of doing it, as one large credit union in the province
22 that I know of has reduced the interest rate to three-
23 quarters of one per cent. They do not pay any rebate,
24 and automatically they are reducing their net earnings.

25 Then, if the credit union encourages deposits
26 rather than shares on which a fixed interest is paid
27 which is charged as an expense, this would further reduce
28 the net profit and it would reduce this figure here of
29 twelve-and-a-half million. It could quite reasonably be
30 reduced two or three million, which would bring down your

1 average per credit union to about \$2,500. Twenty-three
2 per cent of \$2,500 is pretty small, and of course they
3 could not possibly object to that.

4 Therefore, to go back to your other question,
5 we would not feel it would have an adverse effect on the
6 credit union movement.

7 MR. STEWART: When you say it would not have an
8 adverse effect on the credit union movement is that
9 because the method of operating would be altered?

10 MR. BURTON: Because the method of operating
11 would tend to be as near cost as possible because the
12 intention of the credit union when it goes into operation
13 is not to make a profit. It only goes into operation to
14 serve its members.

15 MR. STEWART: That is, of course, the philosophy
16 behind the movement, but is there not, Mr. Burton, a real
17 question now having regard to the growth of the movement
18 and having regard to the increased size of the average
19 credit union, whether these credit unions are not in fact
20 in business for profit?

21 MR. BURTON: We maintain that the question of
22 size is irrelevant because the principle and philosophy
23 is exactly the same. Because it has multiplied ten times
24 in 20 years does not change the original intention. There
25 may be the impression among very big credit unions that
26 they are in business to make a profit, but it is the other
27 way around. Profit is incidental to their growth. The
28 bigger they get and the lower their costs, the higher
29 their proportion of net earnings, but this picture would
30 be altered if they attempted to operate at cost, and the

1 credit union which could most successfully do this would
2 be the large one because of their practices of budget
3 making and because they know so well how they did last
4 year and they can anticipate what they are going to do
5 next year. They are very stable, so we maintain any
6 business for profit is an illusion, just because they
7 happen to make a large surplus, the bulk of which comes
8 back to the members.

9 MR. STEWART: Now, Mr. Chairman, the hour has
10 moved on and this is a matter which we could obviously
11 discuss at some length but I think I had better desist at
12 this stage and close my examination.

13 THE CHAIRMAN: All right, Mr. Stewart, thank you.
14 I think there will be a few questions up here. Just
15 continuing with the last point, I do not think I know the
16 distribution between dividends and rebates. They are set
17 forth in a total amount of \$8,926,000 on Appendix 3. It
18 just occurs to me if I take 4% of the total amount of
19 shares outstanding I would get over seven million dollars,
20 which does not leave an awful lot for interest rebates.
21 Is there a distribution between the two figures?

22 MR. HALLINAN: Unfortunately we have not a break-
23 down between dividends and rebates, Mr. Chairman. These
24 statistics were provided by the Government of Ontario,
25 and they did not give a breakdown.

26 THE CHAIRMAN: Would you have that broken down
27 in your own figures which do not exactly match these?

28 MR. BURTON: No, we do not have them here, Mr.
29 Chairman. I could give you a very rough guide. I think
30 you will find that the dividends probably amount to just

1 over two-thirds of that figure. This is based on the
2 average rebate of 16%, and the interest rebates would
3 account for just under a third.

4 THE CHAIRMAN: Thank you.

5 COMMISSIONER GRANT: I would like to refer to
6 the method of acquiring shares, and would you please
7 explain how shares are allotted?

8 MR. HALLINAN: First of all, we in the credit
9 union movement would like to refer to shares as units of
10 savings. In other words, the credit union movement is
11 built up trying to get people to acquire the habit of
12 thrift, and the only way they can do that is by making
13 regular deposits in the credit union usually every pay day
14 or weekly or bi-monthly or monthly. As each five-dollar
15 unit comes in, the member has acquired a new share.

16 As has been pointed out earlier, sir, there are
17 no share certificates issued. The receipt of the share
18 is evidenced by a pass book. The shares do not fluctuate
19 in value. They remain constant, usually at \$5 - not more
20 than \$10 in this province - and the individual builds up a
21 savings account in his credit union by regularly depositing
22 in his share or deposit account. It is a continuing
23 process - we hope and try to encourage it to be a continuing
24 process.

25 COMMISSIONER GRANT: The borrower does not
26 receive any shares?

27 MR. HALLINAN: He is encouraged to continue
28 saving whilst he is repaying his loan.

29 COMMISSIONER GRANT: So the borrower ---

30 MR. HALLINAN: He is a member as well as the

1 saver.

2 COMMISSIONER GRANT: The borrower has a deposit
3 account with you as well as the loan account?

4 MR. HALLINAN: Yes. In other words, before a
5 person can borrow he must become a member. To become a
6 member he must pay an entrance fee of, usually, 25 cents,
7 and make a subscription for at least one share and then
8 he becomes eligible to borrow.

9 COMMISSIONER GRANT: On your balance sheet your
10 personal loans about equal your shares?

11 MR. HALLINAN: That is correct.

12 COMMISSIONER GRANT: In addition you have mort-
13 gage loans totalling \$34,000,000 at the end of 1961.
14 Those mortgage loans are made by the union without any
15 supervision from the central organization?

16 MR. HALLINAN: Well, I would not say without any
17 supervision. The Department of Insurance has laid down
18 certain rules and regulations that a credit union must
19 follow before it can get into the mortgage field. In
20 other words, it may not at any time have more than 25%
21 of its assets invested in mortgages. They may lend up to
22 60% of the appraised value of the house, and the loan is
23 secured by a first mortgage on real estate.

24 COMMISSIONER GRANT: Are your mortgage loans,
25 on a percentage basis, increasing quite rapidly?

26 MR. HALLINAN: Speaking of this province only,
27 sir, I would say there is no great increase in the mortgage
28 field. It is a very slow but gradual increase. Nothing
29 spectacular.

30 COMMISSIONER GRANT: In your investment account

1 on the assets side of your ledger, you show a total of
2 \$26,000,000 which would consist of your guarantee fund,
3 your undivided earnings, your other funds and reserves.
4 Am I right so far?

5 MR. HALLINAN: May I ask Mr. Creswell, who has
6 statistics on that, to answer that question?

7 MR. CRESWELL: Mr. Chairman, these guarantee
8 funds are not, in the Province of Ontario, required to
9 be invested by law, nor are the undivided earnings.
10 However, I venture to say possibly your statement is
11 correct in that the surplus funds on hand must go some
12 place and they have probably gone in the bank. Our invest-
13 ments are ones that fluctuate all the time because our
14 attempt is to loan out of our funds to our members. There-
15 fore, as a result, we find that only 3.3% of our total
16 assets are invested in long-term investments which usually
17 are government bonds or government guarantee bonds.

18 The remaining 5.8% of this amount is in the
19 hands of our League Central, and other Centrals, perhaps,
20 throughout Canada hold these funds so that they can loan
21 it out to other credit unions that are in need of funds.

22 COMMISSIONER GRANT: You would think about
23 \$7,000,000, probably, in the investment account would be
24 in government bonds?

25 MR. CRESWELL: That would be correct.

26 COMMISSIONER GRANT: Your investment account
27 also, then, includes loans to members?

28 MR. CRESWELL: No, the investments would not
29 include loans to members. The credit union would invest
30 its funds with our League, for example.

COMMISSIONER GRANT: I understand.

MC/ss 1 THE CHAIRMAN: In reply to Mr. Grant I think
2 you stated in order to secure a loan a borrower must become
3 a member and that required 25¢ payment on a subscription
4 to one share of capital stock which was \$5.00. Is that
5 correct?

6 MR. HALLINAN: Not exactly, sir. A person, to
7 become a member of a credit union, pays an entrance fee
8 of 25 cents and then he must subscribe for at least one
9 share and make a down payment on that share.

10 THE CHAIRMAN: What is the down payment?

11 MR. HALLINAN: It could not be less than 25
12 cents. In all practical cases they usually buy a share
13 outright.

14 THE CHAIRMAN: So in order to become a member
15 he pays an entrance fee of 25 cents and makes a down
16 payment on a \$5.00 share and the down payment is not
17 generally less than 25 cents.

18 MR. HALLINAN: That is correct.

19 THE CHAIRMAN: We don't have your statement on
20 the Ontario Organization, Ontario Credit Union League
21 Limited.

22 MR. HALLINAN: We have it in the annual report.

23 MR. BURTON: We have six copies here.

24 THE CHAIRMAN: They are not with us here, I am
25 afraid. We would like to see them.

26 THE SECRETARY: I would like to enter one of
27 these into the record as an exhibit, Mr. Chairman.

28 MR. STEWART: Could we at the same time enter as
29 an exhibit this pamphlet which Mr. Hallinan has identified,
30 the Credit Union Yearbook for 1962.

1 THE SECRETARY: Exhibit No. 74 and Exhibit 75.

2 MR. STEWART: Which is which?

3 THE SECRETARY: 74 will be the Credit Union
4 Yearbook.

5 MR. BURTON: Could we use that one until the
6 questioning is finished?

7 THE CHAIRMAN: Yes.

8
9 ---EXHIBIT NO. 74: Credit Union Yearbook
10 for 1962.

11 ---EXHIBIT NO. 75: Annual Report of the
12 Ontario Credit Union
13 League Limited.

14 COMMISSIONER BEAUVAIS: I have a couple of
15 questions to ask. The brief says that the credit union
16 does not exist to compete with other organizations, and on
17 a question by Mr. Stewart you said that there are other
18 banking institutions are competing with you, because
19 they were formed or they entered into that kind of
20 business after you had entered. Is it not true, however,
21 that in the Province of Quebec there are two savings
22 banks that were long established before the credit union,
23 namely, the Quebec Savings Bank, 110 years, and the
24 Montreal City and District Savings Bank.

25 MR. HALLINAN: That could quite possibly be true,
26 Mr. Chairman. Unfortunately I am not as familiar with the
27 scene outside of Ontario as I would like to be.

28 COMMISSIONER BEAUVAIS: Nevertheless, in Quebec
29 they might compete with two Quebec savings banks.
30

1 MR. HALLINAN: That is a possibility.

2 COMMISSIONER BEAUVAIS: Thank you. Another
3 point, I am coming back to the rate of interest, 1% per
4 month. You said that the average rate was about $5\frac{1}{2}\%$,
5 I think. The effective rate per annum remains at 12%?

6 MR. HALLINAN: 12% simple interest is effective.

7 COMMISSIONER BEAUVAIS: That is all.

8 COMMISSIONER WALLS: You mentioned the fact
9 that the banks are now granting loans on six tests. To
10 what extent do you govern the loaning to new applicants?
11 Is it necessary today for you to require an endorser in
12 granting a loan to somebody you have no previous contact
13 with?

14 MR. HALLINAN: Not necessarily, Mr. Chairman.
15 The regulations regarding loans are generally set forth
16 in the credit union bylaw. The credit union may loan
17 up to \$200.00 unsecured and from \$200.00 to \$3,000.00 on
18 security. The security that is frequently given is a
19 wage assignment or a chattel mortgage. If a member comes
20 in to borrow \$2,000.00 to purchase an automobile, the
21 credit union will take a chattel mortgage on that loan.

22 The big thing that guides the Credit Committee
23 in granting a loan is the character of the individual
24 person. That bears out once again the tremendous advantage
25 of having a credit union work within a common bond of
26 association. You work with this person that has applied
27 for the loan, you go to the same church, live in the
28 same well-defined community, a member of the same fraternal
29 organization. You know the person.

30 The most important thing in guiding a Credit

1 Committee in dealing with a loan application is the
2 person's character, his ability to repay. The loan must
3 be to a provident and productive person. Sometimes you
4 are doing a favour by refusing a loan if in the wisdom
5 of the members of the Credit Committee we would be doing
6 that man a disservice if he borrowed beyond his means to
7 repay or for some foolish purpose.

8 COMMISSIONER WALLS: You still operate on the
9 same basis as the bank insofar as if an applicant is
10 doubtful and he can get an endorser whose credit standing
11 is good, then you will grant a loan based on endorsement
12 of a note.

13 MR. HALLINAN: We can do it that way. We also
14 must take into account the point of view of justice to
15 the person endorsing. If a person is a known deadbeat
16 and he came and said he could get a reputable person to
17 endorse the loan, we would not necessarily grant the
18 loan. We would surmise that the actual borrower was not
19 worthy of the note and if the loan did become delinquent
20 the co-signer would be held responsible and that would
21 be for him disservice.

22 COMMISSIONER WALLS: Can all of your depositors
23 withdraw their money at any time?

24 MR. HALLINAN: Yes. The credit union may require
25 30 days' notice to withdraw deposits or 60 days' notice
26 to withdraw shares. However, in practice it is very
27 rarely the fact. For all practical purposes he can come
28 into the credit union office and withdraw.

29 COMMISSIONER PERRY: I have three or four
30 questions which are closely related. First of all, could

1 you explain the basis of the emphasis on shares in the
2 credit union movement? I notice someplace in your brief
3 you say share ownership has always been regarded as the
4 fundamental source of capital. Is there some philosophy
5 behind this?

6 MR. HALLINAN: Yes, there is. The philosophy
7 is this: The credit unions are primarily set out to
8 encourage people to acquire the habit of thrift. The
9 best way they can do that is making regular deposits in
10 the share account in the credit union. We like a person
11 to think of creating a measure of economic security. We
12 encourage him to leave it in and not withdraw it. If he
13 is in need of funds for a short term we recommend he
14 leave his savings in and borrow the money.

15 COMMISSIONER PERRY: The fact being there is
16 something more tangible about having a share account than
17 simply having a deposit, I suppose.

18 MR. HALLINAN: That is quite correct.

19 COMMISSIONER PERRY: Another question is whether
20 you have any views as to the possible ultimate growth of
21 the credit union movement in Ontario.

22 MR. HALLINAN: Well, of course the credit union
23 movement by their very nature is dynamic. The ideal
24 situation would be if every man, woman, and child in this
25 great country were a credit union member. That ideal, of
26 course, will never be reached. As the economy of the
27 country develops, new industries come into being. We
28 always encourage the formation of a credit union wherever
29 it is warranted.

30 COMMISSIONER PERRY: Would you think if eventually

1 the whole financial system were operated by credit
2 unions there would be still authority in your argument
3 you should not pay income tax?

4 MR. HALLINAN: I would think so.

5 THE CHAIRMAN: What is that?

6 COMMISSIONER PERRY: He would think so. Several
7 places in your brief you mentioned, and I don't doubt it
8 at all, that taxes paid both on dividends and rebates of
9 interest. Just what is the machinery by which you report
10 these financial transactions both to your members and to
11 the Income Tax Department?

12 MR. HALLINAN: Every credit union annually
13 submits the usual returns to the Income Tax Department the
14 same as any other corporation that pays dividends.

15 COMMISSIONER PERRY: What about the rebates of
16 interest on borrowing?

17 MR. HALLINAN: Of course that is only true in
18 the case of a business loan where the businessman has
19 borrowed money and has used the interest that he has paid
20 as a legitimate expense. If it is in the case of an
21 individual person it means he has borrowed that money at
22 a lower cost than it would appear.

23 COMMISSIONER PERRY: What is the actual machinery
24 by which you bring about this result? Is it a credit
25 against the outstanding loan?

26 MR. HALLINAN: Usually the dividends are credited
27 to the member's share.

28 COMMISSIONER PERRY: I am sorry, I mean the
29 rebate of interest.

30 MR. HALLINAN: The same way.

1 COMMISSIONER PERRY: It is made as a credit?

2 MR. HALLINAN: Yes.

3 COMMISSIONER PERRY: Would you give us some
4 idea of what are the trends of growth within the various
5 types of Credit Unions? I see that in Ontario industrial
6 unions are the largest single group. Is this where the
7 growth is now taking place?

8 MR. HALLINAN: Yes, in this province it is chiefly
9 in the industrial field.

10 COMMISSIONER PERRY: Could you just for our own
11 information mention a few of these industrial unions
12 which are now quite large.

13 MR. HALLINAN: The largest industrial credit
14 union in Canada is 10,000 employees of the Steel Company
15 of Canada in Hamilton. They have two or three credit
16 unions in the province, Stelco they call them. We have
17 many larger credit unions. For example, the Hydroelectric,
18 Bell Telephone, Ontario Municipal Employees, we have
19 many credit unions in the civil service, both Federal,
20 Provincial and municipal. In the automobile industry,
21 there is the Autoworkers in Oshawa at the General Motors.

22 COMMISSIONER PERRY: What would be a large
23 industrial credit union in Toronto, for example?

24 MR. HALLINAN: Hepco.

25 COMMISSIONER PERRY: The Hydro?

26 MR. HALLINAN: Yes. They have assets of about
27 twelve million.

28 THE CHAIRMAN: Roughly how many members would
29 they have?

30 MR. HALLINAN: They have about 12,000 members at

1 Hepco.

2 THE CHAIRMAN: I thought you indicated a limit
3 was placed by Statute of 6,000.

4 MR. HALLINAN: That is for community types.

5 COMMISSIONER PERRY: What is a common community
6 type of union? Could it be such a thing as all the persons
7 in one town?

8 MR. HALLINAN: Take the Town of Clinton, Ontario.
9 They have a closely-knit credit union there. There is
10 also Dundalk. It is another type of community union that
11 serves the people in the Dundalk area.

12 COMMISSIONER PERRY: Could you conceive of a
13 community type union in Metropolitan Toronto?

14 MR. HALLINAN: No, that is out as far as the
15 Department goes.

16 COMMISSIONER PERRY: Because of the 6,000
17 membership?

18 MR. HALLINAN: Yes. It has a potential of
19 6,000. As long as the population is more than 6,000 the
20 Department will not grant a charter.

21 COMMISSIONER PERRY: Then you mention that some
22 credit unions took deposits mainly as a facility for
23 checking. Is this sort of thing on the increase, or what
24 is likely to happen?

25 MR. HALLINAN: I would say not appreciably so.
26 At the present time only 6% of the credit unions are using
27 it and of those 6%, it is only a small percentage of the
28 members, according to our records, that are taking
29 advantage of this secondary checking service.

30 COMMISSIONER PERRY: These instruments are

1 issuable to third parties like any ordinary bank cheque.

2 MR. HALLINAN: That is true.

3 COMMISSIONER PERRY: Are there credit unions
4 which engage in active programs of advertising in the
5 public press or radio?

6 MR. HALLINAN: Yes, there are some, although
7 advertising in the public press is not too effective,
8 because before a person could become a member they must
9 share an original common bond. In Oshawa the Autoworkers'
10 Credit Union membership is limited to employees of the
11 General Motors Corporation. If they put an ad in the
12 local press they could conceivably have hundreds of people
13 replying to the advertisement who would not be eligible
14 for membership, not employed by General Motors. Take a
15 church credit union. If they put an ad in the paper,
16 unless the person was a member of that parish or congrega-
17 tion, they would uneligible for membership.

18 COMMISSIONER PERRY: I seem to remember seeing
19 advertisements that did appear in the press, but these
20 would be in the terms that they were drawing to the
21 attention publicly of eligible members the services of the
22 credit union.

23 MR. HALLINAN: That could be.

24 COMMISSIONER PERRY: That is all, I think, Mr.
25 Chairman.

26 THE CHAIRMAN: Continuing that thought
27 about public relations, I observe that the Ontario League
28 spends about \$176,000.00 on public relations which, I
29 think, is probably pretty largely spent on your news, which
30 has a circulation of 100,000 a month. I expect it is also

1 expended on T.V. and press. Would that be right?

2 MR. HALLINAN: No, I am afraid we spend very
3 little on the T.V. or press. We put on a contest, to
4 draw attention to the credit union, a selection of Miss
5 Ontario Credit Union. We spend a few dollars there.

6 THE CHAIRMAN: Most of that sum would be spent
7 on the magazine, would it?

8 MR. HALLINAN: That is true, yes.

9 COMMISSIONER MILNE: I have just one question
10 to ask of Mr. Hallinan, and it deals with family
11 financial counselling. It is not an involved question at
12 all. I was interested in that point and wondering really
13 if the type of counselling that is given here is by
14 trained personnel, if this is a place where Honoraria
15 would be required and to what extent this counselling
16 is given.

17 MR. HALLINAN: The financial counselling is
18 a relatively new development in this League. The textbooks
19 prepared are prepared by experts in that field. We have
20 adopted, through our own Educational Department, to put it
21 on a Chapter level, that is a group of credit unions, say,
22 in the City of Toronto or Hamilton. To illustrate the
23 point, last week the second of two family counselling
24 classes was put on. The first one was for the ladies
25 where they had experts who explained the proper way to
26 purchase clothing, how to get value for it. The one
27 prior was put on by the meatpacking plants showing to the
28 wives particularly the best method of purchasing meat,
29 where you get the most value for your dollar. Then it
30 goes on to further counselling in the method of purchasing

1 automobiles, family budgeting, which is a very important
2 thing. It is that type of thing we are moving.

3 COMMISSIONER MILNE: Then the cost as such
4 would come out of the education dollar.

5 MR. HALLINAN: That is correct.

6 COMMISSIONER GRANT: I just have one question
7 that I would like to ask you, and that comes back to the
8 question which I previously asked with respect to the
9 money which you raised by way of the balance sheet item
10 of shares, which is made up of dividends and according
11 to paragraph 72 on page 29, it also includes interest
12 rebates.

13 Now, when you decide on the percentage of your
14 net profits that you are going to return to your borrowers
15 by way of interest rebates, I understand from your brief
16 that that is credited to the shareholder's account, not
17 to his borrowing account, to his share account.

18 MR. HALLINAN: Generally speaking, that is so.

19 COMMISSIONER GRANT: Now, he is taxable on his
20 dividends, but he would not be taxable on his interest
21 rebates; would he?

22 MR. HALLINAN: No, he would not be.

23 COMMISSIONER GRANT: So do you advise him, do
24 you advise each of your shareholders, so-called, of the
25 amount of dividend that has been credited to his account
26 and the amount of interest rebate that has been credited?

27 MR. BURTON: Yes, Mr. Grant. Many of the larger
28 unions have dispensed with the passbooks and issue
29 quarterly statements and after the annual meeting where the
30 dividend and rebate are approved, the accounts are credited

1 individually with dividend and rebate which is clearly
2 marked. They are not lumped together and put as one
3 sum. For sums in excess of \$100.00 the usual T-5 return
4 is made by the credit union to the Government.

5 COMMISSIONER GRANT: If that member is paying
6 income tax then he is bound to report the amount of the
7 dividend?

8 MR. BURTON: That is correct.

9 COMMISSIONER GRANT: And he is paying tax on
10 that dividend notwithstanding he leaves the dividend with
11 you?

12 MR. BURTON: That is correct.

13 COMMISSIONER GRANT: And I would say from what
14 I have heard that there is relatively little withdrawal of
15 dividends, or small.

16 MR. BURTON: I think that is generally true.

17 COMMISSIONER GRANT: And yet your degree of
18 liquidity depends upon what I should think would be a
19 rather precarious method of raising money in that it can
20 be withdrawn. The man is paying tax on it and he can
21 withdraw it and yet by far the greatest amount of your
22 loans are made from this source of money.

23 MR. BURTON: If in an individual credit union
24 there was for some reason a run on the bank, so to speak,
25 it would have to be made clear to the members it would be
26 difficult for a large proportion of them to withdraw their
27 money if at the same time it was on loan to their fellow
28 credit union members.

29 COMMISSIONER GRANT: You have a provision whereby
30 you can require 60 days' notice.

1 MR. HALLINAN: There is another safeguard, if I
2 might interject. If an individual credit union is
3 experiencing an excessive share withdrawal they may apply
4 to the League for a loan from us and added to that is a
5 further safety valve known as our stabilization fund
6 which has just been in operation for two years. The
7 purpose of it is to stabilize any credit union that finds
8 itself in an awkward position.

9 THE CHAIRMAN: Mr. Grant, perhaps to round out
10 your question, I will ask him if any credit unions have
11 failed in recent years in Ontario.

12 MR. HALLINAN: Some have liquidated due to the
13 basic bond of association disappearing, but certainly in
14 recent years every credit union that has surrendered its
15 charter has paid off 100 cents on the dollar.

16 MR. STEWART: I think the record should perhaps
17 be clarified in one respect. Mr. Walls and I were talking
18 about Service Co-operatives. We got onto that subject
19 because I had suggested to these witnesses that perhaps
20 credit unions were in the position of service co-operatives
21 and we were discussing both the taxability, the possible
22 taxability of a credit union or service co-operative
23 itself and the member in relation to dividends or patronage
24 dividends.

25 Mr. Walls has reminded me under Subsection 6 of
26 Section 75 of the Income Tax Act the member of a
27 co-operative is not taxable in respect of patronage
28 dividends relating to consumer needs or services. I
29 thought I should put that on the record, because as far as
30 the member of a Service Co-operative is concerned his

1 patronage dividend might not be taxable in his hands.

2 THE CHAIRMAN: Thank you, Mr. Stewart. Does
3 anybody have any further questions? Mr. Stewart, have
4 you anything?

5 MR. STEWART: Nothing further, sir.

6 THE CHAIRMAN: I think that completes our questions.
7 Gentlemen, have you anything more you would like to say
8 to us?

9 MR. HALLINAN: No, Mr. Chairman, thank you.

10 THE CHAIRMAN: We are very grateful to you indeed.
11 You put forward an excellent submission. We will continue
12 to review this matter, I can assure you. We indeed thank
13 you very much for your attendance and assistance. Good
4 14 day, sir.

15 MR. HALLINAN: Thank you, sir.

16 THE CHAIRMAN: Mr. Secretary, it being twelve
17 o'clock, it would seem to me that we should stand over
18 until this afternoon. Now, I know that we have arranged
19 to see the next participants at eleven o'clock, but it
20 would be quite unsatisfactory I would think, for an
21 important submission to start now and go for fifteen or
22 twenty minutes. Would you ask these gentlemen, if they
23 are in the room, if it would be satisfactory to them to
24 stand over until 2:15. Would that be satisfactory to
25 you?

26 MR. GORMAN: Yes.

27 THE CHAIRMAN: We will stand over until 2:15.

28

29 ---The Hearing was adjourned until 2:15 p.m.

30

1 THE CHAIRMAN: Mr. Secretary, would you put us
2 in motion and introduce our visitors?

3 THE SECRETARY: Mr. Chairman, we have with us
4 this afternoon Mr. John Gorman, President, and Mr. D.
5 Rolling, Manager pro tem of the Retail Merchants' Associa-
6 tion of Canada (Ontario) Incorporated. This body has
7 presented a brief to the Royal Commission, and they are
8 here to speak to it, and I would like to enter it into
9 the records as Exhibit No. 76.

10
11 ---EXHIBIT NO. 76: Brief of the Retail Merchants'
12 Association of Canada (Ontario)
13 Incorporated.

14 SUBMISSION OF
15 THE RETAIL MERCHANTS' ASSOCIATION OF CANADA (ONTARIO)
16 INCORPORATED

17 APPEARANCES:

18 Mr. John Gorman President
19 Mr. D. Rolling General Manager
20 Ontario Association

21 THE CHAIRMAN: Thank you, Mr. Secretary. Good
22 afternoon, Mr. Gorman. Please forgive us for being late.
23 I am sorry. We announced 2:15, but we did not make it,
24 because we were entertained for lunch. Now, Mr. Gorman,
25 you are with Mr. Rolling.

26 MR. GORMAN: Yes.

27 THE CHAIRMAN: If you would care to speak to
28 your submission, we would be very glad to hear from you.
29 We have questions to put to you. We have our legal
30 adviser and counsel whom we have asked to lead the questioning

1 in order that we might do justice to this excellent work
2 that you people have prepared. We have, I might say,
3 found it most interesting, but before we commence with our
4 questions, have you anything else that you would care to
5 say to us?

6 MR. GORMAN: Thank you, Mr. Carter. Very
7 briefly, yes. My name is John Gorman, from Saulte St.
8 Marie, Ontario. I am a small businessman and I am active
9 in the operation of four Ladies' ready-to-wear stores,
10 Saulte St. Marie, Port Arthur and Fort William, in the
11 Province of Ontario. I am also President of the Retail
12 Merchants' Association of Canada (Ontario) Incorporated,
13 and in this context it is my pleasure to be appearing as
14 the official representative of that Association.

15 I would like to introduce Mr. Rolling, Mr.
16 D. W. Rolling, General Manager of our Ontario Association,
17 who will be available for any questions that you may wish
18 to direct to him. I will be very brief.

19 If I may, I would like to summarize very
20 briefly our thoughts and make our recommendations. It is
21 the purpose of this submission to direct the attention of
22 the Commission to the fact that our present income tax
23 legislation is inequitable and confers tremendous
24 tax concessions on cooperative associations to the
25 detriment of their fully-taxed competitors.

26 This is a matter of grave concern to the
27 retailers of this country owing to the unfair competitive
28 advantage granted by our tax laws to the cooperative
29 trading organizations which are highly concentrated in
30 the distributive marketing and service sectors of the

1 economy.

2 We are also firm in our opinion that this
3 inequitable situation is uneconomic in its relationship to
4 the national welfare. It involves misallocation of the
5 nation's resources, loss of revenue to the Federal
6 treasury and shifts the tax burden to the shoulders of
7 other taxpayers.

8 Cooperatives are flourishing and expanding in
9 their realm of activities at rates of growth which
10 exceed national averages. Page 39, as I recall it,
11 in our brief, indicates July 31, 1961 a 7.2% increase,
12 which I would compare with the mere 1% rise in Canadian
13 sales generally. Their outward signs of prosperity are
14 fully backed up by real financial success.

15 No case has been made out to show that coopera-
16 tives are a superior form of business or more efficient
17 than other businesses. Alternately, there is conclusive
18 evidence we feel to show that the extraordinary growth
19 of cooperatives is due not to their efficiency, but to
20 the financial advantages which are accruing to them under
21 the present tax arrangements.

22 We would clearly establish and I feel that we
23 have in our brief that cooperatives have personalities
24 distinct from those of their members, that they are
25 organized for the gain of their members, that they earn
26 income and allocate their profits to their own patrons.
27 The return to any one member is not simply a repayment of
28 the overcharge made to that particular member; it
29 represents the result of and the profit on all the
30 cooperative trading ventures.

1 The cooperative member, just like an investor
2 in an ordinary company, participates in the trading
3 fortunes of his cooperative. We suggest that there are
4 valid reasons for requiring cooperative organizations and
5 their members to shoulder their share of the tax load,
6 and we add that our request for tax equality does not
7 imply disapproval of the cooperative idea. The businesses
8 we represent are rather used to taking on competition of
9 any kind. All we ask is that the ground rules be the
10 same.

11 In consideration of the relevant importance
12 of the corporate taxation contributions to the Federal
13 treasury, it is the view of the Retail Merchants' Associa-
14 tion that the only practical solution to the cooperative
15 ordinary business tax controversy is tax legislation
16 amended to impose a fair rate of tax on cooperative
17 profits.

18 Now, we have three recommendations. Firstly,
19 the repeal of Section 73, Subsection 1 of the Income Tax
20 Act to remove the discriminatory three-year exemption for
21 new cooperatives. Secondly, the amendment of Section 75
22 to disallow the deduction of patronage dividends in the
23 calculation of net income of either cooperatives or
24 ordinary corporations; thirdly, provisions for tax
25 treatment of patronage dividends in the hands of
26 recipients similar to that imposed on corporation dividends
27 in the hands of shareholders, granted at the same time
28 equal tax credits or allowances which may prevail. We
29 believe these recommendations to be consistent with the
30 principles of justice and equality. They offer a solution

1 to the cooperative taxation problem, and would have the
2 effect of placing cooperatives and their members on an
3 equal footing with proprietary businesses and their
4 stockholders.

5 Thank you very kindly for you attention.

6 THE CHAIRMAN: Thank you, Mr. Gorman. Mr.
7 Stewart, would you care to lead off?

8 MR. STEWART: Thank you, Mr. Chairman. Mr.
9 Gorman, looking at page 2 of your brief, paragraph number
10 1 on that page, I take it that the Association which
11 you represent is a provincial association of Ontario
12 retailers, and that it is affiliated with a number of
13 similar provincial retailers and with a Dominion associa-
14 tion which is called the Retail Merchants' Association of
15 Canada Incorporated.

16 MR. GORMAN: Yes, sir.

17 MR. STEWART: Would you tell us how long you
18 have been connected with the Ontario Association?

19 MR. GORMAN: I have been connected in an
20 executive capacity on the executive or directorate of the
21 Association for a short four or five years.

22 MR. STEWART: Have you been a member for a
23 longer period?

24 MR. GORMAN: I was a member two years prior to
25 that.

26 MR. STEWART: How many members would there be
27 in the Ontario Association?

28 MR. GORMAN: Well, at the present time our
29 records indicate fully paid up membership of approximately
30 3,000.

1 MR. STEWART: On page 5 of the brief you
2 indicate that as of 1961, there were about 60,000 retail
3 stores in Ontario. Does that mean that there was something
4 close to 60,000 retailers in the Province?

5 MR. GORMAN: Yes, I would say it would, sir.

6 MR. STEWART: I am just trying to determine
7 whether your membership is 5% or 10% of the total number
8 of retailers.

9 MR. GORMAN: Perhaps I was somewhat misleading
10 when I quoted you 3,000 paid up members. It is a voluntary
11 organization, and retailers use the services of R.M.A.,
12 and they are not always regular contributors. On a
13 turn-over basis during the last five years, it is
14 estimated that the aggregate membership was between
15 12,000 and 15,000 retailers. Many of these merchants
16 do not regularly contribute, but because they have
17 contributed once they feel they are bona fide Retail
18 Merchants' Association members and identify themselves
19 with membership in the Retail Merchants' Association.

20 MR. STEWART: Let me understand then more
21 clearly. You mention a figure of 12,000. Is that an
22 average figure or is that the total over that period of
23 years?

24 MR. GORMAN: On a turn-over basis during the
25 last five years we had an aggregate membership of between
26 12,000 and 15,000 retailers. At the present time we have
27 3,000 dues-paid members.

28 MR. STEWART: Well, when you say on a turn-over
29 basis you had 12,000 to 15,000 in the aggregate, over a
30 period of five years, that would seem to indicate that

1 3,000 at one time would be more or less an average.

2 MR. GORMAN: I would say that would be an
3 accurate figure.

4 MR. STEWART: Is a chain store eligible for
5 membership in your Association?

6 MR. GORMAN: An individual store by and large ---
7 individual stores make up the bulk of our membership.
8 Large corporate chains may appoint a member as a represen-
9 tative.

10 MR. STEWART: Do they in fact do that?

11 MR. GORMAN: Small corporate chains --- small
12 chains. Not large groups.

13 MR. STEWART: I take it you regard your Associa-
14 tion as essentially an Association of the smaller retailers.

15 MR. GORMAN: Yes.

16 THE CHAIRMAN: I am confused over the figures.
17 I have three different figures. 3,000, 12,000 to 15,000
18 and 60,000.

19 MR. STEWART: Well, Mr. Chairman, 60,000 is
20 the figure that appears on page 5, paragraph 3. There are
21 60,000 retailers. As I understand what Mr. Gorman is
22 saying, over the period of the last five years they have
23 had 12,000 to 15,000 in the aggregate over that period
24 paying dues or otherwise associated with their Association.
25 At the moment there are 3,000, and he has agreed that that
26 is perhaps an average figure, which, as I see it, would
27 mean that they represent some 5% of the retailers at any
28 one time.

29 MR. ROLLING: Could I clarify that just a little
30 more?

1 MR. STEWART: Please.

2 MR. ROLLING: We have many members, who, although
3 they do not contribute on an annual basis, do regard
4 themselves as once a member of the Retail Merchants'
5 Association, always a member of the Retail Merchants'
6 Association, and many others, who are Retail Merchants'
7 Associations of local groups and regard us as their
8 guiding star or someone who assists them when it is
9 required.

10 In evidence of this here are seven copies of
11 a report from the Cornwall Standard Freeholder of May
12 13, in which the local Retail Merchants' Association ---
13 if I could offer those, sir --- regard themselves as
14 part of the Retail Merchants' Association.

15 I offer too, further evidence of that. Here is
16 another organization from Brampton, Ontario, who work as
17 the Retail Merchants' Association of Brampton, and this
18 is their formation of a manifesto that they wish to
19 accomplish with our help and guidance. I have additional
20 copies of that too, sir.

21 MR. STEWART: The first of these documents you
22 have handed me indicates that you are going to discuss
23 new trends in retailing at a meeting open to the members
24 of the Cornwall Merchants' Association and the East
25 Cornwall Businessman's Association.

26 MR. ROLLING: Yes, about 130 in attendance there.

27 MR. STEWART: So that it would indicate that
28 these local or municipal associations look to you for
29 assistance.

30 MR. ROLLING: That is correct, sir.

1 MR. STEWART: For assistance and advice. Unless
2 you wish it, I do not think it is necessary to enter this
3 as an exhibit.

4 THE CHAIRMAN: No, I do not think so. I want to
5 get the figures straight. There are 60,000 retail stores
6 and 12,000 to 15,000 retailers which means that each
7 retailer would have four to five stores.

8 MR. ROLLING: No.

9 THE CHAIRMAN: 60,000 retail stores and 12,000
10 to 15,000 retailers.

11 MR. STEWART: 12,000 to 15,000 are simply the
12 number who have some identification with this Association
13 over a period of time.

14 THE CHAIRMAN: That is the number of retail
15 stores which has been connected with this Association?

16 MR. ROLLING: That is right.

17 THE CHAIRMAN: It is the number of retail stores
18 or retailers?

19 MR. ROLLING: Retailers. We have also associate
20 members that are confined within the Province of Ontario
21 that could be distributors or manufacturers that pay an
22 associate membership where they are dealing with the
23 retailer, particularly in the Province of Ontario.

24 THE CHAIRMAN: Of these 12,000 to 15,000, 3,000
25 are now members; is that right?

26 MR. STEWART: Are now dues-paying members I
27 take it.

28 MR. ROLLING: Active members.

29 THE CHAIRMAN: And on page 5 where it says there
30 are 180,000 retail stores of which slightly more than

1 60,000 are located in the Province of Ontario, that could
2 well mean that there are 180,000 retailers? The term
3 retailer and retail stores are synonymous here?

4 MR. ROLLING: Right.

5 MR. STEWART: Are you saying that the terms
6 retailer and retail store are synonymous or would the
7 average retailer have a fraction over one retail store?

8 MR. ROLLING: No, I would think they would be
9 synonymous on an average, yes.

10 THE CHAIRMAN: Mr. Gorman has three, I think
11 he said?

12 MR. STEWART: Four.

13 THE CHAIRMAN: Do you rate four times in the
14 60,000 or once?

15 MR. GORMAN: I only rate once, sir.

16 MR. STEWART: Now, gentlemen, do you and your
17 Association classify your members according to income
18 groupings?

19 MR. ROLLING: No, we do not.

20 MR. STEWART: You have no information as to
21 the incomes of the individual members of your Association?

22 MR. ROLLING: We do not enquire into it unless
23 it is given to us in confidence in conversation, that is
24 all.

25

26

27

28

29

30

MC/dpw 1 MR. STEWART: Well now, looking at page 6 of
2 your brief, paragraph 6, at the top of the page, I observe
3 that in 1960 10,819 retail companies had a net taxable
4 income of 244.4 million dollars and contributed 86.8
5 million dollars in corporation tax.

6 Then you refer to Table IV which contains
7 additional information on this particular question but if
8 I divide that net taxable income of 244.4 million by
9 10,819, which is the number of companies, I think I find
10 that the average net taxable income of the 10,819 would
11 be something under \$25,000 per annum.

12 MR. ROLLING: That is correct. The basis of
13 that table is in our taxation statistics for 1962, page
14 94, and is repeated in its entirety there. Income distri-
15 bution by occupational class.

16 MR. STEWART: If it is still the case that your
17 average member has a taxable income of something in the
18 area of \$25,000 the average member is taxable only at the
19 low rate of corporate income tax. Is that correct?

20 MR. ROLLING: Twenty-three per cent.

21 MR. STEWART: And, of course, you point out in
22 Table IV that 244 million dollars does not take into
23 account lost companies of which, in the 1960 taxation year,
24 there were 5,420.

25 MR. ROLLING: That is correct.

26 MR. STEWART: Then I also note from page 6 of
27 your brief that - I take it it is in the same year, the
28 taxation year 1960 - there were 77,733 business proprietors
29 in the retail trade who paid tax and that the total tax
30 paid was 45.4 million dollars. I think you would agree

2 1 that the average amount of tax paid by each of those
2 business proprietors was substantially under a thousand
3 dollars in that year.

4 MR. ROLLING: That is correct.

5 MR. STEWART: And, again, looking at Table V,
6 it is plain that those 77,000-odd taxpayers are exclusive
7 of another 40,000 taxpayers who, in that year, did not pay
8 any tax at all.

9 MR. ROLLING: Right.

10 MR. STEWART: Is that correct?

11 MR. ROLLING: Right.

12 MR. STEWART: Now, on that basis, dealing with
13 these individual retailers again in Table V, they had
14 income aggregating \$419,000,000 and their total tax was
15 \$45,000,000, so that I calculate that tax as being at an
16 average effective rate of approximately 11%.

17 MR. ROLLING: Yes, approximately.

18 MR. STEWART: Now, gentlemen, I observe on page
19 8 of your brief, in numbered paragraph 2, you indicate
20 that you do not oppose co-operatives or the co-operative
21 idea and that same point is made at a later stage in your
22 brief. I also observe that on page 28 in the third and
23 fourth paragraphs on the page you say, in effect, this:
24 that in your opinion the essential difference between an
25 ordinary corporation and a co-operative is that the
26 ordinary corporation distributes its profits to its share-
27 holders in accordance with the amount of capital they
28 have invested in the corporation, whereas the co-operative
29 distributes its profits to its shareholders or members in
30 accordance with the volume of business they do with the

3 1 co-operative.

2 When you are comparing these two forms of
3 corporate organization do you attach no significance at
4 all to the fact that the owners of the co-operative are
5 also its customers and, as I understand it, the co-opera-
6 tives say that their members have come together because of
7 some identity of interest of a type quite different from
8 that which might bring the shareholders of a commercial
9 organization together?

10 MR. ROLLING: They would be slightly different
11 but the customers of the marketing co-op, their interest
12 would be diverse to that of the co-op even though they
13 might be a shareholder, whereas the corporation is treated
14 slightly differently in that they are not necessarily the
15 customers of the corporation but shareholders therein.

16 MR. STEWART: When you used just now the expres-
17 sion "marketing co-op" let me be sure we are on common
18 ground here; just exactly what do you mean by a marketing
19 co-op?

20 MR. ROLLING: Well, a co-op that would be in
21 business in the retail field in a variety of lines which
22 customers are buying or members of the co-op are buying
23 and customers.

24 MR. STEWART: In other words, you are thinking
25 not of the type of co-op which markets agricultural
26 products for its members?

27 MR. ROLLING: No, I am not.

28 MR. STEWART: I think your use of this expression
29 "marketing co-op" is perhaps a little unusual. It is
30 unusual in my experience.

4 1 MR. ROLLING: It is covered generally here on
2 page 29 of the last paragraph.

3 MR. STEWART: There is the marketing co-operative
4 (1) which sells produce which is produced by its members.

5 MR. ROLLING: That is right.

6 MR. STEWART: And the term "purchasing co-opera-
7 tive," I take it, is the opposite to that. It is a
8 co-operative which supplies merchandise to its members.

9 MR. ROLLING: Right.

10 MR. STEWART: I think, then, perhaps, I misunder-
11 stood you the first time.

12 MR. ROLLING: I am sorry.

13 MR. STEWART: Now, you said, as I recall, that
14 there was a diversity of interest between the marketing
15 co-operative and its members.

16 MR. ROLLING: There would be.

17 MR. STEWART: Perhaps you would indicate what
18 that is so we understand each other.

19 MR. ROLLING: Diversity of interest might be
20 they could be members necessarily of the co-op but not
21 necessarily the same type of business the co-op is in
22 even though they are shareholders in the co-op.

23 MR. STEWART: Here, are you talking about
24 co-operatives that sell merchandise to their members?

25 MR. ROLLING: They sell it to their members as
26 well as many others.

27 MR. STEWART: Yes. You are thinking of one
28 that sells to members rather than the one that sells for
29 members?

30 MR. ROLLING: I am thinking of one that sells to

5 1 members rather than the one that sells for members,
2 correct.

3 MR. STEWART: Well, now, on page 9, the third
4 sentence of paragraph 1, that is numbered paragraph 1,
5 that a co-operative corporation keeps most of its profits
6 and expands on tax-free income. Now, I wonder if you
7 would tell us exactly what you mean by those words "expands
8 on tax-free income."?

9 MR. ROLLING: I think we can refer you there to
10 page 15 of our brief which refers to Section 75.

11 MR. STEWART: That refers to patronage dividends
12 and do I take it then what you have in mind is that a
13 co-operative which is taxed ---

14 MR. ROLLING: Paragraph 2.

15 MR. STEWART: We are now at page 15, paragraph
16 2.

17 MR. ROLLING: Paragraph 2, co-operative partisans.

18 MR. STEWART: Your basic point relates to
19 patronage dividends.

20 MR. ROLLING: Yes.

21 MR. STEWART: And is the point you wish to make
22 that a co-operative is subject to a limited amount of
23 taxation and that it pays the patronage dividends to its
24 members; they may be taxable in the hands of the members
25 but they are credited to the members' accounts and are,
26 therefore, until they are withdrawn, available for working
27 capital and similar purposes? Is that what you mean by
28 expanding on tax-free income?

29 MR. ROLLING: Yes, I would think that you would
30 be generally correct, sir.

6 1 MR. STEWART: Then you also indicate, on page 9,
2 Mr. Rolling - I refer to the paragraph beginning on the
3 last line on the page, that the basic problem you are
4 concerned with at the moment has been enunciated by the
5 increase in corporate tax rates. I take it that it has
6 also been enunciated because of the fact, as you indicated
7 in the last complete paragraph on page 9, a greater
8 proportion of corporations are no longer of an agency
9 nature so that a greater proportion are of the type - let
10 me put it this way: when a larger proportion was of an
11 agency nature the present tax rules were introduced and
12 those which were of an agency nature were, in fact,
13 excluded from tax altogether.

14 MR. ROLLING: There were two agencies probably
15 at that time, going back some time on that.

16 MR. STEWART: Now, on page 10, you suggest that
17 under the present rules, and I refer now to the first
18 complete paragraph on that page, you suggest that under
19 the present rules co-operatives could restrict their
20 liability to as low as 5% of their profits. Now, could
21 you indicate to us just how you arrived at that figure?

22 MR. ROLLING: That is the Federated Co-Operatives
23 Limited for the year 1961 and the Alberta Wheat Pool have
24 restricted their tax liability in the same manner.

25 MR. STEWART: Those, I take it, are very large
26 co-operatives?

27 MR. ROLLING: That is correct. They are still
28 taken as a good example of a continuing period of 5%.

29 MR. STEWART: If you take your average co-opera-
30 tive which has a comparatively modest amount of income I

7 1 take it the 5% figure would not be borne out.

2 MR. ROLLING: I would think that most co-opera-
3 tive spokesmen would agree their trading transactions
4 take place at current price levels and on the total
5 volume last year of 1.5 billion it would appear to be
6 fairly obvious they had a substantial amount, not neces-
7 sarily all concentrated in the two I gave as an example
8 previously.

9 MR. STEWART: Well, yes, I am quite certain
10 they had a very substantial volume but could you give us
11 examples of small co-operatives which can restrict their
12 liability for tax to this 5%?

13 MR. GORMAN: I think it would be pretty difficult,
14 sir, to get that information.

15 MR. STEWART: In any event, as far as this
16 brief is concerned, you rely on the larger co-operatives?

17 MR. ROLLING: As a fairly good statement, yes.
18 They are public figures. The Alberta Wheat Pool discloses
19 a statement of 5% to be factual. Our brief submits also
20 that the Federated Co-Operatives has managed to reduce
21 its tax liability to 5% or less.

22 MR. STEWART: Then in that same paragraph on
23 page 10, where you indicate that a co-operative is a
24 vehicle for re-investment of tax-free income, are you
25 referring there to the same point we have already discussed,
26 that is that co-operatives are, in fact, or in practice,
27 able to take advantage of patronage dividends for working
28 capital?

29 MR. ROLLING: The point you brought up earlier,
30 that is correct.

8 1 MR. STEWART: Now, on page 13, you deal, with
2 numbered paragraph 1, with what you describe as the three-
3 year tax holiday and you ask that that be eliminated. I
4 take it that you prefer such elimination to the granting
5 of a similar tax holiday to all business.

6 MR. ROLLING: Well, it should be proportionate,
7 sir.

8 MR. STEWART: I just assume, perhaps, you felt
9 it would not be realistic to suggest every new business
10 be granted a three-year tax holiday.

11 MR. ROLLING: We would agree with that statement.

12 MR. STEWART: Now, on page 14, in the second
13 complete paragraph, you refer to the exemption from
14 patronage dividends which is granted under sub-section 6
15 of Section 75 and which, as I see the section, is granted
16 in respect of consumer goods or services.

17 Then, you go on, on page 14, to say that other
18 patronage dividends, whether or not paid in cash, are
19 taxable if the customer is in a tax-paying bracket.

20

21

22

23

24

25

26

27

28

29

30

BL/dpw 1

MR. ROLLING: Right.

2 MR. STEWART: But as I read your brief, you are
3 objecting to the tax treatment of patronage dividends as
4 a whole or, rather, to the tax treatment of co-operatives
5 as a whole, and that your basic submission is that
6 co-operatives should be taxed in the same way as an
7 ordinary commercial corporation.

8 MR. ROLLING: We would suggest that.

9 MR. STEWART: Now, you deal, in fact, with the
10 taxation of corporate profits at page 17 of your brief,
11 and you indicate there that you doubt that the corporate
12 income tax can be eliminated, but I noticed, at an earlier
13 stage of the brief - and I am referring now to page 8 -
14 that you say, I think, that the corporate tax should be
15 reduced. There is a statement on page 8, on the first
16 line of that page.

17 MR. ROLLING: If they were on the same basis, I
18 think reduction of the corporate taxation would be auto-
19 matic in that event, if the taxation load was shared by
20 all.

21 MR. STEWART: I am talking, at the moment, only
22 of corporate taxation. You are not advocating, at the
23 moment, that corporate income tax be eliminated, but you
24 are advocating that it be reduced; is that correct?

25 MR. ROLLING: Right.

26 MR. STEWART: Then, on page 20, gentlemen, in
27 the third paragraph, you say that as matters now stand
28 "the contribution of the individual corporation and its
29 shareholders is several times as great as that of the
30 co-operative group."

1 I would like to explore that with you a little
2 bit having regard to what we have already found about
3 members of your association, and at the moment I would
4 like to deal with the average member of your association,
5 realizing, of course, that there are some members whose
6 incomes will be above average, just as there will be some
7 whose incomes will be below average. But let's take the
8 average member who we found earlier has an income, a
9 taxable income, of approximately \$25,000 per year. Now,
10 at the present time, I think you would agree that he is
11 subject - we are talking now about corporations - that
12 that corporation will be subject to 23% corporate income
13 tax, taking into account the basic tax, the old-age
14 security and the provincial tax in Ontario.

15 We are agreed upon the 23% rate?

16 MR. ROLLING: Right.

17 MR. STEWART: If that corporation pays that
18 rate and then chooses to distribute the balance of its
19 holdings to its shareholders, I think you would also
20 agree that under Section 38 those shareholders are entitled
21 to a 20% dividend tax credit.

22 MR. ROLLING: Right.

23 MR. STEWART: And I, therefore, suggest to you
24 that there is, on that basis, double taxation of corporate
25 income in the case of the average member that we are
26 talking about.

27 MR. ROLLING: Right.

28 MR. STEWART: Only to the extent of 3% of income.

29 MR. GORMAN: I am not quite as fast on figures
30 as you are, sir, nor am I aware - I can't help but feel

1 that if that were so the co-operatives would have no
2 hesitation in sharing the same tax advantages as corpora-
3 tions.

4 MR. STEWART: This is what I want to explore
5 with you. I would like to make it quite plain that I am
6 in no sense trying to trap you into any admission here.
7 I think my mathematics are probably correct, that if the
8 Government, when it taxes the smaller corporation at 23%,
9 leaves the taxpayer with 77%, the taxpayer then proceeds
10 to distribute that amount by way of dividends to its
11 shareholders and then receives on those dividends a 20%
12 dividend tax credit under Section 38.

13 MR. ROLLING: Right.

14 MR. STEWART: The double taxation element so far
15 as the corporate income tax is concerned is arrived at by
16 deducting 20%, that is 20 percentage points from 23 per-
17 centage points and it becomes 3%.

18 MR. GORMAN: It sounds correct.

19 MR. STEWART: Let us assume, without asking you
20 to commit yourself, that that is so for the moment.

21 I would now like to deal with the case of the
22 co-operatives.

23 THE CHAIRMAN: Mr. Stewart, may I interrupt for
24 one second for the better understanding of the Commission?

25 MR. STEWART: Yes.

26 THE CHAIRMAN: It is \$25,000 average; it is
27 including, I would assume, large merchants, chain stores,
28 and so on; Eaton's, Simpson's, Loblaw's, and whatever
29 there may be. If that is the case, there would be a lot
30 of incomes taxed at 50%, quite a lot taxed at the low rate.

1 MR. STEWART: Yes, Mr. Chairman. I am taking
2 my figures from Table IV, as you will recall, and these
3 are the figures which were referred to at an earlier
4 stage of the brief on page 6.

5 I have pointed out that on page 6 it is stated
6 that there were 10,819 retail companies with net taxable
7 income of 244.4 million dollars, and the witnesses have
8 gone along with me that on average this works out at
9 something less than \$25,000 per retail company, and I
10 have been careful, I think, to emphasize that I am well
11 aware that there will be many whose incomes are above that
12 and who are therefore taxed at a higher rate. But I have
13 simply suggested, as far as the average is concerned - and
14 I admit that I suggested this would apply to the average
15 member of this association - we are concerned simply with
16 the low rate of corporate income tax.

17 If you take the large ones out, if you take out
18 the chains, for example, the average of the balance would
19 obviously go down substantially below what it otherwise is.

20 THE CHAIRMAN: Thank you.

21 MR. STEWART: Now, let us consider, gentlemen,
22 the case of the co-operative, and I am thinking now of
23 the co-operative which is taxable under the present
24 provisions of the Act and the patronage dividends of
25 which are also taxable.

26 Now, if I look at the section of the Act which
27 relates to personal tax rates I find that if a person's
28 taxable income exceeds \$4,000 in the year - I am referring
29 to Section 32 - if his taxable income exceeds \$4,000,
30 then the tax he pays on the excess is at the rate of 22%.

1 Now, that, of course, is an incremental rate,
2 it is not an effective rate. But dealing with the incre-
3 mental rate of 22%, would it not follow that the member
4 of a co-operative who is taxable on patronage dividends
5 may very well, at any rate, be taxed on an incremental
6 basis at more than 20%?

7 MR. ROLLING: Would you repeat that last part
8 of that again, please?

9 MR. STEWART: Surely. Let me give you a little
10 more of what is in my mind, Mr. Rolling, because really
11 what I am trying to find out for my own edification,
12 apart altogether from that of the Commission, is whether
13 you have something here you really should be concerned
14 about. If we are thinking of the small retailer whose
15 income is not more than \$25,000 - and I am assuming that
16 his business is incorporated - I am suggesting to you that
17 in Ontario his basic rate of corporate income tax is 23%
18 and he can get a 20% tax credit in respect of that. So
19 that if all the earnings of the small corporation are
20 distributed to its shareholders each year, which can be
21 done, then they are taxed at their personal rates of tax
22 plus 3%.

23 Now, when we come to the co-operatives which
24 pay patronage dividends, to the extent that their earnings
25 are distributed in patronage dividends or credited to the
26 members' accounts by way of patronage dividends, I am
27 suggesting to you that tax is paid by the member, and
28 while obviously something turns here on the proportion of
29 their earnings which is paid out by way of patronage
30 dividends, I am suggesting this to you, that to the extent

2 1 that the earnings are paid out they are taxable at the
3 2 personal rates of the shareholders; and if you assume that
4 3 the average shareholder of a co-operative has some other
5 4 income, then if his taxable income amounts to \$4,000 and
6 5 you take the incremental rate above that as far as the
7 6 patronage dividend is concerned, he has paid tax of 22%
8 7 under Section 32.

8 MR. GORMAN: I think that is a very difficult
9 question for people as inexperienced as ourselves to make
10 an observation on, but I would venture to say that I
11 could get that information.

12 MR. STEWART: Subject, Mr. Gorman, to what the
13 Chairman says, that might be the way to leave it. If you
14 would care to let the Commission have your comments on
15 that situation I think it would be very helpful, because
16 really what we are here for is to try to assess this
17 properly.

18 THE CHAIRMAN: Yes. I think, Mr. Stewart, if
19 Mr. Gorman is going to do that he may just as well not
20 restrict himself to the one level you have spoken of and
21 in the circumstances in which you have directed your
22 question. I think that Mr. Gorman may like to look at it
23 a little more carefully before he agrees with it.

24 When he looks at it having
25 regard to \$4,000, he may like to look at it having regard
26 to \$2,000 and \$10,000, and if he would we would be very
27 happy to hear from him.

28 MR. GORMAN: Yes.

29 MR. STEWART: There are all sorts of things
30 which come into this, and when we think of the average

1 member of a co-operative, the \$4,000 taxable income figure
2 is too high; and, as I have already said, the 22% rate,
3 in any event, is an incremental rate rather than an effective rate. That is another factor to be taken into
4 account.
5

6 But I think basically one of the points which
7 I would suggest you might consider is this: that perhaps
8 what is really involved here is a question of tax rates,
9 and also a question of whether or not adequate credit
10 against one's personal tax is given for the corporate
11 income tax which is paid. That is why I prefaced this by
12 a reference to your suggestion that corporate tax rates
13 be reduced, because if we are thinking of someone whose
14 effective corporate rate is close to 52%, obviously a 20%
15 dividend tax credit is not altogether effective, but the
16 more the 52% rate can be reduced, then the less double
17 taxation of corporate income, it seems to me, we have.

18 In other words, putting it this way: in the case
19 of the commercial corporation, one of your members, there
20 is at the moment a minimum corporate tax of 18%, or 23%,
21 call it what you will; in the case of the co-operative
22 there is no such tax now. There is this 3% tax on capital
23 employed.

24 MR. ROLLING: Right.

25 MR. STEWART: But there is the tax on patronage
26 dividends, and the representations you make in your brief,
27 it seems to me, will be strengthened or weakened according
28 to whether the two sets of taxation are comparable or far
29 apart in their results.

30 You see, I am really, I think, questioning you

1 about your statement on page 20 which I have already
2 referred to, that "the contribution of the individual
3 corporation and its shareholders is several times as
4 great as that of the co-operative group."

EMT/ss 1 Now, I would not dispute for a moment if you
2 are talking about a large cooperative such as the whole-
3 sale cooperative referred to later on. It is true, but
4 if you take what may be a more typical case, take the
5 commercial corporation on the one hand with taxable
6 income of \$25,000.00, and a cooperative on the other hand
7 with income of \$25,000.00, what are the comparative
8 incidences of income taxation? That is an attempt,
9 Mr. Chairman, to state the question, and what the answer
10 is I do not profess to know. I am just raising the
11 point.

12 MR. ROLLING: You made one statement in your
13 explanation there that patronage dividends were taxable.
14 You meant in the hands of the recipients?

15 MR. STEWART: Yes.

16 MR. ROLLING: Our contention, of course, on
17 the part of taxation is that the present context of
18 the 20% tax credit should apply in both cases, both
19 corporation and cooperative.

20 MR. STEWART: Yes, I think your brief is very
21 clear in that. Now, I suggest the cooperative corporation
22 is taxed on its income the same way as the ordinary
23 corporation.

24 MR. ROLLING: Right.

25 MR. STEWART: Then the present dividend tax
26 credit should be extended to the patronage dividends.

27 MR. ROLLING: Yes.

28 MR. STEWART: Patronage dividends then would be
29 paid after what was left after tax. Now, would you also
30 in your considering that and letting us have your views,

1 keep in mind the distinction between types of cooperatives
2 in this connection, because in Section 75, Subsection 6,
3 patronage dividends are taxable except in certain cases.
4 You will observe the words in brackets in the Subsection
5 we do not bring into tax or into income for tax purposes
6 patronage dividends which represent allocations in
7 respect of consumer goods or services.

8 Now, there is another feature of your brief
9 which I would like to canvass with you to some extent.
10 You refer to the fact that when these patronage dividends
11 are credited to shareholders' accounts, they are in fact
12 available for the operations of their cooperative and/or
13 the expansion of the business of the cooperative. Am I
14 not correct?

15 MR. ROLLING: Yes.

16 MR. STEWART: I would like to put this to you:
17 In the case of a commercial corporation, once the
18 corporate income tax is paid, there is nothing to compel
19 the payment of dividends or to prevent, if you like,
20 the accumulation of surplus. If the shareholders wish to
21 avoid the disadvantage, potential disadvantage of a
22 large surplus accumulation, they can distribute their
23 earnings and reinvest what they received by way of
24 dividend in the corporation. In any event, our corporations
25 do accumulate earnings, and as I say, there is nothing
26 in our law at the present time which requires them to make
27 any distribution whatever.

28 MR. ROLLING: Right.

29 MR. STEWART: Now, in those circumstances is
30 there really discrimination in favour of the cooperative,

1 because what is happening, as I see it, is that the
2 cooperative is allocating its earnings, a substantial
3 portion of them, to shareholders' or members' accounts
4 and the members do not choose to withdraw those credits
5 in many cases, and is the result not the same as though
6 the shareholders, the members were receiving and
7 reinvesting the earnings? This is exactly what can happen
8 in the case of a commercial corporation.

9 MR. ROLLING: But if it is continued in a
10 commercial corporation for a protracted period of time,
11 you might have difficulty or experience difficulty in
12 getting investors to invest in the corporation itself.
13 This is one point.

14 The second point is although a co-op may
15 dispense some cash in the form of patronage dividends,
16 they may also give out a share credit of some type at the
17 same time, and the purchases of the individual may or may
18 not be concerned in the particular case, whereas with a
19 corporation, usually the shareholder who might be subject
20 to what you suggest here, of course, may not be an
21 investor of the corporation but an investor there.

22 MR. STEWART: Yes, but Mr. Rolling, you have
23 conceded you have no objection to the cooperative form of
24 organization.

25 MR. ROLLING: That is right.

26 MR. STEWART: And therefore the distribution of
27 earnings on a patronage basis. Now, let us just look at
28 this question about the difficulty of obtaining the
29 investment. I take it that in the case of your average
30 member who is a small retailer, the number of shareholders

1 of the company is going to be quite small. Chances are
2 that these corporations will be owned by members of one
3 family or by a comparatively small group of people.

4 Would that not be correct?

5 MR. ROLLING: That is true.

6 MR. STEWART: All right. If they do not want
7 to run the risk, as I said before, of surplus accumulations,
8 can they not distribute earnings year by year, that or
9 loan money back to the corporation or take up additional
10 shares, whether they are redeemable preferred shares or
11 additional common shares?

12 MR. ROLLING: Well, they might by mutual
13 agreement, but not necessarily by regulation as in the
14 confines of that organization which you suggest as being
15 members of one family.

16 MR. STEWART: I agree that you would have to
17 have a decision on the part of the board of directors.

18 MR. ROLLING: Yes.

19 MR. STEWART: That the monies be distributed.

20 MR. ROLLING: Yes.

21 MR. STEWART: Then you would have to have agree-
22 ment on the part of the recipients of dividends that they
23 would reinvest them. However, is it not the fact that
24 in the case of a cooperative, either immediately or after
25 a decent interval, the member can take away or take out
26 what is deposited or what is credited to his account?

27 MR. ROLLING: I refer you to page 22 of our
28 submission. Perhaps this would answer. In the last
29 paragraph there:

30 "Through the years Federated has consistently

1 reinvested a major proportion of the earnings
2 rather than pay out in the form of patronage
3 refunds.

4 'During the period 1947 to 1957, patronage
5 refunds were paid by two-thirds in
6 certificates of indebtedness and one-third
7 in common shares. Since 1958, patronage
8 refunds were paid only in the form of
9 common shares. Cash returns to the mem-
10 bers have been achieved by revolving cer-
11 tificates and repurchasing shares'."

12 MR. STEWART: But is it not the fact, Mr.

13 Rolling, under the provisions of Section 75 ---

14 MR. ROLLING: Yes.

15 MR. STEWART: That if a cooperative wishes to
16 make a deduction in respect of patronage dividends in one
17 year it must release a corresponding amount held back from
18 previous years to its members?

19 MR. ROLLING: This is stated as that in the
20 Act. You are thinking now of (a) and (b) and 1 and 2 of
21 75? 75 (1) and (2).

22 MR. STEWART: Yes. That is the governing
23 section.

24 MR. ROLLING: Right.

25 MR. STEWART: You are permitted there to make
26 deductions pursuant to allocations in proportion to patron-
27 age. Then if you observe Section 75, Subsection 4, there
28 is a definition of the expression, allocations in propor-
29 tion to patronage. That is a somewhat involved definition.

30 MR. ROLLING: Right.

1 MR. STEWART: Then I think I should refer also
2 to the use of the term payment in Section 75 (1), what
3 you can deduct as a payment, and the expression payment
4 is defined in Section 75, Subsection 4, paragraph (f).
5 There if you issue a certificate of indebtedness or shares
6 that constitutes a payment if the taxpayer has in the
7 year or within twelve months thereafter disbursed an
8 amount of money equal to the aggregate face value of all
9 certificates or shares so issued in the course of redeeming
10 or purchasing certificates of indebtedness or shares of
11 the taxpayer previously issued.

12 Now, that seems to contemplate a sort of
13 revolving type of payment?

14 MR. ROLLING: That is correct. We refer to
15 that in our brief too.

16 MR. STEWART: And then we go on to Subsection
17 2, and we find payment includes the application by the
18 cooperative of an amount to a member's liability to the
19 taxpayer pursuant to a bylaw of the taxpayer pursuant to
20 statutory authority at the request of the member.

21 What I am suggesting is that these amounts which
22 are credited to the members' accounts are not frozen there
23 for an indefinite period, but that the member can
24 in due course withdraw them from the cooperative.

2 25 MR. ROLLING: In most cases you would be
26 correct, but this is not always the case. The funds are
27 there and are available for use.

28 MR. STEWART: And are they not there simply for
29 a period?

30 MR. ROLLING: Yes. That is stated within the

1 limitations of the Act.

2 MR. STEWART: So that again it seems to me
3 there may not be a tremendous difference.

4 MR. ROLLING: They do not pay the corporation
5 tax.

6 MR. STEWART: Quite so, but we have already
7 discussed that aspect of it.

8 MR. ROLLING: Yes.

9 MR. STEWART: And you are going to consider
10 whether the incidence of income tax on the one is in fact
11 greater than the incidence of income tax on the other?

12 MR. ROLLING: Right.

13 MR. STEWART: Leaving aside the question of the
14 corporate income tax, what I am now suggesting to you is
15 that it may be that earnings can be accumulated by
16 commercial corporations just as readily as they can be
17 by cooperatives.

18 MR. ROLLING: I do not think they can under the
19 present regulations. Can you give me an example, sir?

20 MR. STEWART: Well, I think in the case of
21 commercial corporations ---

22 MR. ROLLING: No dividends you mean?

23 MR. STEWART: The position is quite clear if I
24 understand it correctly. Let us suppose that we have a
25 commercial corporation which has an income, a taxable
26 income of \$10,000.00 in a particular year. Its corporate
27 tax rate is 23%, \$2,300.00, so that if it has \$7,700.00
28 left, so far as I am aware the shareholders of that
29 corporation can leave that \$7,700.00 there as long as they
30 like. However, if they choose to distribute the \$7,700.00

1 by way of dividends, loan the money back to the corporation
2 or reinvest it in shares of the corporation, there is
3 nothing whatever to prevent them from doing it, so that
4 the \$7,700.00 can remain effectively working for the
5 corporation indefinitely.

C/dpw 1 MR. ROLLING: Subject, of course, to tax and
2 what it earns.

3 MR. STEWART: That is right. If they pump the
4 money back in, if they leave the money or if they pump
5 it back in, then presumably the future earnings of the
6 corporation will increase and the corporation, among
7 other things, will pay additional corporate income tax.
8 We are back on the question of whether this corporate
9 income tax should be extended to co-operatives.

10 MR. ROLLING: That is right. We suggest that.

11 THE CHAIRMAN: Have you come to the end of that
12 particular subject? If so, we will break.

13 MR. STEWART: Yes.

14 THE CHAIRMAN: We will stand down for ten
15 minutes.

16
17 --- Short Recess

18
19 THE CHAIRMAN: Mr. Stewart, will you continue?

20 MR. STEWART: Thank you, Mr. Chairman. Mr.
21 Gorman and Mr. Rolling, I would like to come to a slightly
22 different subject. So far as the ordinary commercial
23 corporation is concerned would you see any problem about
24 providing, when dividends are paid, they will be subject
25 to a deduction at the source by way of tax of, say, 15 or
26 20 per cent?

27 MR. ROLLING: Would you rephrase that?

28 MR. STEWART: At the present time, in the case
29 of a Canadian corporation, as you know, if you are paying
30 a dividend to a non-resident shareholder it is subject to

2 1 what we call a withholding tax of 15%. Now, dividends
2 which are paid to Canadian residents are not subject to
3 any similar withholding; similarly, as far as I am aware,
4 patronage dividends which are paid by co-operatives are
5 not subject to any withholding.

6 What I am really asking you is: what would your
7 comment be to a proposal, what would your reaction be to
8 a proposal that both dividends and patronage dividends
9 paid to residents of Canada be subject to a tax deduction
10 at the source of, say, 15 or 20 per cent?

11 MR. GORMAN: This is something that we had not
12 considered in our Committee when we were preparing this
13 brief, Mr. Chairman, and I, for one, don't feel qualified
14 as an individual to express an opinion on it. On the face
15 of it it seems like a reasonable suggestion.

16 THE CHAIRMAN: I think that is fair. We cannot
17 expect you to go very far beyond what you have put before
18 us.

19 MR. STEWART: Now then, gentlemen, you have made
20 reference to a company called Federated Co-Operatives
21 Limited, which is referred to on pages 22 and 23 of your
22 brief. This appears to be a substantial concern. Do I
23 take it that you have seen its financial statements?

24 MR. ROLLING: Yes, these are published figures.

25 MR. STEWART: Published in the daily press?

26 MR. ROLLING: No, they are available to ourselves
27 through our Dominion Association.

28 MR. STEWART: Now this, in any event, is a whole-
29 sale co-operative and it serves, according to what you say
30 at the top of page 22, it serves retail stores, members

1 on the Prairies..

2 Now, I would just like to be sure I can follow
3 through what happens to the income of this wholesale
4 co-operative. You indicate that it pays out a substantial
5 part of its earnings by way of patronage refunds and I
6 take it that those patronage refunds or payments would go
7 to these retail store members. Are those retail store
8 members commercial companies or are they those co-opera-
9 tives?

10 MR. ROLLING: They are co-operatives.

11 MR. STEWART: So that what they receive, in
12 effect, increases their income and would be passed on by
13 them in whole or in part to their own individual members.

14 MR. ROLLING: If they declared patronage dividend,
15 yes.

16 MR. STEWART: Have you considered whether there
17 would be any merit in having one set of rules for large
18 companies of this type, large co-operatives of this type,
19 and another set of rules for small co-operatives or do
20 you lump them all together for your purposes?

21 MR. ROLLING: All together, sir.

22 MR. STEWART: Now, on page 39 of your brief, you
23 deal with the general subject of co-operative sales of
24 merchandise and supplies. I would like to refer, again,
25 to a publication I think I have already mentioned called
26 Recent Growth in the Canadian Co-Operatives, by Professor
27 R. Craig McIvor, which was published by the Canadian Tax
28 Foundation in 1962. The first article in that book is
29 one which bears the same name as the book itself. On
30 page 24 of that book, dealing with merchandising

1 co-operatives, Professor McIvor indicates that in recent
2 years those co-operatives have grown in certain particular
3 fields.

4 If I might read from the bottom of page 24, he
5 says this:

6 "Lengthy statistical comparisons are indeed
7 tedious and need not in this area be carried
8 further. They serve to establish two main
9 points. (1) That in particular areas of
10 merchandising, as for example feed and
11 fertilizers, hardware, lumber, clothing and
12 home furnishings, the rate of growth in
13 co-operative sales has substantially
14 exceeded those in the whole economy; and
15 (2) at the present stage of development
16 total co-operative merchandising sales
17 represent a very small but obviously
18 increasing percentage of total Canadian
19 sales in the comparable areas."

20 Then in a footnote to that portion that I have
21 read he says that it appears highly unlikely on the basis
22 of earlier post-war calculations that the co-operative
23 portion of retail merchandising sales in Canada would
24 have amounted at the end of 1960 to more than 3%. I
25 think that figure of 3% also appears in your brief at a
26 slightly later stage.

27 Now, would you agree as of that, as of the end
28 of 1960, the figure of 3% was approximately correct?

29 MR. ROLLING: Yes, I believe it was at that
30 time.

1 MR. STEWART: Now, that seems a pretty low
2 proportion of retail sales to cause you particular concern.

2 3 Is your concern based on the apprehension that the percen-
4 tage may continue to increase?

5 MR. ROLLING: It has continued to increase, I
6 believe.

7 MR. STEWART: And you think this process may go
8 on?

9 MR. ROLLING: I would think so, yes.

10 MR. STEWART: Well, then, on page 25, dealing
11 with ---

12 MR. ROLLING: Pardon me. To substantiate that,
13 going back to page 39, we refer there to merchandising
14 sales, the period 1957-1961. This compares with an increase
15 of 12.3 in the retail trade in Canada for the same period
16 and No. 4, 15.6% for the wholesale trade, which indicates
17 it is increasing.

18 MR. STEWART: On page 25 of Professor McIvor's
19 article he also suggests that between 1953 and 1960 in
20 the wholesale trade that co-operative sales rose from
21 approximately 2% of total Canadian wholesale trade in
22 the relative commodity classification to approximately
23 3%. Actually, you have quoted that sentence at the bottom
24 of page 41. That, again, would be substantially accurate
25 as far as you know.

26 MR. ROLLING: As far as I know, sir.

27 MR. STEWART: Now, on page 47 of your brief,
28 at the end of the first paragraph, where you have been
29 discussing what you consider to be an inequitable tax
30 situation, you say that this involves - then it is the

1 next few words I would like to ask you about - involves
2 the misallocation of the nation's resources.

3 MR.ROLLING: To answer that I would like to
4 quote the author of The Recent Growth in Canadian Co-Opera-
5 tives.

6 MR. STEWART: What page is this?

7 MR. ROLLING: This goes back to page 39 and I
8 believe page 25.

9 MR. STEWART: You mean page 39 on your brief?

10 MR. ROLLING: Page 39, where I was at, and the
11 other page 47 you referred us to.

12 COMMISSIONER WALLS: I believe it is covered by
13 a footnote on page 40, page 24 on the book you have in
14 front of you.

FF/ss 1 MR. ROLLING: I can't give you the reference
2 of Prof. McIvor's quotation there for the moment, if you
3 would be patient on that.

4 Could I read the quotation?

5 MR. STEWART: Please do.

6 MR. ROLLING: "The author of 'Recent Growth
7 in Canadian Co-operatives', after pointing out
8 the discriminations which existed in favour of
9 co-operatives under their tax laws has drawn
10 attention to the misallocations of our national
11 resources which resulted from the discrimination
12 as follows:

13 If this " --- the author is referring
14 to the extraordinary rate of growth which cooperatives
15 enjoy --- "is correct, then the present tax arrangements
16 are undesirable."

17 MR. STEWART: May I ask what you are reading
18 from?

19 MR. ROLLING: I am reading from this quotation
20 or commentary by Prof. McIvor. I haven't given you the
21 reference; I have to locate it.

22 MR. STEWART: What you are reading from appears
23 to be a report on Prof. McIvor's book.

24 MR. ROLLING: Yes. I haven't got the reference.

25 MR. STEWART: I notice on page 38 of Prof.
26 McIvor's article in the last paragraph, the second sentence,
27 he says: "There is nevertheless, a very good case on the
28 grounds of its effects upon equity, competitive advantage,
29 efficiency in resource allocation and upon public revenue
30 for a re-examination and reorganization of this particular

1 piece of legislation."

2 Now, when you talk about misallocation of the
3 nation's resources, are you on the same point as is made
4 there, that is efficiency in resource allocation?

5 MR. ROLLING: I would think that would be
6 correct. The financial advantage enjoyed by one against
7 the other would reflect the amounts available to the
8 treasury.

9 MR. STEWART: Thank you. And this is something,
10 I take it, then, that is a national matter as opposed to
11 a regional matter, and it is a problem relating to
12 industry as a whole and not simply to a particular indus-
13 try.

14 MR. ROLLING: It would relate to all, sir.

15 MR. STEWART: Now, gentlemen, let us suppose for
16 the moment that your proposals were adopted and that the
17 Government in its wisdom chose to tax cooperatives as
18 ordinary corporations, what effect do you consider that
19 this would be likely to have on the cooperative movement?

20 Let me break that general question down into a
21 number of sub-questions. First of all, do you think that
22 if cooperatives generally were subject to the present
23 rate of corporate tax they would or could proceed with
24 what I believe they call pricing out? Are you familiar
25 with this?

26 MR. ROLLING: Not that one, no. I think I follow
27 what you are getting at.

28 MR. STEWART: In the case of a merchandising
29 cooperative, instead of selling at ordinary commercial
30 prices or the equivalent they might sell at reduced prices,

1 and thereby reduce their profit.

2 MR. GORMAN: I don't think that would create a
3 problem. This is happening today in discount operations.

4 MR. STEWART: So so far as you are concerned,
5 do I gather that you think they would adopt that technique
6 or could adopt that technique?

7 MR. GORMAN: Well, Mr. Chairman, it is our
8 contention that cooperatives are in business to make a
9 profit, and if they are going to continue in business to
10 make a profit, they could not adopt that technique any
11 more than private business could and remain in business.

12 MR. STEWART: We have been faced with --- I won't
13 say threats, but with suggestions that these pricing out
14 techniques are available as recently as this morning,
15 although I grant you that the suggestions there came from
16 credit unions and not cooperatives in the strict sense.
17 Do I infer that you would not take suggestions of this
18 nature seriously?

19 MR. GORMAN: No.

20 MR. STEWART: You would not?

21 MR. GORMAN: No.

22 THE CHAIRMAN: This is the point I think they
23 answer on pages 30 and 31 under the heading "Price Adjust-
24 ment Theory." Do you think that would be the case, Mr.
25 Stewart?

26 MR. STEWART: I think that is probably so, Mr.
27 Chairman.

28 Perhaps we can ask the witnesses. Is what you
29 say under the heading "Price Adjustment Theory" commencing
30 on page 30, is that your answer to the pricing out argument?

1 MR. GORMAN: Yes, I would say it is.

2 MR. ROLLING: Yes, I think so.

3 MR. GORMAN: Yes, substantially, Mr. Chairman.

4 THE CHAIRMAN: I wish that connected, Mr.

5 Stewart, because there is an important question I would
6 like to raise when you are through, not now.

7 MR. STEWART: Does what you say there deal with
8 the question of pricing out? As I understand what appears
9 on page 30 where you are talking about a price adjustment
10 theory, you are complaining about the fact that cooperatives
11 say that they are carrying on business at cost and what
12 is rebate or refund or what they pay by way of patronage
13 dividends to their members is simply an adjustment to
14 bring transactions to what was regarded as the original
15 cost basis. I think my question is somewhat different.
16 What I am getting at is this: Would they price out in
17 this sense? Let's suppose, to take a simple example,
18 that the price of a pair of socks is 39 cents and that
19 ultimately the person who buys a pair of socks gets a one-
20 cent refund or rebate. Now, suppose, faced with this
21 problem of income tax on cooperatives, the cooperative
22 decides to sell that pair of socks not at 39 cents, but
23 at 38 cents so that it is operating as closely as it can
24 to a break-even point and its patronage dividends are
25 reduced to an absolute minimum, do you envisage that the
26 imposition of income tax on cooperatives might result in
27 that type of costing technique or pricing technique?

28 MR. ROLLING: This would, as you suggest, appear
29 to defeat the purpose of all cooperatives, which I under-
30 stand are organized to increase gain for their members.

1 Do you suggest that this would cause them not to operate
2 to a point of gain for their members?

3 MR. STEWART: Fortunately, Mr. Rolling, I am
4 not in a position to answer questions.

5 MR. ROLLING: Pardon me; I wanted to be sure
6 I fully comprehended yours. But I would suggest to you
7 that the cooperatives are organized to increase the
8 gain of their members and, as you suggest, I do not see
9 how this would be possible, as you said, a break-even
10 point, and this would obviously eliminate even patronage
11 dividends. Is that correct?

12 MR. STEWART: Well, Mr. Rolling, I am not sure
13 that a person who was a member of a cooperative would
14 agree that the object of a cooperative is gain for its
15 members. I think what they might suggest is that they
16 are banded together to accomplish in concert and in
17 effect on a cost basis things which they cannot do indivi-
18 dually. So that while, as a matter of practice, and I
19 suppose to some extent because they deal with non-members,
20 they do sell --- and I am talking about merchandising
21 cooperatives --- at sort of normal market prices, they
22 then proceed to restore their membership to a cost
23 method of operation through the device of a patronage
24 dividend.

25 MR. ROLLING: Well, my concept is that each
26 member is a joint venturer in a corporate business as
27 a shareholder in a co-op, and I do not believe they would
28 be too happy with what you suggest, even though they have
29 banded together for what may be termed their betterment.

30 MR. STEWART: Well, your approach to corporate

1 organization is the traditional commercial approach, but
2 I am not sure myself it is the cooperative approach. But
3 this is something we don't have to decide here.

4 I think, however, this question is pertinent.
5 Do you consider that it is in the interest of the average
6 retail merchant in Canada or in Ontario --- let's confine
7 it to Ontario --- to encourage cooperatives to sell on
8 a cost basis as opposed to the ordinary commercial basis?

9 MR. ROLLING: I think this might clarify that
10 particular point. On page 26, we have an example of a
11 man in the retail business and a cooperative in the
12 grocery trade, both of them showing a net profit of
13 \$10,000.00 at the end of the year. The cooperative in
14 the grocery trade with the net profit --- this is to the
15 left of the page --- of \$10,000.00 less patronage
16 dividends also paid in full or partly retained in the
17 business \$7,500.00, taxable profit of \$2,500.00, tax
18 payable, Federal and Provincial, \$575.00, as against
19 an individual retailer with a net profit of \$10,000.00,
20 on the right of the page, less personal allowances of
21 \$2,500.00, taxable profit of \$7,500.00, tax payable
22 (after giving effect to Federal and Provincial adjustments),
23 \$1,483. 20.

24 I believe that is a reasonable comparison to the
25 feeling of the retailer that wouldn't necessarily want to
26 encourage competition of that type.

27 MR. STEWART: Well, Mr. Rolling, I understand
28 your Table on page 26, but I don't think that really
29 answers the question I have put to you.

30 Let me give you a simpler example.. Suppose one

1 of your members is actively engaged in competition with
2 a cooperative in his own town and at the present time
3 they are both selling a particular type of tooth powder
4 for 59 cents, and, as a result of your representations
5 and such other factors that it takes into account, the
6 Government decides that it will tax cooperatives on their
7 income and the cooperative that we are presently concerned
8 with, the competitor of your member, decides that it will
9 operate as close to a cost basis as it can, and one of
10 the results of this is that the price of tooth powder
11 in the cooperative store is cut from 59 cents to 57 cents.

12 Is there something that you as members of
13 your Association would contemplate with equanimity?

14 MR. ROLLING: I would say that no retailer
15 to our knowledge appears in normal competition such as
16 that.

17 MR. STEWART: So in substance your view is if
18 cooperatives do price out, the independent merchant can
19 satisfactorily compete against him.

20 MR. ROLLING: I would say so; yes, sir.

21 MR. STEWART: And that would mean, presumably,
22 that you would not expect that a substantial volume of
23 business would be diverted from the independent retail
24 merchant to the cooperative.

25 MR. ROLLING: No, sir.

26
27 ----
28
29
30

GG/ET/dpw 1

2 MR. STEWART: Now, gentlemen, as you know, under
3 the present legislation co-operatives are subject in
4 certain events to a tax of 3% on capital employed. I
5 appreciate that your representations are designed to
6 alter the present situation quite materially, but suppose
7 for the moment we were considering a retention of the
8 basic system that we now have, have you any comments to
9 make on the 3% figure?

10 MR. ROLLING: I don't think so, sir.

11 MR. GORMAN: It is a very minimal figure, Mr.
12 Chairman. If we were to consider the example we show on
13 page 26 to show profit of \$10,000, 3% on his investment,
14 it is a small tax; an investment, perhaps, of \$20,000,
15 3%, \$600, it doesn't change too much from the present tax
16 that we show in that example for that same merchant.

17 MR. STEWART: But you have no particular sugges-
18 tion to make as to a figure which might replace the 3%?

19 MR. GORMAN: It is quite within the realm of
20 possibility, Mr. Chairman, that the Dominion Association,
21 the Retail Merchants' Association, with the help of
22 Professor Lloyd Barber of the University of Saskatchewan,
23 when they make their presentation in the Fall some of the
24 points we have failed to bring out may be further elaborated
25 on or more detailed.

26 MR. STEWART: Thank you. Incidentally, if I
27 could go back for a moment to page 24 of your brief, in
28 the third paragraph on that page you deal with the tax
29 payable by a co-operative in certain events. You indicate
30 there that on those figures the co-operative would pay
31 7.9% of its earnings by way of tax.

1 Is it not the fact that that particular co-opera-
2 tive is assumed to have paid out or to have paid in
3 patronage dividends a total of \$150,000, which would be
4 taxable in the hands of the recipients?

5 MR. ROLLING: If they were in a tax-paying
6 bracket.

7 MR. STEWART: Yes. By the same token a
8 commercial corporation is taxed on dividends only if he
9 is in a taxable bracket.

10 MR. ROLLING: Correct.

11 MR. STEWART: Similarly, on page 26, where you
12 set out another comparative example, you show tax payable
13 by the co-operative, on the lefthand side of the page, of
14 \$575, but you have not taken into account any tax payable
15 on the patronage dividends.

16 MR. ROLLING: No.

17 MR. STEWART: Now, gentlemen, in your brief
18 there does not appear, if I remember correctly, to be any
19 particular point made about the accumulation of reserves
20 by co-operatives or about the accumulation of investments
21 and therefore investment income by co-operatives. Have
22 you any particular comment on either or both of those
23 points at this stage?

24 MR. ROLLING: I would refer you to page 23,
25 where we give a statement there that from 1954 to 1962
26 on the financing and growth of this particular co-op as
27 it commenced moving across the country from Saskatchewan
28 to Manitoba in 1955 and through 1962 finally to Alberta
29 with a total of \$94,825,852.

30 MR. STEWART: Those are sales?

1 MR. ROLLING: Yes, correct.

2 MR. STEWART: And you refer about halfway down
3 that page 23 ---

4 MR. ROLLING: In paragraph 2.

5 MR. STEWART: Yes.

6 MR. ROLLING: To the example of aggregate
7 operating savings from 1947 to 1961 were \$27,651,000.

8 MR. STEWART: Then you go on and say that from
9 1948 to 1962 equities in common shares, certificates of
10 indebtedness and reserves increased by some \$15,596,000?

11 MR. ROLLING: Correct. Therefore, about
12 \$12,055,000 was paid in income taxes and cash dividends.
13 However, we do qualify that that is a general statement.

14 MR. STEWART: This is one particular case, and
15 there, of course, we are not able from what you say, at any
16 rate, to break down that \$15,500,000 between common
17 shares on the one hand and certificates of indebtedness
18 on the other hand and reserves in the third place. Your
19 researches into these co-operatives have not led you to
20 form any particular general conclusions about the amounts
21 of their reserves?

22 MR. ROLLING: No, but I could make probably
23 an observation in that regard with regard to Federated Co-Ops,
24 that it would appear as though they have minimized their
25 income tax liability to less than 5% in 1961. To the
26 best of our knowledge this procedure is consistent with
27 long-term policy. It can then be estimated with reasonable
28 accuracy that their cash payments on aggregate operating
29 savings of \$27,651,000 from 1947 to 1961, referred to on
30 page 23, the second paragraph, are not likely to have been

1 in excess of one million dollars.

2 Therefore, in addition to the increase of
3 \$15,596,000 in equities, by way of re-investment of
4 patronage dividends, approximately \$11,000,000 would
5 appear to have been distributed to members in the form of
6 cash returns. That is an observation.

7 MR. STEWART: I see. Well now, Federated
8 Co-Operatives, as we have said earlier, is a wholesale
9 co-operative. I asked the question earlier whether you
10 would draw a distinction between large co-operatives and
11 small, and you indicated that you would lump them all
12 together. Perhaps I might ask a supplemental question:
13 would you draw a distinction between co-operatives which
14 deal direct with the producer or the consumer on the one
15 hand and these wholesales or national organizations on the
16 other?

17 MR. GORMAN: Those two types of co-operatives,
18 Mr. Chairman, I think, are fairly akin and as against the
19 agency type of co-op.

20 MR. STEWART: Well, do you consider that the
21 first group, that is the wholesales and the national,
22 because of the fact that they deal with co-operatives as
23 opposed to dealing with individuals should be singled out
24 for any special treatment for tax purposes?

25 MR. ROLLING: No.

26 MR. STEWART: Again, you lump all co-operatives
27 together?

28 MR. ROLLING: Right.

29 MR. STEWART: Gentlemen, I think those are all
30 the questions I have at this stage.

1 THE CHAIRMAN: Thank you, Mr. Stewart. I have
2 one or two questions and I guess the other Commissioners
3 have likewise, and we will be late. On page 31, I would
4 like to draw attention to the price adjustment theory in
5 the second to last sentence of the top paragraph which
6 reads: "But the patronage dividend is not paid to the
7 person or firm from which the gain is derived."

8 In order to qualify the dividend must be propor-
9 tionate to patronage, and I would have thought that that
10 is the best attempt that could be made of allocating the
11 dividend to the person or firm from which the gain is
12 derived. I wish you would expand on those words and tell
13 me what meaning, if any, I have missed.

14 MR. ROLLING: Perhaps I could answer that in
15 this way from Robert G. Patterson's book, "Tax Exemptions
16 of Co-Operatives" on that statement. There is no clear-cut
17 difference between patronage dividends in general and
18 dividends of ordinary corporations. The fact that
19 patronage dividends are paid to patrons who are also stock-
20 holders does not make them anything other than a distribu-
21 tion of profits. Now, does that answer your question, Mr.
22 Chairman?

23 THE CHAIRMAN: No, I do not think so.

24 MR. ROLLING: Well, I could add further, then,
25 that patronage dividend is not paid to the person or firm
26 from which the gain is derived in an analysis of the
27 taxability of co-operative earnings or net margins. The
28 significance of this point cannot be over-emphasized.

2 29 Now, that is a quotation from Robert G. Patter-
30 son's book, "Tax Exemption of Co-Operatives," page 71.

1 THE CHAIRMAN: Yes. That is your answer, is it?

2 MR. ROLLING: Right.

3 THE CHAIRMAN: Thank you very much. I was
4 hoping that you might include in your submission a
5 reference to the shrinkage of the tax base in this area
6 because of the fact that there is a large increase in the
7 business of co-operatives, and you might give some indica-
8 tion of the business failures or the take-overs of private
9 enterprise by co-operatives if, in fact, that has occurred.
10 I would suspect there may have been failures and there may
11 have been take-overs if there has been a decided advantage
12 to the one type of organization as opposed to the other.

HH/MC/ss 1

MR. ROLLING: I cannot quote examples, but there

2 have been cases where funds have been available to take
3 over a retailer and buy a Co-op, as you bore out.

4 THE CHAIRMAN: Has that not operated in both
5 ways, have non-cooperative businesses taken over coopera-
6 tives?

7 MR. ROLLING: Never that I have known, Mr.
8 Carter.

9 COMMISSIONER GRANT: I wonder if you would make
10 any comment on the fact that in the United States as
11 recently, I think, as 1961, legislation was passed which
12 puts the Cooperative movement in that country on much the
13 same basis tax-wise as we have in Canada. There is one
14 exception to it and that is in order to take patronage
15 dividends from earnings before arriving at net taxable
16 figure that 20% of that patronage dividend must be paid
17 in cash. I am interested in your reaction to (a) the
18 fact that the legislation in the United States is quite
19 recent, modelled as it is on legislation which has been
20 in our tax laws for two decades almost and also the
21 fact that they have made that one modification that 20%
22 must be paid in cash. Their idea stated openly, I believe,
23 is that the earnings of Cooperatives should not be subject
24 to double taxation.

25 MR. ROLLING: I am not sure, Mr. Grant, but I
26 believe you are referring to the year 1947, and the year
27 1951 in the United States?

28 COMMISSIONER GRANT: No.

29 MR. ROLLING: Quite recent?

30 COMMISSIONER GRANT: Quite recent.

1 MR. ROLLING: I would not be prepared to answer
2 that question. In view of the fact I am a member of a
3 Committee I would like to make a note of it and reply in
4 writing.

5 COMMISSIONER. GRANT: Yes, that would be satisfactory.

6 COMMISSIONER WALLS: It is not too important a
7 question, but I would like to clarify it for the record.
8 First of all, as appears in your synopsis on page A you
9 state industrially the retail industry contributes heavily
10 to the Federal treasury at the income tax level apart
11 from its involvement with Federal excise and sales tax, and on
12 Page 6, paragraph 6, you say that retailers are heavy
13 contributors to the Federal treasury on the income tax
14 level separate and apart from payment of Federal excise
15 and sales tax on their stock-in-trade.

16 By these statements do you mean the retailers
17 are paying Federal sales and excise tax?

18 MR. GORMAN: Mr. Chairman, yes, to some extent
19 they are. If the retailer buys \$100.00 worth of merchan-
20 dise, and much of the merchandise that many of us carry
21 is very fragile in nature, and if it happens to be very
22 valuable glass, for the sake of argument, and that falls
23 on the floor, there is no recapture for that. In the
24 meantime the retailer has paid.

25 COMMISSIONER WALLS: Is it not a fact the
26 manufacturer has paid the sales tax and the excise tax or
27 the licensed wholesaler pays the excise and sales tax?

28 MR. GORMAN: That subsequently is invoiced to
29 the retailer.

30 COMMISSIONER WALLS: Therefore is it not equally

1 applicable to the Cooperatives? Do they then not indirectly
2 also pay the same tax?

3 MR. GORMAN: Yes, I would say it would.

4 COMMISSIONER WALLS: We have had some partici-
5 pants in front of us who are pointing to this as being a
6 negative position for the retailer. They claim that indirectly
7 the retailer has made a profit through pyramiding of this
8 tax. In other words, if you buy a product with the sales
9 tax added and you put the percentage of profit on it,
10 then that percentage is added to both the product and the
11 sales tax. Do you agree with that?

12 MR. GORMAN: That is right, that is the practice.

13 COMMISSIONER WALLS: There is just one other
14 question I had in mind, and that was the last paragraph you
15 quoted on page 23 of the rapid growth of this one particu-
16 lar cooperative group. It is a Federated group and suddenly
17 has sales of 14 million in one year in Alberta with nothing
18 shown for previous years. Could that not be because it
19 has federated an already existing cooperative organization
20 in Alberta into its organization and therefore it is not
21 real growth, but that same organization could have had
22 like sales in the previous years.

23 MR. ROLLING: Mr. Walls, this would be difficult
24 to answer without some further diagnosis of this statement.
25 It is entirely conceivable the amount might have been as
26 you suggest, inherited from the same amount of business
27 last year, but it is also possible that this is business
28 that might have been done within the year, as shown on our
29 chart in 1962. We would have to, I believe, be very fair
30 and put down your question and see if we can answer that

1 one in writing, Mr. Walls.

2 COMMISSIONER WALLS: Thank you very much.

3 THE CHAIRMAN: Thank you very much, Mr. Gorman
4 and Mr. Rolling, for your help this afternoon. This
5 matter of cooperatives is an extremely difficult one.
6 This is not quite our start on it, but we haven't got
7 into it very far so far.

8 It is not the only problem, of course, that we
9 are confronted with. There are many important ones. While
10 we appreciate your assistance tremendously on this
11 aspect, there are others we would like to hear about from
12 the retail merchants. For instance, it has been
13 suggested to us that sales tax might be all shifted to
14 the retail level. Undoubtedly you have heard that
15 suggestion. I cannot think of any group that would be
16 more concerned over a shift in the point at which sales
17 tax would be applied than the retail merchants of Ontario
18 and Canada.

19 You are undoubtedly aware of other proposals
20 which we have had made to us already which would concern
21 the retail merchants. We do hope that either through your
22 written submission or through your national organization
23 that you will express your views, not just on cooperatives,
24 although we want those, but on other matters that will
25 weigh with your people.

26 We need all the help we can get. We need help
27 particularly from those people who are concerned. I know
28 there are many items that will concern you.

29 Thank you very much indeed for your attendance
30 this afternoon and your excellent written submission and

1 for submitting yourselves to a barrage of questions.

2 If we have seemed to be a little vigorous at times in
3 our questioning, it is only to better understand the
4 problem you have presented to us. Thank you very much
5 indeed.

6 MR. GORMAN: It is our pleasure, sir.

7 THE CHAIRMAN: Mr. Secretary, is there anything
8 else today?

9 THE SECRETARY: There is nothing else today.

10 At 9:30 tomorrow morning the Federated Council of Sales
2 11 Finance Companies, Mr. J. S. Robbins of Dundas, Ontario,
12 and
13 Mr. Hamilton Cassels on behalf of the University of
14 Toronto.

15 THE CHAIRMAN: We will stand over until 9:30
16 tomorrow morning.

17
18 ---Adjournment.

3	(c.) <u>SPECIFIC DISCUSSIONS: (continued)</u>	
4	3. A point and question, so long as they	
5	the Unions lend money to their own	
6	members, could they not reduce, or,	
7	in fact, eliminate tax by reducing	
8	their interest charges ? The reply	
9	to the question and some construct-	
10	ive viewpoints.	I772, I773
11	4. A question in reference to extension	
12	of credit to business for machinery	
13	and equipment by members of the	
14	Federated Council, the competitive	
15	factors in relation to Credit Unions.	I773, I774
16	5. A point, in reference to consumer finance,	
17	the competition with Credit Unions.	I774, I782
18	6. A question, in consumer finance, how	
19	do your interest rates compare with	
20	that of the Credit Unions. The reply	
21	and exemplification of.	I774 + I776
22	7. A reference to Credit Unions performing	
23	services that finance Companies do not,	
24	a few comments in respect thereto.	I776, I777
25	8. A question, would you consider that	
26	the Caisses Populaires in Quebec	
27	were Credit Unions ? The reply	
28	and differentiations expressed.	I777, I778
29	9. A point in reference to Credit Unions	
30	becoming commercial in character,	
31	The reaction to the statement or,	
32	concept, and exemplifications to	
33	justify the statement or allegation.	I778, I783
34	10. A reference to:- " American Bankers"	
35	magazine, November 1962 issue,	
36	subject, Taxation of Credit Unions,	
37	some comments in respect to the	
38	article appearing therein.	I782
39	II. A reference to an amendment to the	
40	Ontario Securities Act; A new Deposit	
41	Taking Act; covering closer control	
42	of methods of raising money Re:-	
43	Consumer Finance Companies.	I785, I786
44	12. A reference and question to, type of	
45	the security offered, and the manner	
46	in which Council membership is raising	
47	its money would have some bearing on	
48	the suggestion, that, the Reserve be	
49	set up out of earnings and before taxes,	
50	The point, what risk involved to the	
51	public when money is raised say through	
52	deposits or short term notes? The reply	
53	and reaction to the question .	I786, I787

19	Brief of The Federated Council of Sales <u>Finance Companies</u>	* 549, 1769
	* As previously recorded on April 23, 1963 - contained in Volume No. 6-B of The Royal Commission on Taxation records of submissions.	
77	Submission of The Governors of The University of Toronto.	1805
78	Submission of Mr. J.S. Robbins, Dundas, Ontario.	1815

Toronto, Ontario,
Wednesday,
May 22nd, 1963.

1769

1
2 --- On commencing at 9.30 a.m.

3 THE CHAIRMAN: Mr. Secretary, it is just about
4 9.30. I think we might start.

5 THE SECRETARY: All right, Mr. Chairman, Commis-
6 sioners. You will recall, Mr. Commissioners, that in
7 Montreal we entered into the records as Exhibit No. 19
8 the brief of the Federated Council of Sales Finance
9 Companies. At this time the officers of the Council are
10 appearing before you and wish to speak to the brief which
11 has already been entered.

12 Mr. E.M. Howarth, Executive Vice-President, will
13 speak to the brief. On Mr. Howarth's left is Mr. K.J.
14 Doig, Vice-President, Finance, Industrial Acceptance
15 Corporation Limited, a member of the Council, and on Mr.
16 Howarth's right is Mr. E.G. Jarmain, Treasurer, Canadian
17 Acceptance Corporation Limited, another member company of
18 the Council.

19 THE CHAIRMAN: Thank you, Mr. Secretary. Good
20 morning, gentlemen. We are very glad to have you here
21 this morning, and we are grateful for your attendance. It
22 is not necessary nor desirable to read to us your submis-
23 sion. We have had an opportunity of going over it, which
24 we have done, and we are very much interested in the
25 contents. Most of our visitors speak to their submission,
26 either summarizing it or commenting on it, and we are
27 quite prepared to ask a few questions.

28 It seems to me, Mr. Howarth, this lends itself
29 to dealing separately with each of the three points which
30 you have raised. They are not particularly interrelated;

2 1 I think each point stands by itself. I think you have
3 pretty well covered the Federated Council in your submis-
4 sion and your relationship to it. We would be very glad
5 to hear anything you would care to say to us.

6 MR. HOWARTH: Thank you, Mr. Chairman and
7 Commissioners. I do not think I will endeavour to review
8 the brief for its main points again for it is a fairly
9 short one and I am sure you will have a chance to consider
10 it. I think, perhaps, I could just add one word about our
11 Council. That is, while we have 39 member companies, they
12 do vary considerably in size and also in geographical
13 position, and to some extent, in the type of business that
14 they conduct, although they are in the sales finance field.

15 We did wonder when we considered our appearance
16 here this morning just how many companies we should ask to
17 be represented to give a broad picture of our affairs such
18 as you would wish to discuss, and we came to the conclusion
19 that we would appear in rather a small group and if some-
20 thing should arise in the discussion where we felt it went
21 beyond either the Council's accumulated experience or the
22 experience of the gentlemen who are with me this morning,
23 then we would make that point with you and possibly have to
24 refer for additional information if this should arise.

25 Mr. Doig and Mr. Jarmain are here on behalf of
26 the Council to speak from firsthand experience on any of
27 these affairs. I think the only thing I would say is that
28 I understand in the discussion we are free to comment and
29 to add to each other's remarks if we feel that this is
30 necessary. Is this the procedure?

THE CHAIRMAN: By all means. I do not think you

1 could have had a complete representation because you are
2 growing so fast, I observe, and you have increased by one
3 since you wrote this submission. By all means feel free
4 to express any opinion.

5 MR. HOWARTH: I think we would prefer to consider
6 any questions or comments that you or your Commissioners
7 might wish to make and proceed from there.

8 THE CHAIRMAN: Well, we will start with the
9 first of the headings that you put to us; namely, credit
10 unions. You recommend that seeing they have become, you
11 say, commercial in character, this Commission should
12 consider whether it is in the best interests of the
13 Canadian economy that they be exempted from carrying a
14 fair share of the tax burden. Your suggestion, I think,
15 is that they should be taxed in the same way as any other
16 corporation; is that correct?

17 MR. HOWARTH: That is our basic recommendation.
18 I think that we, as an industry, would consider that
19 co-operatives of any kind and credit unions in particular
20 should bear their share of the tax burden, and we have
21 directed our recommendations to that.

22 THE CHAIRMAN: Do you consider it is equally as
23 easy to measure their income as it is taxpayers such as
24 yourselves?

25 MR. HOWARTH: Not necessarily as easy, Mr.
26 Chairman. We would expect there would be problems in
27 doing so, but if we could make a general suggestion of an
28 approach that might be made, we feel that one area that
29 could be considered for taxation as an introductory step
30 might be their retained earnings; earnings in the sense of

1 the excess of their income over their expenses of operation.
2 However, if you are using the word "easy," Mr. Chairman,
3 in the sense of accounting?

4 THE CHAIRMAN: Yes.

5 MR. HOWARTH: We appreciate there would be
6 problems. Probably it would involve a considerable study
7 of their present accounting operations, but we do not
8 believe this would be an insurmountable obstacle. We
9 feel this is an operation involving dollars and cents,
10 and if the will was there to apply taxation, this could
11 be done, but not without proper study.

12 THE CHAIRMAN: So long as they lend money to
13 their own members could they not reduce or, in fact,
14 eliminate tax by reducing their interest charges?

15 MR. HOWARTH: In the sense of reducing the cost
16 of their operation down to the income that they would
17 derive? I think they could do that just as much as any
18 other organization could if it wished to do so. There
19 could be nothing that I could see to prevent it. Perhaps
20 Mr. Jarmain would speak to that.

21 MR. JARMAIN: I am not an expert on credit
22 unions; this I should confess to start with. It does seem
23 to us that one of the tests of what we have chosen to call
24 commercialism which we feel has arisen in the credit union
25 organizations on this continent has been the retention of
26 earnings, which, as I understand it, is quite contrary to
27 the original intention of the credit union movement, which
28 was to provide mutuality of service in a cohesive group
29 which they could not provide individually.

30 Measuring their income and measuring their

1 expense really is not technically difficult. I agree with
2 you that if they choose to operate on a break-even basis,
3 and assuming for the moment that they had reserves for
4 possible losses in that group, I think they would be
5 confined to what was intended originally.

6 The position, we feel, is when they began to
7 borrow from banks and they began to borrow from other
8 sources, including short-term money markets, they have
9 gone beyond the original intention, and, in fact, are
3 10 subsidized by tax-paid dollars in competition with
11 organizations like our own and chartered banks.

12 THE CHAIRMAN: It would seem to me, you see,
13 that they could operate quite satisfactorily in such a
14 manner so as to break even rather than make a profit.
15 The law requires that they establish certain reserves and
16 I would have thought that since the law acknowledges those
17 reserves, they must be recognized as deductible from their
18 income and treated as expenses. If that is so, we are,
19 of course, curious as to whether income tax is something
20 that might be properly applied to an organization which,
21 because it is not at arm's length really with its borrowers,
22 cannot operate quite satisfactorily without, in fact,
23 making a profit. If that is so, there is not much merit
24 to recommending taxation of that kind.

25 COMMISSIONER WALLS: I note in your introduction
26 more than 90% of credit extended by your members is for
27 business, for machinery and equipment purchases.

28 MR. HOWARTH: I do not think you have the context
29 of that properly; not more than 90% of the credit we extend
30 is for business, but our members extend over 90%.

1 COMMISSIONER WALLS: I understand that, although
2 I may have stated it wrongly. Surely that is a branch of
3 industry or lending in which you have no competition
4 whatsoever from the credit unions.

5 MR. HOWARTH: We have very little competition
6 from the credit unions, to my knowledge, in that area, but
7 I believe there have been occasions of commercial lending.
8 I did hear of an example of a credit union in Hamilton
9 financing a bowling alley. You are quite right. This
10 area of financing of equipment for business and industry
11 is not one in which we come into contact or competition
12 with the credit unions. The competition we have with
13 credit unions is in the consumer.

14 COMMISSIONER WALLS: In the consumer finance?

15 MR. HOWARTH: Yes.

16 COMMISSIONER WALLS: In consumer finance how do
17 your interest rates compare with the credit unions'?

18 MR. HOWARTH: Well, the credit union rate is 1%
19 per month of the outstanding balance, which is 12% per
20 annum rate.

21 COMMISSIONER WALLS: Right.

22 MR. HOWARTH: The rates that our companies
23 charge would vary depending upon the type of receivable
24 that was being financed. New cars today, for example -
25 the rate would range from, I believe, somewhere in the
26 neighbourhood of 11½% up to 15%. Something across that
27 range. If you get into used cars or other small balance
28 items where you have got to recover a certain number of
29 dollars, the rates will go up to 20, to 25 per cent,
30 depending on the particular type of transaction.

1 COMMISSIONER WALLS: So that really to the
2 small man, provided that the co-operative unions stay
3 servicing the small man, they are giving him overall,
4 generally, a lower interest rate than the normal finance
5 companies are giving? I mean overall. I agree on some
6 items you are giving $11\frac{1}{2}$, but overall they are giving a
7 lower interest rate.

8 MR. HOWARTH: I think if you use the term
9 "overall" I would have to say yes to that. May I just
10 add one point here that sometimes is lost sight of? While
11 the credit union rate is 1% per month, which is 12% per
12 annum, it is also considered good credit union practice
13 to encourage members to leave their funds on deposit if
14 they have funds on deposit.

15 If I can give you an example: if a man has, say,
16 \$100 on deposit with a credit union, and say he needs
17 \$200 for some purpose, he can go to his credit union and
18 arrange for a loan of, say, \$200, or he might withdraw
19 \$95 and leave \$5 on deposit and borrow the rest.

20 COMMISSIONER WALLS: Yes.

21 MR. HOWARTH: Now, it is considered good credit
22 union practice, and I believe in the interests of keeping
23 savings intact you can make a case for it there to
24 encourage that man to leave savings on deposit and make a
25 loan for the balance, which he will repay at proper inter-
26 vals.

27 COMMISSIONER WALLS: After all, is that not what
28 the life insurance companies also do? Rather than cash
29 your policy in, you borrow from it and retain the policy.

30 MR. HOWARTH: Oh, well, I think there is a

1 slight difference there. May I finish my illustration?

2 COMMISSIONER WALLS: Yes.

3 MR. HOWARTH: If, as I believe frequently
4 occurs, the man borrows the full amount of his needs,
5 leaving his money on deposit; in my example, where he
6 would borrow \$200, and leaves \$100 on deposit, the net
7 investment of the credit union as an institution is only
8 \$100, and that has a very definite effect on the rate.

9 Now, I am not discussing the desirability of
10 the transaction, but you raised the question of rates,
11 so that the effective rate that the credit union would
12 earn in such a transaction would be 23 or 24 or 25 per
13 cent. This, I believe, from the evidence I have seen, is
14 considered good credit union practice.

15 COMMISSIONER WALLS: I would not know about that,
16 but I do know from their bylaws there is nothing to stop
17 a man withdrawing his \$100.

18 MR. HOWARTH: Absolutely nothing.

19 COMMISSIONER WALLS: We can only go by the bylaws
20 rather than on hearsay, can't we?

21 MR. HOWARTH: This is not hearsay.

22 COMMISSIONER WALLS: I see. Is it not right
23 that the credit unions perform another service that your
24 finance companies do not, and that is one of encouraging
25 savings amongst small people?

26 MR. HOWARTH: Oh, definitely.

27 COMMISSIONER WALLS: You are quite prepared to
28 loan ---

29 MR. HOWARTH: We give them full marks for that
30 in our brief. Within the confines of the small group, we

1 feel the credit unions are a positive and, in many respects,
2 a useful part of our society. Personally, I have on two
3 occasions been a member of a credit union in two previous
4 employments I had, and they were both industry, and I
5 believe in every respect they fulfilled the original
6 purpose of the credit union.

7 COMMISSIONER WALLS: Thank you. That is all.

8 COMMISSIONER BEAUVAIS: Would you consider that
9 the Caisses Populaires in Quebec were credit unions?

10 MR. HOWARTH: In the sense of our brief, yes.

11 COMMISSIONER BEAUVAIS: Because I think that is
12 a quite different organization. Do you not think so?

13 MR. HOWARTH: Well, I believe its basis is
14 parochial, but to the extent of retention of earnings and
15 to the extent of borrowing funds from outside sources, I
16 do not see that it differs in any way.

17 COMMISSIONER BEAUVAIS: I think, though, the
18 equity or the reserves do not belong to the members. If
19 there is a winding-up, for instance, all the reserves
20 except capital stock will be given to charitable institu-
21 tions or education.

22 MR. HOWARTH: I was not aware of that, Mr.
23 Beauvais.

24 COMMISSIONER BEAUVAIS: As directed by the
25 Lieutenant-Governor in Council of the province, so that
26 they have no say in the distribution of their reserves.
27 The only income that the members will receive is the divi-
28 dend, and the dividend is from 4 to 5 per cent. Moreover,
29 the interest rate is not more than 6%. There is also an
30 insurance to cover the loan. Therefore, it seems to me

1 that we should make a difference between the Caisses
2 Populaires in the Province of Quebec and the credit union.

3 MR. HOWARTH: Well, with respect, Mr. Beauvais,
4 I am not familiar with those particular rates that you
5 are mentioning there, but we would still argue that if
6 they are creating earnings in their operation, that they
7 should bear their share of the tax burden. I was not
8 aware of this - you say if they were winding up, in other
9 words, the net resources would not return to the members
10 of the organization?

11 COMMISSIONER BEAUVAIS: That is right.

12 MR. HOWARTH: I did not know that. Even so,
13 dealing strictly with the question of profitability and
14 tax, we would not vary our recommendation there.

15 COMMISSIONER BEAUVAIS: Yes, but for the record
16 I would like to say there is quite a difference, and they
17 should not be considered as a credit union in the sense
18 that credit unions are used in the brief here.

19 COMMISSIONER PERRY: Mr. Howarth, you will
20 agree that a key point here is one which you emphasize
21 throughout your brief, and that turns on the statement
22 that credit unions have become commercial in character.
23 You mention this several times. This is a rather subtle
24 sort of concept. We had a credit union before us yesterday,
25 and I asked them if they would continue to argue that the
26 character of their movement had not changed if eventually
27 they were doing all the financial business in the country,
28 and they said they would continue to argue that; that the
29 basic concept of their movement had not changed even if
30 they ever reached the point where they had all the deposits

1 and were making all the loans.

2 MR. HOWARTH: Did you wish me to comment on that?

3 COMMISSIONER PERRY: I just wondered what are
4 the indicia here. It is theoretically conceivable that
5 size is not an indicia; that eventually credit unions
6 could take over the whole financial system, always opera-
7 ting within your statement of what is the basic function
8 of a credit union.

9 MR. HOWARTH: One thing I am amused to hear:
10 how they have answered that question. Some of their own
11 leaders in the United States have been very self-critical
12 about the development that has occurred in recent years.

1 We would look at it this way: One criterion
2 might be the original common bond concept of borrowing
3 from members, or at least having the savings of members
4 available for lending to members when they have a
5 provident or productive purpose.

6 When a credit union goes to the point where it
7 will borrow funds either from the Central organization or
8 a bank to carry on operation within that credit union of
9 lending, I cannot see any distinction between what our
10 industry does or the banks or small loan companies.

11 The original concept of the credit union of the
12 common bond was, I believe from my reading of their
13 history, that the group itself was self-sustaining and
14 there was a sense of cooperation, of brotherhood within
15 its own membership. We cannot see that as being
16 maintained when borrowings take place from outside the
17 particular membership. That is one example.

18 COMMISSIONER PERRY: I had written this down
19 from a previous statement you made. It seems a valid
20 point of thought, but their own consolidated balance sheet
21 shows very little borrowing from outside sources.

22 THE CHAIRMAN: Mr. Howarth includes their
23 central organization as well as outside sources.

24 MR. HOWARTH: From our way of thinking this has
25 all the earmarks of a branch banking system. To take
26 their example, if all the financing of the country became
27 the business of the credit unions and they say that
28 would not have departed from their original concept --- I
29 cannot accept that as a valid argument.

30 COMMISSIONER PERRY: It is difficult to accept.

1 There must be some reasons for not accepting it. I am not
2 clear what they are.

3 MR. HOWARTH: We don't see any particular
4 distinction between the operation of a credit union that
5 uses resources outside its membership from that of any
6 commercial organization in the tax-paying groups.

7 COMMISSIONER PERRY: I think this is verging
8 on a valid point. Could you think of anything else?
9 That is one of the indicia of commercialism.

10 MR. HOWARTH: One example would be the flood
11 of advertising that is engaged in today by credit unions
12 in certain areas. When a credit union in Hamilton will
13 take T.V. time to advertise for general membership, we
14 feel this has the earmarks of a commercial organization.
15 You see, Mr. Perry, when your bonded membership is
16 residents it is a pretty flexible thing. There are
17 credit unions active today that are residential rather
18 than industrial or church or fraternal organizations.

19 COMMISSIONER PERRY: I asked for some details
20 on this. They mentioned that the largest industrial
21 credit union would be in Hamilton in the steel company,
22 and this would have 10,000 members and if they did do
23 any advertising it was not to attract membership at
24 large, but to draw to the attention of people who were
25 eligible the fact that there was a credit union. This was
26 a fairly carefully thought out statement that they did
27 not advertise for general membership.

28 THE CHAIRMAN: There was one further restriction
29 imposed, namely, that residential unions could not be
30 established in towns which had a population in excess of

1 6,000 people. They could not secure a charter.

2 MR. HOWARTH: Would this be a Provincial credit
3 union group you were speaking to?

4 THE CHAIRMAN: Yes.

5 MR. HOWARTH: I don't think this is general
6 in all provinces.

7 COMMISSIONER PERRY: This was the Ontario group.
8 They did mention community credit unions, but they are
9 in small places like Dundas and Dundalk. We will have
10 to continue this.

11 MR. HOWARTH: If I could summarize our thinking
12 on this and say that we have to contend with competition
13 from credit unions in our industry as other lending
14 institutions do, and we would sincerely believe that the
15 mechanics of taxation could be worked out, if this was
16 decided as a proper course. You might be interested in
17 the comment that was made, if I might make it here, by
18 the American Bankers' Magazine in its November issue of
19 last year on this general point of taxation of credit
20 unions.

21 We have suggested that the credit unions'
22 profits be taxed. The American Banker pointed out that
23 equity could be achieved if in addition to allowing
24 exemption for credit unions in this tax area similar
25 exemptions were made available to other institutions such
26 as the American banks and finance companies and so on.
27 They say that competition in this area is so keen that
28 benefits would percolate to the consumer, and this would
29 be a general benefit to the borrowing consumer.

30 This, to me, was interesting. Somebody thought

1 of it going the other way. Our recommendation is in view of
2 the heavy burdens that Government has to meet at the
3 Federal level that the credit unions be required to pay
4 their share of the tax.

5 THE CHAIRMAN: Thank you. As you are undoubtedly
6 aware, we have heard several suggestions to the effect
7 that corporation tax be done away with. I suppose that
8 would very nicely take care of this problem!

9 COMMISSIONER GRANT: Would you give us a little
10 further information as to the composition of the Council
11 of Sales Finance Companies and what are the qualifications
12 for membership in the Council?

13 MR. HOWARTH: The Council, Mr. Grant, was formed
14 in 1957, a fairly recent association as associations go.
15 Its membership consists of companies who are, using our
16 phraseology, independent sales finance companies and
17 companies who compete for the receivable paper that is
18 available in the general market. This would exclude from
19 membership such companies as, say, Simpsons-Sears Acceptance
20 or Eatons Acceptance or acceptance companies geared to a
21 particular dealership or particular manufacturer. Our
22 companies compete for the general availability of acceptance
23 paper, conditional sales contracts. Our membership does
24 not include the so-called small loan companies, even
25 though some of our companies do have subsidiaries in this
26 field. Our association represents the companies conducting
27 the financing of conditional sales contracts.

28 COMMISSIONER GRANT: Do you lay down any
29 regulations within the Council as to the method for
30 raising money by your membership?

2 1 MR. HOWARTH: No, we just have the general
2 bylaws on ethical behaviour, not specific as to raising
3 of money.

4 COMMISSIONER GRANT: You have never had occasion
5 to reject a membership because you objected to its way
6 of raising money?

7 MR. HOWARTH: No.

8 COMMISSIONER GRANT: Have you lost any member-
9 ship since you began?

10 MR. HOWARTH: Yes. We started off in 1957 with
11 eight companies and we now have 39. I think that is the
12 figure. We have lost the odd small company which is
13 either a one or two-branch operation, usually where there
14 was a change of management or something of that nature.

15 I did not expect you to raise that point, but
16 I am glad to say that this year we have renewed 100% of
17 our membership.

18 COMMISSIONER GRANT: Is your membership under
19 some sort of surveillance by your Council?

20 MR. HOWARTH: If I could make a distinction here,
21 I was formerly associated with the Canadian Institute of
22 Chartered Accountants, which is the central body for the
23 ten provincial groups. A professional organization like
24 the Chartered Accountants or the Bar or Medicine has
25 disciplinary powers. It does have the right to grant or
26 withdraw a man's qualification, so you can see in a
27 professional body of that kind you have teeth. You can
28 say to a man if he does not toe the line he will not keep
29 his professional standing. You have something to apply
30 which will make him toe the mark.

Ours is not quite like that. We are, in common with most industrial groups, just a voluntary organization. You can join or not join as you see fit. We hope that by responsible leadership of the industry it will come to mean a mark of prestige to belong to and support its operations and its purposes. There would be no penalty that we could apply other than dismissal. We have no other means of applying a penalty to, say, either of my colleagues' companies or any company in the organization.

We have, I think, grown reasonably soundly over the years. We have now about forty members. Our growth has been fairly steady and we have sustained most of our membership. We have no way, other than I would say, the not unimportant factor of mutual respect and recognition amongst the membership companies, we have no penalties we could apply.

COMMISSIONER GRANT: My questions are prompted by the fact that I seem to recognize in your list of members the names of some companies that have been in the news lately as to their method of raising money and mention has been made as to whether or not their advertising and their solicitation conforms to Provincial laws.

MR. HOWARTH: Yes. There has been recently a law introduced in Ontario as an amendment to the Securities Act, a new Deposit Taking Act, which will bring this type of operation under closer control. This was at the last session of the House these changes were introduced. They are regulations which I believe will be adopted, or similar ones, in other provinces throughout the country.

1 COMMISSIONER GRANT: It seems to me that they
2 have managed to work within the law in some provinces,
3 because of the fact that they advertise their debentures
4 or their notes as being available only to their own
5 shareholders or their own members and for less than one
6 year. In that way they are not bound by the Security Acts
7 of the provinces which require registration for the
8 sale of debentures.

9 MR. HOWARTH: Is this a recent development,
10 this business of being shareholders?

11 COMMISSIONER GRANT: Within the last six months.

12 MR. JARMAN: Perhaps I might help on this.
13 I think you have two separate things here. As far as I
14 am aware under the Security Law in each province a
15 promissory note which matures in more than a year is
16 exempt from prospectus and registration requirements.
17 The sale of any kind of security running more than a
18 year may be exempt if it is directed only to present note-
19 holders or other people who are already investors. I
20 think this is the transaction you are referring to .

21 COMMISSIONER GRANT: Yes.

22 MR. JARMAN: There was an issue of longer
23 term notes. As far as I am aware that was perfectly
24 proper within Ontario law as it was constituted then, and
25 as it stands now.

26 COMMISSIONER GRANT: The type of the security
27 offered and the manner in which your membership is raising
28 its money would, I should think, have some bearing on
29 your suggestion that the reserve be set up out of earnings
30 and before taxes and along the lines which is now

1 permitted for mortgage reserves. I am referring to
2 mortgage reserves. My purpose in asking these questions
3 is to find out the risk involved to the public when
4 money is raised, say, through deposits or through short-
5 term notes.

6 MR. JARMAN: If I might quote one of the
7 gentlemen of the press, who I think is here now, who said
8 that the interest rate paid is a fair measure of that
9 risk.

10 COMMISSIONER GRANT: That depends on the success
11 of the company, I suppose. If the company is making
12 money, then it could meet its obligations. If it is not
13 making money, it would not be able to meet its obligations.

14 THE CHAIRMAN: The second point that you refer
15 to in your submission concerns the Industrial Development
16 Bank. I am really surprised to find the Industrial
17 Development Bank is offering strong competition. I had
18 no idea that was in fact the case. I was a little
19 surprised at your suggestion that the way to level this
20 out is by using the Tax Act and denying a deduction in
21 respect of their interest. It occurred to me that
22 perhaps a not unreasonable alternative might be to impose
23 income tax on the Industrial Development Bank. Certain
24 Crown companies are taxed. This one, I believe, is not.
25 I suppose under those circumstances its costs would then
26 become comparable to those of ordinary commercial organiza-
27 tions.

28 MR. HOWARTH: It would bring them closer together,
29 Mr. Chairman. There is the very important point that the
30 funds of the Industrial Development Bank are made available

1 from the Bank of Canada at a rate --- I don't think it
2 is public --- I am given to understand it is about $\frac{1}{2}$ of
3 1% above the Bank of Canada rate. While you would narrow
3 4 the gap between the cost of operation of the I.D.B. and,
5 say, companies doing comparable business in our industry
6 it would not completely close it. There is a further
7 factor here. Maybe we should have enlarged upon it in
8 the brief. That is our suggestion that from the point
9 of view of the fiscus this would bring revenue in if you
10 tax the I.D.B. as distinct from borrowers by removing
11 the deduction from tax.

ET/dpw 1 We are concerned as an industry that customers or borrowers
2 who receive I.D.B. financing, which they do at a preferred
3 rate in comparison to commercial rates, be prepared or
4 encouraged to stand on their own feet as soon as possible.
5 In other words, we do not want them to become I.D.B.
6 customers for financing on a perennial basis, and we are
7 alarmed and concerned that an enterprise which uses I.D.B.
8 financing at a particular stage of its development may
9 continue to re-finance and re-finance and be removed
10 entirely from the normal competitive commercial area.

11 The point of our recommendation is that the
12 deduction from taxable income would only have bearing on
13 this particular enterprise as it became profitable, at
14 which time it would be better able to stand on its own
15 feet, and on a financial basis, while this would not neces-
16 sarily be a large area of revenue to the Government, it
17 would have, we believe, a sound effect on the operation
2 18 of this enterprise. Your counter-suggestion there for
19 taxing I.D.B. is one that I do not think our industry
20 would quarrel with at all, but we do not believe it would
21 have this effect.

22 THE CHAIRMAN: If one disallowed the tax
23 deduction on successful borrowers from I.D.B., the rate,
24 instead of being whatever it is, we will say 6%, would
25 become virtually 12% and an uneconomic rate for any
26 borrower.

27 MR. HOWARTH: You state from six to twelve?

28 THE CHAIRMAN: If it was disallowed for tax
29 purposes.

30 MR. HOWARTH: Is that an envisaged 50% rate?

1 I will put it this way: anyone who can sustain a 50% tax
2 rate should not pay ---

3 THE CHAIRMAN: I prefaced my remarks with
4 "successful borrower." I said a successful borrower. I
5 did not mean success in achieving the loan. I meant
6 having obtained the loan, success in its operations. If
7 it were successful in its operations to the extent of
8 making good profit, which is obviously the purpose of
9 the loan, and it needs to make a good profit to pay off
10 the loan and become a solvent company, it would place a
11 considerable strain on its ability to achieve this
12 because it would then amount to roughly 12%. One could
13 find few borrowers who could pay that kind of money and
14 have enough left over to be of value to the enterprise,
15 I would think.

16 MR. HOWARTH: I do not think that I could quite
17 accept the spread that you suggest there in terms of the
18 success. I do not believe it could be reached that
19 rapidly. At least that would be my feeling on it.

20 THE CHAIRMAN: You mean the tax rate would not
21 be 50%?

22 MR. HOWARTH: I would think that would be an
23 extreme case.

24 THE CHAIRMAN: I am using the marginal rate,
25 but I think that is fair in the circumstances. You may
26 be correct. I would have thought that if it is a worth-
27 while concern, a 50% rate would hit \$35,000 in profits,
28 and that is not such a tremendous attainment.

29 COMMISSIONER GRANT: The I.D.B., once a loan is
30 made, they take as security for that loan such immovable

1 assets as the company might have by way of mortgages,
2 and such movable assets as the company may be able to
3 offer. Do you know the length of time that the average
4 I.D.B. loan would be? The length of time for repayment?

5 MR. HOWARTH: I will consult my colleagues on
6 this. Generally, the I.D.B. is prepared to lend for
7 longer periods than our industry.

8 COMMISSIONER GRANT: That is what I thought.

9 MR. HOWARTH: I believe five and ten-year
10 periods.

11 COMMISSIONER GRANT: Now, your purpose in
12 bringing the I.D.B. into your brief is to bring out the
13 fact that it is unfair competition to the members of your
14 particular Council?

15 MR. HOWARTH: That is correct.

16 COMMISSIONER GRANT: Well, just on interest
17 rate alone, do you think a borrower for a commercial
18 enterprise which has now been taken care of within the
19 objects of I.D.B. could go to a finance company such as
20 any member of your Council and pay the higher interest
21 rate of, say, 12%, which would be minimum, as compared to
22 the bank rate?

3 23 MR. HOWARTH: Would you care to comment on that?

24 MR. JARMAN: I do not know the source of your
25 12% minimum on this class of business, but we would love
26 to get 12%.

27 COMMISSIONER GRANT: Perhaps you can enlighten
28 me on that. Do you take loans for less than 12%?

29 MR. JARMAN: On the kind of business that the
30 Industrial Development Bank competes on, 12% would be

1 higher than any rate anyone gets today. Nine to eleven
2 per cent would be the range. The tendency is to get below
3 nine.

4 COMMISSIONER GRANT: Some of your members will
5 lend below nine per cent?

6 MR. JARMAN: Mr. Doig's company and mine do
7 regularly.

8 MR. HOWARTH: On this class of business.

9 COMMISSIONER GRANT: Over what period of time?

10 MR. DOIG: As high as twelve years. Twelve
11 and fifteen years.

12 COMMISSIONER GRANT: Are these national
13 companies to which you refer, companies which have offices
14 pretty well coast to coast?

15 MR. HOWARTH: Mr. Doig's company is the largest
16 one in Canada, sir.

17 COMMISSIONER GRANT: In your experience, Mr.
18 Doig, did you have occasion to finance commercial loans
19 of the type which I.D.B. are now financing before I.D.B.
20 came into existence?

21 MR. DOIG: I cannot recall, Mr. Grant, but I
22 would guess that we did.

23 MR. HOWARTH: Could I add something there, Mr.
24 Grant? One of the ways in which the I.D.B. competition
25 was brought home to us most strenuously over a period
26 from about early 1960 through until last Fall was in the
27 pay-out of business that we had on our books by I.D.B.
28 This is where the competition was really most strenuous
29 and severe.

30 In terms of totals, it was in millions of

1 dollars, and in many cases there would be a particular
2 piece of financing, say, which had originally been loaned;
3 say, \$300,000 that had been paid down to \$150,000, and
4 then the pay-out would come from I.D.B. So in terms of
5 the type of business, we were losing customers to I.D.B.
6 which had, in many cases, maybe over a period of 8 or 10
7 years, been using the services of our industry.

8 COMMISSIONER GRANT: Of course, it would be
9 asking entirely too much if you were to give us instances
10 of why they re-financed with I.D.B. rather than re-financed
11 with the company they were doing business with.

12 MR. HOWARTH: I think we made a very careful
13 analysis of a number of these cases, and we have case
14 histories if your Commission would like to have them.
15 In almost every case the deciding factor was rate. In
16 other words, we just could not compete with the I.D.B.
17 rate.

18 There may have been the odd case where the term,
19 which you introduced a little earlier, had some effect,
20 but not from our own experience, going back to our field
21 people who had put the business on the books and so on;
22 the rate was the deciding factor. Mr. Jarmain has
23 mentioned 9 to 11 per cent.

24 MR. JARMAIN: Yes, that is the common rate.

25 MR. HOWARTH: It is a very competitive area,
26 but the re-financing through I.D.B. in the cases where we
27 felt there was a loss to us, a competitive loss, was on
28 the factor of rate.

29 COMMISSIONER WALLS: Is it not a fact when
30 I.D.B. went into existence it was not to supplement the

1 existing financial institutions, but was to give a form of
2 credit that the banks at the time were restricting ~~credit~~
3 and were unable to offer to industry? In other words, it
4 was to give long-term loans, and at that time banks were
5 only interested in short-term loans, and your own organiza-
6 tions at that time were not giving long-term loans.

7 MR. HOWARTH: Well, the preamble of the I.D.B.
8 sets out many conditions for its lending. I think our
9 basic position on that, Mr. Walls, would be that I.D.B.
10 should only step into the picture when the particular
11 accommodation is not available in the normal lending area
12 wherever that may be. We feel there has been a competitive
13 development here, a rather aggressive development, by
14 I.D.B., which has brought it into a competitive position
15 with us rather than supplementary.

16 COMMISSIONER WALLS: You do not think I.D.B.
17 could say the reverse; they went into this business when
18 no one else was prepared to give this credit of 10 to
19 15 years and therefore in recent years they have now been
20 competed with by both yourselves and the banks going into
21 long-term credit?

22 MR. HOWARTH: If they said that I think we
23 would challenge it to some extent.

24 COMMISSIONER WALLS: The next question I would
25 like to ask you is this: you only mention I.D.B. What
26 about the other government lending institutions, that
27 operate on the same basis, who borrow from the
28 Minister of Finance for half
29 a per cent lower than what they charge on the loan, or
30 1% less? I am thinking particularly of the Farm Credit

1 Corporation which is lending today over ninety million
2 dollars a year. How are you going to draw a line of
3 demarcation between them, because I am quite sure you
4 would not want to compete and go into agricultural
5 financing, or would you?

4 6 MR. HOWARTH: We have been in it for 35 or 40
7 years.

8 COMMISSIONER WALLS: Yes, but running to the
9 types of loans that they are granting?

10 MR. HOWARTH: Well, our industry has been
11 lending or financing agricultural equipment and machinery
12 for many, many years.

13 COMMISSIONER WALLS: At 5%?

14 MR. HOWARTH: We cannot finance at this rate.
15 This is a government-guaranteed rate. In our consideration
16 of this, for instance, we question today whether the
17 guarantee is necessary to the banks in many of these
18 instances, but we certainly are in this field of financing.

19 COMMISSIONER WALLS: If so, I would be interested
20 to know why you have picked on I.D.B. and have not picked
21 on other government lending institutions, that is all.

22 MR. HOWARTH: We feel it was an oversight after
23 consultation.

24 COMMISSIONER BEAUVAIS: Mr. Howarth, I have a
25 question on this problem. If a borrower cannot obtain
26 a loan from you or from the bank, and can obtain this
27 loan from I.D.B., according to your suggestion he will
28 be penalized because his interest will not be allowable
29 for income tax purposes.

30 MR. HOWARTH: I am not sure if I have the sense

1 of your question, Mr. Beauvais.

2 COMMISSIONER BEAUVAIS: Well, a borrower will
3 be refused by a bank or your institution.

4 MR. HOWARTH: Yes.

5 COMMISSIONER BEAUVAIS: And will be accepted ---

6 MR. HOWARTH: Would be accepted by I.D.B.?

7 COMMISSIONER BEAUVAIS: Yes. Then, by the mere
8 fact of your suggestion, he would be penalized because
9 his interest would not be allowed for income tax purposes.

10 MR. HOWARTH: I think our answer to that would
11 be: if he is refused by the banks and by our industry and
12 must find his financial investment from I.D.B., it is
13 most unlikely that his balance sheet and profit and loss
14 statement is going to be in a tax-paying position. You
15 see, here our thought is this is only significant as he
16 moves into the area where he is taxable and able to meet
17 his obligations. It was not our thought that it would be
18 a penalty.

19 We feel it would be a proper bringing of him
20 into an area of meeting his share of the overall tax
21 burden as his business became profitable. In other words,
22 if, in the year in which he obtains this financing from
23 I.D.B., which is not available from normal commercial
24 lenders, this would only have a bearing if he is in a
25 position of profit for his operation.

26 COMMISSIONER BEAUVAIS: You infer that if a man
27 is refused by the banks and your companies, then he
28 should not get a loan from I.D.B.

29 MR. HOWARTH: No.

30 COMMISSIONER BEAUVAIS: Because when I.D.B.

1 started, and I had some experience at the beginning,
2 we could obtain a loan for a client that was refused by
3 a bank and other credit institutions, and I think that
4 was the idea of creating I.D.B. at the beginning.

5 MR. JARMAN: It might help if I try to recall
6 how this came to be in the brief. I shall confess I was
7 the actual author of the words. I.D.B. represents very
8 severe competition for our companies. We feel it is
9 subsidized by our tax dollars and other people's tax
10 dollars no matter how they are accounted for.

11 Our first thought was exactly what your Chairman
12 has suggested, that we would recommend that I.D.B. be
13 subjected to income tax. However, there was a number of
14 people around that table who felt I.D.B. served or could
15 serve the purposes for which it was intended. It is our
16 feeling, as we have said in the brief, it has gone way
17 beyond what was intended.

18 Whether the device we have suggested would
19 actually be workable or not we have no statistics to
20 prove, but our thought was that this was a sort of thin
21 edge of the wedge, if you like, from the point of view of
22 gradually increasing the burden of the interest rate of
23 an enterprise which I.D.B. should and was set up to
24 support.

25 As the profitability of that enterprise increases
26 then the burden of taxation would increase with it. There
27 is no intention on anybody's part to penalize anybody
28 here, and I hope the brief does not give that impression.
29 It was not written with that in mind.

30 COMMISSIONER BEAUVAIS: If the borrower has to

1 pay twice the interest rate or less than twice if he is
2 in the 23% bracket, surely he is penalized. It is not
3 his fault that I.D.B. is not subject to income tax.

4 MR. JARMAIN: I agree with you, sir. If he
5 were earning enough profit, and you do not have to earn
6 very much, as Mr. Carter has pointed out, to be taxable
7 at the top rate, but we have to remember our income tax
8 law does provide for a period of six years over which
9 profits and losses can be equated with some ease.

10 I think we should also recognize that an
11 organization which is profitable probably would not be
12 refused either by us or by a bank if we were given a
13 chance to talk to him before I.D.B. talked to him.

14 COMMISSIONER BEAUVAIS: Then we have to assume
15 that I.D.B. should disappear?

16 MR. JARMAIN: No, sir, we don't think so.
17 That is why we went at it this way. If we were to adopt
5 18 Mr. Carter's suggestion, I think it would disappear. I
19 do not think it could compete with us.

20 THE CHAIRMAN: I am inclined to think that
21 might be the more natural result.

22 MR. HOWARTH: Up until about two-and-a-half
23 years ago there was no thought in our industry's mind of
24 ever cramping I.D.B.'s style or objecting to the nature
25 of financing it was doing. We believe it plays a very
26 necessary part and can play a very necessary part in the
27 economy, and to be quite frank, there are cases where
28 people have come to us that we have not been able to
29 accommodate and that we have been pleased could go to
30 I.D.B. There is no question about that.

1 It is the expansion that is of concern to us.
2 We believe that there has always been a necessary role,
3 and that this would continue for I.D.B., but we believe
4 it has gone beyond its intention and what is best for the
5 economy.

6 THE CHAIRMAN: The main burst of expansion has
7 occurred in the last year, has it?

8 MR. HOWARTH: No, sir. I would say from early
9 1960 on.

10 COMMISSIONER GRANT: Would you give any reason
11 in your mind as to why that expansion has taken place?

12 MR. HOWARTH: I can give you my personal feeling
13 about that. I think that expansion was sparked by the
14 desire of government to invigorate the economy. They
15 saw this as an expanded I.D.B. operation, as one that
16 would be providing employment and use of our resources.
17 One thing we would be critical of, and I do not know that
18 we mention this in our brief, but we did when we discussed
19 it with the Royal Commission on Banking and Finance, and
20 that is that I.D.B.'s figures of outstandings which are
21 a gauge of their contribution to the economy never could -
22 never did, and probably would have difficulty in doing so -
23 never showed to what extent this amount was a duplication
24 or replacement of financing that would have been provided
25 by the private enterprise sector.

26 To answer your question I believe this was a
27 deliberate attempt, and one that we could not quarrel
28 with as far as the goal was concerned, of sparking the
29 economy and providing some employment as we went along.

30 COMMISSIONER GRANT: I was wondering if the

1 expansion was due to the fact that they are less parti-
2 cular in their type of risks now than they were when
3 they started out.

4 MR. HOWARTH: It could be, in part. I might
5 add, sir, the regulations under which they operate were
6 greatly expanded or it was made possible for them to
7 undertake a much wider group of loans and financing
8 than they were previously able to do.

9 COMMISSIONER GRANT: They have become more
10 relaxed in their requirements for security and risk, but
11 then that expansion might not be at the expense of
12 competing organizations.

13 MR. JARMAIN: There is no indication, sir,
14 that they are really extending credit wildly - I am not
15 trying to put words in your mouth - but I am exaggerating
16 deliberately. There is no indication that they are
17 extending credit in what you would call a wild fashion.
18 Their losses so far do not indicate they are.

19 MR. HOWARTH: Our main complaint is that they
20 have been extending credit at a more attractive rate to
21 many customers that would have been placed on our books.

22 COMMISSIONER GRANT: When you say a more attrac-
23 tive rate, do you mean they have lowered their rate?

24 MR. HOWARTH: No, sir. I believe there was a
25 slight increase a while back, but their rate is a rate
26 that is not competitive. We cannot compete with it, of
27 course. I believe they have been anywhere from around
28 2% lower.

29 MR. JARMAIN: Their rate runs $6\frac{1}{2}$ to 7 per cent.

30 MR. HOWARTH: And ours would be 9 to 11.

1 THE CHAIRMAN: I assume you will carry your
2 complaint elsewhere than here?

3 MR. HOWARTH: We have been carrying it in many
4 directions.

5 THE CHAIRMAN: Then, the third point which you
6 put before us concerns reserve for losses on receivables.
7 This reserve for losses is essentially a matter of
8 accountancy. There is a bulletin from the Canadian
9 Institute of Chartered Accountants relating to reserves,
10 and you will recall the content of this probably better
11 than I will, but it seems to me it restricts reserves to
12 the accounts outstanding at the end of the year; it does
13 not recommend cyclical reserves as one might refer to
14 anything extending over a period of time except in the
15 case of banks, or does it go to all financial institutions?

16 MR. HOWARTH: I wish I were more familiar, and
17 I bow my head in shame that I am not.

18 THE CHAIRMAN: I take it that your concern is
19 with reserves sufficient not just for the moment but to
20 take care of losses over a period of time; is that correct?

21 MR. HOWARTH: Our concern is that the approach
22 to the reserves on an annual basis is not realistic in
23 terms of the type of receivables that we hold. On this
24 particular area of our brief I would like Mr. Doig and
25 Mr. Jarman to make their comments.

26 THE CHAIRMAN: One more question before they
27 do. I assume that the assessors, generally speaking,
28 admit a sufficient reserve to take care of accounts
29 then outstanding against which the reserve is provided,
30 but not to go into the future? Am I correct in that

1 general assumption?

2 MR. DOIG: To some extent. In view of the fact
3 that we have not had our reserves touched by the assessors
4 in the last eight or nine years, that would be so, but
5 there is some indication that has been given to us that
6 they feel our reserves are too high and they are going
7 to base their reserves in future on the previous year's
8 losses which we feel is sort of a threat hanging over our
9 head, which is wrong in principle.

10 COMMISSIONER WALLS: You feel it should be a
11 percentage of the accounts receivable?

12 MR. DOIG: I think you have got to have a basic
13 reserve based on that, but I do not think that is the
14 whole answer because your portfolio could deteriorate
15 very considerably over a year's period, and the
16 established percentage would not be sufficient. I think
17 it would be more likely to establish a percentage on
18 receivables below which your reserves should not be
19 questioned, but if you found it necessary to establish
20 a reserve above that percentage, then you have got to
21 justify it by individual accounts.

22 COMMISSIONER GRANT: In the question of
23 establishing reserves, and having regard to the suggestion
24 that it might be along the line that is permitted for
25 mortgage companies - and if I am wrong here, you correct
26 me - in the case of mortgage companies there is a restric-
27 tion as to the amount of the loan. Now, there is no
28 restriction, I would take it, in the case of the finance
29 companies. That depends upon their own discretion?

30 MR. DOIG: I think, perhaps, Mr. Grant, we are

1 talking of two different things; the consumer figures
2 on which we would expect a certain percentage of loss
3 reserve, and when we get into the other area which we
4 in our company call capital funds financing which is
5 similar to the I.D.B. type, most of that financing is
6 covered by mortgages, secured by mortgages, and we think
7 the reserve in that area should come close to the mort-
8 gage reserves, but not the other.

9 COMMISSIONER GRANT: In taking those mortgages,
10 are they subject to the requirements of the Loan Companies'
11 Act in the provinces?

12 MR. DOIG: Yes, they would be. Perhaps I had
13 better ask just what restrictions are you referring to?

14 COMMISSIONER GRANT: For instance, there are
15 some provinces that say a mortgage shall not exceed
16 two-thirds of the appraised market value of the property.

17 MR. DOIG: That is trust companies.

18 COMMISSIONER GRANT: Well, it could be a loan
19 company.

20 MR. DOIG: No, our mortgages will exceed 66.2/3%.

21 COMMISSIONER GRANT: I was asking as to whether
22 or not you are bound by the requirements of the Loan
23 Companies' Act in a province or the Trust Companies' Act
24 in the province.

25 MR. DOIG: No; I would say no.

26 COMMISSIONER GRANT: So that the percentage of
27 risk is a matter for your own discretion?

28 MR. DOIG: Right, and because the rate is
29 higher the risk could be assumed to be greater.

30 THE CHAIRMAN: We have no more questions, Mr.

1 Howarth. Is there anything else you would like to say to
2 us?

3 MR. JARMAIN: One thought occurred to me, and
4 this is going back to I.D.B. There is one word I ought
5 to have recalled to you when we were talking about it,
6 if I can find it. Our recommendation is that in our
7 opinion the rate at which I.D.B. lending takes place
8 should impose a reasonable burden upon the borrower.

6 9 That was carefully phrased to indicate we were not sugges-
10 ting that the current rate or any other rate necessarily
11 should be maintained, and this is part and parcel of our
12 recommendation. I felt I should draw that to your
13 attention.

14 THE CHAIRMAN: Those words are already under-
15 lined in my copy here.

16 MR. JARMAIN: I quote it only to reinforce the
17 statement I made. We were very conscious of a place for
18 I.D.B., and a very important one, in the economy.

19 THE CHAIRMAN: We very much appreciate your
20 attendance here this morning and your giving us this
21 interesting and most useful submission. Thank you very
22 much indeed, gentlemen.

23 MR. HOWARTH: Thank you, Mr. Chairman.

24 THE CHAIRMAN: We will stand over, Mr. Secretary,
25 for ten minutes.

26

27 --- Short Recess

28

29

30

IC/ss

SUBMISSION OF

THE GOVERNORS OF THE UNIVERSITY OF TORONTO

APPEARANCES:

Mr. Hamilton Cassels, Q.C.

Mr. A. E. Charlton

THE CHAIRMAN: Mr. Secretary, are you now ready?

THE SECRETARY: All ready, Mr. Chairman.

THE CHAIRMAN: Will you introduce our visitors?

THE SECRETARY: You now have a brief before you presented on behalf of the Governors of the University of Toronto by Mr. Hamilton Cassels, Q.C. Mr. Cassels will speak to the brief and he has associated with him this morning Mr. A. E. Charlton.

I would like to enter this into the record as Exhibit 77.

---EXHIBIT NO. 77:

Submission of the Governors
of the University of Toronto.

THE CHAIRMAN: Mr. Cassels, we are not only pleased to greet you personally, but also as appearing on behalf of the Governors of the University of Toronto who are landlords in this very excellent premises. I am happy to acknowledge how much we are indebted to them on that score.

We have received your submission which concerns the matter of Estate Tax. There is no need to read it to us, we have already read it. I would be grateful if you would say a few words to us. Stand if you wish, but we are perfectly happy if you care to remain seated.

1 MR. CASSELS: Mr. Chairman, madame, gentlemen,
2 I am afraid I am a little bit apt to become intemperate
3 in language when I talk about this particular matter,
4 because I think it is not stretching it to say that the
5 present provisions --- it is a narrow point, as you may
6 have seen from the brief --- but I think it really is
7 an iniquitous situation.

8 I am assuming that you have all read the brief.
9 It is not only departing from the wishes of the testator
10 in each case but it is putting the trustees in a position
11 where they really are asked to commit what is tantamount
12 to a breach of trust.

13 The narrow point is simply this: In a great
14 many estates nowadays, to avoid double taxation, the
15 testator leaves a life interest in his estate to his
16 widow, or members of his family, with a provision that
17 in the event of need the trustees may encroach on capital,
18 with the remainder or the residue going over to usually
19 the younger generation. That is the typical form of will
20 that is now, I think it is fair to say, most common.

21 Now, because of the fact that this provision for
22 encroachment on capital is inserted in the will, the
23 Federal Government is treating that, if it is unlimited
24 power of encroachment, as if it were an outright gift to
25 the life tenant. That means, in the case of charity, and
26 it is only in the case of charities that I am concerned
27 with it, in the case of a charity it means they are
28 deprived very often of a substantial amount, because what
29 should have gone to them is going in taxes to the life
30 tenant or on the life tenant's interest.

1 In using the expression "charity" you are all
2 no doubt aware of the fact that it is the same old
3 definition that goes back to the Statute of Elizabeth,
4 charity in a general sense being considered as the relief
5 of poverty or gifts for the advancement of religion or
6 education or other purposes for the benefit of the
7 public not included in those terms.

8 Now, the first intent of the testator is usually
9 to provide first for his own family and the gift to
10 charity is after provision has been made for his family,
11 the typical case being, of course, the widow. He gives
12 her probably the interest for life on the residue of his
13 estate, but he cannot look into the future and be sure
14 that there won't be some emergency which will mean that
15 the income will be insufficient. He puts this provision
16 in that his trustees may encroach on capital if they
17 consider that she is in need.

18 The provisions of the Statute have been from
19 the inception, I think, unfair, inequitable and working
20 hardship. They have made those provisions even more
21 harsh by an amendment which was made in 1960. By the
22 1960 Statute they added the words "and inalienable"
23 meaning, presumably, that if there was a right of
24 encroachment, of course, the gift could be defeated by
25 the capital of the estate being applied under the power
26 of encroachment.

27 I had correspondence with the Department some
28 years ago, and the Minister wrote to me and said "Well,
29 that has been modified". The modification was this: In
30 1962 --- 1963, they passed an amendment which provided

1 that the trustees could renounce the right of encroachment.
2 They administer that in this way: If Mrs. Smith thinks
3 she can get along on a certain amount of encroachment,
4 say, a thousand dollars a year or two thousand dollars,
5 or five thousand dollars, whatever it is, she can renounce
6 any right to the capital over and above that.

7 Well, that puts the trustees in an impossible
8 situation. Now, in the first place, perhaps I should say
9 I am not arguing that in the case of the widow, for
10 example, being the sole executrix and being given the
11 right of interest with power to encroach that that should
12 not be treated as an outright gift to her. Obviously
13 she could say "Well, I will take the whole estate." I
14 don't quarrel with that. To get over that position most
15 people making a will put the widow in as an executor
16 but also put strangers so it is not the discretion of
17 the widow which has to be exercised, it is a number of
18 executors.

19 Now, while the executors may have the legal
20 power to say, "We will renounce the right to encroach
21 on capital, or a certain part of that", they obviously
22 cannot do it without discussing it with the widow and
23 getting her consent. Even then they are departing from
24 the wishes of the testator.

25 Now, in Ontario they deal with the matter on
26 what is, I think, a fair and equitable basis. They say,
27 "We will tax according to the event." They keep the
28 estate open as long as the life interest lasts if there
29 is encroachment, then they tax accordingly as if that had
30 been left outright to the life tenant. To protect

1 themselves on that, they either do not release a certain
2 portion of the assets or they ask for security to be
3 furnished by way of bonds, perhaps estate bonds may be
4 deposited with the Provincial Secretary. The interest
5 goes to the estate and the treasury and the Government
6 are protected and get whatever is the fair tax.

7 To show, Mr. Chairman, that I am not exaggerating
8 in what I say, I could give you instances of six or seven
9 estates. I won't name them, because some of them are
10 sub-judice. Of course they will have the record in
11 Ottawa. In one estate this method of applying the Act
12 takes nearly \$50,000.00 away from the charities in a
13 case in which there was no encroachment at all. The
14 life tenant died about a year after the testator and got
15 no encroachment, asked for none, and yet the whole fund
16 in which he had a life interest was treated as if it
17 went to that life tenant.

18 A more extreme case, I don't even know the
19 name of this one, but the Department will know, is one
20 in which the life tenant of a fund died within a week of
21 the testator. He probably didn't even know what benefit
22 he was entitled to. In that case the estate was taxed
23 as if that life tenant, who only survived the testator
24 by a week, took the whole of that fund outright.

25 I could go on with these cases, Mr. Chairman,
26 in which substantial sums are taken away from charitable
27 organizations through something that I submit is completely
28 artificial, unjust, and an inequitable method of taxation.
29 I simply ask that it be put on a fair basis without the
30 Crown running the slightest risk of losing the proper tax,

1 and that this iniquitous provision be altered. I say
2 "iniquitous" in all good faith, because I cannot see any
3 possible justification for it.

4 THE CHAIRMAN: Thank you, Mr. Cassels. I think
5 we have your meaning and your feeling about this matter.
6 You suggest an amendment to the Estate Tax Act which,
7 as I understand you, is to bring it somewhat in line with
8 Ontario. I am curious as to whether the law in
9 Ontario provides a model for the amendment that you would
10 have in mind, or whether it is a practice in Ontario
11 which is not supported by any particular law.

12 MR. CASSELS: I think under the Ontario Act,
13 Mr. Chairman, that this is the normal practice. If it
14 was desired to amend the Estate Tax Act to provide the
15 same system it could be very easily done by a small
16 amendment to the Estate Tax Act.

17 THE CHAIRMAN: Would you proceed? What kind of
18 amendment?

19 MR. CASSELS: Well, one was suggested by the
20 Canadian Bar Association. I haven't studied it very
21 carefully. This is the amendment to Section 7, which is
22 the Section I am discussing. It is as follows:

23 "Where any gift was made by the deceased
24 during his lifetime or by his will to a donee
25 described in Paragraph (d) of Subsection (1) but
26 subject to a power in favour of any person to
27 appropriate at any time or from time to time the
28 whole or any part thereof for the use or benefit
29 of any person, the gift so made shall not be
30 considered to have been absolute and indefeasible,

1 except to the extent that such power is exercised
2 at any time."

3 COMMISSIONER GRANT: Excuse me, Mr. Cassels,
4 I have the amendment before me too and I believe you left
5 out a word. There is a double negative there. "The gift
6 so made shall not be considered not to have been absolute
7 and infeasible ---"

8 MR. CASSELS: That is correct, Mr. Chairman.

9 Did I not read the double negative? With great respect.
10 for the draftsman of that, Mr. Chairman, there is one
11 point that bothers me about it, and that is that word
12 "any other person", because it could apply, the doctrine
13 or principle that I am submitting could only apply in
14 the case, as I said, of there being other trustees and not
15 the widow alone. I just wondered if that word "other"
16 would be inappropriate in the event of the widow and,
17 we will say, two other people being the trustees. I guess
18 actually they would be acting in a different capacity.
19 The widow would really be in two capacities, one as a
20 member of the Board of Trustees and in the other as a
21 beneficiary, so it really would be "others" dealing with
22 the trustees as a separate body.

23 COMMISSIONER GRANT: It would seem to be that
24 "other" is used advisedly.

25 MR. CASSELS: I think so, Mr. Chairman. It
26 bothered me a little bit in reading over that draft
27 suggestion.

28 THE CHAIRMAN: Would you give us particulars of
29 what you are reading from so the record may be complete.

30 MR. CASSELS: This is in the Canadian Bar Journal,

1 Volume 5, number 2, of April, 1962.

2 THE CHAIRMAN: Thank you, Mr. Cassels.

3 MR. CASSELS: May I add one thing, Mr. Chairman,
4 which perhaps I should have done at the outset. I have
5 not spoken to or canvassed a number of other organizations
6 which I know would be sympathetic to the submissions
7 made on behalf of the University of Toronto. One I have
8 always been closely associated with is the Inter-Church
9 Committee on Legal Affairs. I spoke to the Chairman of
10 that body, and they are in full accord with the submissions
11 that are contained in the brief. It is a little committee
12 we formed a good many years ago with representatives of
13 the Anglicans, Baptists, Hebrews, Presbyterians, Salvation
14 Army, and the United Church. We have been able from time
15 to time to help in matters of taxation. They are
16 fully in accord and I am perfectly sure that other
17 organizations will probably be making submissions to you
18 later.

19 Thank you for your kind remarks about the
20 University, Mr. Chairman. I will pass those on. I don't
21 know if it would be fair to say I am entitled to credit
22 on my argument for the rent!

23 THE CHAIRMAN: Have you anything further?

24 COMMISSIONER GRANT: Possibly the reason that
25 Ontario assessed in the manner in which they do, which is
26 favourable to the charity involved, is because of the
27 very nature of the Act. It is a succession duty act,
28 whereas under the Federal Statute it is an estate tax act,
29 and as such the estate is charged with the payment of
30 the duty. Would you agree, Mr. Cassels?

1 MR. CASSELS: Actually with great respect, no,
2 because they have already shown that they want to benefit
3 charitable institutions. If there were not the deduction
4 for charitable institutions, then I would say "Yes". It
5 is shown quite clearly they have them in mind and intend
6 to benefit them. Does that answer your question?

7 COMMISSIONER GRANT: Yes. I think it is not
8 too material the avenue in which it is approached, but
9 it is the end result we are looking for.

10 MR. CASSELS: Yes.

11 COMMISSIONER GRANT: And if the amendment as
12 proposed were to be made to the Estate Tax Act, then in your
13 opinion, although you didn't give it a great deal of
14 study, you would say it would go towards fulfilling your
15 suggestion.

16 MR. CASSELS: Yes, Mr. Chairman. I don't know
17 whether I should ask this indulgence. I would like to
18 have the chance to study that matter further and perhaps
19 at a later date submit a draft amendment.

20 THE CHAIRMAN: We would be very grateful if
21 you would do exactly that.

22 MR. CASSELS: Could I speak to the Secretary
23 and find out when I could submit the proposed draft?

24 THE CHAIRMAN: You can submit it any time you
25 wish to do so in writing, rather than appearing. If you
26 think it desirable to appear, you better then address
27 yourself to our Secretary.

28 MR. CASSELS: It will take a little time. I
29 think I will have to speak to a number of the Trust
30 Companies and their solicitors to just insure that it

1 carries the blessing of all.

2 THE CHAIRMAN: Take all the time you wish.

3 MR. CASSELS: I would be very glad to do that if
4 I may.

5 THE CHAIRMAN: It would be very helpful to us
6 if you would.

7 COMMISSIONER GRANT: In drafting an amendment
8 perhaps you will give consideration to the elimination of
9 the double negative, which I have always regarded as an
10 unfortunate thing where it does occur. I am wondering
11 if the end result would not be the same if the amendment
12 read "gift so made shall be considered to have been
13 absolute and indefeasible."

14 MR. CASSELS: There should not be a double
15 negative. That is a typographical error. "Gifts so
16 made shall not be considered to have been absolute and
17 indefeasible, except to the extent such power is exercised
18 at any time." When you caught me on that, I must have
19 read it as I understood it to be without noticing the
20 second "not". It certainly should not be there.

21 THE CHAIRMAN: We will refer that to our
22 Department that takes care of double negatives!

23 COMMISSIONER BEAUVAIS: I have just one question
24 to ask: In many cases it would delay the final settlement
25 of the estate for many, many years.

26 MR. CASSELS: Mr. Chairman, the Government does
27 not suffer with that. I was speaking to one of the senior
28 officials in the Ontario office this morning and it works
29 admirably here.

30 THE CHAIRMAN: You don't see any difficulty?

1 MR. CASSELS: Not the slightest. Perhaps this
2 is an unfair statement, but the only provocation for the
3 present thing is what someone called "administrative
4 ease". That was the unkind way in which it was defined
5 to me.

6 THE CHAIRMAN: We thank you very much indeed,
7 Mr. Cassels, for bringing this to our attention. We will
8 certainly continue to give it our consideration and we
9 would be very glad to hear again from you should you
10 wish to put anything in as to a proposed amendment.
11 Thank you, sir. We find it interesting and constructive,
12 and indeed useful to us.

13 MR. CASSELS: Thank you very much.

14 THE CHAIRMAN: We will stand over for two
15 minutes.

16
17 ---Short Recess.

18
19 ---EXHIBIT NO. 78: Submission of Mr. J. S.
20 Robbins.

21 THE CHAIRMAN: Mr. Secretary, are we ready?

22 THE SECRETARY: All ready, Mr. Chairman. We now
23 have a brief being presented to the Commission by Mr. John
24 Stanley Robbins of Dundas, Ontario. Mr. Robbins is a sales
25 tax consultant and he presents this brief on his own
26 behalf.

27 I would like to enter it into the record as
28 Exhibit No. 78.

29 THE CHAIRMAN: Good morning, Mr. Robbins. Thank
30

1 you for your submission and your attendance this morning.
2 Most people appearing before us speak to their submissions.
3 There is certainly no need to read it, as we have all
4 read it already.

I wonder whether we could properly take this section by section. I think we could quite nicely. Section 1 deals with certain subject which I would like to look at. Have you anything you would like to say to us before we start asking questions?

MR. ROBBINS: Mr. Chairman and Members of the Royal Commission, I have gone over this brief after I had it all fixed up for you, and one point here that I would like to bring out is this: The unlicensed branch that is used by a lot of manufacturers.

Now, this unlicensed branch does not benefit the consumer in any way. It only gives the manufacturer a chance to get a deduction on his invoice for sales tax purposes, but it does not benefit the consumer in any way. That is why I suggest in the brief that if there if the rate of tax were reduced to 6%, 3% sales tax and 3% Old Age, that it would do away with this unlicensed branch which is iniquitous.

Now, as a Government auditor, 34 years in the Government's service, these firms that operated on this unlicensed branch, they wanted all the benefits of it, but they did not want to conform to the requirements of this unlicensed branch operation with the result that as an auditor I found on numerous occasions that they were not adhering to the restrictions of this basis at all, which in my opinion just made it null and void as far as any common sense application of the tax law was concerned.

Section 21 of the Regulations states what a wholesaler is and what a distributor is, and what a retailer

1 is, and so on and so forth, but in my experience the
2 Department never would define the distinction between a
3 distributor and a wholesaler, because the line of
4 demarcation there is so small, so narrow, that it was
5 impossible to define it, with the result that a lot of
6 distributors were getting away with paying tax on the
7 wholesale value instead of on the value on which they
8 were supposed to under Regulation 21 of the Act, which I
9 disagreed with as an auditor, do you see.

10 That is one of the main points that I want to
11 bring out for your consideration. That is the fact that
12 if this tax rate were reduced to 6% it would eliminate
13 all this wholesale branch business altogether, and firms
14 doing business in volume, they get volume discounts,
15 they get cash discounts, they get freight deductions if
16 the freight is recorded on the office copy of the invoice,
17 and in that way the consumer, the man who is actually
18 paying the tax, and that is the man we are concerned about
19 in this country of ours, is the man who has got to pay
20 the bill, and he would not be called upon to pay this
21 iniquitous rate of 11% sales tax on the merchandise that
22 he buys.

23 In my opinion, as I mention in my brief, that
24 is just not fair, and that is the one point that I wish
25 you would consider if you will.

26 THE CHAIRMAN: You do not need to stand unless
27 you wish to, Mr. Robbins. Supposing I mark the unlicensed
28 wholesale branch as item number 5 and we deal with these
29 in order as they arise. The matter of 6% instead of 11%
30 tax comes up under Section 2, I think.

1 COMMISSIONER WALLS: Page 4 is where that comes
2 in.

3 THE CHAIRMAN: That is still Section 2.

4 COMMISSIONER WALLS: I think you have to take
5 Sections 1 and 2 together really.

6 THE CHAIRMAN: Just reading the references, I
7 thought I would suggest that we look at the unlicensed
8 branch after we finish the other items that I referred to
9 in here.

10 MR. ROBBINS: Very good, sir.

11 THE CHAIRMAN: I think we will deal with Sections
12 1 and 2 together. I do not think there is anything in
13 Section 1 that is not referred to again in Section 2. I
14 was a little surprised that you refer to this as a
15 tax on industry, rather than a tax on consumers.

16 I suppose one could think of it as a tax on
17 industry passed on to consumers, but I would be a little
18 concerned as to who actually would bear the tax. I
19 thought in most cases it passed through to the consumer.

20 MR. ROBBINS: All the tax now under the Excise
21 Act is at the manufacturer's level. It is not on the
22 consumer level; therefore the manufacturer under the Act
23 is required to pay the tax to the Crown and his monthly
24 tax returns. That is why I mentioned that. On the
25 consumer level, like this Ontario retail sales tax, they
26 are charging tax on a pyramided value from 200 to 300%
27 on the manufacturer's level, which in my opinion is not
28 fair to the taxpayer, but of course we are not dealing
29 with Provincial matters; we are dealing with Federal
30 matters.

1 THE CHAIRMAN: I think you missed my point. I
2 was dealing with the manufacturer's tax, and I was merely
3 asking you whether you did not feel that the manufacturer's
4 tax was borne by the consumer, rather than by the
5 manufacturer. Is it not passed through various stages
6 until it arrives at the consumer, and the consumer pays
7 more for his goods because of the tax than he would other-
8 wise?

9 MR. ROBBINS: No, the manufacturer has the
10 right to pay all taxes on his invoices on the basis of
11 11/111ths of the selling price after taking out volume
12 discounts, cash discounts, freight and so forth, so that
13 he is paying tax on the net value, you see. That price,
14 for instance, is passed onto the wholesaler, and he puts
15 his mark-up on and the wholesaler, when he sells it to
16 the retailer, he puts his mark-up on, and when it gets
17 to the consumer there is at least two mark-ups that are
18 very distinct, on which it were applied on the consumer
19 value, the tax would be on a pyramided value.

20 The basis of the Act all the years I was with
21 the Ottawa Government was that it was not feasible to
22 charge a tax on the consumer level. We had it in effect
23 for several years, but the Department abandoned the
24 idea because it was too costly. They could not see the
25 reason for using it any longer, so they abandoned the
26 whole thing and went back to the original sale price at
27 the manufacturer's level.

28 THE CHAIRMAN: Thank you.

29 COMMISSIONER WALLS: I am afraid I am not clear
30 yet. I do not think that you have given an answer to the

1 Chairman's question. Is it not a fact that a tax added
2 at the manufacturer's level has pyramided and eventually
3 the consumer pays that tax? We recognize, of course,
4 under the terms of the Act the tax is paid either by the
5 manufacturer, or in the case of imports by a licensed
6 wholesaler in most cases, but when that is added to
7 his price and the wholesaler then adds his percentage of
8 profit to it, and the retailer adds his percentage of
9 profit, is there not a chance that it is pyramided right
10 through and the consumer eventually pays that tax?

11 MR. ROBBINS: The consumer pays the tax on the
12 basis of the manufacturer's invoice to which is added,
13 if he wishes to add it, but a lot of them don't add it.
14 They include it in the price which means that any
15 pyramiding is on the price charged by the manufacturer,
16 which in a great many instances nowadays is on a tax-
17 included value and not on a tax-extra value.

18 COMMISSIONER WALLS: If there was no sales tax
19 would the manufacturer sell his product to the wholesaler
20 for less money and the wholesaler would sell it to the
21 retailer for less money if there was no tax?

22 MR. ROBBINS: Well, yes, the manufacturer ---
23 if there was no tax he would not have a chance to charge,
24 so therefore there would be no tax on the product.

25 COMMISSIONER WALLS: Then leading to my next
26 question on the matter of exemptions, and I do not know
27 that I altogether disagree with you on the extent to which
28 exemptions have gone, but in the idea that this tax can
29 be passed on to the consumer, should there not be some
30 exemptions to avoid progressiveness? In other words,

1 you yourself mention on page 3, the
2 disadvantage to the man with a family by having
3 to pay sales tax on his children's clothing and shoes as
4 against there being no sales tax on building materials.

5 MR. ROBBINS: Yes.

6 COMMISSIONER WALLS: Now, would you not say
7 that if you were to remove the exemptions with the
8 exception of those items that increase the cost to the
9 low-salaried man such as food, clothing and perhaps
10 drugs, that those might be logical exemptions instead of
11 eliminating all exemptions?

it 2
ET/dpw MR. ROBBINS:

1 Well, a manufacturer when he invoices merchandise that he
2 makes, if he invoices that merchandise to some wholesaler
3 who has a wholesaler's licence, no tax applies on that
4 sale. The wholesaler - he buys that tax-free from the
5 manufacturer under the wholesaler's licence so that when
6 the wholesaler sells the merchandise out to the retailer,
7 he accounts for the sales tax on the price charged to him
8 by the manufacturer, or on the duty-paid value if the
9 goods are imported into Canada, so that at no time is
10 that price level disturbed from the standpoint of taxation.

11 COMMISSIONER WALLS: You still have not
12 answered my question. Do you recommend elimination of all
13 exemptions?

14 MR. ROBBINS: No, I am sorry; if I conveyed
15 that impression I did not mean to convey that.

16 COMMISSIONER WALLS: Then your figures would
17 not substantiate themselves wherein you state that if the
18 tax was cut to 6% total instead of 11%, and I am including 3%
19 Old Age Security Tax, that you would then have as much revenue
20 as you have got today.

21 I worked it out, and the only way you would
22 be able to do that would be by total elimination of today's
23 exemptions, and I understood from your brief that is what
24 you were recommending; total elimination of exemptions.
25 The only way that you could cut your tax down to 6% from
26 11% and still have the same revenue would be by total
27 elimination of exemptions.

28 MR. ROBBINS: What I meant by that was that if
29 a manufacturer, when he orders merchandise, the component
30 parts of the article he is going to manufacture, he would

2 1 be allowed, under the Act, to use his licence number to
3 2 obtain all that merchandise tax-free so that he has got
4 3 no money invested in sales tax up to the time of sale of
5 4 the product that he is going to make.

6 Now, any of these firms that I mentioned in
7 here as not having any licence at all, when they buy
8 machinery and apparatus or ingredients or anything
9 that is used directly or indirectly in the production of
10 the goods that they manufacture and sell as unlicensed
11 firms, our government has no access to check their
12 records to ascertain whether or not those firms are
13 entitled to obtain all the pipe valves and fittings that
14 is used in the manufacturing operation tax-free, with
15 the result that the Crown loses thousands of dollars of
16 revenue for that very reason that the Government has no
17 check. They have no authority to go in and check the
18 records of the unlicensed firm.

19 I had a case in point just recently where I
20 was in a big office and one of the purchasing agents
21 mentioned to me, "You know, Mr. Robbins, in our certifi-
22 cate of exemption we state these valves - these regulators
23 which we are ordering - will be used directly in produc-
24 tion of goods for sale." They call them regulators;
25 they don't call them valves any more, and Ottawa has
26 authorized that, unfortunately, and that is what I took
27 exception to, and I was working for the Government and
28 I wrote to the Department and I asked them why they did
29 it, and, of course, they didn't give me any answer
30 because right there is a loophole, and this purchasing
agent I was talking to just recently, he admitted to me

3 1 quite frankly that with that new regulation he is
2 permitted, on ordering valves for his own maintenance -
3 and these valves run at \$800, \$900, \$1,000, \$1,200, and
4 \$1,500 in lots of cases - he got those valves free of
5 sales tax and the Government had no access to go in and
6 check his records to see why he ordered them the way he
7 did as a regulator when actually they are a valve.

8 COMMISSIONER WALLS: Thank you very much. Those
9 are all the questions I have.

10 THE CHAIRMAN: I think we understand that point
11 very clearly. Section 3, dealing with yarns. Again,
12 it is quite comprehensive. I can understand the diffi-
13 culty there, but at the present time I do not know what
14 the solution is. Has anybody any questions on Section 3?

15 COMMISSIONER WALLS: The only thing I would
16 like to remark: I think there is a justifiable case
17 there because the same situation came up with respect to
18 candy and it was ruled that if it was brought in bulk
19 into Canada and packaged in this country, the packager became the
20 manufacturer and paid sales tax, and I think that is
21 something from Mr. Robbins' recommendations that we can
22 very well look into.

23 THE CHAIRMAN: The unlicensed branch technique, of
24 course, has been criticized by Professor Due and lots
25 of other people. It has got some purpose, but perhaps
26 as you say, it would not make any difference to the
27 ultimate consumer and maybe it has outlived its original
28 purpose; I do not know. However, it is certainly some-
29 thing that we assure you we will take a very careful
30 look at. We have had quite a number of people suggesting

4 1 to us that the tax should be removed from the level of
2 manufacturer's sales to the wholesaler to a different
3 level, either the wholesale level or consumer level.

4 Have you anything to say on that score, Mr.
5 Robbins? We know the difficulty which arose in the past.
6 We are aware of the history that it was difficult to
7 collect.

8 MR. ROBBINS: That is the point I wanted to
9 make in my remarks here. I have, through experience,
10 determined that the import of merchandise into Canada
11 computed on the duty-paid value, the rate of tax appli-
12 cable, worked out on the basis of the manufacturer, is
13 about 6%.

14 Now then, my conclusion there is that if the
15 goods manufactured in Canada - and after all, we have
16 got to protect the Canadian manufacturer, like the
17 textile industry that I mention here - you know what
18 they have gone through. I have a client who is in the
19 textile business, and I have been working for them for
20 some time, and it is just very difficult to understand
21 why they don't get more support from the Government than
22 they do in these importations of this yarn, and these
23 people are allowed to bring it in tax-paid on a duty-
24 paid value, and yarn from Japan and these foreign
25 countries, where the wages are low, this merchandise is
26 dumped in here at a ridiculously low value. There is no
27 dump duty put on it. To compete with that sort of thing
28 the textile manufacturer is just up against it; he has
29 got his back to the wall.

30 That is the point that I think should be looked

5 1 into very carefully by the Royal Commission and get an
2 equitable basis worked out for the manufacturer against
3 the importers that are coming in here.

4 For instance, I was in Ottawa six weeks ago
5 for a firm, and they told me that my client would have
6 to pay the sales tax on the packaging of the yarn that
7 they sold from the manufacturing premises. Well, there
8 is nothing in that Special War Revenue Act that says
9 that tax applies on the packaging of yarn, and I told
10 them so, and yet despite that they ruled this client of
11 mine would have to pay sales tax on the selling price of
12 the yarn which they packaged and sold to the Canadian
13 trade and yet the importer, the unlicensed importer of
14 this yarn, can bring it in and pay tax on this ridiculously
15 low price into Canada with no dump duty on it at all.
16 He then, of course, sells it at a much cheaper rate than
17 they can afford to sell, and they get the business away
18 from the manufacturer and the manufacturer suffers. I
19 know several who have gone out of business as a result
20 of it. That is the point that I think is most unfair
21 and should be looked into.

22 THE CHAIRMAN: Thank you, Mr. Robbins. I can
23 assure you we will keep this before us and we will
24 consider it. We are grateful to you indeed for coming
25 before us today, for your written submission and submitting
26 yourself to the questions that we have put to you. We
27 appreciate your long experience in the area of sales tax,
28 and we shall weigh your thoughts and opinions most care-
29 fully, Mr. Robbins. Thank you very much indeed, sir.

30 MR. ROBBINS: Thank you, sir.

6 1 THE CHAIRMAN: Is there anything more for us
2 today, Mr. Secretary?

3 THE SECRETARY: Nothing, Mr. Chairman.
4 Tomorrow morning at 9.30 the United Nations Association
5 in Canada, followed by the Communist Party of Canada,
6 and Mr. L.C. Foster.

7 THE CHAIRMAN: We will stand over until 9.30
8 tomorrow morning.

<u>Titles</u>	<u>Description</u>	<u>Page</u>
(d) <u>Submission: Of</u>		
<u>The Communist Party of Canada</u>		I838
Opening remarks of the Chairman		I838
<u>Nature of the Organization and its group.</u>		I838, I839
27 Incidence of Taxation and Income		
Distribution .		I839 / I868
(e) <u>SPECIFIC DISCUSSIONS:</u>		
The problems of taxation as reviewed by and reasons for the suggested recommendations setforth by the participant.		
Preamble		I838 / I849
I. A point raised in reference to nothing contained in the submission dealing with countries where the Communist party provides the Government that taxation is generally low. A question, with reference to any information relative thereto and their tax system employed.? A concept of the principles.		I839 / I840
2. A point outside of the terms of reference of the Royal Commission on Taxation, Re cost of education should be collected by the Federal Government and administ- tered by the Provinces. A review of the concept of the proposals.		I849, I850 I858 / I860
3. A few questions, relative to paragraph No. 22 of the Summary as recorded in volume No. 26-A dated May 23, 1963 of The Royal Commission on Taxation records of submissions page 5 thereof, with regard to deductions for advert- ising by corporations, limited to an amount equal to 5% of operating costs. The points raised, exemplifications and viewpoints expressed.		I850 / I852
4. A reference to criticism in respect to collection of salary and wage earners' income tax at the source. A review of the point raised and the arguments in respect thereto.		I852, I853
5. A reference and question to, suggested cancellation of the Federal Sales Tax on consumer goods, how would the line of demarcation be drawn between consumer goods and capital goods, also, the scope and intention, The reaction and some exemplifications of the points raised incidental thereto.		I853, I854

Titles	Description	Page
(e) <u>SPECIFIC DISCUSSIONS: (continued)</u>		
6. A reference to the Sales Tax continuation of Excise Taxes as referred to in the brief, paragraphs 44 and 45 respectively page 10 thereof and as further recorded in volume No. 26-A May 23, 1963 of The Royal Commission on Taxation records of submissions page 15 thereof. A point of sales tax removal v/s retention of excise taxes. The debated viewpoint in respect to sales taxes and excise taxes.		I854 / I856
7. A reference to the suggested" Value Added method of collecting excise tax, the method to be employed and basis.		I856, I857
8. A question, where we are going to get all the money to do all the things that you have recommended.? A general review of (5) five essential points outlined in the brief. The questions, arguments and viewpoints expressed.		I857, I858
9. A question, do you have any views as to the incidence of the Corporation profit tax or as to where this tax finally lands, on shareholders or consumer, whether it is passed on to the consumer ? The reply and reaction to the question.		I860, I861
10. A question, do you feel that the social benefit program and the tax burden should be kept in entirely separate compartments and no account taken of one in viewing the incidence of the other ? Some exemplifications in pursuing the points raised.		I861 / I863
II. A reference to taxation of Non-residents, some points relative thereto.		I863
12. A point and question in respect to practical implications, results of tax on Capital Gains as would apply to realized and unrealized Capital accretion ? Some points and reactions to the suggested taxing of.		I863 / I866
13. A reference to the Summary paragraph 17 (b) as further recorded in volume No. 26-A May 23, 1963 of The Royal Commission on Taxation records of submissions page 4 thereof, in respect to " Increase in Net Worth is exempt from taxation" A clarification of the point and the taxation incidence and basis of the exemption. SUBMISSION OF

THE UNITED NATIONS ASSOCIATION IN CANADA

APPEARANCES:

Mrs. Eileen Swinton

THE CHAIRMAN: Mr. Secretary, I think we are
all ready if our visitor is.

THE SECRETARY: Mr. Chairman and Commissioners,
this morning we have a brief being entered by the United
Nations Association in Canada. Mrs. Eileen Swinton is
present to speak to the brief. Mrs. Swinton is a member
of the National Executive and Vice-President of the
Toronto Branch of the United Nations Associations in
Canada.

I would like to enter this brief into the
record as Exhibit No. 79.

---EXHIBIT NO. 79: Submission of the United
Nations Association in Canada

THE CHAIRMAN: Thank you, Mr. Secretary. Good
morning, Mrs. Swinton. Don't bother standing, most people
remain seated.

We have read your submission with considerable
interest. It is a matter of some considerable importance
to many worthwhile organizations and we would be glad to hear
anything further you would like to say about this matter,

1 either in summary of what you put before us, or to amplify
2 it. There is no need to read it, as we have already read
3 it.

4 Do you have anything you wish to say?

5 MRS. SWINTON: I don't think there is anything
6 I can add. I think everything is pretty clear, at least
7 to my mind, I hope it is to those of the Commissioners
8 as well.

9 THE CHAIRMAN: I think it is quite clear.
10 There are one or two questions that we would like to put
11 to you. We would like to know to what extent you believe
12 those organizations which do not qualify for charitable
13 donations, such as UNICEF, to what extent they have
14 suffered because of this? Do you have any idea?

15 MRS. SWINTON: It is pretty hard to estimate.
16 I don't suppose the increase would be tremendous. For
17 instance, with UNICEF the largest proportion of money
18 raised is raised during the collection at Halloween and
19 the sale of Christmas cards. The donations otherwise
20 received by UNICEF might amount to \$20,000.00 or \$30,000.00
21 a year, for which income tax receipts could be issued.

22 It is hard to say how much more could be
23 raised. It is always, of course, an added incentive for
24 people to give.

25 THE CHAIRMAN: I was wondering if you had any
26 idea in mind of the difference it would be.

27 MRS. SWINTON: I don't feel I could estimate it,
28 Mr. Chairman.

29 COMMISSIONER MILNE: You mentioned about the
30 possibility of assistance by popular demand. I was

1 wondering, in taking your appeal to the Government, have
2 you had the support of any other groups with you?

3 MRS. SWINTON: Yes, there are other groups who
4 are interested in this, as you have probably noticed in
5 the list of organizations I have mentioned.

6 COMMISSIONER MILNE: I meant in supporting
7 your group in asking for this.

8 MRS. SWINTON: It was a little late to get
9 other groups to come in on the preparation of the brief,
10 but I have spoken to a number of people and they were
11 certainly in favour of the matter in principle. They
12 feel the Act is not too clear on this point.

13 COMMISSIONER WALLS: Can you foresee a general
14 clause in the Income Tax Act that would do the things
15 you want it to do, or do you not rather see the Government
16 would have to give an approved list of the charities
17 that it would be allowable to?

18 MRS. SWINTON: I think possibly the Government
19 might have to approve each individual charity, but I
20 think the Act could be a little more specific than it
21 is as to what might qualify. Certainly the United Nations
22 charities or various projects that come up from time to
23 time in aid of United Nations appeals might be specified
24 within the Act.

25 COMMISSIONER WALLS: You can't just open the
26 door.

27 MRS. SWINTON: No, I quite realize that. I
28 think if the Canadian Government is strongly in support
29 of the United Nations, as it always claims to be, and
30 all parties claim to be, I feel this is one way they could

1 indicate support and permit individuals to indicate their
2 support as well.

3 COMMISSIONER WALLS: Would you suggest any
4 limitation as to the percentage of revenue raised that
5 should be spent within Canada?

6 MRS. SWINTON: I feel at the present time, Mr.
7 Chairman and Commissioners, that this is not relevant any
8 longer. I think we recognize that charity is necessary
9 abroad as well as at home, therefore, I don't think this
10 should be specified.

11 COMMISSIONER WALLS: Do you think any of the
12 charities that are today excluded have suffered in their
13 collection in Canada because of lack of tax benefit?

14 MRS. SWINTON: To a certain extent. I was
15 involved with the World Refugee Year Campaign a couple of
16 years ago, and it did suffer in the early months
17 considerably. We did finally get the exemption, of course.
18 We picked up some of what we lost, but some I think was
19 lost irretrievably.

20 THE CHAIRMAN: You got the deduction despite
21 the limiting words "in Canada"?

22 MRS. SWINTON: Yes, it was a tremendous struggle

23 THE CHAIRMAN: I was wondering how the Government
24 could accomplish what you wish when the Act says: "in
25 Canada"? It is organizations in Canada, not necessarily
26 money spent in Canada.

27 MRS. SWINTON: Yes. The Act does not specify
28 that it must be abroad. It took months of pressure for
29 the World Refugee Year from a number of organizations and
30 individuals.

1 THE CHAIRMAN: What you ask for would be accom-
2 plished by removing the words "in Canada" in 27 (1) (a).

3 MRS. SWINTON: Yes, I would think that. I don't
4 presume to be an expert on the drafting of the Act.

5 THE CHAIRMAN: "Organizations in Canada", it
6 seems to imply the money be spent in Canada.

7 MRS. SWINTON: Yes, and apparently that is the
8 interpretation that the administrators of the Act take.

9 THE CHAIRMAN: Yes.

10 MRS. SWINTON: It could say to charitable
11 organizations situated in Canada.

12 THE CHAIRMAN: I would think if it is the inten-
13 tion to deal with all charitable organizations at the dis-
14 cretion of the Minister, the words "in Canada" are redundant
15 and should be taken out.

16 MRS. SWINTON: That again leaves it entirely to
17 the discretion of the Minister, which in many cases is not
18 too desirable

19 THE CHAIRMAN: Virtually it has to be there, does
20 it not, or there would be charities that should not qualify
21 because they may bear the name of charity and may not in
22 fact be genuine.

23 MRS. SWINTON: Yes.

24 COMMISSIONER WALLS: Unless you listed the
25 charities, would it not lend itself to fictitious charities
26 and sending tax-free money out of the country.

27 MRS. SWINTON: Well, there surely could be
28 adequate safeguards for that type of thing. You can look
29 into the sponsorship of any charity before it is accepted.

30 COMMISSIONER PERRY: This is probably a silly
question, and I only ask it because the brief does not
specifically answer it: Can we assume exemption has been
requested for all these various organizations and refused?

MRS. SWINTON: Yes.

COMMISSIONER PERRY: Is there any indication in
the refusal of the grounds for the refusal?

1 MRS. SWINTON: Just that the money is spent
2 abroad.

3 COMMISSIONER PERRY: There is a possibility,
4 you know, that the Treasury attitude creeps in here.
5 There may be some feeling that since the Government is
6 already supporting the United Nations directly that it
7 need not also do so through an income tax deduction.

8 MRS. SWINTON: No doubt this is their attitude,
9 but the more money raised voluntarily for the United
10 Nations means possibly less pressure on Government to
11 make Government contributions.

12 COMMISSIONER PERRY: Yes, there is the ideological
13 inconsistency here, although the Minister of Finance might
14 feel it is a strong argument.

15 MRS. SWINTON: It is mainly the fact it is
16 inequitable, because so many charities do the same type
17 of thing and they do have the exemption. If the United
18 Nations charities are refused, so should others be
19 refused if that is their ground on which they are
20 refused.

21 COMMISSIONER PERRY: It is quite interesting
22 that the United Nations organizations as a group have been
23 refused. There may be a little bit of this attitude
24 behind the refusal, because any Minister of Finance would
25 say "I am not going to pay for this both ways." I am not
26 defending that attitude, but I think some of it might
27 be present.

28 MRS. SWINTON: It is really unfair that the
29 churches and various groups who raise money for the same
30 projects can issue receipts in their names. For instance,

1 there are all sorts of organizations raising money for
2 Freedom From Hunger and all except the Freedom From
3 Hunger Committee itself can issue receipts.

4 COMMISSIONER PERRY: I suppose the money that
5 goes abroad to the foreign missions from Canadian churches
6 would far exceed anything that any other organization
7 would be contemplating.

8 MRS. SWINTON: Yes.

9 THE CHAIRMAN: I think we fully understand what
10 the problem is, Mrs. Swinton. We will certainly consider
11 it further. Thank you very much for putting it before
12 us, and for appearing here this morning. You have done
13 the job so tidily that we have got through in a new
14 record time.

15 MRS. SWINTON: Thank you very much.

THE CHAIRMAN: Are we ready, Mr. Secretary?

2 THE SECRETARY: Yes. Mr. Chairman, Commissioners,
3 you have now the brief before you from the Communist
4 Party of Canada. Mr. Bruce Magnuson, leader of the
5 Ontario Communist Party is here together with Mr. Alfred
6 Dewhurst, Educational Director of the Party. Mr. Magnuson
7 will speak to the brief which I now enter into the record
8 as Exhibit No. 80.

9
10 --- EXHIBIT NO. 80: Submission of the Communist Party of
11 Canada.

12 SUBMISSION OF THE COMMUNIST PARTY OF CANADA

13 Appearances: Mr. Bruce Magnuson
14 Mr. Alfred Dewhurst

15 THE CHAIRMAN: Thank you, Mr. Secretary. Good
16 morning, gentlemen. We have read your submission with
17 considerable interest. It covers quite a bit of territory,
18 and obviously some of it is of more interest to us than
19 others. As you will have observed by our terms of
20 reference, we are appointed by the Federal Government to
21 look at Federal Government taxes, and we are reluctant to
22 go very far into the matter of Dominion-Provincial rela-
23 tions in taxation, and likewise into the matter of munici-
24 pal taxation. However, there is a good deal of your brief
25 which is, of course, most pertinent to our considerations,
26 and I would like to address a few questions to you along
27 the lines of that particular part.

28 Before getting into that, would you like to tell
29 us a little bit about your organization, Mr. Magnuson?
30 You are representing, I think, the Executive Committee of

2 1 the Communist Party?

2 MR. MAGNUSON: That is correct, sir, yes.

3 THE CHAIRMAN: What is the Executive Committee?

4 How does it come into being?

5 MR. MAGNUSON: Well, the Executive Committee of
6 our Party is elected from a National Committee, which, in
7 turn, is elected by a National Convention of the Party.

8 THE CHAIRMAN: The National Executive Committee
9 appoints the Ontario Committee?

10 MR. MAGNUSON: No, the Ontario organizations of
11 the Party have their own set-up; their own conventions.
12 They elect their own committee, but I am a member of both.
13 I am a member of the National Executive and also of the
14 Provincial Executive.

15 THE CHAIRMAN: You have a Taxation Committee?

16 MR. MAGNUSON: We do not have any separate
17 Taxation Committee as such.

18 THE CHAIRMAN: This brief is drawn then by
19 members of your Executive Committee, I take it?

20 MR. MAGNUSON: That is correct.

21 THE CHAIRMAN: One thing you do not cover in
22 your submission and which I was curious about is that my
23 impression of the taxation in those countries where the
24 Communist Party provides the Government that taxation is
25 generally very low. We have got very little information
26 about that. We know a good deal about Western European
27 countries, but we do not know very much about the Eastern
28 European countries. Can you tell us anything about that?
29 Do you know what their tax systems look like?

30 MR. MAGNUSON: Well, no, I am afraid I would not

31 care to go into that very much because I am afraid I would
2 not know enough about that to do so.

3 THE CHAIRMAN: I was curious and I thought I
4 would ask you.

5 MR. MAGNUSON: I would be very happy, sir, to
6 find out something for you if it would be of any assistance.

7 THE CHAIRMAN: If you have any literature on the
8 subject I personally would like to get it and I am sure
9 the other Commissioners would also. It has occurred to
10 me that 'a principle of Communism, as I understand it,
11 is that the Government owns the facilities of production
12 and distribution. That being so, why taxation? It would
13 seem to me that sufficient revenues can be secured for
14 the purposes of government by the mark-up on goods in a
15 more satisfactory manner than taxation, and therefore I
16 did not see why taxation, and I was curious as to why you
17 would come forward with a submission on taxation.

18 MR. MAGNUSON: Well, of course, if I may say this
19 in addition to a few remarks I would like to make before
20 we get into the questions: actually, on a long-term pros-
21 pectus the idea is to do away with taxation as such. We
22 do not favour taxation in the sense of continuing debts.
23 We are living here in Canada, which is an entirely
24 different situation.

25 COMMISSIONER WALLS: Would you please speak a
26 little louder?

27 MR. MAGNUSON: I wonder if I may make a few
28 remarks.

29 THE CHAIRMAN: If you would, yes, in your own
30 way rather than in reply to my questions.

4 1 MR. MAGNUSON: We take the point of departure
2 here in Canada from the fact that it is virtually impos-
3 sible today to speak of a proper and democratic tax system
4 in this country. As long as we have an annual drain of
5 somewhere around one billion dollars that flows out of
6 the country annually in payment of interest and dividends
7 and such commitments to foreign investors in this country;
8 secondly, when we have some one-and-a-half to two billion
9 dollars spent for what is largely wasteful expenditures,
10 far beyond what is required for the country's actual
11 defence purposes.

12 We have, over a long period of years, as a Party
13 in this country, taken a position on this question of
14 taxation and how it affects the economic and social life
15 in relation to the development of the country and the
16 productive capacity.

17 Now, if I may draw attention of the Commission,
18 for example, to a brief we submitted here in 1937 to the
19 Royal Commission on Dominion-Provincial Relations, which
20 we received commendation for at that time. It is a rather
21 large and documented brief that goes very exhaustively
22 into the constitutional history of Canada and the diffi-
23 culties that have arisen as a result of the growing
24 economic developments here in terms of the governmental
25 set-up that we have, Dominion, provincial and municipal.

26 We also submitted a letter or a document to the
27 Dominion-Provincial Conference, 1955, among other things,
28 and an extensive documented brief to the Gordon Commission
29 on Canada's economic prospects, and a letter to the Prime
30 Minister of Canada in 1960 at the time of the Dominion-

5 1 Provincial Conference. There are numerous other documents,
2 too numerous to mention here, that we have submitted over
3 the years dealing with this question.

4 Now, wages, as we see it as a percentage of
5 national income, at times, particularly of economic
6 expansion, has a tendency to decline relatively, parti-
7 cularly in periods of economic growth, and that the taxa-
8 tion is loaded onto the shoulders of those who are least
9 able to pay.

10 As a matter of fact, in this country today we
11 have a situation where much of the bigger corporate busi-
12 nesses have various means of evading taxation, and are
13 given all sorts of leeways for the purpose of doing that.

14 I would like to draw your attention, for example,
15 to the situation that is a point of reference here, to
16 illustrate what I am talking about in connection with the
17 annual statement of International Nickel Company of Canada.
18 The International Nickel Company of Canada's annual state-
19 ment here shows us that in 1961 their net earnings were
20 \$88,777,000, on which their income taxes paid were
21 \$60,876,000.

22 In 1962, a year later, last year, their net
23 earnings were ninety-four-and-a-quarter million dollars,
24 or just about that, and their taxes were down \$37,429,000
25 as a result, of course, of the exemptions they gained as
26 a result of the Thompson, Manitoba development.

27 Now, this company has a fifty-four million
28 dollar tax reserve. As a matter of fact, this year they
29 could go along without having to deduct anything from
30 their earnings to pay their taxes, and while they have

6 1 something in reserve, they have taken out something of a
2 billion-and-a-half worth out of the mining operations in
3 Sudbury alone, and in the event that one may speak about
4 this being an incentive to increase economic activity, I
5 may point out that the company itself states here, on
6 page 7 of their annual report, 1962, that having established
7 large stand-by stocks of refined nickel, the company
8 curtailed production at its mines and plants in Canada in
9 the latter part of the year.

10 Now, of course, only about two-thirds of the
11 money that I have mentioned here as being paid by income
12 tax, paid as income tax by the International Nickel
13 Company of Canada, is actually paid to Canada. Something
14 like \$27,000,000, I believe, or thereabouts. The balance
15 of the taxes is paid to the United Kingdom and the United
16 States. So that out of these large operations the Govern-
17 ment gets comparatively very little of taxes, relatively
18 speaking.

2 19 Now, if you take a worker's income, on the
20 contrary a worker's income is very heavily taxed. As a
21 matter of fact, it will take a worker a long time to earn
22 his taxes and amounts to anywhere from 25 to 30 per cent
23 of his income, the average worker, and that is what
24 happens in the case where the wife is working. The worker
25 has no means of escaping taxation because it is deducted
26 at the source. As a matter of fact, in the case, for
27 instance, of seasonal workers, the deduction that is
28 based on the income tax regulations at the source is much
29 higher than is required when his earnings are distributed
30 throughout the year, and as such, constitutes the interest-

8 1 people in mental institutions and TB cases out of ordinary
2 revenue, but this is not the case now. When the Govern-
3 ment, now, in Ontario, speaks of a deficit in its opera-
4 tion of the Hospital Services Commission, as in 1960,
5 for instance, \$10,000,000, and in 1961-62, a little bit
6 of an increase, and so on, this means lumping together
7 all of those costs. This means, for example, that every
8 taxpayer, even those who do not make enough now to pay
9 taxes, now have to pay the same amount whether their
10 income is \$2,000 or \$2,000,000 a year; not only towards
11 maintenance of the health insurance scheme as such, for
12 the protection of the person for which it was designed,
13 but also for the mental institutions and for TB care
14 which was formerly taken out of ordinary revenue.

15 Now, if this has to be resorted to in Ontario,
16 just as an example, what about the other provinces which
17 have much less means than the Province of Ontario has to
18 undertake such expenditures?

19

C/MC/ss 1

I might also mention here the fact that more
and more of the national tax revenue is taken over and
appropriated by Federal Government and this is a direct
consequence of the aims of our national policy today
in Canada. The share of the tax revenue, relatively
speaking, that comes to the local and Provincial Govern-
ments has declined while they call upon such Governments
for social services which have greatly expanded during
recent years.

Now, this is particularly true during the
past fifteen years since 1947, when the policy of this
country brought about a very rapid increase in the
foreign investment, mainly investments from the United
States in Canada. These investors are in a rather
favourable position with regard to taxation as compared
to those who are investing in Canada as Canadians. Of
course, the fact of the matter is that as long as this
policy continues the situation will get worse, and it
will get more and more out of line with respect to
responsibility for social services as the industrial
operations expand and less and less revenue will be
available.

Besides that, we must take into consideration
the fact that it is impossible today for a municipality
to take the responsibility for a national industry
establishing a branch plant in its community which may go
out of business very quickly. This is a national problem,
but which may result in certain expenses which will be
put on the back of the municipal taxpayer. Now, we have
cases in Ontario, Windsor for instance, where industrial

1 activity has declined. We have the case of the uranium
2 industry at Elliott Lake. We give that example as another
3 case in point.

4 There is one other point I wanted to make, and
5 that is with regard to ability to pay. I mean any
6 taxation system which robs a person of the essential
7 requirements of living. I refer to a worker who has a
8 limited income, and we know the distribution of national
9 income in this country is extremely uneven. I could speak
10 for hours on that if I could quote all the briefs and
11 submissions to document what I am talking about. There
12 are hundreds of thousands of working people in this
13 country that don't make enough money to make ends meet,
14 but are today called upon to pay taxes. This is a very
15 unjust situation, to say the least.

16 On top of that now we have the sales tax
17 coming into the picture, Federal sales tax and Provincial
18 sales tax, all sorts of other taxes. It is this that is
19 responsible for the fact that between April the 30th,
20 1961 and April the 30th, 1962, which are the latest
21 figures available to me, the total personal debt of
22 Canadians increased by 21.2% in one year. On this basis
23 workers are living, working people are living that is
24 true, but living on borrowed money and perhaps sometimes
25 on borrowed time, and that is not a good healthy situation
26 for the expansion of productive activity in the country.
27 On the contrary, the way to guarantee debt is expansion
28 of the domestic market and ability to buy back goods
29 and pay for services.

30 This was evidenced very much by the fact that

1 in the war years, when we had the highest taxation also
2 on corporate income as well as others, in this country
3 the economic expansion was more rapid than at any other
4 time. The increase in the national income from 1938 to
5 1945 was something like 144%.

6 Well, I think perhaps that will suffice to
7 emphasize some of the main points that I wanted to draw to
8 your attention with respect to our brief. Our brief is
9 directed towards pointing out the necessity for a change
10 in this country with respect to the taxation system,
11 which comes up against social and economic conditions
12 which compel many and varied reforms and changes also in
13 the structure and functions of Governments. It is, I
14 think, incumbent upon this Commission to recommend to the
15 Government, and we wish that this would be given serious
16 consideration, steps which would bring about that kind of
17 reform of our tax system immediately, that is which
18 will stop most of the loopholes for evasion of taxation
19 by those who are best able to pay, and relieve taxation
20 of those who are least able to pay. We recommend bringing
21 about a kind of taxation system which will put taxation
22 on the principle of ability to pay and bring about a
23 situation also which would eventually help to bring into
24 being a more just responsibility for social services.
25 This, of course, requires constitutional changes and
26 those constitutional changes might take a much longer time.
27 It is a more complicated process and our brief points
28 that out, I think.

29 We have not dealt in too much detail in this
30 brief, as we did, for instance, in previous briefs because

1 what we are in most need of here is to deal with the
2 principal questions of policy that are involved here,
3 and without which it is impossible to get at any of
4 the detailed matters, the technical questions that will
5 have to be answered.

6 THE CHAIRMAN: Thank you, Mr. Magnuson. Any
7 questions?

8 COMMISSIONER WALLS: My first question deals
9 perhaps with a section of your brief that is outside of
10 our terms of reference. I was interested in your
11 recommendation that the cost of education should be
12 collected by the Federal Government and administered by
13 the Provinces. Do you mean the entire cost of education,
14 or do you mean the portion that is today collected by
15 property taxes? In other words, in practically every
16 Province of Canada today 50% of the cost of elementary
17 and secondary education comes out of consolidated revenue
18 and 50% comes out of property taxation. Now, would you
19 have the Federal Government just collect the amount that
20 is today collected by property taxation?

21 MR. MAGNUSON: Well, our proposals over a
22 number of years have been concerned with the cost of
23 elementary education, that is that the Federal Government
24 should assume responsibility for the cost of elementary
25 education, which is that which falls directly on the
26 property owners.

27 COMMISSIONER WALLS: Elementary and secondary?

28 MR. MAGNUSON: That is true.

29 COMMISSIONER WALLS: But then the Provinces
30 today are themselves paying out of the consolidated revenue

1 half of that cost, so I presume what you would have the
2 Federal Government collect would be the equivalent of
3 50% of the cost?

4 MR. MAGNUSON: No.

5 COMMISSIONER WALLS: You would have them collect
6 it all?

7 MR. MAGNUSON: That is right. We have made the
8 proposal that the aim should be for the Federal Government
9 to assume full responsibility for educational costs,
10 both primary and secondary education. That is a step
11 towards that. The very first step should be that the
12 Federal Government should pay to the Provinces as a
13 statutory right a sum equal to the amount required to meet
14 elementary school costs, which in turn would be distributed
15 by the Provinces to the municipalities on the basis of
16 the number of pupils in the elementary schools. That
17 would relieve, in other words, both the Provinces and
18 the municipalities of the cost of education. We feel
19 this way about it, because the Federal Government would
20 be in the best position to see to it that there would be
21 equal opportunities for all children across the country,
22 as we feel there should be.

23 COMMISSIONER WALLS: My other questions may
24 seem to jump back and forward across your brief. My
25 second question deals with number 22 in your summary
26 where you recommend five percent ceiling be placed on
27 advertising. In other words, 5% of the operating costs
28 of any company shall be the ceiling amount they shall
29 spend on advertising. Are you not going to play into the
30 hands of the well-established large companies by doing

1 that and make it difficult for new businesses to come
2 on the market. If you are going to limit them to only
3 5% of operating costs, you are going to preserve the
4 position of the man or firm that is already well
5 established and make it practically impossible for a new
6 product, a new competitor's product to come on the
7 market against it; are you not?

8 MR. MAGNUSON: Well, I don't think the intention
9 here is to propose something that will be necessarily
10 applicable in all cases. What we are talking about here
11 is a maximum ceiling, so to speak, on deductions which
12 may be made for taxation purposes.

13 COMMISSIONER WALLS: Yes, but you do see where
14 it is going to prejudice new businesses coming on the
15 market if they are limited to 5%.

16 MR. MAGNUSON: Well, I do not see where that
17 would make that much difference that it would hamper them
18 in any way. I think there should be ample allowance.

19 COMMISSIONER WALLS: If I had a business with
20 operating costs of a million dollars I would be allowed
21 to spend 5% of that. Now, if my competitor came into the
22 same line of business and his first year his operating
23 costs were \$100,000.00, he would only be able to spend
24 5% of that \$100,000.00, which might make it impossible
25 for him to get his share of the market. In other words,
26 you would be preserving the position of the already well-
27 established companies.

28 MR. MAGNUSON: Of course, I think here we have
29 to take into account it would also work the other way
30 around. We have too much excessive advertising today, and

1 the very idea that sales are made by advertising alone
2 I think is fallacious. The question is the fact of
3 people buying things perhaps they don't need through the
4 medium of advertising. People buy because they can
5 afford to buy, and they buy because they need to buy.
6 In many cases today when there seems to be no limit I
7 would think that a small business or a new business would
8 be largely hampered by the excessive amount of advertising
9 that larger businesses are able to carry through and they
10 cannot compete. Some limit should be placed on that.
11 There should be some assistance in that case. It could
12 work also the other way around.

COMMISSIONER

13 WALLS: Then some of your criticism in respect to
14 collection of salary and wage earners' income tax at
15 source is quite justified, but do you not believe that
16 most wage and salary earners prefer this system of paying
17 income tax by deduction as earned, rather than having
18 to pay a lump sum at the end of the year?

19 MR. MAGNUSON: Well, I think to the extent that
20 they have to pay taxes it doesn't make too much difference
21 to a worker. It perhaps will be easier this way if it
22 is deducted piecemeal. The fact of the matter is that
23 many workers today are paying taxes who should not actually
24 pay any taxes at all, and that is where the difficulty
25 comes in. Now, this applies in general, for example, as
26 a result of the low exemptions which we are asking today
27 should be raised, which would except hundreds of thousands
28 of workers from paying income tax in the first place.
29 I am referring to people in the timber industry, for
30 example, who are seasonal workers and other people who are

1 deducted because, say, for a few months of the year their
2 average income is fairly high and they come under certain
3 income tax brackets and they are deducted. After that
4 they don't work for a number of months and as a result
5 of that, when their income is averaged out for a year,
6 they are entitled to a refund. This tax has gone to
7 the Government and is being held there, and while they do
8 get a refund, they have to wait a long time before they
9 get it.

10 COMMISSIONER WALLS: Would you not consider
11 that even if the changes that you desire are put into
12 effect, of larger deductions for those who will continue
13 to pay income tax that the wage earners will prefer the system
14 of paying as they earn it, rather than as a lump sum?

15 MR. MAGNUSON: I know, of course, that most
16 workers I am sure do not prefer to pay any taxes.

17 COMMISSIONER WALLS: Of course that is true of
3 18 all of us, I suppose.

19 MR. MAGNUSON: But as I said to the extent that
20 they have to pay taxes this is probably as good a way for
21 them as any to pay.

22 COMMISSIONER WALLS: I notice you suggest that
23 we cancel the Federal sales tax on consumer goods. Now,
24 how would you draw a line of demarcation within the
25 taxable goods that are under Federal sales tax today as
26 between consumer goods and capital goods? Is it your
27 intention really that the whole tax be taken off, or just
28 be taken off certain types of goods?

29 MR. MAGNUSON: We think that taxes, such things
30 as sales tax should be taken off consumer goods entirely.

1 COMMISSIONER WALLS: For instance, is an
2 automobile consumer goods? Is jewellery consumer goods?
3 Are radios consumer goods? I am not trying to get you
4 into difficulty, but I am trying to get you to help us
5 to draw a line of demarcation on what are consumer goods.

6 MR. MAGNUSON: I think the automobile today is
7 no longer a luxury, but a necessity for a person to have.
8 It is part of his life. It is part of the worker's life
9 commuting to and from work, and it is certainly a very
10 important factor when it comes to excise tax and sales tax
11 being added onto such items which enter into the ordinary
12 living.

13 COMMISSIONER WALLS: You then go on and favour
14 the continuation of excise tax. In one paragraph you
15 say you wish to take off the sales tax on consumer goods
16 and in the next paragraph you deal with the continuation
17 of the excise tax, but you do not exclude the consumer
18 goods that fall within the excise tax. By that I am
19 referring to things like shaving soap and your wife's
20 lipstick and radios. All of these things are today
21 subject to excise tax. Now, you wish the excise tax to
22 continue?

23 MR. MAGNUSON: Which part of the brief are you
24 referring to, by the way?

25 THE CHAIRMAN: 44 and 45, page 10.

26

27

28

29

30

D/ET/dpw

1 COMMISSIONER WALLS: You say excise taxes
2 should be levied only on the value-added basis. I am
3 going to come to dealing with the basis of tax in a
4 minute. In other words, you wish excise taxes to be
5 continued but you made no qualification on the excise
6 taxes as you did on the sales taxes. On the sales tax,
7 you said it should be removed from consumer goods,
8 but there are some consumer goods that are excise taxed.

9 MR. MAGNUSON: That is true, but there are
10 very complicated problems involved here in terms of
11 imports and exports, particularly in Canada, where we
12 have branch plants operating of foreign corporations,
13 that are importing component parts on all of this kind
14 of business. One would have to be very technical in
15 order to go into that.

16 We are not in favour of excise taxes, as such,
17 on consumer goods either. Anything that will add in cost
18 in this sense to consumer goods should be limited, or
19 over a period of time abolished and replaced by more
20 equitable taxes such as capital gains tax which we are
21 talking about in our brief.

22 COMMISSIONER WALLS: Of course, I was only
23 going by your statement in this paragraph where you said
24 excise taxes should be levied only on the value-added
25 at each stage of production and distribution from the
26 manufacturer's price to the final sale to the consumer.

27 MR. MAGNUSON: Yes.

28 COMMISSIONER WALLS: And the point I want
29 to find out from you whether you wanted consumer goods ex-
30 cluded from that the same as you have it from sales tax.

MR. MAGNUSON: Well, of course, it does not say so here.

COMMISSIONER WALLS: No.

MR. MAGNUSON: That is so, it does not say so, but what we are dealing with mainly in this paragraph is the question, of course, of adding taxes on top of taxes.

COMMISSIONER WALLS: I appreciate that. Well then, through sales tax today we collect some three hundred million of the Old Age Security tax. Now, if we take a very large percentage of the sales tax off, where would we now collect these hundred millions of dollars for Old Age Security? Would you add that to income tax?

MR. MAGNUSON: I would think so. If they would carry out the provisions that are in principle outlined in this brief, there could be a considerable increase in the revenue that is collected by the Government to cover social expenditures without having to pin it on those that are least able to pay.

COMMISSIONER WALLS: How do you see the value-added tax being used for excise?

MR. MAGNUSON: I don't quite get you.

COMMISSIONER WALLS: In your brief, you wish to employ the value-added method of collecting excise tax.

MR. MAGNUSON: Oh, yes.

COMMISSIONER WALLS: Now, how do you see that being employed?

MR. MAGNUSON: Well, of course, this has to do with the question of income, what constitutes income in productive activity; capital appreciation, if that is taxed, in addition to the value that is added in the course

3 1 of production in terms of income tax, that is going to
2 produce a lot of revenue that is not now collected.

3 COMMISSIONER WALLS: I just have one other
4 question, and perhaps I am taking too many questions from
5 my colleagues.

6 THE CHAIRMAN: Oh, no.

7 COMMISSIONER WALLS: See if I have this right:
8 I am rather concerned about where we are going to get all
9 the money to do all the things that you have recommended
10 here. Firstly, you are suggesting that the Federal Govern-
11 ment collect sufficient to pay for the cost of elementary
12 and secondary education; secondly, that they collect
13 sufficient to pay 80% of a national health plan; third,
14 that we remove a very large percentage of the sales tax;
15 fourth, that we increase the basic exemptions on income
16 tax, and fifth, that we deduct the taxes on assessed
17 values of homes up to \$5,000.

18 Now, against that, the only place that I see
19 you are recommending an increase of taxes to cover these
20 things is capital gains tax, a heavier tax on higher
21 income tax brackets, and increased tax on dividends
22 going out of the country.

23 Have you made any estimate of what the total
24 cost is going to be of those increased services that you
25 want the Government to carry out, and as to whether they
26 could be applied to these three increases in taxes?

27 MR. MAGNUSON: We do believe that if those steps
28 are taken there would be sufficient revenue to meet the
29 requirements.

30 COMMISSIONER WALLS: I would conservatively

4 1 estimate it is going to take somewhere between two and
2 three billion dollars, and I just cannot see how you can
3 make these additions to the three existing taxes that
4 you suggested and be able to get that amount of money.

5 MR. MAGNUSON: There is a lot of income to be
6 derived in terms of taxation on capital gains, net worth,
7 capital appreciation. As far as dividends on investments,
8 foreign investments in the country, there is another
9 source which will bring about a considerable amount.

10 I want also to mention, for instance, that you
11 already had a brief from a gentleman here the other day,
12 I believe, who said that sales tax now only covers 50%
2 13 of the firms; where manufacturers of agricultural equip-
14 ment, chemicals, building materials, fancy biscuits and
15 so on were exempted.

16 COMMISSIONER WALLS: What he meant was partly
17 what you are already asking for; a very large percentage
18 of consumer goods have already been exempted from sales
19 tax. 50% of the total items are today exempt, and a
20 very large amount of these are upon consumer goods.

21 MR. MAGNUSON: Yes, but actually I do not have
22 his brief. I read a report of it to mean the opposite,
23 the fact that sales tax in its application is not applied
24 in many cases where it could be applied without entering
25 into the consumer goods field. If that was not the case,
26 then, of course, that is another matter.

27 COMMISSIONER WALLS: That is all, thank you.

28 COMMISSIONER PERRY: I have one or two points.
29 Although as the Chairman said we are not going very deeply
30 into the Federal-Provincial area, you do make a point

51 that the constitutional distribution of taxing powers
2 should be revised.

3 I was just wondering if you had anything in
4 mind in respect of the federal taxing powers which are
5 now, as you know, unlimited.

6 MR. MAGNUSON: Well, when you speak of unlimited
7 federal powers of taxation, I do not think that it is
8 entirely correct to speak of unlimited federal powers of
9 taxation in the present circumstances in the sense that
10 the provinces enter into the picture, and under our
11 constitutional set-up, it depends on what is taxed and
12 how it is taxed.

13 THE CHAIRMAN: I cannot hear you.

14 MR. MAGNUSON: It depends on what kind of taxa-
15 tion. In the income tax field, for example, as opposed
16 to real estate, as opposed to property taxation, and so
17 on; corporation income tax.

18 COMMISSIONER PERRY: I think you are speaking
19 more of the practical application of the taxing powers,
20 and I am quite sure that the constitutional position is
21 that the Federal Government has full rights to impose any
22 kind of tax.

23 MR. MAGNUSON: If that is so, under the present
24 circumstances, then it could be done; to make it possible
25 for the Federal Government to assume those services which
26 we propose in the brief here should be the concern of the
27 Federal Government.

28 COMMISSIONER PERRY: So that when you speak of
29 constitutional change, you do not have any change in mind
30 for the federal powers of taxation? I am being a bit

6 1 sticky about this because I do not think, in fact, you
2 have used "constitutional" in the same sense that I would.
3 I have in mind the provisions of the British North America
4 Act which is our constitution in this sense, which sets
5 out the respective taxing powers of the national govern-
6 ment and the provincial governments.

7 When you speak of changing the constitutional
8 arrangements, I interpret that as changing those sections
9 of the British North America Act, not changing the kind
10 of tax which each Government is levying at any particular
11 point of time.

12 MR. MAGNUSON: Well, we believe, of course, that
13 we need a new constitution.

14 COMMISSIONER PERRY: People have been saying
15 this for at least 50 years now, and nothing very tragic
16 seems to have happened in the absence of a new constitution,
17 particularly in this area, in taxing.

18 However, on an entirely different subject, do you
19 have any views as to the incidence of the corporation
20 profits tax? Do you have any views as to where this tax
21 finally lands, whether it is on the shareholders or the
22 consumers; whether it is passed on to the consumers? We
23 have had many conflicting views presented to us, and, of
24 course, one's attitude towards corporation profits tax
25 would be quite different, depending upon one's views as to
26 its incidence.

27 MR. MAGNUSON: Well, of course, that is one of
28 the reasons why we feel that capital gains tax is so
29 important. We also feel that the corporations' income
30 taxes should be much stiffer and more strictly applied.

7 1 Now, of course, it is true that in many cases,
2 and no doubt in most cases, there is a tendency for this
3 to be passed on to the consumer in one way or another.
4 In that sense the capital gains tax will help to balance
5 the situation much better, and a gradual shift in that
6 direction will be an improvement in our tax structure
7 from the point of view of shifting the taxes to those who
8 are better able to pay. Otherwise, it is being passed on
9 through various ways and means, including all the various
10 corporations, at various stages passed on to those who are
11 least able to pay.

12 COMMISSIONER PERRY: So that you think that
13 some part of the corporation profits tax is passed on?

14 MR. MAGNUSON: Yes, we certainly believe that.

15 COMMISSIONER PERRY: Well, of course, one would
16 not condone any form of evasion or avoidance of tax, but
17 on the other hand, if it does happen that corporations
18 minimize their tax, then in your view it should follow
19 that they are minimizing the taxes that are being passed
20 on?

21 Now, on a completely different area again, do
22 you feel that the social benefit program and the tax
23 burden should be kept in entirely separate compartments,
24 and no account taken of one in viewing the incidence of
25 the other?

26 Just take the hypothetical possibility, for
27 example, that the whole of the tax revenue were converted
28 into a massive social security program for people with
29 incomes under \$5,000. The Government spends all its
30 money for this purpose. Would you then go on looking

8 1 only to the burden of the taxes that were imposed as the
2 measure of a democratic tax system where the benefits
3 received might be ten or fifteen times the amount of the
4 tax being levied?

5 MR. MAGNUSON: Well, I do not think, hypotheti-
6 cally, or in any other way, that such a situation is very
7 realistic. Therefore, in the first place, all the
8 revenue of the Government cannot be applied in that sense.

9 COMMISSIONER PERRY: Well, let us say 15% to 20%
10 applied that way. That is getting closer to the present
11 position.

12 MR. MAGNUSON: One thing we do know is that in
13 the present situation of distribution of national income,
314 the way it is, private ownership, all of the means of
15 production in the hands of fewer people and higher
16 centralization of control of finance and industry in the
17 country, with the requirement of social services, the
18 costs of such services are continuously increasing, and at
19 the same time people who are in control of governments
20 and who determine the policy of governments and so on
21 are in an increasingly stronger position to determine ways
22 and means of evading it.

23 COMMISSIONER PERRY: There is a real problem
24 here as to how far ultimately you must take into account
25 the benefits, the direct cash benefits of a program of
26 government expenditure.

27
28
29
30

E/MC/ss 1

Any level of income where the taxes are being

2 paid may be just a small part of that direct benefit.

3 With regard to money leaving the country you say you feel

4 this should bear the same burden as if it had been

5 received by residents of the country. I suppose you have

6 in mind there that non-residents should be subject to

7 some sort of a graduated withholding tax or a tax something

8 like our personal income tax.

9 MR. MAGNUSON: Something like that, yes.

10 COMMISSIONER PERRY: This is not an unprecedented

11 suggestion. There are some countries which do have this

12 practice. They require the non-resident to file a

13 return and pay tax as though he were a resident in the

14 country of origin. Have you thought much about the

15 practical implications of your tax on capital gains which,

16 as stated in your brief, would apply both to realized

17 and unrealized capital accretion? To my knowledge, no

18 country has attempted to get at the unrealized accretions

19 and there are enormous problems not only of evaluation,

20 but reporting involved. I think you would have to have

21 an open account for two or three million taxpayers with

22 an annual appraisal of their total net worth. Is this

23 the sort of thing you have in mind?

24 MR. MAGNUSON: Well, of course, as far as the

25 actuarial problem, the technical aspect, is concerned,

26 I am in a very poor position to speak on that, because I

27 am neither an accountant, nor a person who aspires or

28 can claim to be an economist in the sense I would be able

29 to deal with the detailed application of it. We are

30 concerned mainly here with the principle that is involved,

1 and what would be just an equitable in terms of treating
2 capital appreciation.

3 COMMISSIONER PERRY: Without reflecting on the
4 validity of your proposal at all, I think you would
5 have to agree that some things which are theoretically
6 ideal just cannot be worked out in practice, and this
7 might be one of them, particularly where you are referring
8 to unrealized gains.

9 MR. DEWHURST: It would be practical on the
10 realized.

11 COMMISSIONER PERRY: There are taxes in existence
12 which do operate on realized gains, yes.

13 COMMISSIONER BEAUVAIS: You state in your
14 summary at 17 B that increase in net worth is exempt from
15 taxation. Well, if the increase represents the savings
16 in wages or salary of a man on which income tax has been
17 paid, it seems to me that this increase in net worth
18 has been subject to taxation.

19 MR. MAGNUSON: There is no doubt about the
20 fact that there may be here a bit of overlapping. It
21 depends on how it would be applied actuarially speaking,
22 but this is not the kind of net worth we are so much
23 concerned with. It is the big aggregations of earnings
24 of capital appreciation that we are concerned with,
25 increasing net worth that is not subject to taxation and
26 speculative capital and everything else that comes into
27 the picture.

28 COMMISSIONER BEAUVAIS: Nevertheless you do
29 admit that if it is due to dividends or wages or salary
30 on which tax has been paid, this increase in net worth has

1 been subject to tax.

2 MR. MAGNUSON: Yes, that might be. As I said,
3 there might be an area of overlapping there, but I don't
4 think that would be serious.

5 COMMISSIONER BEAUVAIS: Section 38, page 9,
6 you say the great accumulations of wealth which exist
7 today are held by corporations and therefore not accessi-
8 ble to succession duties. The shares of those corporations
9 are held by individuals and when a shareholder dies,
10 then his share is valued according to that wealth. In
11 effect, that wealth is accessible to succession duties;
12 is it not?

13 MR. MAGNUSON: I am afraid I didn't quite get
14 your point.

15 COMMISSIONER BEAUVAIS: A shareholder of a
16 corporation has part of the wealth of a corporation and
17 when he dies his share of that corporation is evaluated
18 and then his estate pays succession duties on that value.
19 Therefore, this wealth is accessible to Estate Tax.

20 MR. MAGNUSON: In that limited sense, yes, I
21 would think so.

22 COMMISSIONER BEAUVAIS: In section 39, Commissioner
23 Perry talked about your suggestion of taxing both
24 realized and unrealized capital gains, but would you
25 consider also allowing for a decrease in value in the
26 capital assets? For instance, if a property is valued at
27 \$100,000.00, and is worth \$120,000.00 at the end of the
28 year, according to your suggestion he would pay taxes on
29 the \$20,000.00, whether it is realized or not. Now, if
30 it is proven this property is worth \$80,000.00, would you

1 then allow \$20,000.00 against his other income?

2 MR. MAGNUSON: Well, of course that is a question
3 that is very hard for me to answer how that would be
4 treated in that case. I am afraid I can't answer that.

5 COMMISSIONER GRANT: You said that 25 -- 30% of
6 workers' income was paid out in the form of taxes. Were
7 you referring there to all levels of Government that
8 impose taxes, or were you referring only to the income
9 tax?

10 MR. MAGNUSON: I was referring to all levels of
11 various indirect taxes that the workers pay.

12 COMMISSIONER GRANT: Including municipal taxes
13 and real estate?

14 MR. MAGNUSON: Yes.

15 COMMISSIONER GRANT: Have you the figures on
16 the percentage of the total personal income tax that is
17 paid by taxpayers in the various income ranges?

18 MR. MAGNUSON: Well, not up to date. I have some
19 in a partial sense. In this brief, for example, we have
20 these figures.

21 COMMISSIONER GRANT: Which brief is that?

22 MR. MAGNUSON: The brief to the Sirois Commission.

23 COMMISSIONER GRANT: In 1937?

24 MR. MAGNUSON: Yes. We have the brief that was
25 submitted to the Gordon Commission in the 1950's. As far
26 as a worker with an average family is concerned, I have
27 some figures that show that the income tax alone for an
28 average family with two children with an income of below
29 \$5,000.00 amounts to roughly 7% of his income. The rest
30 is indirect taxation.

1 THE CHAIRMAN: There is one point here I would
2 like to go into further. Paragraph 33 on page 8 suggests
3 that the increase in the basic income tax exemption for
4 single persons to \$2,000.00 and for married persons
5 \$3,000.00. I think we all agree with you that taxes
6 should not be collected from people that don't have
7 enough to live on. It is a difficult thing to measure.
8 There have been surveys as to where, if you like, the
9 poverty level may lie, the sustenance level. Do you have
10 any such survey? Where do you come by your figures of
11 two and three thousand dollars?

12 MR. MAGNUSON: Well, we haven't a survey. We
13 haven't made any such surveys. There are surveys which
14 we have looked at which have been made by welfare agencies
15 and various organizations which show what it takes as an
16 average today to live on. That is, what is needed to
17 meet a reasonable amount of expenditures. They certainly
18 do come far above the amount that is allowed here. This
19 is very conservative. I would say they should be higher,
20 the exemptions should be higher. Speaking about this,
21 I would think it a very conservative figure.

22 THE CHAIRMAN: Could you give me a reference
23 to a Canadian survey which would be useful in this matter?

24 MR. MAGNUSON: The Ontario Welfare Council for
25 one.

26 THE CHAIRMAN: We need one for all of Canada.

27 MR. MAGNUSON: I can't think of any name. I
28 know that there are such. I don't know if I have any.

29 THE CHAIRMAN: Recently somebody appearing before
30 us made reference to a United States study which obviously

1 had some validity, but I would prefer here a Canadian
2 study.

3 MR. MAGNUSON: Was that the Hellyer Study?

4 THE CHAIRMAN: I think not.

5 MR. DEWHURST: I think the Ontario survey takes
6 comparative figures from across the country, not only
7 related to Ontario.

8 THE CHAIRMAN: That is the Ontario Welfare
9 Council, 1941?

10 MR. MAGNUSON: Yes, that is right. I thought I
11 had here in an old information service bulletin some
12 references, but it is not here. I must have it in some
13 other reference book I didn't bring with me. For instance,
14 there is a research bureau on the west coast that has
15 conducted a number of surveys at times in a limited area
16 across the country bearing on this point and that might
17 be helpful. Then, of course, there is the Hellyer budget.
18 In California there is an organization that is referred
19 to. The Canadian Labour Congress, the old Trades and
20 Labour Congress of Canada, did publish a bulletin some
21 years ago which had some statistics on this based on an
22 impartial survey that was carried out across the country.
23 That was during the war time. It applied to the cost
24 of living at that time and the requirements when P.C. 103
25 came into being just about that time. I am sorry I
26 cannot state the exact number of this bulletin or the date
27 it was issued.

28 THE CHAIRMAN: We can find that out. I think
29 we have no more questions. Have you anything further you
30 would like to say to us?

1 MR. MAGNUSON: Well, that is all.

2 THE CHAIRMAN: We thank you very much indeed
3 for your submission to us, and your appearance here
4 today. None of us like taxes and I would suspect, in view
5 of the philosophy of your party, you like them even less
6 than the rest of us. In view of that it is very good of
7 you to take the time and trouble to come before us.

8 MR. MAGNUSON: I shall be very happy if I find
9 anything that bears on the point you raised to mail it
10 to you, any written document that bears on taxation.

11 THE CHAIRMAN: Well, I would certainly like to
12 read it providing it is in English. I couldn't go very
13 far beyond that.

14 MR. MAGNUSON: Yes, of course.

15 THE CHAIRMAN: Thank you. We will stand over for
16 ten minutes.

17

THE CHAIRMAN: Mr. Secretary, are we ready?

2

THE SECRETARY: Mr. Chairman and Commissioners,

3

we have this morning with us Mr. L.C. Foster and Miss

4

Ursula Foster. Mr. Foster has presented a brief to the

5

Royal Commission which you have before you, and he wishes

6

to speak to this brief this morning. I would like to

7

enter it into the records as Exhibit No. 81.

8

9

--- EXHIBIT NO. 81: Submission of Mr. L.C. Foster.

10

11

THE CHAIRMAN: Thank you, Mr. Secretary. Good

12

morning, Miss Foster and Mr. Foster. Thank you, indeed,

13

for your submission. I might say this gives me some

14

personal satisfaction because I have been of a little

15

assistance at one time in guiding Miss Foster's steps

16

in income taxation; perhaps not very far, but a little

17

bit, and I see that she has picked up anything I said to

18

her and I think a great deal more in this submission.

19

Mr. Foster, there is no need to read your brief

20

to us. We have already read it. Most people appearing

21

like to speak to what they have sent in by way of summary

22

or additions to it or anything that they please, and we

23

will be very glad to hear anything you have to say.

24

Otherwise, we will have a few questions to put to you.

25

MR. FOSTER: I would like to say, firstly, that,

26

oddly enough, we are not seeking relief from taxes. We

27

are seeking more - and I should have written the words

28

out to get this more clearly - we are seeking more to

29

have a more economic approach by the Tax Department and

30

a fairer approach by the Tax Department. If I may read

2 1 just this summary.

2 THE CHAIRMAN: By all means.

3 MR. FOSTER: My submission outlines some undemo-
4 cratic and very unfair features in the operation of the
5 Income Tax Department, as far as the small taxpayer is
6 concerned.

7 The small businessman is very vulnerable because
8 he usually does not have the time or resources to contest
9 decisions. If the amount is small, the Income Tax Depart-
10 ment assumes he will not contest a decision of even a
11 junior assessor as the cost of auditor and/or legal fees
12 would be greater than the tax. Legal fees thus incurred
13 would not be allowed as an expense.

14 When an objection to a re-assessment is filed,
15 the whole file is opened, and decisions that have already
16 been made are subject to reversal. My sister's status
17 as a tenant could be reversed and she would have to pay
18 back taxes and penalties. At the same time, I would
19 receive a tax rebate with interest. This sort of thing
20 no doubt keeps assessors busy, as the Department can go
21 back four years and three or four assessors can screen it
22 (the file) in that time.

23 In court, when an accused person appeals, only
24 the item under appeal can be considered, and during the
25 appeal he cannot be threatened with other charges. This
26 sort of justice does not apply in the Income Tax Department.

27 THE CHAIRMAN: Now, Mr. Foster, you are an
28 engineer, I see, a professional engineer in the Province
29 of Ontario?

30 MR. FOSTER: Yes.

3

1 THE CHAIRMAN: Employed by Dearborn Chemical,
2 and your interest in taxation comes about because of
3 taxes that you are paying yourself, I think?

4 MR. FOSTER: Yes, that is correct. Excuse me,
5 sir; my experience, just very briefly: I graduated in
6 1938, and my industrial experience was varied until
7 about 1952, and then, for 5 $\frac{1}{2}$ years, I was manager of a
8 small chemical company, and we struggled, and then there
9 was a change of ownership which let me out. Then I struck
10 out as an independent sales agent sort of on a catch-as-
11 catch-can basis. Then, at the beginning of last year, I
12 joined the Dearborn Chemical Company in the service
13 department as a regular employee. So I only say those
14 words to indicate that I have rather a vivid picture of
15 what the small businessman has to contend with.

16 THE CHAIRMAN: You have put quite a few recommen-
17 dations before us. I think I have counted seven in all.
18 Are there any questions?

19 COMMISSIONER MILNE: I would like to ask you a
20 question just to clear up in my own mind the facts that
21 surround this particular case. I gathered from your
22 submission you have this apartment as an investment, and
23 I have no idea how long it has been an investment in your
24 hands. You mentioned that the original refrigeration
25 system had never been capitalized.

26 Am I right in assuming, when you bought this
27 apartment, or purchased it, or in whatever manner, that
28 the refrigeration system as it exists now was in the
29 building at that time?

30 MR. FOSTER: Yes. My sister, in her letter,

4 1 outlined the details. I believe it was 1957 that my
2 father died. Actually, he had had his house in the city
3 converted - it is an old house, and it was converted into
4 three apartments in 1944. My sister and myself took over
5 this building, and in 1944 the refrigeration system was
6 installed with a compressor in the basement and three
7 boxes.

8 In this particular instance, we found we could
9 not get an exact unit to replace them, but as you
10 suggested, originally the refrigeration system was not
11 separated from the building as a whole. It was just
12 considered that, and we felt that it was just a replace-
13 ment of a certain item. In the course of this certain
14 principles seem to come out. One of the main principles,
15 as I see it, is that in one way or another these refri-
16 gerators happen to be an expense. Whether they are
17 taken in one year or over a period of years depends on
18 the Tax Department.

19 Now, to us it seems a waste - and we are not
20 trying to dodge it, you see - but to us it seems a waste
21 of assessors' time and therefore taxpayers' time to
22 capitalize an item worth \$170. That may have been all
23 right in the 1930's, but aside from the fact that it was
24 a unit, you might say a unit that was already in the
25 house, and capitalized with the house, there is this
26 uneconomic feature.

27 Then, of course, the additional unfair approach
28 of which this is just an example.

29 I know, from talking to accountants who deal
30 with small business firms, that this is a regular practice.

5 1 When you appeal one item your whole file is opened, and
2 we were put in the unfortunate spot in this particular
3 item, that the choice, as I outlined, was given to me:

4 "We will close your 1961 file if you unconditionally
5 withdraw your objections."

6 Well, this is sort of like "When are you
7 going to stop beating your wife?" because do not
8 have anything to hide. But then we just did not feel
9 that we had the time and energy and so forth to go into
10 a long fight on a bunch of other items that these people
11 would bring up. Have I gone farther than your original
12 question?

13 COMMISSIONER MILNE: That is all right. You
14 certainly cleared the point for me. I wanted to ask you
15 one other thing in connection with your submission which
16 you show as your first recommendation. It deals with
17 Section 51 and the time in which additional tax must be
18 paid. You do not think it should be necessary to pay
19 this within 30 days? Did you have a definite time limit
20 that you would suggest?

21 MR. FOSTER: I suggested that at the end of the
22 appeals - that could vary.

23 COMMISSIONER MILNE: Yes.

24 MR. FOSTER: Within 30 days. Payment of addi-
25 tional taxes due to re-assessment should be required only
26 after appeal and/or objection has been settled.

27 COMMISSIONER MILNE: You thought it should go
28 on even though this could be a very lengthy period?

29 MR. FOSTER: Yes.

30 THE CHAIRMAN: Well, it is very good, indeed, to

6 1 have this directed at assessing tax. Most of what we
2 have received, of course, is directed at the economics
3 of taxation or the language of the Act. We do hear a
4 bit about the assessing practice, but not a great deal,
5 and we are delighted to receive a submission from an
6 individual taxpayer who is particularly concerned about
7 the way the Department proceeds to assess.

8 You may be sure we will continue to examine
9 this, and if there are matters which can be corrected,
10 we will give them our attention. I think we have no
11 more questions. Is there anything further you would like
12 to say to us, Mr. Foster or Miss Foster?

13 MISS FOSTER: There is one item from my own
14 company, the Wholesale Diamond Merchants. We have very
15 heavy sales and excise taxes, more so than corporate
16 income taxes, and, of course, the auditors come in
17 periodically. They never clear up to a certain point,
18 say, 1960. They will clear up certain items to 1960 and
19 two years later they will come in and dig up 1956 or
20 1955 or 1954.

21 Then, what we have been doing in all good faith,
22 they will say, "No, that is not so," so then we have a
23 little penalty. Not much.

24 However, if only they would clear the decks to
25 a certain point that you would know where you are at once
26 it is audited. The private auditors from an auditing firm
27 do the audit for a year - unless, of course, there is a
28 suspicion of fraud, then I realize they would have to go
29 back then, but if they could clear the decks to a certain
30 definite point on each audit.

7 1 THE CHAIRMAN: Thank you, Miss Foster. You
2 have put it on the record. You might find it useful to
3 address yourself by letter to the responsible department.
4 However, in all events we will have regard to the matter,
5 I can assure you.

2 6 Thank you very much indeed for your appearance
7 here today and your help to us.

8 MR. FOSTER: This same sort of thing applies
9 even in very small items. Real estate. We can never
10 really be sure that we are cleared up in any particular
11 period. You know, four years back, and we are always
12 open for more. Thank you very much indeed for taking
13 the time.

14 THE CHAIRMAN: Not at all. We are glad to see
15 you. Thank you.

16 Mr. Secretary, what is next?

17 THE SECRETARY: I have one more item of business,
18 Mr. Chairman. I have a brief submitted to the Commission
19 that was received on April 16th in Ottawa from the Rubber
20 Association of Canada. I understand that Association
21 will be appearing before the Commission some time in the
22 autumn in Ottawa. At this time, with the concurrence of
23 the Secretary of the Rubber Association of Canada, I
24 would like to enter this brief into the record as Exhibit
25 No. 82.

26 THE CHAIRMAN: Thank you, Mr. Secretary.

27
28 --- EXHIBIT NO. 82: Submission of the Rubber Association
29 of Canada.
30

8 1 THE SECRETARY: There is no further business,
2 Mr. Chairman, in Toronto. We will be meeting in Ottawa
3 at 9.30 on Monday morning at the Board of Transport
4 Commissioners.

5 THE CHAIRMAN: This completes the Toronto
6 submissions. We stand over now until 9.30 on Monday
7 morning in Ottawa. This hearing is concluded.

<u>Titles</u>	<u>Description</u>	<u>Page</u>
(c)	<u>SPECIFIC DISCUSSIONS: (continued)</u>	
A question, as to how the figure of \$ 10,000. was arrived at, in reference to the recommendation set forth in the brief, page 2 thereof, in respect to gifts to widows ? The reply and the explanation of the basis of.		1886, 1889, 1890
A question, as to the size the Estate would be of a person of moderate means? The reply and comments expressed.		1886 / 1888
A reference and question to, Any advantage in Estate Tax and Succession Duties Tax being combined or collected by the same medium ? The reply and reaction to the question and points raised.		1888, 1889
A question, in respect to, (abstract from page 2 of the brief quoted)"In all circumstances, all normal household appliances, furniture and furnishings shall be deemed to be the property of the Widow " also, would you include Art objects, Paintings, Sculptures and so forth ? The reply and comments expressed.		1889, 1890, 1893
A point in reference to, and question Re: suggested exemption of an Estate be increased by \$ 10,000. where there is a residence among the Assets. What is the equity in such a provision, when the family home is sold and the retired couple move into an apartment, also, the equity of giving an exemption when retained as opposed to non-retention and sale of same, the money realized invested in other form of Assets ? The reaction, and reply to the question with further comments incidental thereto.		1890 / 1893
A reference and point raised as to, special treatment given to the home in the Gift Tax sections, would like to have some identical treatment in the Estate Tax Act; as is afforded under section 112 of the Income Tax Act; Some debatable viewpoints expressed.		1892, 1893
A question, have you given any thought to the taxation of the Capitalization of the Pension when it is a joint survivorship basis ? some exemplifications and comments expressed.		1893, 1894
A point raised, the legal precedence under the Estate Tax Act; and even under the various succession duties Acts are rather meagre. A few comments and examples cited.		1894, 1895
Closing remarks of the Chairman.		1895 -

1 ---The hearing commenced at 9.30 a.m.

2 THE CHAIRMAN: Would the Secretary
3 introduce our visitors to us?

4 THE SECRETARY: Mr. Chairman and
5 Commissioners, this morning we have a brief from the
6 Professional Institute of the Public Service of
7 Canada. Dr.B. Coldwell is the vice-president of the
8 Institute. He is here to speak to the brief, and with
9 him, two colleagues, officers of the Institute. I would
10 like to enter this brief into the record as Exhibit 83.

11 ---EXHIBIT NO. 83: Brief of the Professional Institute
12 of the Public Service of Canada.

13 SUBMISSION OF THE
14 PROFESSIONAL INSTITUTE OF THE
PUBLIC SERVICE OF CANADA

15 APPEARANCES:

16 Dr. B. Coldwell
17 Mr. J.H. Leroux
18 Mr. F.S. Morris

19 THE CHAIRMAN: Thank you, Mr. Secretary.
20 Good morning, Dr. Coldwell. I would like you to be
21 so kind as to introduce your colleagues. I will
22 introduce the Commission. I do not need to name them as
23 their names are up here. If you would care to speak to
24 your submission, please do so. We have all read it.
25 It does not need to be read into the record or to us.
26 It is in the record now, but if you have anything you
27 would like to add or summarize we would be very glad
28 to hear anything you have to say.

29 DR. COLDWELL: Mr. Chairman and
30 Commissioners: I would like to introduce Mr. Hector

1 Leroux on my right, our executive secretary, and
2 Mr. Morris on my left, who is a member of our legal
3 group. We are appearing here this morning on behalf
4 of our President, Mr. Gilhooley, who was unable to
5 come.

6 I think I should point out that the
7 Professional Institute of the Public Service of Canada
8 is a staff association which represents professionals
9 in the public service.

10 THE CHAIRMAN: The acoustics in this
11 room are dreadful. Will you raise your voice a little
12 bit, please?

13 DR. COLDWELL: I should point out that
14 the Professional Institute of the Public Service of
15 Canada is the voice of professionals in the public
16 service, and we have a membership of approximately
17 6,500 at the moment. The brief makes four
18 recommendations. They are before you. I do not think
19 I have anything further to add to this at this time.
20 We will try to answer any questions you may wish to
21 put to us.

22 THE CHAIRMAN: Thank you, Dr. Coldwell.
23 You may remain seated. In the Professional Institute
24 of the Public Service whom do you classify as
25 professionals? I presume it would be doctors, lawyers,
26 engineers, accountants.

27 MR. LEROUX: There would be chemists,
28 bacteriologists, biologists, pharmacists, nurses, and
29 generally speaking those who are university graduates
30 who are employed in the federal public service in these

1 categories.

2 THE CHAIRMAN: There are a few left over
3 who do not qualify.

4 MR. LEROUX: Well, we would include
5 such people, for example, as administrative officers,
6 personnel officers, and other related fields in
7 management, in the management areas.

8 THE CHAIRMAN: Do you have a committee
9 on taxation? I was wondering how it is that you come to
10 submit a brief to us. Did you make studies of tax laws?

11 DR. COLDWELL: We have a committee on
12 superannuation and insurance, and we have a committee
13 on legislation. These are standing committees of
14 our organization, and these committees on occasion,
15 as the occasion demands, do make studies on legislation
16 and tax laws.

17 THE CHAIRMAN: Thank you. I might say
18 we are very glad to have this submission. We feel it
19 is an important one. We will have a few questions for
20 you.

21 COMMISSIONER GRANT: It is Dr. Coldwell,
22 is it?

23 DR. COLDWELL: Yes, that is correct.

24 COMMISSIONER GRANT: If I understand your
25 brief correctly, you are restricting your comments
26 largely to the position of the widow and children.

27 DR. COLDWELL: That is right.

28 COMMISSIONER GRANT: Of the deceased
29 person. Your first submission is that the family
30 home should be regarded as belonging to the husband and

1 wife jointly or with a minimum amount of \$10,000 being
2 the dividing point.

3 DR. COLDWELL: That is right.

4 COMMISSIONER GRANT: Now, you are aware of
5 course, of the provisions of the gift tax section of
6 the Income Tax Act, which is Section 112, and I thought
7 we might just review some of the provisions which
8 already exist in the light of your submission.

9 I think you make a point that while
10 relief is available, already available, that it could
11 only be taken advantage of if the person knows the law.
12 I think you make a point it is not always easy to
13 find out what the law is.

14 DR. COLDWELL: That is right.

15 COMMISSIONER GRANT: The Gift Tax Act
16 already provides that a husband can deed his residence
17 to his wife, and on his death \$10,000 of that valuation
18 of the residence will be exempt from being included
19 in the value of the residence. That provision already
20 exists in the Income Tax Act.

21 Also under the gift tax provision, a
22 person can gift up to \$4,000 in one year to one person,
23 or one-half of his taxable income of the previous year,
24 whichever is the greater, so that a measure of relief
25 does exist under the Income Tax Act there. Perhaps it
26 is well for us to keep these in mind, you would agree,
27 in considering any amendments to the Estate Tax Act.

28 Now, there are two provisions of the
29 Ontario Succession Duty Act which you draw to our
30 attention. They seem to be provisions which are

1 working quite well in Ontario, and naturally they will have
2 full consideration of this Commission.

3 There is a further provision in the Estate
4 Tax Act that in the event of property being held in
5 joint tenancy, on the death of one spouse, the actual
6 interest of that spouse will be included in his or her
7 estate, but no more.

8 Now, those are about the only observations
9 I have to make. Perhaps you might have some further
10 remarks in enlargement of your brief in the light of
11 those observations.

12 DR. COLDWELL: I will ask Mr. Morris
13 to comment on your observations, Mr. Grant.

14 MR. MORRIS: Mr. Chairman, gentlemen,
15 firstly, the Professional Institute are well aware of
16 the provisions of the Gift Tax Act and Section 112
17 of the Act. However, the Institute feels that the
18 man on the street, he is unaware of the provisions of
19 the Gift Tax Act. Furthermore, the section is not
20 too explicit. The exemption must be claimed, and if
21 not claimed, of course there is no presumption on
22 behalf of the widow.

23 Furthermore, with respect to the annual
24 gifting, the amount of \$4,000, of course this is a
25 section which more readily applies to the well-to-do
26 and the wealthy in this country. In that connection
27 we feel that the average Canadian is more or less
28 discriminated against. We think that the provisions
29 of the Statute itself, the Estate Tax Act, based on
30 federal authority and the Succession Duty Act in the

1 Province of Ontario, should spell out clearly the
2 exemptions and other provisions that are available to the
3 average Canadian.

4 It is quite clear that since commuted
5 pensions and annuity rights are taxed on a commuted
6 basis, this fact alone is placing many estates into
7 the tax bracket. The average Canadian is completely
8 unaware that his estate may be taxable.

9 In fact it is quite clear that even
10 solicitors of the Department of National Revenue are
11 not clear as to what the law is today. We have a
12 rather anomalous situation of a senior solicitor of
13 that Department soliciting estate planning advice from
14 a junior insurance man. That to my mind is a grave
15 indictment on the Act itself. Here is a man supposed
16 to be an expert in his field. While it is true that
17 possibly he is terrified by the knowledge that he
18 possesses, I personally am aware that recently a
19 senior solicitor of that Department solicited estate
20 planning advice from a very junior insurance salesman
21 who was taking a correspondence course leading to the
22 so-called degree of C.L.U.

23 COMMISSIONER GRANT: Estate planning is
24 becoming a more and more complex problem. It might be
25 a very foolish man who would think that he had all the
26 answers himself and could not profit by taking advice.
27 However, you know of the particular instance which we
28 will not go into.

29 The provision with respect to the
30 capitalization of annuity or pension has been brought

1 to the attention of the Commission on several occasions
2 in previous hearings, and I am sure what you have to
3 say will be taken into consideration very seriously
4 along with the approaches which were made by other
5 organizaions.

6 It has been brought very forcibly to
7 our attention that there are instances where
8 capitilization of life interest does work a considerable
9 hardship where liquid funds are not available and
10 where the income may be subject to quite severe
11 strain in order to find the funds with which to pay
12 the estate duty.

13 MR. MORRIS: I might say that the
14 Institute in the month of March presented several
15 recommendations to the Premier of this Province. These
16 recommendations were well received, and we have
17 received a reply to the effect that possibly the
18 Institute may be suitably impressed by amendments to
19 existing legislation in the Province.

20 COMMISSIONER MILNE: May I ask you about
21 the amount of \$10,000? I think you are thinking in
22 terms of income, as you phrase it, of moderate means,
23 and I was wondering if you would tell us why you
24 picked that particular amount. Is it because that
25 is the amount mentioned in the gift tax or were there
26 some other conclusions that you reached to take that
27 amount, "one-half or at least \$10,000".

28 DR. COLDWELL: I think, Mrs. Milne, that
29 our thinking with respect to this sum was this seemed
30 to be a reasonable figure; that the homes of the

1 average professional in the public service would
2 probably contain somewhere around this amount, this
3 value of furnishings, and we felt that this was
4 reasonable in that respect and that we were not asking
5 for the moon. This seemed to be a reasonable figure.
6 I suppose I could ask \$12,000 or \$15,000 or some other
7 figure, but this seemed to be fairly reasonable.

8 I should point out that we are simply
9 asking that these recommendations be studied by the
10 Commission, and from your sources of information you
11 might find this figure might need to be adjusted.

12 COMMISSIONER MILNE: You have no definite
13 conviction about the amount? It is just that it should
14 be a reasonable amount?

15 DR. COLDWELL: Yes.

16 COMMISSIONER MILNE: Perhaps you have
17 already answered then the question as to what size
18 the estate would be of a person in moderate means.
19 You possibly feel that this would come in the same type
20 of income?

21 DR. COLDWELL: Of course the size of the
22 estate will vary considerably depending on the earnings
23 of the individual and the time of death. A large part
24 of it no doubt will be tied up in annuity benefits from
25 superannuation. That, plus his home, furnishings and
26 life insurance. Those would be the three main parts
27 of a professional's estate. We feel in many instances
28 it could well exceed \$60,000.

29 THE CHAIRMAN: You have no comment on the
30 \$60,000, have you?

1 DR. COLDWELL: No, I don't think so,
2 Mr. Chairman.

3 THE CHAIRMAN: It is not in your sub-
4 mission.

5 COMMISSIONER WALLS: I was rather glad
6 to hear you had made a presentation to the provincial
7 government, but it seems to me some of the problems
8 that you have are rather aimed at Provincial
9 Succession Duty instead of Federal Estate Tax.
10 You must keep in mind that the Federal Estate
11 Tax is only interested in what the deceased leaves,
12 and not to whom he leaves it.

1 The fact you get \$60,000 deduction for
2 a wife is a normal deduction, just like an income tax
3 deduction. The wife may be left nothing by the estate
4 and the man still gets \$60,000 deduction; whereas the
5 Provincial Succession Duty Act taxes what each
6 beneficiary receives, therefore it seems to me more
7 of your questions are geared to that.

8 Do you think it is possible, or do you
9 see any advantage to both these taxes being collected
10 by the one medium in the provinces where ⁺the have a
11 succession duty?

12 MR. MORRIS: Could you rephrase that
13 question again?

14 COMMISSIONER WALLS: Do you see any
15 advantage to both these taxes being combined or
16 collected by the one medium?

17 MR. MORRIS: Personally I think it would
18 be far more efficient and businesslike for one authority
19 to collect both taxes, however there is the question of
20 provincial autonomy and I doubt if Queen's Park would
21 look upon that with any great favour.

22 COMMISSIONER WALLS: I see a great deal
23 of merit in the things you suggest, like the furniture.
24 It seems to me you are getting away from the spirit
25 of the Estate Tax. I am not saying that the spirit is
26 right or wrong but there is the fact it is only
27 interested in the total estate the deceased leaves and
28 not who gets it. Therefore if you had a combined tax
29 you would be better able to look after some of the
30 problems that you are proposing today.

1 MR. MORRIS: Well, since we have made
2 complementary recommendations to both authorities
3 we feel, providing both authorities lend a favourable
4 ear, certainly this matter can be ironed out. We
5 feel the request is reasonable and we think it is
6 what any widow is entitled to.

7 COMMISSIONER BEAUVAIS: I would like to go
8 back to that question of \$10,000. You say that you
9 are aware of the tax provision in connection with a
10 gift of \$10,000 on property during a taxpayer's
11 lifetime. If a taxpayer has given to his wife
12 \$10,000 of property would this suggestion apply also?

13 MR. MORRIS: We of course don't mean
14 to duplicate the provision so the wife is able to
15 collect from both sources. We are suggesting that in
16 all the circumstances the wife should be deemed to have
17 this equity in her family home whether or not her
18 husband was aware of the provisions of Section 112
19 and took advantage of that.

20 COMMISSIONER BEAUVAIS: If the husband
21 took advantage then there would be no duplication of
22 the \$10,000.

23 MR. MORRIS: I feel that if the amendment
24 we are suggesting here were adopted it would lead to
25 a deletion of a part of Section 112 of the Gift Tax Act.

26 COMMISSIONER BEAUVAIS: Now in the next
27 paragraph you suggest in all circumstances all
28 normal household appliances, furniture, and furnishings
29 shall be deemed to be the property of the widow.
30 Would you include in that art objects and paintings and

1 sculptures and so forth?

2 MR. MORRIS: We, of course, had this in
3 mind. It is a matter of statutory interpretation.
4 We would certainly not so intend -- these are not
5 normal.

6 COMMISSIONER BEAUVAIS: But if it is
7 the wife who dies first then would the same application
8 be made? Would it be the widower?

9 MR. MORRIS: The Institute feels it is
10 the widow who needs protection. Surely the widower
11 can fend for himself.

12 COMMISSIONER PERRY: As I read your
13 recommendation it is really a suggestion that the
14 exemption of an estate be increased by \$10,000 where
15 there is a residence among the assets. Put that way
16 I then asked myself, "What is the equity in such a
17 provision?". Take the instance of a couple who have
18 retired for some time and, as many of them do, sell
19 the family home and move into an apartment. What
20 is the equity of giving an exemption where the residence
21 has been retained, as opposed to the situation where
22 it has not been retained, where it has been sold and
23 the money perhaps invested in securities or some other
24 form of asset? Do you have any thoughts on that
25 particular aspect? I can see how you arrived at this
26 recommendation but I am wondering whether you had
27 thought of it in those terms.

28 MR. MORRIS: We feel that the women in
29 this country feel and believe that they are entitled
30 to an equity in the home.

1 COMMISSIONER PERRY: But is it not
2 true a lot of women in the country in advancing years
3 do not want to be bothered with keeping up a larger
4 home and they would rather be living in more convenient
5 circumstances?

6 MR. MORRIS: I suggest that that is
7 neither here nor there. We are primarily interested
8 in the widow with minor children.

9 COMMISSIONER PERRY: Well, I must say
10 that rather changes the brief because this widow, if
11 she has enough minor children, would have an exemption
12 of eighty, ninety, or a hundred thousand dollars
13 and therefore she may not have a problem.

14 MR. MORRIS: Under the present provisions
15 of the Estate Tax Act I suggest that it would be very
16 easy to have an estate of \$100,000 although you may not
17 even be able to purchase a used second-hand car.
18 \$100,000 at five per cent gives a salary of \$5,000.
19 A widow today with an average family would have rather
20 tough sledding on \$5,000.

21 COMMISSIONER PERRY: Is it actual
22 experience that there are numbers of people leaving
23 estates valued at more than \$90,000 or \$100,000?
24 I am just looking for information here.

25 MR. MORRIS: I have no actual figures on
26 the matter, Mr. Perry, but I suggest that under the
27 present provisions of the Estate Tax Act that it is
28 very easy to leave an estate of \$100,000, even though
29 you have few visible and tangible assets.

30 DR. COLDWELL: Mr. Perry, when you

1 mentioned the case where the family home is disposed
2 of and the family have moved into an apartment, at
3 the time of the liquidation of the family home could
4 not at that time the wife's equity be established?

5 COMMISSIONER PERRY: It would have to
6 be established in whatever assets replaced the family
7 home in the husband's property and once you start
8 along this sort of line I think the effect of what
9 you are asking is an increase of \$10,000 in the basic
10 exemption because it would almost become too compli-
11 cated to do anything else.

12 THE CHAIRMAN: This is not the place to
13 argue with a fellow Commissioner! I would like to
14 ask Mr. Perry if in fact we have not started on the
15 road in view of the special treatment given to the
16 home in the Gift Tax sections and if that is so the
17 arguments made are valid to the effect these gentlemen
18 would like to have the same treatment in the Estate
19 Tax Act as is afforded under Section 112 of the Income
20 Tax Act.

21 COMMISSIONER PERRY: I suffer under the
22 disadvantage of ... knowing why that provision went
23 into the Act. It is not much of a secret; I think it
24 was largely a recognition of the fact that a good many
25 husbands unconsciously had made gifts of a part of
26 their residence to their wives through entering into
27 a joint mortgage or title. This has become very
28 common, a good many mortgage companies insist on it.
29 The Department was faced with the fact that perhaps
30 hundreds of thousands of husbands all over the country

1 who had made gifts but had to be assessed for gift
2 tax or removed from this position by some device,
3 such as this \$10,000 exemption.

4 As I said I can see the road by which
5 they had arrived at this position which, of course,
6 is the \$10,000 exemption from the Gift Tax. This is
7 a real argument that always comes up in the case of
8 pensions where other testators have created other
9 assets in other forms, a formation which just happened
10 not to be pensions.

11 MR. LEROUX: I think I might suggest
12 there is a little more than the purely financial
13 interest here. I think there is something of the
14 psychological interest on the part of the wife who
15 feels a sort of proprietorship toward the furnishings
16 and so on.

17 COMMISSIONER PERRY: You can appreciate,
18 of course, that the furniture would go with her to
19 any type of abode. That is all I want to say,
20 Mr. Chairman.

21 THE CHAIRMAN: Thank you.

22 COMMISSIONER BEAUVAIS: I have another
23 question. Have you given any thought to the
24 taxation of the capitalization of the pension when
25 it is on a joint survivorship basis? It seems to me
26 it is a very serious matter because the assets of a
27 taxpayer on his death might be only the pension that
28 his wife would receive and if this pension is
29 capitalized then the wife will have no money to pay
30 for that capitalized value.

1 MR. LEROUX: I might say, Mr. Beauvais,
2 we have had one or two examples amongst the membership
3 who have been obliged to use their entire proceeds of
4 their husband's life insurance in order to pay the
5 estate tax and succession duty charges.

6 COMMISSIONER BEAUVAIS: I understand
7 that in the United States the value on which it is taxed
8 is on the basis of the contribution of the taxpayer
9 but otherwise it is not taxable.

10 THE CHAIRMAN: That concludes our
11 questions. Do you have any others you would like to
12 put to us, any further remarks to make?

13 MR. MORRIS: I might just remark,
14 Mr. Chairman, the legal precedence under the Estate
15 Tax Act and even under the various Succession Duty
16 Acts are rather meagre. I think a study of the results
17 of the report would rather clearly indicate that the
18 Department of National Revenue normally has its way
19 and it is quite clear that these Acts are framed in
20 very general terminology, almost all-embracing, and
21 we feel that this works certainly to the detriment of
22 the average Canadian taxpayer, the man on the street.
23 We of the Institute feel that the average Canadian is
24 more or less injured to the high taxation under the
25 provisions of the Income Tax Act but we feel that it
26 is going a little bit too far to pursue the average man
27 beyond the grave. Surely there should be some respite
28 somewhere.

29 THE CHAIRMAN: Your statement as to the
30 language of the Act is an interesting one. The reverse

1 is usually stated with reference to the Income Tax Act
2 and it has been suggested that perhaps it seeks to
3 create too great a degree of precision in its
4 statements. Maybe there is a happy middle ground. I
5 don't know.

6 MR. MORRIS: I am afraid my legal
7 confreres with the Department of National Revenue are
8 experts in their field on behalf of the government
9 and seemingly the shoe is on the other foot when they
10 think of their own future estate.

11 DR. COLDWELL: I would like to thank
12 you very much, Mr. Chairman, for permitting us to
13 appear this morning on behalf of the Professional
14 Institute of the Public Service of Canada.

15 THE CHAIRMAN: We thank you very much
16 indeed for coming forward with this interesting
17 submission and answering our questions. We are
18 very glad to see you. Thank you.

19 THE SECRETARY: Mr. Chairman, we have
20 a brief submitted by Mrs. Denise C. Brown of Ottawa.
21 Mrs. Brown is here before you this morning and wishes
22 to say a few words and she is presenting this brief
23 on behalf of herself.

24 I would like to enter this brief into the
25 record as Exhibit No. 84.

26 THE CHAIRMAN: Thank you, Mr. Secretary.

27
28 ---EXHIBIT NO. 84: Brief submitted by Mrs. Denise
29 C. Brown, Ottawa.

1896

SUBMISSION OF
MRS. DENISE C. BROWN, OTTAWA

THE CHAIRMAN: Good morning, Mrs. Brown,
We have your submission and it is indeed very clear.
I think we may have a few questions to put to you.

--

--

--

--

--

ET/jc

1 I was curious as to what your professional
2 qualifications are. It seems to be very well drawn.
3 You are not a lawyer?

4 MRS. BROWN: No.

5 THE CHAIRMAN: You are really making
6 a submission which is in your own interest?

7 MRS. BROWN: Yes, very definitely.

8 THE CHAIRMAN: Do you have anything you
9 would like to say to us in amplification of your
10 recommendation?

11 MRS. BROWN: No, I believe it is all
12 contained in the submission. I will be pleased to
13 reply to any questions that are asked.

14 THE CHAIRMAN: It was very well stated
15 in your proposal that natural mothers, irrespective
16 of marital status, be granted a basic and permanent
17 exemption for income tax purposes of \$10,000 annually,
18 and that such exemption be made retroactive to
19 January 1, 1957. The retroactive feature is one
20 that would not find much favour with the government
21 I would think. Retroactive legislation, as you
22 are probably well aware, in the tax area is very
23 difficult to deal with.

24 We were curious as to why \$10,000.
25 Surely equity would be achieved if the natural mother
26 were placed in the same category as a widow with a
27 child. Would that not be right?

28 MRS. BROWN: Well, of course, a widow
29 with a child, I would include that as a natural
30 mother. By "natural mother" I meant the mother of a

1 child as opposed to one of an adopted child.

2 THE CHAIRMAN: I see.

3 MRS. BROWN: Rather than either a single
4 or married woman or widow.

5 THE CHAIRMAN: A widow with a child in a
6 self-contained domestic establishment now gets
7 \$2,000 I think.

8 MRS. BROWN: Yes, or a woman who is
9 separated from her husband and has a dependent child
10 also gets \$2,000. In my opinion that is not
11 sufficient. I am in those circumstances, and in my
12 opinion the exemption equivalent to that of a married
13 man is not realistic, as I have pointed out in the
14 brief.

15
16 COMMISSIONER WALLS: The only thing that
17 rather disturbed me, and I have a good deal of sympathy
18 for a great many of the points in your brief, but I came
19 to the conclusion that it would perhaps be unfair for a
20 \$10,000 exemption to a married woman with a dependent while
21 a married man with two children getting \$10,000 a year has
22 to pay over \$1,500 tax. Why would you state that a
23 woman should have complete exemption of \$10,000 as against
24 the husband having to support a wife and two children
25 and having to pay \$1,500 tax?

26 MRS. BROWN: In the first place I mentioned
27 the \$10,000 to give the government some room to down-
28 grade it. I think that if the government approved of
29 an exemption of \$5,000 I would be quite satisfied.

30 COMMISSIONER WALLS: You were carrying on
a Dutch option, were you?

1 MRS. BROWN: Yes. The second part
2 of your question is that from the point of view of
3 a woman who is separated and supporting a dependent
4 child and does not have the services of a male person
5 in the home, it is a little difficult to understand
6 that a married man is supporting a wife. In actual
7 practice a married man could be requested to add to
8 his income the value of the services of a domestic
9 servant without pay, which is the status of a married
10 woman in Ontario.

11 I wash my own dishes, but the married
12 man next door does not wash his own dishes. He does
13 not prepare his own meals. He has a domestic servant
14 without pay to do these things for him.

15 COMMISSIONER WALLS: Some of us married
16 men still have to wash dishes. Why did you pick
17 on the retroactive date of 1957? Why did you
18 particularly pick 1957?

19 MRS. BROWN: Because I was married in
20 1939 and I was under the impression, as many married
21 women are in Ontario, that a married man is responsible
22 for their support. It was very rudely brought to me
23 in the Family Court and in the Supreme Court of
24 Ontario that this is not the case. This is false.

25 COMMISSIONER WALLS: Your picking 1957
26 is to apply to your own particular circumstances?
27 That is why you picked 1957, to make it retroactive
28 to 1957?

29 MRS. BROWN: Yes. I feel I have
30 suffered considerable injustice, and before that it

1900

1 could be said that I was going under the misapprehension
2 that my husband was responsible for my support, which
3 he was not, and neither is any other married man.

4 COMMISSIONER WALLS: Thank you very
5 much.

6 COMMISSIONER MILNE: It would seem if
7 the \$10,000 exemption were granted it would be much
8 better for a woman to be a widow.

9 MRS. BROWN: I'm sorry. You mean it would
10 be more advantageous for a woman to be a widow
11 than to be a married woman?

12 COMMISSIONER MILNE: Yes.

13 MRS. BROWN: I agree with you, and when
14 I separated from my husband I was able to claim
15 married exemption, whereas when I was living in the
16 same house as he was I was not able to claim that
17 married exemption. The moment I left with my
18 dependent child, I maintained a separate establishment
19 three streets from my previous residence, and I
20 immediately qualified for \$2,000 exemption, so it
21 was to my advantage, I agree with you.

22 THE CHAIRMAN: I believe that completes
23 our questions, Mrs. Brown. I think we understand
24 what you have put before us, and I assure you we will
25 consider it. Is there anything further you would
26 like to say to us?

27 MRS. BROWN: No, I do not think so,
28 thank you.

29 THE CHAIRMAN: We thank you very much
30 indeed for your attendance here today and your

1 submission to us.

2 MRS. BROWN: Thank you.

3 THE CHAIRMAN: Mr. Secretary, is there
4 anything else this morning?

5 THE SECRETARY: One short item of
6 business, Mr. Chairman. I have received a very short
7 brief from the Agricultural Institute of Canada
8 which I would like to enter into the record as
9 Exhibit 85. The Agricultural Institute points out
10 it is a national association representing over 3,000
11 professional agriculturists in Canada. By the
12 nature of the industry the profession serves between
13 80 and 90 per cent of the members who are salaried
14 employees. The conclusion: "We have been permitted
15 to examine the submission to your Commission made
16 by the Canadian Association of University Teachers.
17 We should like to place on record with you our
18 profession's complete endorsation of the principles
19 underlying the recommendations of the C.A.U.T.",
20 You will recall, sir, we had this brief in the City
21 of Montreal.

22 THE CHAIRMAN: They spoke about refresher
23 courses, and these are the farmers' organizations?

24 THE SECRETARY: Agricultural Institute
25 of Canada.

26
27
28 THE SECRETARY: There will be distri-
29 bution made in the usual way, but I am entering this
30 into the record now.

1 ---EXHIBIT NO. 85: Brief of the Agricultural
2 Institute of Canada.

3 SUBMISSION OF THE
4 AGRICULTURAL INSTITUTE OF CANADA

5 Suite 100, 176 Gloucester St.,
6 Ottawa 4, Canada.

7 May 15, 1963.

8 Mr. Kenneth LeM. Carter,
9 Chairman,
10 Royal Commission on Taxation,
11 Room 1014,
12 88 Metcalfe Street,
13 Ottawa, Ontario.

14 Dear Sir:

15 The Agricultural Institute of Canada
16 is a national association comprised of and
17 representing over 3000 professional agriculturists in
18 Canada. By the nature of the industry our profession
19 serves in this country, between 80 and 90 per cent
20 of our members must be and are salaried employees.
21 They are employed by others to serve the industry
22 rather than being practitioners of the profession
23 as independent individuals or through professional
24 partnerships.

25 The fact that these individuals are
26 employed rather than self-employed in no way reduces
27 their personal responsibility to maintain and improve
28 their professional competence. Some employers support
29 some of their activities and needs in these respects,
30 but to an increasing degree, the individual is
required to personally accept the responsibility.
Our concern is that the Canadian Income Tax Act in
its present form seriously discriminates against

1 salaried professionals by not allowing as deductions
2 from taxable income the expenses which they must
3 incur to continue to be professionally competent.

4 We wish to make it clear that our
5 comments are intended to refer to all professional
6 agriculturists whose principal source of income
7 is from salaried employment regardless of their
8 employer. The basic principles of the problem
9 and its solution apply without exception in all
10 instances where the salaried professional has to
11 finance these expenditures himself.

12 We have been permitted to examine the
13 submission to your Commission made by the Canadian
14 Association of University Teachers. We should
15 like to place on record with you our profession's
16 complete endorsement of the principles underlying
17 the recommendations of the C.A.U.T. and at the same
18 time urge you to propose revisions to the Income
19 Tax Act in your report that will remove the
20 existing discrimination against salaried professionals.

21 Yours very truly,

22 J.E. McCannel, P.Ag.,

23 Executive Secretary.

24
25 THE SECRETARY: That is all this morning,
26 Mr. Chairman. Tomorrow morning at 9.30 the Canadian
27 Committee on the Status of Women, and the next
28 following brief the Canadian Federation of University
29 Women.

ROYAL COMMISSION ON TAXATION

Hearing held in the Board of
Transport Commissioners
Hearing Room, Ottawa, Ontario,
on Tuesday, the 28th day of
May, 1963.

COMMISSION:

MR. KENNETH LeM. CARTER -- CHAIRMAN

MR. J. HARVEY PERRY

MR. A. EMILE BEAUVAIS

MR. DONALD G. GRANT

MRS. S. M. MILNE

MR. CHARLES E. S. WALLS

LEGAL ADVISER:

MR. J. L. STEWART, Q.C.

RESEARCH DIRECTOR:

PROF. D. G. HARTLE

SECRETARY:

MR. G. L. BENNETT

ADMINISTRATIVE OFFICER:

MR. A.J. SIM

E R R A T A

ROYAL COMMISSION ON TAXATION

VOLUME NO. 23 - May 17th, 1963. TORONTO, ONTARIO

Page 1624, Lines 8-17 inclusive, should read:

MR. VANDERPLOEG: Mr. Chairman, I was interested in Mr. Stewart's remarks, in reading from the Radcliffe Report, about the effect of FIFO on a rising market acting as a brake on inflation because it creates more taxation and thus leaves business less money to spend unwisely. By the same token, it gives the Government more money, which it doesn't always spend too wisely. No Governments are noted for restraint in spending.

Another point he mentioned was that LIFO was fairly youthful, a fairly callow youth.

Page 1624, Lines 19-27 inclusive, should read:

MR. VANDERPLOEG: He mentioned that the LIFO system was fairly new. It is at least 30 to 40 years old. I daresay there has been more business done in the years since then than was ever done in the years all together before that. For comparison I might mention I read recently that the current U.S. budget envisions more spending than all the U.S. budgets previous, I believe, to the year 1920. While LIFO is youthful in years, it is not youthful in its application in business.

Page 1625, Lines 5-12 inclusive, should read:

MR. VANDERPLOEG: Things change, of course, and new practices have to be evolved to take care of them. I would like to mention, too, that there was a question if there had been a census on LIFO. I believe there was a study some years ago by the U.S. Chartered Accountants' Association, or whatever the name is, which approved LIFO, and it was signed, I believe, by a great many American firms in the States. Perhaps our Chairman will recall that.

Page 1625, Lines 20-30 inclusive and Page 1626, Lines 1-11 inclusive, should read:

MR. VANDERPLOEG: I recall that in our LIFO case in the Exchequer Court one of the Crown witnesses, Mr. Thompson, I believe, was opposed to LIFO - that is, his firm in Canada was opposed but his parent firm in the States was for it.

There is another point I would like to bring up, Maybe this is being a bit vindictive. Appeals to the Privy Council were abolished by Parliament in 1949, September, I believe it was, and Mr. St. Laurent, then Prime Minister, said it was a campaign issue and the country supported it. The Minister of Justice, I think it was Mr. Garson, said appeals to the Privy Council were

1 ERRATA (continued)

2 a touch of colonialism for Canada and should have been
3 abolished long ago. I think the Prime Minister challenged
4 Mr. Drew, then Leader of the Opposition, to say if our
5 Courts and lawyers were not smart enough to deal with
6 Canadian issues. Then, six years later, 1955, the same
7 Government that abolished appeals took our case (which
8 we had won in the Exchequer and Supreme Courts) to the
9 Privy Council. In the intervening years, our lawyers
10 and Courts apparently became less smart instead of smarter.
11 To be sure, there was a hedge when abolishing appeals.
12 Either party could take it to the Privy Council if the
13 case was then under consideration by our Courts. Surely,
14 however, that reservation wasn't to be invoked by the
15 Government which had abolished appeals but was for the
16 benefit of other aggrieved parties.

17 Page 1626, Lines 14-15 inclusive, should read:

18 MR. VANDERPLOEG: I just wanted to make these
19 points. Thank you very much.

---The hearing commenced at 9.30 a.m.

THE CHAIRMAN: Mr. Secretary, shall
we proceed?

THE SECRETARY: Good morning,
Mr. Chairman, Commissioners. We have this morning
representatives here of the Canadian Committee on the
Status of Women. This Committee submitted a brief,
and the group before you this morning is led by
Mrs. W. H. Gilleland, who is chairman. Mrs. Gilleland
will speak to the brief. Mrs. Gilleland will also
introduce her colleagues. I would like to enter this
brief into the record as exhibit No. 86.

---EXHIBIT NO. 86: Brief of the Canadian
Committee on the Status
of Women.

SUBMISSION OF THE
CANADIAN COMMITTEE ON THE
STATUS OF WOMEN

APPEARANCES:

Mrs. W. H. Gilleland, Chairman
Mrs. Frank Flaherty
Mrs. Betty Gordon
Mrs. R. Bishop
Mrs. D. Thom

THE CHAIRMAN: Good morning, ladies.
We have your submission and we have read it with
considerable interest. We would like you to speak
to it if you have anything you would care to say. We
have all read it.

MRS. GILLELAND: Yes.

1 THE CHAIRMAN: You do not need to read
2 it. Would you care to introduce your associates to us?

3 MRS. GILLELAND: Thank you, Mr. Carter.
4 On my extreme right, Mrs. Frank Flaherty, press
5 secretary, Miss Elizabeth Gordon, treasurer; next to me
6 on my left, Mrs. Bishop, recording secretary, and
7 Mrs. Donald Thom, corresponding secretary.

8 In the communications from the Secretary
9 I gathered ~~that~~ you might want us to identify our
10 organization.

11 THE CHAIRMAN: That is right.

12 MRS. GILLELAND: Now, what I have to
13 say, there are four sentences in the opening paragraph
14 and I cannot do it any faster or any shorter than that.
15 Just skipping the first sentence, our attention was first
16 concentrated on arousing in husbands and wives an
17 awareness of the disabilities which widows suffered
18 under the old Dominion Succession Duties Act. To
19 accomplish this we compiled and widely distributed
20 basic information in lay language in the belief that an
21 informed public opinion will compel governments to
22 amend existing out-moded legislation.

23 The overwhelming response and the commen--
24 dation of our educational material from individual
25 women across Canada and from national organizations,
26 both women and men, prodded us into taking this further
27 step: We made a number of written and oral submissions
28 to the Federal Government throughout the progress of the
29 Estate Tax Act from Bill 248 through the replacing bill
30 C-37, and finally made a submission to the Senate

1 Committee on Banking and Commerce in 1958.

2 We feel that we have not only reached
3 the man on the street, but I sometimes think we might
4 far better say the woman on the farm because the
5 correspondence and requests for information that have
6 come in from local Women's Institutes all across
7 Canada have been something that we found incredible,
8 but certainly rewarding and stimulating and encouraging.

9 In our approach to you today we want
10 to state what our approach to you is because this is
11 a little different from the approaches to the Federal
12 Government which we have made in the past, and when I
13 say Federal Government, I mean Federal Liberal and
14 Federal Conservative through the history of the legis-
15 lation. We thought in our approach to the Royal
16 Commission we had to pay attention in our own minds at
17 least to what we have done before and in the method of
18 approach, and in our requests over ten years we have been
19 working on a \$50,000 exemption. This was a detail,
20 and we recognized it, so we are maintaining in our
21 approach to you this detail only and we have moved it
22 from a \$50,000 figure, which has been partly met, of a
23 true exemption; namely, it is \$40,000 now with \$60,000
24 true exemption for widows. We have in true feminine
25 form made the old compromise and we are submitting a
26 figure of \$75,000 as a true exemption.

27 In our minds we know \$50,000 is not enough,
28 and we haven't even got the \$50,000 anyway. We really
29 think it ought to be \$100,000 true exemption, but being
30 women, we have set a middle figure of \$75,000 so this is

1 the figure we are presenting to you this morning as the
2 proper one that our experience tells us and our
3 philosophy tells us also is the one we had better ask
4 for to be reasonable, and also because we think we might
5 get it.

6 All our approaches in the past to Governments
7 have been based on trying to be reasonable and asking only
8 for what we could get. It has also been what we call
9 the whittling approach. You take one thing and you
10 whittle it into shape and you get a little off. In our
11 case it is really a build-up rather than the knife-remove
12 material. Perhaps we have been able to remove through
13 many women's organizations some of the encrustations,
14 or something like that, that have been in Federal legis-
15 lation in the Succession Duty Act.

16 However, in our brief to you we are going
17 to pass this whittling process, and we are presenting
18 two major pieces of what we think is taxation philosophy.
19 Our first point is the \$75,000 true exemption. The
20 second one is the recognition of the women's contribution
21 to the marriage partnership, and I should no doubt read
22 that to have the wording precise, but I am not going
23 to at the present moment. We will get to it later.
24 This is a piece of philosophy that has been presented
25 in briefs to Government even though we did not think
26 we had a hope of reaching through amendments to the
27 Succession Duty Act; even though as far back as
28 Mr. Abbott there was a statement this was to be a major
29 overhaul. We still presented the philosophy of the
30 recognition of the marriage partnership and the

1 contribution of women in it, and that means the money
2 contribution as well as all the other kinds. There
3 was some recognition of this in the Senate Finance
4 Committee, but the climate at that time politically was
5 not suitable for getting very far with the Senate at the
6 time they sat, as between Senate and the House of
7 Commons. That was about 1958.

8 Nevertheless, the Senate is a comparatively
9 detached body, and they did pay attention to this idea,
10 and in our presence the Commissioners debated -- I don't
11 know if "debated" is the right word, but they debated
12 back and forth across, and we were cross-questioned to
13 some point, too, and it was given a good deal of
14 thought, and they apparently did not think it was a crazy
15 idea, let's put it that way.

16 Now, today in our presentation on this
17 philosophical argument which Mrs. Flaherty is going to
18 start with -- that is a good one! -- We feel that since
19 this Commission is going to overhaul the whole philosophy
20 of taxation we have a hope at least of getting this;
21 and our last point on the delay of taxation, those two
22 bits of philosophy will be received we know at least
23 in the thoughtful way as it was in the Senate and we
24 may have a hope of making a dint in the philosophy of
25 taxation in Canada in regards to the Estate Tax Act.

26 Now, with those few confused remarks we
27 will go back to the \$75,000 true exemption, and
28 Mrs. Flaherty is going to present an argument or two.

29 THE CHAIRMAN: Thank you, Mrs. Gilleland,
30 for your expression of confidence in what we can do.

1 MRS. GILLELAND: Thank you.

2 THE CHAIRMAN: Mrs. Flaherty?

3 MRS. FLAHERTY: Mr. Chairman and Members,

4 as you know, the figure of \$50,000 is the top level of
5 estate; all estates under \$50,000 would not be taxed.

6 This figure was set in 1941, and we all know what has
7 happened to the value of money since that time. Yet
8 this is the figure that still remains in the Estate Tax
9 Act as the minimum; any estate over \$50,000 comes into
10 the estate tax picture.

11 We maintain that \$75,000 would be a more
12 realistic figure taking into consideration the inflated
13 value of the dollar and the increase in all other
14 commodities and all other expenses. The administrative
15 costs have become terrific since many more estates now
16 come into the tax picture. The proportion of estates
17 in 1961 between \$50,000 and \$99,000 was 55.71 per cent
18 of the total number of estates that were valued for
19 succession duty purposes.

20 THE CHAIRMAN: The 55.71 per cent is
21 what?

22 MRS. FLAHERTY: That is the percentage
23 of the total number of estates that were valued for
24 taxation, for estate tax purposes. The tax imposed on
25 that number was only 7.7 per cent of the total revenue
26 from estate tax, and in the over-all revenue picture in
27 Canada the succession duty does not loom very large.
28 It comes to about 1.5 per cent of the total revenue.

29 We maintain that a hardship or an impos-
30 ition that brings in so little revenue is out of all

1 proportion to the hardship worked on a great number of
2 people.

3 As I say, our basic argument is that
4 everything is costing more and also administrative costs
5 have gone up. When you have three or four assessors
6 coming in to work on an estate that is just over
7 \$50,000, it becomes a very expensive item.

8 MRS. GILLELAND: We can say too one
9 does not know whether to be angry because you have to
10 pay the Federal tax assessor to assess it or whether
11 to say it is unjust that you should be paying the
12 Provincial assessor whose salary precumably comes out
13 of the taxpayer's pocket.

14 THE CHAIRMAN: I have seen figures of
15 the 55.71 per cent and 7.7 per cent, and the source of
16 those I think is national tax statistics.

17 MRS. GILLELAND: The Dominion Bureau
18 of Statistics.

19 THE CHAIRMAN: And the year is 1961.

20 MRS. FLAHERTY: 1961.

21 MRS. GILLELAND: Now then, Mrs. Gordon
22 will begin on the argument about the recognition of
23 the contribution of the wife to the marriage partnership
24 for estate tax purposes. -- only, I should add.

25 THE CHAIRMAN: Perhaps we might take
26 these one by one. If we have any questions we will
27 ask them as we go along. Do you think that would be easier?

28 MRS. GILLELAND: Yes, all right.
29
30

1 COMMISSIONER MILNE: Shall I address to
2 you the question, Mrs. Gilleland, on the \$75,000 true
3 exemption?

4 MRS. GILLELAND: It doesn't matter.
5 Mrs. Flaherty will answer, and if we do not like her
6 answer, we will add.

7 COMMISSIONER MILNE: It certainly has
8 been drawn to our attention that other professional
9 groups support this principle very thoroughly, the
10 principle that there should be a true basic exemption.
11 The Canadian Institute of Chartered Accountants and the
12 Canadian Bar in their joint submission, through their
13 joint committee, support this principle that there should
14 be a true exemption. Their figure of course is just not
15 a figure other than a true exemption meaning \$60,000.
16 We have some participants who have suggested larger amounts
17 than \$75,000, and some have suggested less than \$75,000.

18 Now, was there something that we could
19 accept as being an indicator as to how you arrive at
20 the appropriate figure to be used? You suggest to us
21 \$75,000 is where you would like to start, yet you also
22 mention that you really feel \$10,000 should be exempt.
23 This latter figure also has been mentioned to us.

24 Would you have something that would indi-
25 cate to what you have geared this?

26 MRS. FLAHERTY: As you know, the cost
27 of living index is based on 1949 figures as 100 per
28 cent, and the cost of living has gone up 30 per cent.
29
30

1 If 1941 figures were taken, it would come to about
2 50 per cent. This is half way between. This is
3 about a 50 per cent increase on the figure that seemed
4 to be logical and did not cause too much excitement
5 in 1941. It seemed in 1941 as if \$50,000 was a reason-
6 able figure.

7 Now, if \$50,000 was a reasonable figure
8 in 1941, it certainly is not a reasonable figure now,
9 and this is an increase of 50 per cent, taking that as
10 an indication of all the increases that have gone on.

11 COMMISSIONER MILNE: Yes. Then very
12 definitely you have geared this to the cost of living?

13 MRS. FLAHERTY: Yes, and the inflated
14 value and the general picture. I mean some things,
15 as you know, have gone up more. Property values are
16 fantastic. You cannot even predict when you leave a
17 house to your wife, or a farm to your wife, how much
18 that is going to amount to in your estate. It may be
19 nothing or it may be \$100,000 -- something for which
20 you paid \$4,000 or \$5,000.

21 MRS. GILLELAND: And also I think we
22 mention in a later connection the impact of pension
23 schemes and capitalization thereof which we do deal
24 with at a later point. It relates to the \$75,000
25 figure too.

26 COMMISSIONER GRANT: Appropriately
27 enough of course you are confining your representations
28 so far as this Commission is concerned to the Estate
29 Tax Act which is a Federal statute. Do I understand
30

1915

1 you have looked into the Ontario Act, and have you made
2 representations or do you intend to make representations

3 --

4 MRS. GILLELAND: Present, past, and
5 future, affirmative. Past, present and future, all
6 affirmative.

7 COMMISSIONER GRANT: What is the latest
8 submission you have made to the Provincial Government?

9 MRS. GILLELAND: Well, the result was
10 in (a) the budget speech in February and (b) \$60,000
11 exemption for widows. This is what we asked for, but
12 we have been at that for about three years in the
13 Provincial field and went to Mr. Frost about three
14 years ago now with a brief and presentation. We have
15 either the famous or infamous green sheet on Provincial
16 succession duties even as we had an infamous at first
17 but later famous blue sheet on Federal Dominion succession
18 duties which just since November has been on an on-
19 request-basis-only distribution through Ontario of
20 over 5,000 sheets. Also a supplementary white
21 memorandum sheet which came out between the budget speech
22 and the Act, the amendment to the Provincial Act,
23 alerting some of our correspondents. We hadn't had a
24 wider coverage because we couldn't afford it. Maybe
25 this announcement in the budget was going to be
26 adequate, but we had better watch for a few things.
27 There is no mention of any across-the-board true
28 exemption which we have of \$40,000 certainly for sure
29

1 COMMISSIONER GRANT: Have you given
2 consideration or made any representations with respect
3 to the dual system of taxation which exists in the
4 Estate Tax and Succession Duty field?

5 MRS. GILLELAND: I will have to say
6 "no" to that. Could I give myself an excuse? When
7 we first started with the Federal, the Ontario --
8 we knew there was no use going to them at that point
9 because this was changing into the Estate Tax Act
10 from Dominion Succession Duty to Estate Tax. That
11 was 1959. Then it took the Ontario government a
12 while to decide they were going to do something.
13 We do try to pay attention to timing in submissions.
14 Could it possibly be that we could get one assessment
15 across Canada, one Estate Tax valuation and one
16 Estate Tax so it would cost the same amount to die,
17 whatever province?

18 COMMISSIONER GRANT: In other words, that
19 is what you favour?

20 MRS. GILLELAND: Yes. Our Committee has
21 discussed this.

22 COMMISSIONER GRANT: You have not
23 included that in your representation.

24 MR. GILLELAND: No, we wish we had.
25 We have in an indirect way. Our green sheet for
26 Ontario under the Succession Duty heading says, "It
27 costs more to die in Ontario". So they know, people
28 in Ontario certainly know it costs more to die in
29 Ontario.

30 COMMISSIONER GRANT: Would you favour

1 Federal legislation with respect to Estate Tax or only
2 Provincial legislation?

3 MRS. GILLELAND: No, we discussed that
4 yesterday afternoon and we favour a Federal tax.
5 There is a reason for that, namely it will be uniform.
6 If the legislation is Federal, just like the Criminal
7 Code, that is Federal and administered by the
8 Provincial Courts, et cetera, et cetera. the same
9 Provincial institutions. Now then, why is it not
10 feasible, and it certainly has been feasible to have
11 the Federal Criminal Code and have it bear a satis-
12 factory relationship to the provinces, surely it is
13 equally feasible and reasonable to have a Federal
14 Estate Tax because it will be an Estate Tax if it is
15 Federal rather than a Succession Duty and that would
16 give this the same uniformity. Have I answered your
17 question or not?

18 COMMISSIONER GRANT: I think when you
19 draw a comparison between the Criminal Code and
20 the Estate Tax Act you must keep in mind, must you
21 not, that one has to do with the administration of
22 law and the other has to do with a taxing statute?

23 MRS. GILLELAND: Excepting in this way --
24 my husband never understands why I think the way I do--
25 there is a parallel in my mind and it is this: As
26 I envisage, and I think as our Committee envisages,
27 the one tax, the Federal would levy it, I assume,
28 but I don't know that the Federal would collect it and
29 that the provinces would spend it.

30 COMMISSIONER BEAUVAIS: Just one question:

1 Your organization is a national one?

2 MRS. GILLELAND: Yes.

3 COMMISSIONER BEAUVAIS: Have you ever
4 made recommendations to the Quebec Government?

5 MRS. GILLELAND: No, not yet but we
6 are only ten years old, you know. There is an
7 organization, I think there is more than one, one
8 of the women's organizations that is working in the
9 Province of Quebec actively. I don't know if they
10 made a representation yet. I don't think they have.
11 It is the Canadian Federation of University Women.
12 The Quebec Section is very active right now and for
13 about three years now particularly, and not just on
14 succession duties but on all the aspects. We also
15 think it is polite to get this done through the
16 province.

17 COMMISSIONER PERRY: I find the idea
18 of increase in exemption quite interesting. I was
19 wondering if you have worked out the arithmetic?

20 MRS. GILLELAND: Not me. I can only add
21 a bridge score. You mean cost-wise to the Government?

22 COMMISSIONER PERRY: The reduction in
23 estate tax that results.

24 MRS. FLAHERTY: It is a very small
25 proportion of the revenue. It would be a loss of
26 revenue of about one and one-half per cent of the amount
27 collected from succession duties.

28 COMMISSIONER PERRY: I was trying to
29 assess the real concern of women here in facing
30 estate tax. Obviously they are all concerned. The fact

1 is at \$75,000 the savings from increase and exemption
2 would be \$1,800 and at \$100,000 it would be \$2,700.
3 Are these the kind of amounts that concern you? They
4 are not relatively large amounts.

5 MR. FLAHERTY: What we are concerned
6 with is so many estates would not be taxed. There
7 would be no tax on 55 per cent of estates that are
8 now taxed, they would pay none. These are border-
9 line estates, you know. You know how the value can
10 come to \$50,000 before you turn around. You have
11 a house, a car, a pension. There is the \$50,000,
12 especially when the pension is capitalized. Today
13 pensions are becoming part of the work pattern.
14 All the advertisements you read in the paper mention
15 pension plans. Now they are bringing in portable
16 pensions and everyone, nearly everyone, is eventually
17 going to be involved in the pension. People are
18 floored when this pension is capitalized. Many women
19 don't know this is going to happen to them. They
20 think they have a small estate and the next thing you
21 know there is this hefty lump.

22 COMMISSIONER PERRY: Is it the element
23 of surprise or the financial burden you are concerned
24 with?

25 MRS. BISHOP: I think the element of
26 surprise has a good deal to do with it.

27 MRS. FLAHERTY: When these estates are
28 being valued for taxation purposes the husband is gone.
29 He set up his will presumably to protect his wife and
30 children. He may not have thought -- nobody knows how

1 old they are going to be when they die or how old
2 their wife is going to be when they die. This is
3 a figure that they cannot put into their thinking
4 when they are setting up the will. It depends on
5 the age of the wife at the time of her husband's death
6 because there is no account taken of whether she comes
7 from a short-lived or long-lived family. Her age
8 is set up by the life expectancy table.

9 COMMISSIONER PERRY: I am not trying to
10 put words in your mouth or ideas in your mind but
11 is it rather the emotional upset and the fact that
12 the wife is completely unprepared for this?

13 MRS. FLAHERTY: It is the financial
14 burden. It could happen when the children are ready
15 for college and having to pay the Estate Tax within
16 six months, a lump sum, it could be quite a burden
17 if there are no liquid assets.

18 COMMISSIONER PERRY: The liquidity
19 problem is something else again.

20 MRS. GILLELAND: We have covered that.
21 You know what we think about the liquid assets, it
22 is on page 6, the lack of them. I don't see how a
23 middle-sized estate, somewhere between \$60,000 and
24 \$75,000, can make any suitable provision of liquid
25 assets. Our argument is certainly set forth there.
26 That is exactly what we think.

27 " If the husband dies early, liquid assets
28 will not be needed to pay estate tax
29 because the estate will not have reached
30 a taxable aggregate; if he lives to middle

1 " life, a growing business requires all
2 available capital to keep it growing into
3 a taxable estate (or, as the married couple
4 think of it, one that will keep them through
5 their retirement years). For many years
6 the first call on liquid assets must be
7 provision for the education of the children.
8 His pension, if he has one, will provide a
9 basic subsistence allowance for the couple,
10 and later for the widow; --"

11 That is the way they think of it. They
12 don't visualize the capitalization program. They
13 think about that pension in terms of a basic security.
14 Now we have had not just scores but hundreds of women,
15 widows who have told us of the surprises that came
16 to them in the capitalization of the pension which
17 made their estate taxable and the fact that not only
18 do you have to pay it in six months' time -- there
19 is the horror story you told me yesterday afternoon,
20 Mrs. Bishop. Mrs. Bishop is a widow and went through
21 this. You have to pay it in six months but maybe
22 it is not settled in six months. You have to pay the
23 interest and pay to get the provincial assessment of
24 \$20,000. Will you tell us the story about this,
25 Mrs. Bishop?

26 COMMISSIONER PERRY: Perhaps we could
27 spare Mrs. Bishop the story.

28 MRS. BISHOP: As a matter of fact the
29 reason I am on the committee is I went through it all
30 and I felt that anything I could do in any way to

1 alleviate this situation and keep other people from
2 having to go through it I will be very glad to do.
3 It was entirely a surprise to me. My husband thought
4 he was leaving everything in very good shape for me.
5 My estate was just small. He didn't take into
6 consideration at the time, he had been ill, the
7 capitalization of the pension. When it came up I
8 must say the Dominion Government were very fair.
9 We had to act under the law.

10 They had an assessor come and assess
11 the estate, which they do, which I paid for. You
12 pay for the assessor to do the work. My son is a
13 chartered accountant and he had all the assets and
14 everything in detail and he handed them to the lawyer.
15 The lawyer said they would get in touch with the
16 Provincial Government.

17 The Provincial Government said, "We
18 will send an assessor". We said, "The Dominion
19 Government has accepted the assessment. It is here
20 in Ottawa". They said, "No, it will not do. We
21 will have to send our own assessor". After four
22 months they sent their assessor down with the tape
23 measure and he measured everything fore and aft and
24 went to Toronto and raised the estate by \$20,000.

25 Then I spoke to my lawyer and he said,
26 "We will just protest that." I said, "I don't know
27 about protesting, that costs money". As you know,
28 legal fees in connection with it are not small. So
29 my son went to Toronto and when he went to see the
30 man in Toronto the man said, "It may be a little bit

1 high. We always like to err on the right side. We
2 sort of expect these protests to come in."

3 That seemed to me the very last thing to
4 have an official who is supposed to be efficient come
5 down and create a situation in which it was going to
6 cost more money. You get so worried having to pay
7 for this and that. They did reduce it some but not
8 altogether, about \$10,000. Eventually we got
9 everything ready to be paid and was paid and in six
10 months all the succession duties and everything were
11 clear.

12 What I feel very keenly about is that
13 there is an awful lot of administration that might
14 be simplified.

15 THE CHAIRMAN: I don't understand
16 what the payment was you made in respect of the
17 assessor. Was it travelling expenses?

18 MRS. BISHOP: Yes. When they ask
19 to have the estate assessed you engage an assessor
20 to assess your estate. In this case it was in Ottawa,
21 Mr. Ross, who is dead now. He makes a charge to
22 you for assessing the estate and you pay it.

23 THE CHAIRMAN: This is evaluating the
24 property?

25 MRS. BISHOP: Yes, the realty.

26 COMMISSIONER GRANT: Was that what is
27 sometimes called an appraiser's fee as distinct from
28 an assessor's fee?

29 MRS. BISHOP: Yes, I think that is the
30 appraiser's fee.

1 COMMISSIONER GRANT: That is an Estate
2 matter, not anything arising out of the Succession
3 Duty Act or the Estate Tax Act. The Government
4 provides assessors but at no charge to the estate.

5 MRS. BISHOP: The Government assessor
6 does not put any charge on the estate.

7 COMMISSIONER PERRY: The appraiser is
8 not an official.

9 MRS. BISHOP; No. Your Ontario
10 assessor is a Government official.

11 COMMISSIONER PERRY: Is this the man
12 you paid?

13 MRS. BISHOP: No, the man I paid is the
14 man in Ottawa.

15 COMMISSIONER PERRY: A man in the
16 business of making appraisals?

17 MRS. GILLELAND: Yes, but you have to
18 pay that.

19 MRS. BISHOP: The lawyer suggested that
20 this was the procedure. I don't know why.

21 THE CHAIRMAN: You did fairly well to
22 get the estate settled in six months.

23 MRS. BISHOP: Yes, ordinarily it goes
24 on and you have to pay added expenses in getting
25 it fixed up. It just happened that we had some money
26 we intended to do something else with but it was not
27 there to do it with after the Succession Duties
28 were paid.

29 MRS. GILLELAND: We really don't have
30 to take this brief point by point. We are covering

1 the points relating one to another.

2 THE CHAIRMAN: I think that is the best
3 way to do it. I am quite happy. You were about to
4 change the subject and we moved on to page 6.

5 MRS. GILLELAND: Before I get to page
6 6 I would like to go back to page 5.

7 THE CHAIRMAN: You lead us, Mrs. Gilleland.

8 MRS. GILLELAND: This point on page 5
9 in paragraph 11 is headed, Delay in Collection with
10 Estate Taxes. We are asking that there should be
11 no collection of estate taxes on a married couple's
12 estate or estates -- I don't know whether to use the
13 singular or plural there -- until both spouses are
14 dead. Now hundreds of times literally -- this is
15 not a rough figure at all -- hundreds of times we
16 have had this argument about the Government has no
17 right to tax that estate until the wife is through with
18 it or vice versa.

19 I know it is a brand new idea -- I guess
20 I won't finish that sentence. We have had it sub-
21 mitted to us by widows who, of course, cannot benefit
22 it by future changes in the law. They are the people
23 who have brought it to our attention.

24 I don't think of it. My husband is
25 still earning and as long as this is going on you
26 are never going to think about this at all. You just
27 think it is always going on the same way until your
28 friends -- and you get into a Committee like this and
29 people come to you and tell you what has happened.

30 Now I am literally saying that hundreds of

1 widows have come to one or other of this small exe-
2 cutive group and made this statement. You know,
3 the very first time I heard it I thought, "Oh, yes,
4 that would be nice. Maybe there is something in it".
5 That is as far as the idea got with me because it
6 seemed too remote kind of thinking. When I have had
7 it hammered at me over and over, this resentment,
8 we begin to see this is a pretty reasonable thing
9 and in this case we are moving to the philosophical
10 approach, I don't know any better word than that,
11 of what constitutes proper and reasonable kind of
12 taxation. Now here is capital removed without
13 benefit. Now I know there are implications in
14 implementing this.

15 COMMISSIONER WALLS: There is one thing
16 that quite puzzles me. I can understand the
17 sentiment behind it but what about if they remarry?
18 When does the estate stop?

19
20 --

21
22
23 --

24
25
26
27 --

1928

1 I even worked out an extreme example where it
2 would never stop. In other words, if a man age
3 thirty is married and at age seventy his wife died
4 or is divorced from him, he remarried a woman of thirty
5 and lived another five years and died, and she married
6 a husband the same age as herself and then he lived
7 to seventy and went through the same process either
8 divorcing his wife or his wife dying, this could go
9 on ad infinitum and the estate would never be settled.

10 The thing that bothers me, and I know
11 that is an extreme case, but it would be possible
12 literally for an estate never to be settled. What
13 is the answer to that one?

14 MRS. BISHOP: The answer to that one
15 is there are hundreds of thousands of widows in the
16 other category against your special case that you
17 build up, and why penalize the hundreds of thousands
18 for the sake of one? Any law should benefit the
19 greater number. I grant you that there are specific
20 cases, but ordinarily the husband and wife have worked
21 together, they have earned or cared for what they have
22 in order that they may have something in their declining
23 years. If a wife dies first and the estate belongs
24 to them both, if there is a pension it comes in; they
25 have their home and the husband is able to continue
26 like he did before without any change whatsoever.

27 However, if the husband dies first his
28 wife is immediately confronted with (1) succession dues,
29
30

1 and (2) half the pension, and these have to be
2 settled right away, and if there are not any liquid
3 assets -- and it is at a time when she is really grieved
4 and has no protection and ordinarily it is in her
5 later years. She has to reduce her way of life; she
6 has to confront all these legal aspects of settling
7 up of the estate, and why not make it that the govern-
8 ment doesn't take any taxes out of the estate until
9 such time as they are both through with it?

10 COMMISSIONER WALLS: Would you give
11 consideration to the fact that the government required
12 settlement of the estate if the survivor remarried?
13 That might be the solution to this. If the survivor
14 remarried the government steps in?

15 MRS. BISHOP: I think there could be
16 some clause put in that could perhaps care for that
17 situation, but why penalize, as I said before, the
18 hundreds of thousands of people who really suffer?
19 I know dozens and dozens of my own personal friends,
20 widows who have gone through this over and over and over
21 again, and it is not funny. It really is not.

22 I do think it is unfair to have the two
23 situations of handling it; the widow who is really
24 perhaps not capable unless she has some help of going
25 through this, just because she is a woman that she should
26 be penalized whereas on the other hand if her husband
27 survives he is able to carry on his way of life.

28 Sometimes people who have a home and
29
30

1930

1 half a pension are unable to live in that home because
2 they have not enough income to carry on and live in it.
3 The Government says right away you have to pay your
4 succession dues, and if they did, they would not have
5 bread and butter -- if they wanted to live in their
6 home they would not have bread and butter for about two
7 years.

8 MRS. GILLELAND: We know of a specific
9 case where this was so, and it was a deputy minister's
10 wife.

11 THE CHAIRMAN: Would you not think
12 in most cases the husband would leave the use of the
13 estate to his wife? Of course I suppose what you
14 propose would accomplish that result without having
15 to conform to that part of the law which he may not
16 understand.

17 MRS. BISHOP: You mean when the use
18 of the estate is left to the wife there is no succession
19 dues?

20 THE CHAIRMAN: It is placed in trust with
21 the estate passing down to his heirs in the next gener-
22 ation.

23 MRS. BISHOP: Yes.

24 MRS. FLAHERTY: We do not presume to
25 tell the husband how he should leave his estate. Many
26 husbands feel that the wife has made a contribution
27 and she is the one who should benefit from the estate
28 that they have built up over the years. The children
29
30

1 are out earning their own money and the wife has the
2 first claim.

3 THE CHAIRMAN: It is an interesting
4 thought indeed.

5 MRS. FLAHERTY: And to answer
6 Mr. Wall's extreme case, all the time this marriage
7 and divorce and remarriage was taking place, money is
8 being spent in the country; income tax is being paid
9 and sales tax is being paid. There is revenue from
10 that money although it may not be in the specific
11 category of estate tax, yet the revenue from that
12 money is not completely lost to the government.

13 The revenue, as I have pointed out, from
14 the estate tax is so small in the revenue picture that
15 the loss of that specific amount that you are discussing
16 would not show anywhere.

17 MRS. BISHOP: Another thing I would like
18 to say is ordinarily it is not such a long time between
19 the time -- perhaps it may be some years --- before the
20 government would collect the succession dues, we will
21 say, when the wife dies, and that if they feel they
22 should have the succession dues then, why not raise
23 the rate, and when they do get it, it would easily make
24 up for it, and it would pass on, because the people
25 who would inherit it, perhaps they have had no part in
26 either earning or caring for it.

27 I have two sons which agree with me
28 entirely on this. That is all I can say. They feel
29
30

1932

1 this very keenly, that the father and mother who have
2 had this should both have the use of it until they are
3 both through with it, and then if the Government wants
4 to collect the succession dues or duties, raise the
5 rate of the tax which would equal it off.

6 COMMISSIONER GRANT: To put this
7 proposal that you are now urging in its proper perspective,
8 would you agree that your reason for wishing to defer
9 the tax on one-half of the estate until the death of
10 the surviving spouse is that the tax which would be
11 paid to the Government at the time of the death of the
12 husband, let us say --

13 MRS. BISHOP: Yes, that is what we are
14 dealing with.

15 COMMISSIONER GRANT: That money would
16 be retained in the estate and be available to the
17 widow either by way of income or by way of principal
18 or both? Am I correct?

19 MRS. BISHOP: You mean that the estate
20 should not change? She would really not have access
21 to the principal?

22 COMMISSIONER GRANT: No, no. What I
23 am saying is this: In urging that one-half of the
24 estate be the property of the surviving spouse and
25 not taxed until the death of that spouse, your reason for
26 that is to conserve in the estate the amount of the tax
27 that would be paid if it were paid at the death
28 of the first spouse?

1 MRS. BISHOP: Yes, I think so because
2 after all I do not think it belongs to the Government
3 until such time as they are both through with it.

4 COMMISSIONER GRANT: In urging that
5 one-half of the estate should be regarded as being
6 owned by the surviving spouse and not taxed, then the
7 only advantage -- and I do not minimize it -- but the
8 only advantage to the estate is that you are getting
9 the use during the lifetime of the surviving spouse
10 of the money that would have been paid in tax?

11 MRS. BISHOP: Yes.

12 COMMISSIONER GRANT: Therefore, do
13 you differentiate between the size of estates? For
14 instance, if a person left a one million dollar
15 estate, would you say that on five hundred thousand
16 of that, the tax should be deferred until the death
17 of the surviving spouse?

18 MRS. BISHOP: I think what should apply
19 to one should apply to the other regardless of the size
20 of the estate.

21 COMMISSIONER GRANT: Or do you
22 differentiate as to the need? You do not differentiate?

23 MRS. BISHOP: Well, no, I really believe
24 in the principle of it. I think the principle is that
25 what the husband has the country does not claim until he
26 dies, and that in a true marriage the country should
27 not claim the money until the wife is dead because I
28 do not think it belongs to the Government until such
29
30

1934

1 time as they are both through with it. You are
2 immediately making a difference between the husband
3 and the wife, between a man and a woman, let us say
4 that.

5 COMMISSIONER GRANT: Let me explore it
6 a little further.

7 MRS. BISHOP: Yes, I am glad to have
8 you do it.

9 COMMISSIONER GRANT: I note this is a
10 very important part of your brief, and I think you lay
11 great emphasis upon it.

12 MRS. BISHOP: I do personally because
13 I have experienced it. I find, just as Mrs. Gilleland
14 says, until you experience these things you are not
15 aware of them, and letters we have had from all across
16 Canada about the hardships that widows have gone through
17 all across Canada in settling the estate and what they
18 have had to give up.

19 I can speak especially about the farm
20 women on farms in the west. They were just coming in
21 hundreds from the people there; what they have gone
22 through. They never even thought about it, but it
23 does not take much of a farm and all the machinery and
24 animals to build up over \$50,000.

25 Now, in order to pay that tax sometimes
26 they have had to sell -- they have written in and said
27 that they had to sell machinery that produced their
28 income in order to pay their Government taxes. Animals
29
30

1 had to be sold. The estate has to go down. And here
2 she is in her declining years. I mean with the
3 financial set-up --- emotionally what she goes through
4 is most pathetic.

5 COMMISSIONER GRANT: You are urging
6 that the exemption be raised. You are also urging that
7 one-half of the value of the estate be regarded for
8 taxation purposes as owned by the surviving spouse.
9 If the exemption were raised to, say, \$100,000, would
10 you feel that you would press this second point to the
11 same extent?

12 MRS. BISHOP: I think that a person who
13 has been used to living on, let us say, \$100,000, is
14 just as much entitled to go on living as she has been
15 living up to that time. If they have to reduce her
16 living to just a substance just because that is there
17 --- I think the principle applies just the same.

18 COMMISSIONER GRANT: Do you think
19 there should be any security taken for this deferred
20 tax?

21 MRS. GILLELAND: In leaving the money
22 in escrow, is that the idea?

23 COMMISSIONER GRANT: Say that the tax
24 on one-half of the value of the estate was estimated
25 to be \$5,000 at the death of one spouse, do you think
26 there should be any security? The assets might
27 become dissipated entirely by the time of the death of
28 the surviving spouse.
29
30

1936

1 MRS. GILLELAND: Do you mean this
2 \$5,000 tax would be reserved? A reserve fund but that
3 the widow would have four and a half or five per cent
4 or five and a half per cent or whatever the going rate
5 of money is as part of her income?

6 COMMISSIONER GRANT: The tax would
7 not be taken out of the estate.

8 MRS. GILLELAND: It is for her use.

9 COMMISSIONER GRANT: But there would
10 be some principal --

11 MRS. BISHOP: Yes, I think that would be
12 quite fair. That would be quite fair. Whatever the
13 hardship is in most of the correspondence, the great
14 hardship is making up that payment of succession dues
15 at a time when there is not that asset there to do it.
16 It has to be taken out of something that she should
17 have the income from until she is through with it.

18 COMMISSIONER GRANT: I would venture
19 to state that many people in planning their estates
20 take care of that situation.

21 MRS. BISHOP: They do that with insurance.
22 In insurance in some cases, or at least in a great
23 many cases they do, and I do think that men do provide
24 that way. Of course they have had to pay for it
25 during their lifetime, but that is one of the things
26 they do.

27 However, when I say that a great many
28 people do not realize it, I do think that people are
29 very much more conscious now of what succession dues
30

1 mean than they have been in the past.

2 COMMISSIONER GRANT: Then you are aware
3 no doubt of the provisions of the Income Tax Act
4 which will permit under the gift tax provision of the
5 Income Tax Act --

6 MRS. BISHOP: \$10,000 can be given
7 without any taxes during the life, yes, I am aware
8 of that.

9 MRS. GILLELAND: Once.

10 MRS. BISHOP: Yes.

11 COMMISSIONER GRANT: And that applies
12 to farmers as well as others.

13 MRS. BISHOP: Yes, but I am speaking
14 now of the Exhibition where farmers come in and ask
15 again and again and again for these blue sheets, and
16 they were astounded. They couldn't understand that
17 this was really the law, and they went home with a very
18 inquiring mind into the situation, and heartily agreed
19 that it should be a joint partnership.

20
21 MRS. GILLELAND: May I say, Messrs. Com-
22 missioners, that whatever safeguards would be appropriate
23 for the collection of the necessary amount of tax --
24 I will go back -- that the necessary safeguards for
25 that established by regulation in amendments or drafts,
26 that is fine, providing the principles that we are
27 after in relation to the recognition of the wife's
28 contribution to the total estate, in so far as that is
29 implemented, then we are going to be more than satis-
30 fied women because at the moment we consider that on

1938

1 the death of the husband the widow becomes a sort of
2 second-class citizen.

3 Things are taken from her that we think
4 the Government has no right to take. These are things
5 that she has helped to acquire. This is the basis
6 of this. Now, take all the safeguards that are
7 necessary to get the tax paid eventually, but it should
8 not be so -- I don't care if it is \$1000 of tax -- it
9 makes no difference to the principle or whether it is
10 \$5000 or \$10,000 that is taken.

11 THE CHAIRMAN: There is one point I
12 do not quite understand; when is the amount of an
13 estate determined? Do you mean it would be determined
14 upon the death of the first spouse or on the death of
15 the second spouse? You have suggested that whatever
16 is left is for the benefit of both partners to the
17 marriage, and if that is the case, should the
18 surviving partner who is entitled to the asset in that
19 estate be at liberty to spend the entire estate or
20 should the surviving partner --

21 MRS. GILLELAND: From the standpoint of
22 what is right morally, as far as we are concerned,
23 practically speaking I do not care if she goes to
24 Hawaii. I don't care if she puts it down the drain;
25 it is hers. She has helped to gather it. That is a
26 foolish thing I have said, and she is not going to
27 do it. It wouldn't make sense. After all, women
28 are sensible people too, by and large, but from a
29
30

1 practical point of view I will answer you in a very
2 different way and say that I can see very well that the
3 preservation of half of the estate in order to make
4 sure a taxable specific amount -- her half is her half
5 and I am going to spend mine as I like or save it. I
6 am a saving kind of person so I am going to save it.

7 THE CHAIRMAN: I understand your
8 point.

9 MRS. GILLELAND: Does this make it
10 that this is a reasonable thing from a taxation point
11 of view to have a sum established at the time of the
12 death of the husband and base taxation on that but
13 don't remove the money from the estate so that the
14 capital will not be removed from the estate and it
15 will be available for the use of the wife.

16 COMMISSIONER GRANT: You are assuming,
17 I believe, that if for taxation purposes the wife
18 would be regarded as the owner of one-half of the estate,
19 you are assuming that that is in accordance with the
20 husband's wishes although it may not be.

21 Have you given consideration to this in
22 the stand which you are taking: Should the husband provide
23 the widow he leaves with something less than she would
24 get if she owned one-half of the estate?

25 MRS. GILLELAND: Yes, we have, and we
26 still know very well that it is every person's right
27 to make their will as they wish, and if there are a
28 few ornery husbands who do not want to leave their wife
29
30

1940

1 a penny, then the widows will take recourse to the law,
2 for what it is worth, and so on.

3 However, as for setting up legislation
4 within the Estate Tax Act that would prevent a man or
5 women from making a will in the way they like, I do
6 not think there is anything sensible about that. We
7 are not asking that. You must preserve the individual
8 right of a man or woman to make a will any way he or
9 she sees fit.

10 COMMISSIONER GRANT: I am glad to hear
11 you say that because to rule otherwise by statute
12 would be violating one of the most basic principles.

13 MRS. GILLELAND: Yes, and violating
14 what is right, a civil right; you would be denying a
15 civil right.

16 COMMISSIONER GRANT: And in the establish-
17 ment of a trust, it must be honoured, and it must be
18 maintained provided it is within the law.

19 MRS. FLAHERTY: In our submission at
20 the bottom of page 2 we say:

21 "We submit that one--half of a deceased marriage
22 partner's estate should, if it passes to the
23 surviving partner, be considered for tax
24 purposes, as earned by the surviving partner,
25 and not therefore subject to estate taxation."

26 COMMISSIONER GRANT: If it passes.

27 MRS. FLAHERTY: Yes, if it passes.

28 MRS. GILLELAND: That is the key phrase.
29
30

1941

1 COMMISSIONER GRANT: Now, the estate
2 does not pass if you base it on a life interest.

3 MRS. BISHOP: No, that is right.

4 COMMISSIONER GRANT: And today I
5 suggest that the vast majority of wills restrict the
6 gift to life interest with the right to withdraw on
7 principal.

8 MRS. BISHOP: Yes, I think so too.

9 COMMISSIONER GRANT: In that case your
10 submission would not apply?

11 MRS. GILLELAND: No. We only ask
12 that it apply in cases where it can apply, and in time
13 if lawyers make husbands' and wives' wills differently,
14 more will benefit by the new legislation that embodies
15 the principle we are asking for. If it only benefits
16 less than half now, the principle is established,
17 and then the course of how wills are made will take
18 their course.

19 MRS. THOM: The main reason for having
20 a life interest is, I think, to get around the Estate
21 Tax Act. If this is removed, that won't happen so
22 often; if there is a method of passing half the estate
23 to the wife.

24 COMMISSIONER GRANT: It certainly is
25 a factor in having a will drawn that way. Whether
26 it is the main factor or not is another question.
27 The main factor might be that the husband says, "Well,
28 I do not think I want to give my estate outright to
29
30

1942

1 my wife," regardless of tax considerations.

2 MRS. THOM: I do not think that is the
3 modern view of the younger generation, for I can speak
4 for that, and I feel a lot of them speak of the
5 co-operative movement, and I know when I was working
6 we didn't think of it as my money or my husband's money.
7 We thought of it as our money, and we did not arrange
8 our estate or the small estate we have at the moment
9 in terms of his and hers. It is all ours. But that
10 would hurt me more than it would hurt him if he died.

11 MRS. BISHOP: I haven't anything to
12 say as far as a will is concerned. My husband left
13 everything to me outright without any tags to it at all.
14 I mean I haven't a grudge, don't think, or anything
15 like that. But even with the simplest way of
16 distribution, which could not be any simpler, there
17 were still all these complications that came up. I
18 do not think I was more sensitive about it than the
19 great majority of women have been who have gone through
20 it. For that first year when you are going through a
21 very trying time.

22 COMMISSIONER PERRY: I was wondering
23 if I might ask one more question. I am frankly
24 confused by what I regard as your second and third
25 proposals; one being only half of the estate passing
26 on the death of the husband and the other being none
27 of it passing on the death of the husband. Is there
28 any distinction between the circumstances which they
29
30

ANGUS, STONEHOUSE & CO. LTD.
TORONTO, ONTARIO

1943

1 would apply to?

2 MRS. GILLELAND: No.

3 COMMISSIONER PERRY: Or is one of

4 those better than the other?

1944

1 MRS. GILLELAND: I will put it this
2 way: Our last point is an advanced philosophy. Let
3 us put it that way.

4 COMMISSIONER PERRY: May I tell you in
5 fact it is not?

6 MRS. GILLELAND: For us it is.

7 COMMISSIONER PERRY: The original concept
8 was it should be a tax on passage of property between
9 generations. In England, for example, it was the
10 duty that the Crown levied on passage of an estate
11 from the father to the oldest son. The thing that
12 is new is the tax on passage of property between
13 people in the same generation. Historically you
14 are on pretty firm ground whether this will help
15 you or not.

16 MRS. GILLELAND: We are glad to know
17 that historically we are sound. As far as we are
18 concerned the proposals to which you have just referred
19 would solve everything that went before. As far as
20 married women we are still under the \$75,000 true
21 exemption. To use the short identification words,
22 "half" and "delete" then in a way they are related for
23 the simple reason if that half is established the tax --
24 I don't think you can get No. 3 to delete without
25 some action for point 2. If half the estate is
26 regarded as belonging to the wife the tax is set on
27 the husband's estate assuming he dies first and then
28 valuation of tax can be set at that point and it would
29 be half the estate, so in a way there is a relation
30 between 2 and 3.

1 COMMLSSIONER PERRY: The husband's half
2 would be evaluated?

3 MRS. GILLELAND: Yes. I don't think
4 we can present 3 without presenting 2.

5 COMMISSIONER PERRY: I would disagree.
6 I would present 3 on its own merits.

7 MRS. GILLELAND: We don't mind doing it
8 that way. We don't mind at all.

9 COMMISSIONER WALLS: Other people call
10 it the thin edge of the wedge!

11 MRS. GILLELAND: This Estate Tax Act,
12 as it now stands, at the moment of the husband's
13 death when he predeceases his wife it demotes the
14 widow economically and psychologically and a set
15 of measurements for the value of the wife are used in
16 calculating that estate that never in the life of the
17 husband had been used by him in his evaluation of his
18 wife nor in reverse, her of him, nor their opinions
19 of what is his and hers and ours, nor in the family.
20 The wife and mother has had a status during the life
21 of her husband that she loses the minute an estate
22 begins to be administered. This is the principle that
23 we object to and object to emotionally certainly but
24 also we have good solid grounds outside of the emotional.

25 THE CHAIRMAN: Thank you very much.
26 You have given us a great deal to think of. This has
27 been most interesting and stimulating and we will
28 continue to think about it, I assure you.

29 MRS. GILLELAND: Thank you very much.

30 MRS. THOM: That is all we can ask.

1946

---A short recess.

THE CHAIRMAN: Are we ready?

THE ADMINISTRATIVE OFFICER: Mr. Chairman, on February 18, 1963 the Commission received a brief from the Canadian Federation of University Women. The Federation is represented here this morning by Mrs. M.J. Sabia, Vice-President, Central Canada. Mrs. Sabia will introduce her associates and speak to the brief, which I would like to enter as Exhibit No. 87.

---EXHIBIT NO. 87: Brief of the Canadian Federation of University Women

SUBMISSION OF THE
CANADIAN FEDERATION OF UNIVERSITY
WOMEN

APPEARANCES:

Mrs. M.J. Sabia,	St. Catharines.
Mrs. S. Tench,	Ottawa
Mrs. W.R. McClelland,	Ottawa.
Mrs. R. Orange,	Sudbury.
Mrs. Frank Flaherty,	Ottawa.

THE CHAIRMAN: Thank you. Good day, Mrs. Sabia. Before getting into your brief would you be so kind as to introduce your associates? We would also like to know more about your Federation. I note here that you have 107 member organizations. I was not very clear what a member organization is. Would you tell us more about it?

1 MRS. SABIA: Thank you, Mr.Chairman.
2 We appreciate the privilege of coming to the Royal
3 Commission to present this brief to you.

4 Our Federation, as is stated here in
5 this brief, has 107 clubs throughout Canada. There
6 are clubs from Atlantic to Pacific, the greatest
7 number being in the Province of Ontario, some 60 clubs,
8 and the remainder in the rest of Canada.

9 We represent somewhere over 10,000
10 graduates of universities who are extremely interested
11 in public affairs, education, and various facets of
12 our economic life.

13 Now there is not any doubt that when
14 talking of taxation that it is rather difficult to
15 be too certain, to be too emphatic about anything.
16 Taxation is a vast problem. It is a powerful instru-
17 ment in the hands of Government to control and
18 manipulate our Canadian economy. There are not fast
19 rules and we don't pretend to have any fast, clear,
20 and concise recommendations. These are flexible ones.
21 They are recommendations that we have talked about
22 in our clubs, that we have considered and that we have
23 studied. They are not the answer nor the end to
24 taxation.

25 In the past few years there has been a
26 growing awareness, I think, among women, among men,
27 among all Canadian citizens of the rather crippling
28 and confiscatory level of taxation in Canada and the
29 damage it does have to our Canadian economy in this
30 vast country of tremendous expanse and very few people.

1948

1 In looking at this we realize it applies to all levels
2 of taxation and not only the ones we ourselves are
3 interested in. We are interested in the level of
4 taxation that hampers the ability of Canadians to
5 invest in their own economy and country because of
6 personal income tax and estate taxes.

7 Now we have limited ourselves today to
8 a few specific facts. As I said before they might not
9 be the answer. We realize the Royal Commission
10 was set up to look into all facets of taxation.
11 Perhaps a whole new thinking, a broad new thinking
12 should be looked at rather than a specific type of
13 change or amendments to amendments. We have had
14 so many amendments to amendments, which has increased the
15 horrendous taxation that we have, crippling as it
16 may be.

17 Now I am just going to give you specifi-
18 cally the three points of personal income tax and
19 the three points of estate tax rather briefly and I
20 shall ask the women on the panel to speak to them.

21 On my left I have Mrs. Orange from
22 Sudbury. On my right there is Mrs. Tench of Ottawa
23 and next to her Mrs. McClelland of Ottawa and next
24 to her, you have already met Mrs. Flaherty of Ottawa.
25 All of us have worked on this brief on taxation.

26 We have three points in personal income
27 tax. First, the wife who is only allowed to earn
28 \$250 before exemption is taken off her husband's
29 allowance for her. We would wish or feel that she
30 should be allowed at least \$950 that the child is

1 allowed, or the son or daughter or other dependent is
2 allowed to earn. This is certainly just asking for
3 a certain amount of equity, be that as it may.

4 Secondly, in personal income tax we
5 would mention the discrimination against the employed
6 spouse. That is the woman who is working either for
7 her husband in a small business, for a professional
8 man, a small salesman, or this kind of person who
9 works with her husband and is not allowed to take
10 that as a legitimate expense. This is something that
11 is discriminatory against women and we feel something
12 should be done about it.

13 Now the third thing on the personal
14 income tax is that a deduction be allowed for salary
15 paid to a housekeeper when both people in the home
16 are working or when one is working and there is someone
17 else in the home. We feel this is a legitimate
18 expense. More and more women are moving into the
19 labour force today. Twenty per cent of the married
20 women are working and we feel that some relief
21 certainly should be given to them if they must employ
22 someone to look after the children or other dependents,
23 be they old parents or sick brothers or sisters. These
24 are the three in the personal income tax bracket.

25 Now in the Estate Tax we also have three.
26 Sometimes we have wondered about this, I must admit,
27 but nevertheless we have worked on it and talked about
28 it and that is the true exemption of \$50,000 on all
29 estates rather than the \$40,000 granted today. All
30 estates are allowed \$40,000 and \$60,000 where there is

1950

1 a widow. We are asking that all estates be exempted
2 \$50,000. We are also asking, again this is a
3 contentious issue, we would prefer to have a true
4 exemption of \$100,000 and not worry about the equity
5 in the marriage partnership. We bring it forward
6 because it is discriminatory against women. We
7 do feel there ought to be some kind of equity in
8 recognition of the marriage partnership. Again I
9 think we would prefer exemption, if this is possible.
10 We realize this could be manipulated in many ways
11 and we give it to you as our feeling, as our study.

12 The third is the exemption of pension
13 benefits from estate taxation. This is a very
14 important item because you know men today are
15 providing superannuation or providing pensions,
16 Government annuities, whatever they may be, for
17 a wife and then suddenly she finds it is taxed on
18 her life expectancy. This is again discriminatory.
19 We feel that money that has not actually been
20 received should not be taxed and this we lay great
21 emphasis upon.

22 To start the ball rolling I would like
23 to ask Mrs. Tench to speak about the discrimination
24 against wives as dependents. Would you briefly
25 state the facts?

26 MRS. TENCH: I think Mrs. Sabia has
27 made it clear already what the discrimination is.
28 On the income tax form it is quite clear that any
29
30

1 dependent, son, daughter, father, mother or any
2 dependent claimed by a taxpayer can earn \$950
3 a year before the taxpayer is not allowed to claim
4 them as a dependent. In the case of a wife she
5 is only allowed to earn \$250 and after that his
6 tax exemption is affected. It is reduced over and
7 above the \$250. We believe that this is not fair
8 and is a discrimination against wives as against
9 any other dependent.

10 THE CHAIRMAN: Thank you. Perhaps
11 one way to cure that might be to reduce it in the
12 other direction.

13 MRS. TENCH: The trend in the past number
14 of years has been to up the amount of money allowed,
15 that a dependent is allowed to earn before the
16 exemption is cut off or decreased.

17 THE CHAIRMAN: Thank you. Before we
18 move on to the next point could I inquire if there
19 are any questions?

20 COMMISSIONER GRANT: I was wondering if
21 you would make any distinction between investment
22 income and earned income on the part of the wife?

23 MRS. TENCH: No, I would not.

24 MRS. FLAHERTY: No distinction is made
25 among other dependents. Why should it be? A
26 father could have earned income and earn up to \$950
27 before the taxpayer's exemption is reduced.

28 MRS. TENCH: A parent could receive the
29
30

1952

1 old age pension in addition to another pension,
2 which is not earned income.

3 COMMISSIONER GRANT: I think there is
4 a distinction in this respect. If the wife has
5 earned income then she must be spending some time out
6 of the home to bring that money in and therefore
7 the husband is deprived of her services to that
8 extent. Your argument might have more force with
9 respect to earned income than it would with respect
10 to investment income where she is under no handicap
11 as far as household duties are concerned.

12 MRS. TENCH: I don't think today
13 husbands look on wives going out to work as an
14 encroachment against their duties.

15 COMMISSIONER GRANT: Shall we say that
16 might be a matter of opinion!

17 MRS. SABIA: I think the greater
18 increase of women in the labour force is a fact of
19 life. There is not any doubt about it. We cannot
20 further deprive ourselves of the brain power of half
21 the population. You have women who are educated,
22 who have great skills, lawyers, doctors, trained
23 accountants, even if they are stenographers in an
24 office they are needed and I think that 50 per cent
25 of the population ought to be treated as the other
26 50 per cent.

27
28 I think with the labour-saving devices
29 today that the woman who leaves her home does not
30 always deprive her children or her husband of the

1953

1 services that she should render in the home. We
2 are all aware of the fact that women are going out
3 more and more, whether we like it or not. We have to
4 readjust our thinking and our taxation thinking
5 on those levels.

6 MRS. TENCH: The \$950 that a married
7 woman could earn does not prevent her from keeping
8 up with her duties very much because that does not
9 take much time to earn \$950. This is a part-
10 time job.

11 COMMISSIONER WALLS: You don't recognize
12 the initial \$1,000 deduction for a wife, which means
13 a total exemption for a wife of \$1,250.

14 MRS. TENCH: If it were a dependent --

15 COMMISSIONER WALLS: A dependent would
16 get \$950 plus \$350, which would be approximately the
17 same amount as the \$1,000 married exemption plus the
18 wife's \$250 allowance.

19 MRS. TENCH: If a man is a widower
20 and has a child he can claim \$1,000 for that child
21 and the child can earn \$950 and the wife cannot.

22 MRS. SABIA: There is tinge of
23 discrimination.

24 COMMISSIONER PERRY: May I say a word
25 on behalf of the unmarried woman? It could be said
26 that the situation here would be that the exemption
27 for two people working would be three times the
28 exemption for a single unmarried person working.
29 I think one would have to define this proposition
30

1954

1 that the State is so anxious to have married women
2 working that a much greater exemption would be given
3 than to where an unmarried single woman was working.

4 MRS. TENCH: If a man is single and
5 has no responsibilities he gets \$1,000 exemption
6 the same as a single woman. If a single woman is
7 supporting a mother or father she gets an additional
8 \$1,000 exemption and that parent can earn \$950
9 a year either by investment income or earned income.

10 COMMISSIONER PERRY: I appreciate
11 the point of the dependents. Let us leave dependents
12 out of this and speak of the married couple as
13 opposed to a single person, be it male or female.
14 Your suggestion in effect is that the married couple
15 be given a total exemption of \$3,000?

16 MRS. TENCH: No, \$2,000.

17 COMMISSIONER PERRY: Would not the
18 husband be allowed --

19 MRS. TENCH: If you have in mind that
20 any other dependent that he has --

21 COMMISSIONER PERRY: I have deliberately
22 left dependents out of the argument.

23 MRS. TENCH: That is what we claim is
24 unequal. For any other dependent he has he can claim
25 \$1,000 for the dependent and that dependent can earn
26 \$950 a year so he gets \$2,950 exemption, if you look
27 at it in that way.

28 COMMISSIONER PERRY: Suppose I make the
29
30

1 great mistake of conceding your argument. Let us
2 say for the record that I am and this is a horrible
3 inequity. Let us get back to my case where
4 you have a wife and husband working and where the
5 husband would be allowed exemption until his wife's
6 income exceeded \$950. Would not the total exemption
7 be \$2,950?

8 MRS. TENCH: Yes, which would be the
9 same exemption for any other dependent that he had.

10 COMMISSIONER PERRY: We have stopped
11 that argument. We have agreed with you. Now
12 opposite that wife or husband is a single man or
13 woman whose exemption is \$1,000. He, in effect, is
14 being given \$500 less exemption than either one
15 of the other parties. I am not putting this as an
16 artificial case because I was in the Department for
17 years and years and this was the sort of correspondence
18 that we got from single women. Why bless further
19 our already blessed sisters!

20 MRS. SABIA: If blessed they be!
21 I am quite sure that our whole Federation to a man,
22 or a woman, would very whole-heartedly agree that
23 the single woman should certainly be given as many
24 concessions as the married woman. We make no
25 distinction between them. It is the married woman's
26 case we have stated here because it shows up so
27 badly. It is the married woman in part-time work
28 in the labour force. We are not jeopardizing the
29
30

1956

1 single woman. We feel she should have equal
2 exemptions. I think the single woman today is
3 not on a parity with the married woman maybe because
4 the married woman is so vocal about things she is
5 not getting. The single woman of today is a very
6 productive part of our economy and should certainly
7 be granted every advantage and every exemption of
8 the married woman. I am sure our Federation would
9 go along with that.

10 COMMISSIONER PERRY: We may give you
11 an argument in your own favour. It is expected of
12 a married man in law that he support his spouse,
13 which is a rather vague term. One would think if
14 he gave her a little bit of money occasionally he
15 was supporting her. The law requires that a child
16 be wholly dependent, not have a cent of its own,
17 yet this is the area on which they are allowed to
18 earn \$950.

19 THE CHAIRMAN: Are there any other
20 questions? I think you have taken care of it,
21 Mr. Commissioner.

22 COMMISSIONER PERRY: We have conceded
23 that argument.

24 MRS. SABIA: Compromise, you know, is
25 the value of these things.

26 MRS. TENCH: But there is a discrimi-
27 nation.

28 MRS. SABIA: Let us not belabour it.
29
30

1 COMMISSIONER PERRY: I think we get
2 the point all right.

3 THE CHAIRMAN: The next item is
4 paragraph 7.

5 MRS. TENCH: I believe that in the
6 past the Income Tax Act allowed wives to work for
7 husbands and this was changed and now wives are not
8 allowed to work for husbands and the husbands to
9 claim the wages paid to the wife when she is per-
10 forming services the same as would be performed
11 by an outsider. We believe the husband should be
12 allowed to claim this as a business expense and the
13 wives should be allowed to declare the income earned
14 as a separate income.
15

16 THE CHAIRMAN: You are not alone of
17 that opinion. We have heard it two or three
18 times and of course it is a fair and fundamental
19 point, I think. There is one question that I would
20 like to ask you about because I have wondered
21 about it for a long time. It is the belief that
22 taxation be levied on the husband and wife jointly
23 rather than the individuals.
24

25 --

26
27 --
28
29
30

--

1958

1 I might say that I have had my own
2 views on it. I do not want to commit myself on it,
3 but I have been intrigued with the idea. Have
4 you ever considered the possibility of recommending a
5 joint return for husband and wife in line with the
6 American system or the system in certain European
7 countries? There are a number of different ways of
8 doing it.

9 MRS. SABIA: Yes, I think we have.

10 MRS. FLAHERTY: We have discussed it.

11 MRS. SABIA: We have looked into the
12 American system. They can elect to either make their
13 tax return jointly or else separately.

14 As I say, our recommendations are
15 flexible. We have gone along the thinking of the
16 Bar Association and the Canadian Institute of
17 Chartered Accountants who have felt this very strongly,
18 and they are experts in their field. We have studied
19 what they have recommended, and we have felt it was a
20 good thing. We would be very much in favour of the
21 American plan. We have gone into it and we felt it
22 was a good thing.

23 Our idea in presenting it this way is
24 the fact that we always believe if someone in the
25 community or in the country has done an intensive
26 study and it is a good study, let us pick those brains,
27 let us use that and let us go from there, and that is
28 I think what we have done in this recommendation.
29
30

1959

1 THE CHAIRMAN: I raise that only to
2 find out whether or not you are against it, and it
3 was not in your submission.

4 MRS. SABIA: No, we would not be
5 against it.

6 MRS. FLAHERTY: All these presentations
7 that we are making have been the subject of study over
8 a period of years, and although we have discussed the
9 possibility, we are not prepared at this moment to
10 bring it up as an argument.

11 THE CHAIRMAN: That is fair, I would
12 think.

13 MRS. SABIA: Are we going now to the
14 next point?

15 THE CHAIRMAN: Have we any questions
16 on this?

17 COMMISSIONER MILNE: I do have a
18 question. It is difficult to get statistics on this.
19 We have statistics on the number of women who work
20 and we have statistics on many things, but it is
21 difficult to find out how many women work for their
22 husbands and also to classify even further into the
23 fields of activity.

24 It certainly would seem in the
25 professional field, certainly the earnings of the
26 wife as a business expense are probably not as important
27 because of the factor of costing the service performed
28 which is recoverable in the business in the professional
29
30

1960

1 fee. However, I am thinking about other areas,
2 and I wondered in your research if you have anything
3 that would be conclusive that you could give to us?

4 MRS. TENCH: I think that if you look
5 at any corner grocery store, for example, you will
6 find that the wife is working.

7 MRS. SABIA: I do not think we
8 specifically have statistics. We do not have.

9 MRS. TENCH: They are not available.

10 MRS. SABIA: I think you are quite
11 right in saying on the professional level it is not
12 quite as important. I think your small business man
13 -- I think back in my own home town of the women who
14 work in these dry cleaning establishments with their
15 husbands, and they haven't the money to go into a
16 limited company or anything like this, and they are
17 uneducated women but who know and feel they should be
18 paid for the services they are rendering into the
19 business and yet it is not a deductible item on their
20 husbands' expense.

21 We haven't even taken a look into the
22 statistics of this. I do feel that the small business
23 men more so than on the professional level are the
24 people who have been discriminated against because
25 many a woman has helped her husband in this field.
26 I am always reminded about the little joke about the
27 multimillionaire and someone asked him what he attributed
28 his great wealth to and he said it was my good wife who
29
30

1961

1 wanted to see what income she could live beyond.

2 Here is a woman who worked hard and tries
3 very hard even though she spends the income and she is
4 not allowed anything for it. He is not allowed to
5 deduct anything. I think this is the greatest dis-
6 crimination. I feel quite sure, Mrs. Milne, this is
7 more so than on the professional level, and even though
8 professionals have a point, I would rather concede to
9 the small business man.

10 MRS. FLAHERTY: There is no area that
11 statistics could be made available. For one thing a
12 man can't report his wife as working for him. There
13 is no place for him to put that down. In the census
14 figures the wife can sign herself as an unpaid family
15 worker, and in the labour force survey that is taken
16 every month there is a place for an unpaid family
17 worker. If we were able to get access to the results
18 of those punch cards, we would find it. The wife in
19 turn who is working in keeping her husband's books
20 if he is a doctor, or if she is working in the store,
21 she can't declare income so there is no place for her
22 to go on record that she has been helping so the
23 statistics would be very hard to come by.

24 THE CHAIRMAN: I certainly understand
25 the injustice of not permitting a deduction in these
26 circumstances. However, I do concern myself a little
27 bit about the man with the corner grocery store who
28 employs a clerk to work in the store and the wife looks
29
30

1962

1 after the child and the house and the kitchen and is
2 not paid for it, whereas if you put it around the other
3 way he would get a deduction, would he not?

4 MRS. SABIA: I have great faith in the
5 Department of Internal Revenue in finding out these
6 things. They have a way of looking into things and
7 knowing what is going on, and I think quite legitimately
8 so, that there has to be some way of making sure, you
9 know, that you are not dealing at arm's length, so to
10 speak. Certainly there are ways of finding that out
11 and making sure that advantage is not being taken.

12 MRS. TENCH: The possibility of evasion
13 exists for the higher income groups and non-professionals
14 because they can form limited companies and pay wives'
15 salaries whether the wives are working or not.

16 THE CHAIRMAN: I was not thinking of
17 evasion particularly. I was thinking of the difference
18 between the wife working in the store and working in the
19 kitchen. In the store the husband gets a deduction,
20 and in the kitchen he would not. Is that quite fair
21 to the wife working in the kitchen?

22 MRS. TENCH: Often the wife combines both.
23 She works in the store and in the kitchen and has a
24 child under her feet.

25 THE CHAIRMAN: She should get a right
26 good deduction.

27 MRS. SABIA: She should get a good
28 deduction there.
29
30

1963

1 THE CHAIRMAN: Are there any more
2 questions?

3 MRS. SABIA: I think our next point
4 is on the housekeeper's wages. This again is a bit
5 of a contentious matter, but we feel a little strongly
6 about it and I am going to ask Mrs. Orange to bring it
7 forward.

8 MRS. ORANGE: I do not know that I can
9 add to what Mrs. Sabia has already said and what we
10 have included in the brief, but we do accept the fact
11 that there is a new look in women in industry and in
12 the professions, and married women are being encouraged
13 to go back and take their place in the labour force.

14 MRS. SABIA: Single women as well.

15 MRS. ORANGE: And if there are dependents
16 that must be cared for at home, we feel that \$1,000
17 exemption should be allowed for the salaried person
18 who is employed in the house to look after the child
19 or some other dependent.

20 Of course, this is a question similar
21 to the elective manner of filing joint income tax returns
22 in the United States. This is a point that they have
23 and we feel very strongly about and have considered it
24 very favourably.

25 Of course, once again, it would not be
26 any disadvantage to the economy of the country as a
27 whole, but would be adding to it; more services would
28 be provided and more revenue would be available, and
29
30

1964

1 therefore there would not be any loss of income as a
2 result of this rather small exemption.

3 MRS. TENCH: I think in fact there
4 would be a gain because there are many housekeepers
5 being paid today who are not declaring their income,
6 and for whom T-4's are not being filed. If exemptions
7 were allowed for those housekeepers, then their name
8 would have to go on record and they would have to
9 declare their incomes and T-4's would have to be filed
10 for them.

11 MRS. SABIA: I might also add that we
12 have a shortage of nurses; we have a shortage of
13 teachers, and heaven help us, we know of the shortage
14 of teachers. There are many, many women who could go
15 back to teaching if this was an incentive to them, and
16 we need this older, more mature teacher certainly in
17 our economy today, and we are not getting her because
18 there are no allowances for her.

19 I submit on the economic basis purely
20 of productivity we need these women to go back to teach,
21 to nurse, to be social workers. These are the fields
22 where the scarcity is in our economy, and we think
23 we ought to make it a little simpler for them. We
24 do not want to go to the ends some countries have gone
25 to by providing creches of all kinds from the cradle
26 to the grave sort of thing for children, but we do feel
27 this would be a great help.

28 THE CHAIRMAN: This would contribute to
29
30

1965

1 the mobility of the female labour force and thus decrease
2 structural unemployment.

3 COMMISSIONER BEAUVAIS: You say in
4 section 12

5 "We believe that the actual wages paid to a
6 housekeeper should be allowed as a personal
7 exemption."

8 That is not the \$1000.

9 MRS. SABIA: No, I am sorry. I think
10 Mrs. Orange meant we would not be allowed to take
11 the thousand dollar deduction. If you were taking
12 the wages as a personal exemption you could not also
13 take the thousand dollars.

14 MRS. ORANGE: Yes.

15 COMMISSIONER GRANT: You are assuming
16 the wages would exceed \$1000?

17 MRS. SABIA: Yes.

18 COMMISSIONER BEAUVAIS: But you would
19 add it into the amount of the wages?

20 MRS. SABIA: I do not think it is up
21 to us, that limit. We know in our economy what the
22 wage of a housekeeper is, and I think within a certain
23 flexible range we could not state --- we could not
24 say \$2000, \$3000 or \$4000. This is very difficult
25 because things change and the pattern of earnings
26 changes, and I think this is a difficult matter for us
27 to do. I think this is more for a Commission to
28 undertake than ourselves.
29
30

1966

1 THE CHAIRMAN: That concludes the income
2 taxes, I think.

3 MRS. SABIA: We come to estate taxes.
4 This is another very difficult thing to actually say
5 that this is exactly what we want or this is not
6 exactly what we want. We have in the past said and we
7 reiterate it again the figure of \$50,000 true exemption
8 is a more adequate figure perhaps, a more realistic
9 figure than the \$40,000 that is now allowed.

10 We are submitting that the exemption
11 be \$50,000 rather than \$40,000. This is what we submit
12 here.

13 Also in item 15 I think it is coupling
14 the two together, so I think perhaps we might treat it
15 together. I would prefer to spend more time on the
16 pension benefits, but I will go over this. Recognition
17 of equality in the marriage partnership. I know
18 this is exceedingly contentious. You can look at it
19 from many angles, and there are discriminations on
20 one side and the other too.

21 However, we feel that somehow in our
22 taxation, in our Estate Tax Act, there ought to be
23 an equalization between a man and wife. The wife
24 earns we feel and helps, and if we go back to our little
25 stories, certainly she helps the man and vice versa, and
26 I think this should be recognized.

27 We have asked for recognition in the
28 marriage partnership. I think I would say now
29
30

1967

1 so if the question is asked to me, would you not prefer
2 perhaps, as I think it was the Council of Estate
3 Planning who said nothing under \$100,000 should be
4 taxed. We would go along with that, of course,
5 because this is even better I think and because we
6 have studied this, and because the clubs have all passed
7 it and we bring it to you. It is not new. It is
8 debatable.

9 As I say, I think all of us would
10 prefer to have as the Estate Planning Council said,
11 true exemption or no estate taxes under \$100,000. We
12 submit it to you because it has been passed. We feel
13 there should be a weight of equality between the man
14 and wife.

15 COMMISSIONER BEAUVAIS: On that point
16 would you decrease the \$60,000 presently allowed to
17 a widow to \$50,000?
18

19 MRS. SABIA: No, I think we have said
20 here in No. 16, if you go on, we submit that the
21 present exemption of \$60,000 where there is a surviving
22 widow, whether or not she received any part of the
23 estate is not an acknowledgment of equality in the
24 marriage partnership.

25 We would prefer to have the marriage
26 partnership rather than the \$60,000 exemption. In
27 asking for the \$50,000 exemption it would mean on all
28 estates even though there was community of property.

29 COMMISSIONER BEAUVAIS: But you
30

1968

1 would maintain the \$60,000 exemption?

2 MRS. SABIA: As it is now, yes.

3 COMMISSIONER BEAUVAIS: Then you would
4 still have the discrimination you are talking about
5 between husband and wife?

6 MRS. SABIA: We will concede the point
7 and give you men the fifty. It is the equality we
8 are interested in. How one arrives at the equality
9 is not important. It is the equality. I think we
10 have got to leave behind our old thinking that there
11 is a difference between a man and a woman or a
12 difference in brain power or man power. We have
13 got to recognize equality in our society. We have
14 got to pick the best brains from society; not female
15 or male. We have got to pick the best opportunities
16 from man and woman, and I think it is the sense of
17 equality we are looking for, not so much of how we
18 get that equality.
19

20 I am sure a Commission such as yours
21 are in a better position to bring about that equality,
22 and we would not argue with whatever equality you
23 brought up as long as it was equality.

24 COMMISSIONER BEAUVAIS: In the same
25 section 16, you say the Federal Government has applied
26 this taxation policy in respect of widows in the Province
27 of Quebec. Can you explain that?

28 MRS. SABIA: In explanation of this,
29 I am sorry it has been worded the way it has been
30

1969

1 because I think all of us who are here today are not
2 happy with this wording. We did not feel we should
3 quote Quebec in any sense at all. This is a
4 Provincial matter. I do not think it should be in
5 here.

6 I think perhaps what we are trying to
7 bring out is the fact that in Quebec there is com-
8 munity of property if you do not have a marriage con-
9 tract, and the sense of that equality -- we realize
10 there are other facets, and I am not going into the
11 Quebec Civil Code or into their succession duties, but
12 there I think is a showing of equality in this community
13 of property, and I think we did wrong in quoting a
14 province in a Federal presentation. It is in there
15 by mistake and we would ask your indulgence.

16 COMMISSIONER PERRY: I would like to
17 suggest facetiously there may be a male rebellion one
18 of these days. You may have heard of an American
19 Association of Secretaries and Executive Assistants
20 I think it is called. This is quite a large female
21 organization, one of whose basic propositions is that
22 they do half the bosses' work at the office. His
23 wife claims to create half of his wealth, so this is
24 not leaving very much for the old man to do. I get
25 the impression that I am doing quite a bit myself.

26 MRS. SABIA: I don't doubt that the
27 day will come when there will be a male rebellion, and
28 probably we will have to give up some of our equality
29
30

1970

1 until they catch up with us. However, we are working
2 within the present framework.

3 COMMISSIONER PERRY: I think the women are
4 becoming more equal than others.

5 MRS. SABIA: We are doing more thinking,
6 let us say. Listen to us indulgently.

7 THE CHAIRMAN: I think there are no
8 more questions on that point.

9 MRS. SABIA: Now we come to the last
10 and, I think, one of the most important, and that is
11 the exemption of pension benefits from estate taxation.

1 This is, I think, an extreme hardship
2 on the surviving spouse when all their lives they
3 have worked and saved to pay a pension or annuity
4 or whatever it may be and find it is capitalized
5 on that wife's life expectancy. Today the life
6 expectancy is 70 and if the husband dies when the wife
7 is 50 that is 20 years multiplied by whatever the
8 pension may be. If it is \$2,000 or \$3,000 you have
9 already created an estate of \$70,000, \$80,000 or
10 \$90,000. Many, many wives are left with no actual
11 cash to pay the taxes on that amount of money and
12 there is hardship for them to borrow or use that
13 small insurance policy. We find that out in
14 talking to widows and talking to women who have
15 certainly some experience with this. This is a
16 tremendous hardship, this capitalization of pension
17 funds.
18

19 I realize the government does not
20 particularly like the words "double taxation". There
21 is double taxation on everything in our society.
22 When we talk of double taxation I think we need to
23 define our terms. In this field the governments
24 are taxing the widow on money she will probably never
25 receive. She might die in five years and she has
26 paid money on something that she will never see,
27 money that she will never receive. I think this
28 is where the hardship lies in the fact of her life
29 expectancy.
30

1972

1 I know you have to create an estate
2 and come to the value of that estate and the only
3 way you can do it is perhaps -- I say "perhaps" --
4 I am sure there are many other ways of doing it
5 but on money or cash that is not actually received.
6 We find it hard to understand that it can be taxed
7 on a life expectancy even though you might die and
8 never receive it.

9 We feel rather strongly about this
10 point because we have had a number of women who have
11 come to us, members of our own organization and
12 members of others, we have talked to many other
13 women's organizations. We work with the Council of
14 Women, the Business and Professional Women who are
15 fundamentally interested in this too because they
16 can see the wrongs in it for the widow.

17 Now we have Mrs. McClelland here today.
18 We asked her to come with us today because this is
19 a point upon which she feels strongly and she is one
20 who is typical of the many widows who have had to
21 pay taxes on money that they actually don't receive.
22 Mrs. McClelland, would you add a few words?

23 MRS. McCLELLAND: My pension was
24 capitalized at \$20,983.73 and it brought my husband's
25 estate up to where I had to pay 12.1 per cent on that.
26 In 1956 when my husband died we had to pay everything
27 and I worked it out and it came to a fantastic figure.
28 As far as my husband's estate was concerned I cannot
29
30

1973

1 speak about it politely. However, it was 12.1 per
2 cent. After that for 1956 they deducted from my
3 pension for the year \$66.13. In 1957 it was \$93.
4 I did get a refund of \$41.13 that year and whether
5 that was all from the pension or not I am not sure
6 now. In 1958 they deducted \$68.90 and in 1959,
7 \$70.20. In 1961 and 1962 they deducted \$72.60
8 each year. That comes to a total, I think, of
9 \$517.03. If I live another seven or ten years I
10 will have paid in practically what amounts to a
11 whole year's pension to say nothing of the
12 succession duties I had to pay on \$20,983.73. If
13 it had not been for the fact that my husband took
14 out the \$5,000 civil service insurance I don't
15 know where I would have been. All his other
16 insurance went into paying for the succession duties.

17
18 It was a little bit complicated
19 because he had an estate that was real estate and
20 rundown and it was in trust. It was quite a sum
21 of money and I had to borrow to help pay for the
22 repairs. That had nothing to do with this pension
23 business.

24
25 It doesn't take long to pay back a
26 whole year's income at the rate I have been going.

27 THE CHAIRMAN: Thank you, Mrs. McClelland,
28 for telling me the story. You understand that
29 the most difficult job we have is to try to find
30 equality. I am not sure whether you are suggesting

1 that all forms of annuities be free from tax.

2 MRS. SABIA: In Ontario there is an
3 exemption up to \$1,200 a year. I think your pension
4 up to \$1,200 is not capitalized. Beyond that the
5 whole thing is. Is there any way you can help the
6 person who is getting a small pension? Today
7 \$2,000 is a small pension. Could there not be
8 some way?

9 We are not rigid in the things we
10 are demanding. We are flexible. We would like
11 to get something for the person who has a limited
12 income. A person who has an income of \$10,000 from
13 annuities is not as great a concern as the small
14 person who must pay succession duties and has not
15 fluid assets. You see most people provide for
16 fluid assets but not always the small man. The
17 bigger person with the big estate always provides
18 money for succession duties but not the small person.
19 I think we are concerned with the person who is
20 left with \$2,000 or \$2,500 annuity and it is
21 capitalized on their life expectancy. If there was
22 some way of putting on a certain amount we would go
23 along with it.

24
25 THE CHAIRMAN: I think we can understand
26 the hardship that can result.

27 COMMISSIONER BEAUVAIS: In Section 19
28 you maintain that future income should not be
29 capitalized, where no capital is receive no estate tax
30

1 should be levied. When a taxpayer has during his
2 lifetime purchased an annuity or contributed to a
3 pension plan, thereby investing a capital that will
4 be received after his death in the form of an
5 annuity, then you create a capital that is received
6 by an annuity.

7 MRS. SABIA: That is debatable.

8 COMMISSIONER BEAUVAIS: Otherwise
9 a man can invest all his money in annuities and
10 receive the annuity right away and there would be
11 no estate tax. I think the hardship is when a
12 widow would die after four years and she had a life
13 expectancy of, say, 18 or 20 years. Then this is
14 a real hardship. Would it not be advisable to
15 levy that out of pensions and annuities only when
16 received? The amount of tax would be established
17 at the time of death and if it is eleven years that
18 would be one-eleventh paid each year.

19 MRS. FLAHERTY: We have thought of this.
20 This has been a consideration that would mean a
21 certain proportion of the tax would come off each
22 cheque and, of course, income tax would come off it
23 too. That would be a more realistic approach.
24 As it is now if the wife dies after five years or
25 remarries all that money is gone. This increases
26 the Federal revenue without anyone receiving the
27 benefit.
28

29 MRS. McCLELLAND: I was wondering
30

1976

1 whether it would be simpler to charge the husband
2 income tax on his whole salary. I think the amount
3 put aside for pensions is not taxable.

4 COMMISSIONER PERRY: A lot of husbands
5 would feel very strongly about that. The tax
6 benefit in the deduction is very large. It comes
7 off the top of his income in his earning years.

8 MRS. SABIA: You would get a hue and
9 cry on that one.

10 Now we have item 2 which I don't feel
11 we should discuss at all because on April 28th
12 Bill 138 came down in the Provincial House and has
13 been given Royal Assent and there is true exemption.
14 I feel in a Federal submission we should not go into
15 Provincial matters.

16 We are very, very grateful to you for
17 having listened to us. We know that the tax study
18 is in exceptionally capable hands and we feel very
19 secure that you will come up with recommendations
20 that will certainly be the best for the majority.
21 I think that is what is important, that when changes
22 are made that they are made for the majority of
23 the population. We are cognizant of this matter
24 and we feel very strongly and very gratefully.
25 that you will do a very commendable job and certainly
26 come up with something new, interesting, and with
27 a complete new look. Thank you very much.

28 THE CHAIRMAN: Thank you. It is good
29
30

1977

1 we are not proceeding to write our report tomorrow
2 for I am perfectly sure we should not be able to
3 restrain ourselves from acceding to everything you
4 put before us. We have not only had a very
5 interesting morning but a very charming one.

6 Mr. Secretary, have you any other
7 business for us?

8 THE ADMINISTRATIVE OFFICER: Yes.

9 We have received two briefs which I would like to enter
10 into the record. One is from Mr. G.F. MacLaren, Q.C.,
11 of Ottawa. The brief was received into our
12 offices on January 3rd, 1963. It concerns death
13 taxation and the smaller private business in Canada.
14 I would like to enter this as Exhibit No. 88.

15
16 ---EXHIBIT NO. 88: Brief of Mr. G.F. MacLaren, Q.C.,
17 Ottawa.

18 Also, on May 27th, 1963 we received
19 into the offices a brief from Mr. Archibald G. Smith,
20 a tax consultant of Willowdale, Ontario. The
21 brief is relative to customs duties and sales taxes
22 on pharmaceutical and doctors' prescriptions. I
23 would like to enter this brief into the record as
24 Exhibit No. 89.

25
26 ---EXHIBIT NO. 89: Brief of Mr. Archibald G.
27 Smith, Tax Consultant,
28 Willowdale, Ontario.

29 THE CHAIRMAN: Thank you. Those are

1 ---The hearing resumed at 9:30 a.m.

2

3 THE CHAIRMAN: Mr. Secretary, are
4 we ready?

5 THE SECRETARY: We are ready. Mr. Chair-
6 man, Commissioners, we have a brief this morning
7 submitted on behalf of the Dominion-Scottish
8 Investments Limited and Economic Investment Trust
9 Limited. Major-General A. Bruce Matthews, Chairman
10 of the Economic Investment Trust Limited, will speak
11 to the brief and will introduce his colleagues who
12 are here with him this morning. I would like to enter
13 this brief into the record as Exhibit No. 90.
14

15 ---EXHIBIT NO. 90: Brief of the Dominion-Scottish
16 Investments Limited and
17 Economic Investment Trust
Limited.

18 SUBMISSION OF THE
19 DOMINION-SCOTTISH INVESTMENTS LIMITED and
20 ECONOMIC INVESTMENT TRUST LIMITED
21

22 APPEARANCES:

23 Major-General A. Bruce Matthews, Chairman
24 Mr. R.V. Inglis
25 Mr. H.R. Jackman, Q.C.
26 Mr. L.W. Skey
27

28 THE CHAIRMAN: Thank you, Mr. Secretary.
29 Good morning, General Matthews and gentlemen. Would
30 you be so kind as to introduce your colleagues to us?

1 I will introduce the Commissioners to you without
2 mentioning names. We would like to know anything
3 you would care to tell us about Dominion-Scottish.
4 It is a public company I think although I am not
5 very sure. You might fill us in on that. We have
6 questions to put to you. There is no need to
7 read your submission as we have all read it and it
8 is entered into the record. You may remain seated
9 unless you wish to stand.

10 GENERAL MATTHEWS: Thank you,
11 Mr. Chairman. Mrs. Milne, and gentlemen, we
12 certainly appreciate the opportunity of appearing today
13 and making this submission on behalf of these two
14 trusts. As the Chairman has pointed out I am
15 Chairman of the Economic Investment Trust and
16 Mr. H.R. Jackman, Q.C. is Chairman of the Dominion-and
17 Anglo Investment Corporation and other investment
18 trusts. He has joined with us this morning and
19 although the name of his company does not appear in
20 the brief submitted, his company associates itself
21 with these two trusts.

22 It may be that he would wish to comment
23 on his own behalf, with your permission.

24 Also I am accompanied by L.W. Skey,
25 on my left, who is Managing Director of both of these
26 trusts. They operate their joint office under a
27 contractual arrangement for the clerical and space
28 and administrative accommodations.
29
30

1 R.W. Inglis beside Mr. Jackman is
2 Secretary-Treasurer of both of these trusts. Beyond
3 these two officers, these trusts have no common
4 connection. This is merely a facility which is
5 attractive from a cost point of view. Both of these
6 gentlemen are available to reply to any questions
7 by the Commissioners which should arise, and I think
8 they would like to comment very briefly on the brief
9 submitted by the Great Britain, Canada, and American
10 Growth Fund Management, if they may, which bears to
11 some extent on our submission.

12 Now, you have already received the
13 submission from other trusts, including at least
14 one closed-end trust, and we are most anxious to avoid
15 repetition and we have paid some heed to their sub-
16 missions, of course.

17 There is a long and interesting history
18 behind the concept of investment trusts as a medium
19 of investment, going back in Europe and more
20 particularly in the United Kingdom with experience
21 in excess of 200 years of proven success. Suffice
22 it to say in Canada this type of investment was first
23 started about the mid-1920's. Economic, if I may
24 use the abbreviated names, was the first closed-end
25 trust incorporated in Canada in 1927, quickly followed
26 by Dominion-Scottish in 1929. It is interesting to
27 note throughout market declines in 1929 and during the
28 1930's, Economic was able to maintain an unbroken
29
30

1 dividend record. I mention this only as further
2 evidence to support the fact that the closed-end
3 technique or concept has proven itself both in
4 Canada and elsewhere as an attractive form of invest-
5 ment for the individual or the corporation, but
6 particularly for the small investor who is unable
7 to obtain adequate diversification through investment
8 in shares of individual companies.

9 While I could enlarge at length on
10 the concept of the closed-end type of investment,
11 I would refer to only five of the many features which
12 have contributed to their success and refer to them
13 only in headings. Obviously diversity, both in
14 domestic and foreign securities. Low-cost
15 administrative charges are outstanding in this area
16 compared to other mediums of investment. Constant
17 portfolio supervision, Participation of trust in
18 size, and I mean of the individual investor and at
19 times size is a significant feature in the market
20 place. Finally, the creation of a pool of savings
21 available for investment.

22 In this latter connection we believe
23 that Canadians have become increasingly concerned
24 about the lack of well-ordered pools of such
25 savings operating in our country. Foreign investors
26 have in fact, through the medium of their trusts,
27 moved in where Canadians have been timid.

28 Based on the experience of British
29
30

1 and also Scottish -- and they are quite distinct identities
2 in that country -- there is ample proof to suggest
3 the Canadian investor has been placed at a dis-
4 advantage due to restrictive tax practices in
5 comparison with those trusts in the United Kingdom.

6 I think I am correct in saying the
7 growth of the investment companies in the United
8 Kingdom has been a tremendous assistance to the
9 United Kingdom. There are now 258 such trusts
10 in the United Kingdom who are members of an
11 association, and I know of others who would not be
12 included in these figures. They have assets under
13 administration in excess of two billion pounds. This
14 is a big factor in the economy of the United Kingdom,
15 more particularly in their trading connections
16 throughout the world.

17
18 While here there are less than 20 such
19 trusts offering shares to the public with assets of
20 approximately four hundred million dollars -- that
21 figure would be subject, gentlemen, to some
22 modification as it is the 1961 year-end and I have
23 not got the 1962 figure. I should add it includes
24 two major development companies which really could
25 not be regarded as pure investment trusts. I can
26 identify those companies if you wish me to.

27 Why this wide difference in the pattern?
28 It is the opinion of the trusts represented here that
29 such pools of investment funds are not being used to
30

1 the best advantage of individuals or of the investment
2 community in Canada. We believe also that one of
3 the reasons for the relative success of trusts
4 elsewhere has been consistency of tax legislation,
5 whereas the changes and inconsistencies which have
6 been experienced here over the years have inhibited
7 participation by the general public in this proven
8 medium of investment.

9 In the case of these two trusts, our
10 shareholder loyalty has been reasonably good under
11 these circumstances. However, it is interesting
12 to note the number is not growing, the number of
13 shareholders is not growing. In fact, it would be
14 fair to say it is declining slightly; nor is the
15 capital base being enlarged other than by normal
16 market appreciation, so little new money has found
17 its way into these long-established trusts.

18 In support of this statement, I should
19 point out the conduit principle which is applied
20 elsewhere has never been recognized by the Canadian
21 tax authorities. In addition to this, our share-
22 holders were not accorded the benefit of the dividend
23 tax credits when first introduced. At a later date,
24 after long representations were made on their part,
25 dividend payments to our shareholders were allowed
26 to qualify. I merely cite these as illustrations --
27 spread over two or three years each time as some of
28 the deterrent or the type of deterrent that we have
29
30

1 experienced. Accordingly, Mrs. Milne, and gentlemen,
2 it is submitted that the restriction on portfolio
3 management imposed by the 25 per cent limit on
4 income from interest-bearing securities and the further
5 restriction on flexibility which is so highly
6 important in the portfolio administration by the
7 present regulations confining non-Canadian investment
8 to 15 per cent -- these two items create a unduly
9 restrictive limitation on the Canadian investor,
10 particularly when compared to the experience of
11 investors in other jurisdictions.

12 These two items then form the basis
13 of the recommendation paragraphs of our submission.
14 I hope that you will forgive the brevity of this.
15 I realize that this is a subject which would raise
16 many questions in your mind. We collectively felt
17 it would be better to leave that to your good
18 judgment rather than to try to enlarge on the many
19 features of the concept of the closed-end investment
20 trust which could be put into several volumes.

21 THE CHAIRMAN: You indicated you are
22 going to preface your proposal to us with what we
23 have already received.

GENERAL MATTHEWS: I would like to ask
Mr. Skey and Mr. Inglis to comment briefly on two
submissions which you have received in that they do
bear on the whole field of investment trusts. Whereas
we do not have any quarrel or dispute with either

1987

1 of these two submissions, you will find a variation
2 in ours, and we thought it should be possibly
3 explained.

4 It is interesting to note, gentlemen,
5 in Canada there is no association of investment
6 trust companies of the closed-end variety as yet.
7 Otherwise you would have had a submission from them.
8 However, I can report that the incorporation of such
9 an association is now being prepared. Open-end
10 trusts of course have a very large and very industrious
11 association which you have no doubt heard from.

12 THE CHAIRMAN: This is undoubtedly one
13 of the by-products of taxation that drives
14 people together.

15 GENERAL MATTHEWS: Yes. May I ask
16 Mr. Skey to comment on the British and Canadian
17 trust brief.

18 THE CHAIRMAN: If you would, please.

19 COMMISSIONER PERRY: I wonder if we
20 could clear up just a point of semantics? I notice
21 you are speaking most of the time of investment
22 trusts whereas your brief refers to investment
23 companies. Do I assume you are referring to both
24 trusts and companies in anything that you have said?

25 GENERAL MATTHEWS: They are similar,
26 Mr. Perry. In 1927 you could still get a title
27 from the Secretary of State incorporating the word
28 "trust"; thereafter you could not. This is now
29
30

1 confined to the trust company as we know it, who is
2 an administrator of estates and so forth.

3 By the time the Dominion-Scottish
4 applied for their charter the word "trust" had
5 been denied to investment companies. It was merely
6 a matter of nomenclature. The only thing it does
7 for Economic is identify it as the oldest trust,
8 so that it is the same. Their function and role
9 are exactly the same.

10 COMMISSIONER WALLS: The only thing
11 I was really interested in, since the 1955 Act
12 which made it mandatory for 60 per cent of the gross
13 revenue be invested in Canadian securities was
14 changed, I believe, in 1960 to 85 per cent, what
15 effect has that had on your own particular portfolios?
16 Have you any particulars to show an adverse effect,
17 if any, which you have encountered?

18 GENERAL MATTHEWS: I have not any figures
19 to support the contention that we were removed from
20 the non-Canadian market. Largely that would be the
21 United States market and the United Kingdom market.
22 The strength of investment trusts is the great
23 diversity, and the success of the British trusts have
24 been world-wide diversity.

25 I think we can demonstrate to you that
26 under certain conditions of the market we would have
27 enjoyed a more profitable experience had we been
28 able to retain in our portfolio a higher percentage--
29
30

1 for illustration I will say United States securities
2 largely confined to the types of companies which we
3 cannot participate in. The 15 per cent figure we
4 have reached on different occasions and had to hold
5 there.

6 You see it is our contention, sir,
7 that tax restriction should not be the motivating
8 force in administrating a portfolio. You must stick
9 to the quality, type and location of security.
10 However, I think it would be only fair to say that
11 the tax implications have seriously affected the
12 judgment of Canadian portfolio administrators from
13 time to time in the post-war years.

14 COMMISSIONER WALLS: Is it not a fact
15 that the 85 per cent has been in effect for such a
16 short time that you really have no adequate bases
17 to know whether over a long period the investor will
18 not be as well off as a high percentage of the
19 Canadian investors?

20 GENERAL MATTHEWS: We certainly have
21 no mathematical figures that we can produce to prove
22 it otherwise.

23 MR. JACKMAN: Could I reply to
24 Mr. Wall's question, sir? Because of this restriction
25 of not having more than 15 per cent outside Canada,
26 it makes it so difficult that in one company of
27 about \$17 billion in investment trust assets we no
28 longer qualify. It just is not worth our while, and
29
30

1 the question arises is it worth while in our case
2 anyway, having an investment trust or investment
3 company, because the shareholders are subject to
4 taxation in the States -- they are subject to taxation
5 in the company form and then the small residue
6 that is left for dividend distribution in their hands
7 in Canada is again subject to personal income tax.

8 In other words, you just throw up
9 your hands. This 15 per cent is considered an
10 iniquitous provision of the government. It was
11 done I think I may say at a time more or less
12 in the form of sumptuary legislation to straight-
13 jacket the savings of the Canadian people into the
14 development of Canada. That theory is not quite
15 so prevalent today as it was during that particular
16 time, and to straight-jacket us to 15 per cent
17 is extremely bad.

18 I should just like to add to
19 General Matthews' presentation on the value of these
20 investment companies in the United Kingdom when war
21 was first declared. Britain had to pay on the barrel-
22 head, and the investment trusts were required --
23 their assets were commandeered. They had a gentleman
24 in the trust field sent out from Scotland who was
25 resident in Ottawa here and he sold many of the
26 securities in order to pay not only the United States
27 but to pay Canada for munitions of war which were
28 required at that time.
29
30

1991

1 In other words, that it is a good thing
2 for the country to have a certain amount of money
3 available in foreign bonds, and at the present time
4 I think the theory would perhaps receive political
5 acceptance because we are suffering a little bit too
6 much ownership of our own assets, so let us own
7 a little bit of someone else's assets. Does that
8 answer your question, sir?

9 COMMISSIONER WALLS: Yes.

10 GENERAL MATTHEWS: May I ask Mr. Skey
11 to comment on British and Canadian?

12 THE CHAIRMAN: Yes, thank you.

13 MR. SKEY: Mr. Chairman and Commissioners,
14 in respect of the representations made to you today
15 and previously, I would like to make brief reference
16 to pages 758, 759 and 760 of the transcript of your
17 Commission. These were recorded at your Montreal
18 hearing on the 26th of April, 1963, and contained
19 recommendations of the officers of the Great Britain
20 and Canada Investment Corporation who appeared before
21 you on that day. The first of their recommendations--

22 THE CHAIRMAN: May I interrupt you just
23 a minute? This is the first time we have had anything
24 before us which sounds like rebuttal, and I think
25 before we proceed with this we had better see if we
26 have imposed any rules in regard to rebuttal.
27 Mr. Secretary, what are the rules?
28
29
30

1 MR. SKEY: This will not be in the nature
2 of rebuttal.

3 THE CHAIRMAN: Let me hear why it is
4 not rebuttal.

5 MR. SKEY: It is a comment.

6 THE CHAIRMAN: If you agree, we will
7 take it as a comment. I am sorry to interrupt.
8 Will you proceed?
9

29

30

1 MR. SKEY: The first of these
2 recommendations is that the Investment Trust
3 Management should be freed of restrictive tax
4 provisions. This is what we support in our brief
5 and it is indeed the crux of all these representations.
6 I would refer to the second, fifth, and sixth
7 recommendations on pages 759 and 760. We have some
8 reservations about them. These reservations are on
9 the grounds of complexity and we agree with the
10 observation made by Commissioner Perry on page 764
11 when he said they present an administrative chore.
12 While we still believe their implementation would be
13 an improvement on the present tax provisions we also
14 think that the recommendations made in paragraph 7 of
15 page 3 of our brief presented to you today is a better
16 solution to the problem.

18 THE CHAIRMAN: Mr. Skey, I haven't
19 any idea what the recommendations 2, 5 and 6 are. Do
20 you wish to tell us?

21 MR. SKEY: Yes, sir. They represent
22 to you that it would be better for the shareholder to
23 be taxed in the long run on the type of income that
24 the trust received. In other words, if 20 per cent
25 of the income was from interest bearing securities,
26 20 per cent from foreign sources, and 60 per cent from
27 taxable Canadian securities, the individual receiving
28 the dividend from the investment trust would be taxed
29 on the 20 per cent of interest, 20 per cent of foreign
30

1 dividends, and tax free on the 60 per cent that
2 came to him from taxable Canadian corporations.

3 THE CHAIRMAN: Thank you.

4 MR. SKEY: We recommend a return to
5 the provisions of the Act as it was in 1955. That is
6 to say that not less than 60 per cent of gross
7 revenue from the years shall be from dividends on
8 taxable Canadian corporations. This, we feel, affords
9 a more workable regulation for the Government to
10 administer and the Investment Companies to follow.
11 In other words, we believe it will serve both parties
12 better.

13 The third and fourth recommendations
14 which have to do with the right to invest abroad and
15 the advantages accorded the Investment Companies, we
16 support wholeheartedly.

17 The seventh recommendation, which as I
18 understand it, asks for relief from tax incurred
19 through changes made in regulations we also support
20 because portfolio investments cannot be changed quickly
21 and due notice of any tax changes to be made within
22 the period of transition seems to be a reasonable con-
23 sideration to ask.

24 Before completing my representations I
25 would like to mention the terms of reference which
26 your Commission has been given and to refer to the
27 request that you propose changes which will encourage
28 the holdings of Canadian equity securities by Canadians.
29
30

1995

1 In giving attention to this part of
2 your findings, I believe that the submissions made
3 to you by the Canadian Investment Trust bear up to
4 consideration because our portfolios are diversified.
5 We are able to hold a higher percentage of equity
6 securities than would be prudent for the individual
7 small investors. Our risks are spread over a broader
8 base than they are able to obtain. Over the past
9 few years these companies which are appearing before
10 you today have consistently held less than 20 per cent
11 of their assets in bonds and have at times held as
12 little as ten per cent of our portfolio in this type
13 of security.

14 Thank you, Mr. Chairman.

15 THE CHAIRMAN: Could the comments
16 with regard to the American Growth Fund Management
17 Company Limited be construed as a rebuttal in any way,
18 Mr. Inglis?

19 MR. INGLIS: No, sir. I think it
20 should be considered as giving support to their brief.
21 At the hearing held on May 6, 1963, Mr. C. W. Goldring,
22 Vice-President of the A. G. F. Management Limited
23 submitted a brief in support of his contention that
24 subsection 69(2)(ba) be replaced by other legislation.
25 These arguments are shown on page 1039 and 1040 of the
26 transcript. I should like to reiterate them to
27 express our support of the five points, which are
28 quite brief if I may.
29

30 THE CHAIRMAN: Please do.

1996

1 MR. INGLIS: Firstly, we do not believe
2 that income taxation is an efficient instrument to
3 control or direct investment flows into or out of the
4 Canadian market.

5 Secondly, if it was to be used it
6 should apply to all savings institutions and not
7 merely investment companies.

8 Thirdly, there is no sense in a tax
9 provision which can be circumvented by the simple exped-
10 ient of changing from a corporate form to a trust form
11 of organization.

12 Fourthly, under certain circumstances
13 a degree of economic nationalism can be justified, but
14 we believe it is the long-range interest of Canada
15 to encourage a free flow of investments both into and
16 out of this country.

17 Fifthly, there should be no discrimination
18 between buyers of foreign securities. We maintain
19 there should be no additional cost to the investor
20 investing abroad because he invests by mutual funds
21 which is not present if he is a large investor buying
22 foreign securities on his own.

23 Thank you, sir.

24 MR. MATHEWS: Unless Mr. Jackman
25 would like to comment on his own behalf, we have
26 nothing further to add to the brief. In the hope
27 that some questions might arise, we would be happy
28 to answer them.
29
30

1 MR. JACKMAN: I would like to say a
2 word or two because many years ago I was very much
3 concerned with the legislation in regard to these
4 investment trusts and we did at one time -- and here
5 I differ very slightly from General Mathews -- we
6 did have the conduit theory established in our
7 legislation.

8 We started off first of all with an
9 investment trust, if you like, and it was taxed.
10 The asset or the dividends from which it received
11 income were taxed and when the money flowed to the
12 ultimate shareholder it was taxed. There were three
13 areas of taxation from the same original earnings
14 and that was felt to be an unfair situation and
15 quite an impossible one if you were going to have an
16 investment trust.

17 An investment trust is simply an
18 aggregation of small accounts that might be in the
19 hands of an ordinary trust company for administration
20 but we believe, following the pattern of the United
21 Kingdom, they are better administered in corporate
22 form and the beneficiaries, if you like, hold shares
23 in these trusts.

24 The government, when the legislation
25 was first introduced under Mr. Ilesley, in 1940-odd,
26 did adopt the conduit theory of no taxation whatsoever
27 on investment companies, but there were certain rules
28 we had to follow. For instance, that not more than
29
30

1 25 per cent of the company could be owned by any one
2 shareholder. They were not difficult to adhere to.
3 Then the first problem arose when the government in
4 its wisdom saw fit to give 20 per cent tax credit on
5 dividends, inasmuch as some of the income which
6 investment trust received was not in the form of
7 dividends from other Canadian corporations which are,
8 of course, tax free, but came from bonds and some
9 from foreign securities and the shareholder in an
10 investment trust would have received an unfair benefit
11 because he would get 20 per cent tax credit if it
12 were allowed.

13
14 Mr. Abbott was then the Minister of
15 Finance and he said "There will be no tax credit on
16 investment trust dividends even though 70 per cent
17 -- 80 per cent of the content of the dividend might
18 have come from dividends from other Canadian corpor-
19 ations."

20 There we were faced with the first
21 injustice in taking 20 per cent tax credit off our own
22 shareholders.

23 We went down to see the Department and
24 they were quite agreeable to a proposal, namely, that
25 on that part of the income of an investment trust which
26 was received from sources other than dividends from
27 other tax-paying Canadian companies, the investment
28 trust asked to submit these to 20 per cent tax on that
29 outside portion of income, namely from interest and
30

1 from foreign dividends. We asked for taxation. The
2 conduit theory had been formally established.

3 That went on very well. It was a very
4 fair proposal and went on until 1956 or so. It was
5 pointed out that an investment trust could be formed
6 to hold bonds in Canada and it would pay the 20 per cent
7 tax on them but then that income could be transferred to
8 its shareholders, most particularly corporations,
9 and there would be no further tax.

10 I will give you the ultimate example:
11 The banks of Canada could have had an investment
12 company hold their investment account and it would
13 have been subject to 20 per cent tax, if you like,
14 but the investment trust, being a Canadian corporation,
15 there was no tax on the money flowing into the bank's
16 coffers. Of course the Government would have plugged
17 the hole within the next year and it was never taken
18 advantage of. It was quite open there but nothing
19 was ever done.
20

21 The Government saw fit to make the changes
22 in 1956 in regard to implementing its policy of
23 channelling Canadian funds into Canadian investments by
24 allowing the investment trust to have only 15 per cent
25 of income from other sources. They also changed the
26 rule in regard to the amount of income which could be
27 received from bonds. I believe it was not more than
28 25 per cent.

29 Now, the difficulty of that small 25 per
30

1 cent is this, that often you will find bonds will
2 yield you more in this day and age than equity stocks
3 will. You may only get three or four per cent some-
4 times on bonds, at the present time five per cent --
5 six per cent, on equities you get sometimes two and
6 one-half per cent -- three per cent, so you can have a
7 very small amount of your money in bonds, perhaps only
8 eight per cent or nine per cent, and it will produce
9 25 per cent of your income. It works against the
10 proper management of investment companies. We feel
11 this is very unfair and the whole purpose of investment
12 trusts is to provide the small investor with a maximum
13 portfolio, some bonds, some preferreds, and some
14 equity securities which will do his work for him and
15 give him the advantages of constant management and
16 the advantages of certain size.

17
18 If we were just doing an operation
19 like the Argus Corporation, or some company of that
20 nature, which is quite different, we would be entirely
21 in common stocks and in the stocks of other Canadian
22 companies. They have no tax problem. Their income
23 is all non-taxable. On the other hand, we feel we must
24 always have some bonds for the protection of the small
25 investor or small savers in this country.

26 Therefore we believe that both those
27 restrictions on the interest and on the 15 per cent
28 allowed in foreign investments should be done away
29 with. I don't think the Government would look unkindly
30

1 at the proposals.

2 Might I add something to Mr. Walls'
3 point that he made a little while ago about whether
4 the 15 per cent is a restriction. I was over in the
5 States recently and I was interested to hear that the
6 United States government appropriates eleven billion
7 seven hundred million dollars for research which is
8 paid out mostly through corporations under the guise
9 of national defence. As we know many of these
10 inventions are applicable in ordinary life today. Of
11 this amount of eleven billion seven hundred million,
12 one billion dollars is actually channelled through the
13 universities for more or less pure research.

14 I point that out as something relative
15 to the whole crux of the national product of our
16 country. With our 19 million people against their
17 190 million people, we just cannot compete in many
18 areas in the growing field with the United States or
19 with even some European countries.

21 If we are to do a fair job as invest-
22 ment managers, we must be allowed to invest in their
23 IBM, their Chemical Companies and Research companies.
24 If you have a good idea and can sell it to 190 million
25 people, you can afford to do a great deal of research.
26 In this country you just cannot do it and cannot keep
27 the men to do it.

28 We are bound as investment managers,
29 we are put under an obligation to invest further and,
30

1 as I mentioned, it sometimes seems hardly worthwhile
2 trying to keep the investment trust companies going
3 in this country and to do a good job.

4 I would like therefore to join with
5 General Mathews and his group in suggesting that the
6 only restriction on investment companies be that not
7 less than 60 per cent of its ~~gross revenue~~ for the year
8 was from dividends from taxable corporations.

9 THE CHAIRMAN: Thank you. As you
10 and General Mathews have indicated, it is in the long-
11 range interest of Canada to encourage the free flow
12 of investments. I have heard that stated many times
13 before. I would like to know as precisely as
14 possible why you think it is a good idea for Canadians
15 to invest outside their own country? You speak
16 about yourselves as investment managers and in making
17 the decisions you are acting for individual
18 investors. Why is it a good idea for individuals in
19 Canada to invest outside of Canada?

20 MR. JACKMAN: I suppose because we
21 want to participate in the good things of life and if
22 you cannot set up competition to the IBM, the best
23 thing to do is join them and share in the profits.
24 I am anxious to get back some of the money we Canadians
25 pay to these people. I don't know of any other way
26 of doing it. I cannot suggest how investment abroad
27 helps our country except that it does provide a source
28 of foreign exchange to pay for the imports which our
29
30

1 people are going to get more and more. I would like
2 to say the question is out of the practical. It is
3 out of the dollars and cents area, which is perhaps
4 a little more my field than the general area of what
5 is good for the over-all picture of Canada. I
6 should hate to think that if one were from a small
7 country, one could never participate in the great
8 advances which are being made today in the larger
9 countries that are really spending money on research
10 and doing things in a manner which we cannot hope to
11 follow.

C/ET/je

1 GENERAL MATTHEWS: May I comment,
2 Mr. Chairman?

3 THE CHAIRMAN: Yes.

4 GENERAL MATTHEWS: In addition to the
5 practical aspects Mr. Jackman has mentioned of cash
6 flow and holdings of U.S. dollars or sterling,
7 I really feel that some of the criticism that has
8 been cast on Canada as being too parochial in its
9 outlook with regard to the world trade position
10 can be traced right back to our desire to stay
11 within our own boundaries.

12 I hate to keep referring to the United
13 Kingdom experience because it is entirely different,
14 but I believe, although this is rather academic,
15 over the long term it is highly important that
16 Canadian money for trade purposes in addition to
17 the investment capital and for psychological purposes
18 should flow in areas that it has never been seen.
19 We want to stimulate every sinew of the Canadian
20 impact on even new countries.

21 I think it will be a great many years,
22 sir, before we are likely to invest substantial funds
23 on behalf of small individuals in Ghana, but, by
24 jove, Scottish Trust are in there with lots of money.
25 They tie definite situations to the advantage of the
26 United Kingdom trade channels, and this is a factor
27 which we cannot overlook. We are not international-
28 minded in Canada.
29
30

1 I do not suggest this produces a quick
2 answer, but I think it is a very real contribution;
3 these trusts gradually would spread their wings on
4 behalf of Canada in proper proven areas. The risks
5 are greater, but the rewards are sometimes even
6 much greater, so from an academic point of view I
7 just want to add that.

8 MR. JACKMAN: May I throw in another
9 sentence?

10 THE CHAIRMAN: Yes.

11 MR. JACKMAN: We have an example of
12 the Moore Corporation investing in the United States.
13 We have the Massey-Harris, and it has almost come
14 to the situation where if a Canadian wants to have
15 any share in our own oil industry he has to buy
16 American oil stock. Eighty per cent is owned by
17 Americans.
18

19 THE CHAIRMAN: Do you wish to add
20 anything to that?

21 GENERAL MATTHEWS: No, thank you.

22 COMMISSIONER GRANT: If Section 69
23 in the past has been used to support the fiscal
24 policy -- I do not say that it has, but the amendments
25 which have been written into the section, particularly
26 the amendment in 1956 where the switch was from
27 dividends to fixed income securities, and then they
28 switched back in 1961 to the 85 per cent dividend
29 in Canadian corporations, might indicate that
30

1 Section 69 is regarded as a means of supporting some
2 form of fiscal thinking.

3 As I understand your companies find
4 that to be unsatisfactory, and that in adopting a
5 long-range investment policy you just do not know
6 quite where you might fit, and there will be changes
7 from time to time from fixed income securities to
8 equity securities, and it is difficult for you to
9 build up your portfolio and maintain your portfolio.

10 That would be one point you would have
11 in mind, and secondly you would be happy to work
12 under the 1955 arrangement now, whereby 60 per cent
13 of your investment would be in the form of shares
14 in Canadian corporations when you succeeded in
15 getting 20 per cent tax credit for your shareholders,
16 which I understand you now have.

17 GENERAL MATTHEWS: Yes.

18 COMMISSIONER GRANT: Could you enlarge
19 any further on that? It has been touched upon, but
20 I do not know that you stated whether or not there
21 was any understanding that there would be a certain
22 amount off your income derived from the dividends
23 in Canadian corporations in order to maintain that
24 20 per cent.

25 MR. JACKMAN: I do not recall that there
26 was anything there. One has to refresh one's memory
27 on these things. When I saw Dr. Eaton on the matter,
28 it was just a very nice quid pro quo that the govern-
29 ment felt was very fair in the circumstances, and we
30

1 had only had, as I recall, one object in view;
2 namely, to get 20 per cent tax credit on a fair
3 basis for the investment trust shareholders, and
4 we did not want them advantaged and we did not want
5 them disadvantaged, so we said that on the income
6 that would not naturally attract 20 per cent,
7 please tax us 20 per cent and let us pass on the
8 remainder of the income to the shareholders as they
9 would ordinarily have it with the 20 per cent tax
10 credit, because it always attracted that 20 per cent
11 tax credit. The sales were absolutely in balance
12 at the time when we paid 20 per cent tax and then
13 passed it on to the shareholders by way of dividend
14 tax credit.

15
16 COMMISSIONER GRANT: Do I understand
17 you negotiated, Mr. Jackman?

18 MR. JACKMAN: I think I had a little
19 bit to do with it.

20 COMMISSIONER GRANT: You were in on the
21 Scottish-Dominion --

22 MR. JACKMAN: Yes.

23 COMMISSIONER GRANT: What year would
24 that be, do you recall?

25 MR. JACKMAN: 1955 or 1956, I guess it
26 was.

27 COMMISSIONER GRANT: It was at least
28 well in advance of the 85 per cent requirement?

29 MR. JACKMAN: Yes. That last requirement
30

1 was under Mr. Fleming's administration. It was
2 too much of a straight-jacket.

3 COMMISSIONER GRANT: Now I believe
4 General Matthews said that there is no new money
5 finding its way into the closed-end companies, or
6 not any great increase in the amount of money that
7 is coming in. Is that right?

8 GENERAL MATTHEWS: No appreciable
9 increase, that is correct. I think the practice
10 of these investment companies that have listed or
11 have shares available to the public have been to
12 offer rights to their shareholders to take in modest
13 capital increases, but the fact is that no new
14 investment trusts of this character have been started
15 other than some owned by a relatively small group
16 of people, usually for a special purpose. That
17 would be called the same thing. No new large
18 offerings to the public have been made in recent
19 years, whereas in other jurisdictions they are going
20 on almost monthly; new trusts being developed for
21 creating pools of investment. We have broadened
22 our capital base by issue of rights to existing shares
23 and had increases in capital, but very modest.

24 COMMISSIONER GRANT: There is quite a
25 number of open-end companies?

26 GENERAL MATTHEWS: A vast number.

27 COMMISSIONER GRANT: In recent years.
28 Are they not quite aggressive in the sales field?
29
30

1 GENERAL MATTHEWS: Very aggressive.

2 COMMISSIONER GRANT: Would you say more
3 so than the closed-end companies?

4 GENERAL MATTHEWS: Infinitely, because
5 our sales are largely listed on stock exchanges,
6 and theirs are sold through a variety of organizations,
7 from door to door.

8 COMMISSIONER GRANT: And you appropriate
9 your shares --

10 GENERAL MATTHEWS: Yes, and this
11 accounts for the wide difference in administrative
12 charges. They have a serious loading charge of
13 8-1/2 per cent and we have none. Our costs of
14 administration, once the fund is established, if
15 you take funds of comparable size, is substantially
16 less.
17

18 COMMISSIONER GRANT: Would your
19 loading charge and cost of administration not be
20 one and the same thing? It is only a matter of
21 degree?

22 GENERAL MATTHEWS: No, their loading
23 charge is paid out in a commission to the salesman.

24 COMMISSIONER GRANT: Not necessarily
25 applied to the actual cost whereas yours is?

26 GENERAL MATTHEWS: Yes.

27 MR. JACKMAN: May I say, Mr. Chairman,
28 in answer to Mr. Grant's query, investment is an odd
29 business in a way. It depends on the amount of risk
30

1 which the person can afford to take or the amount
2 of suffering which would be occasioned in the case
3 of loss. The mutual funds -- I happen to be a
4 Director of one of them -- are in a different kettle
5 of fish from this old type of British investment
6 trust. If you want to participate in equities
7 for part of your portfolio, you have your house and
8 insurance policies and so on -- if you want equities,
9 the mutual fund is a very good type of vehicle for
10 you to use, but if you want a general investment
11 portfolio suitable for a person of average means,
12 then the old British type investment trust with a
13 certain proportion in bonds and a certain proportion
14 in preferred and a certain proportion in equities
15 is much more suitable, and it is because of this
16 diversification not having all equities as the unit
17 trusts do, mutual funds mostly -- not entirely, but
18 90 per cent as a rule or more -- that we run into
19 this problem of taxation.
20

21 We want to be a conduit. We are a
22 service organization. We have money for share-
23 holders in corporate form, and they hold the shares
24 of the company and we do the management for them.

25 In order to compete with a person who
26 puts his funds in the hands of an ordinary trust
27 company, the executor type, he has no problem of
28 taxation at all beyond his individual scope, whereas
29 if he goes into an investment company that is doing
30

1 the identical job only in the co-operative form,
2 then he gets into an area of taxation which is bad.

3 COMMISSIONER GRANT: I understood,
4 Mr. Jackman, that you did not wish to become a
5 true conduit. I understood you would be happy to
6 operate under this section with the amendment or
7 with the Act as it was in 1955, and pay tax.

8 MR. JACKMAN: We are forced into that
9 position whereas we would much prefer to be a pure
10 conduit. However, the 20 per cent dividend tax
11 credit is a factor which we cannot take advantage
12 of. We cannot ask the government to give it to
13 our people when some of the income which they receive
14 does not naturally attract 20 per cent; namely
15 bond income and dividends from foreign sources.
16 We cannot ask for any special favours, but we want
17 fairness and we are bound, therefore, to submit
18 ourselves to taxation on that portion of our income
19 which does not naturally attract 20 per cent tax
20 credit.
21

22 I might just indicate that this conduit
23 theory -- evidence that the conduit theory was
24 accepted. In Section 69(2)(e) there is provision
25 there that we have to pay 85 per cent of our income
26 before the end of the fiscal year, before the
27 auditors come in and tell us what it is, and there
28 are times when it is quite a difficult job, and that
29 is because the theory -- Mr. Ilesley was Minister --
30

1 that we are a conduit, but in those days we were
2 changing our rates of taxation rather rapidly, and
3 he was not going to let us be 5 per cent better off
4 by waiting for a tax reduction, or worse off, but
5 we had to pay out income before the end of our fiscal
6 year so that the individual getting it would be
7 subject to the same rates of tax as were applicable
8 during the period the money was earned, which is
9 very clear evidence, and while we have now asked for
10 that provision to be changed, it is a very great
11 nuisance to have to estimate your income before you
12 get it, and pay it out before the end of your fiscal
13 year. Now when taxation is not rising as fast
14 as in the war years, I do not think the government
15 would be unfriendly to allow us as much as three
16 months or so.

18 If you held a substantial amount, in
19 let us say an American investment trust in a specialized
20 field, and at the end of the year they pay out
21 capital gains dividends, that is taxable to us as
22 part of our 85 per cent, and you can get hit pretty
23 hard. We had Japanese bonds in one of these companies,
24 and they started paying double coupons when they
25 resumed payments in 1950, and there are various items
26 that come in to swell your income beyond what you
27 estimate, and if you don't pay out 85 per cent, you
28 don't qualify and you are in for a very heavy tax
29 burden.
30

This is a small point, Mrs. Milne and

1 gentlemen, but if it could be incorporated in any
2 suggestions for changes, we would like to have
3 two or three months after the end of the fiscal year
4 to give the officers a chance before we have to
5 disburse 85 per cent of income. Thank you.

6 COMMISSIONER MILNE: I just want to
7 ask you one question, General Matthews. I think
8 in your initial remarks this morning you spoke
9 about a decline of shareholders, a decline in
10 investment capital which has been apparent in your
11 type of company. Is this a significant factor,
12 and when was it first noticeable?

13 GENERAL MATTHEWS: I do not think it
14 is too significant at all other than to indicate
15 a lack of interest. I was referring to Economic
16 Investment Trust in particular which has something
17 under 800 shareholders. This amount has been very
18 static. In other words, the popular features of
19 the closed-end trusts have not appealed in the same
20 way that we would like to see them to the middle
21 income group or average investor. I do not know
22 that this would apply to the entire industry.

23 We do feel the impact of the competition.
24 if you want to call it that, of mutual and open-end
25 funds, and in many instances they are serving as
26 good a purpose but they do not cover off the same
27 wide field generally as the closed-end trusts.
28 It is not significant. This just kind of implies
29
30

1 that the Canadian public have not shown the interest
2 in these forms of investment that we think they
3 should, for the benefit of Canada, to say nothing
4 of the benefit of themselves.

5 Investment becomes a rather personal
6 thing. I think it is fair to say too that Dominion-
7 Scottish is in the same position, and you may be
8 interested in something that is a little beside the
9 point, that shares of these companies have a real
10 tendency to gravitate to the hands of the very
11 sophisticated investor, the one chap who does not
12 need them, because he sees in them the basis of
13 good experience and much lower cost than he could
14 experience doing it himself.

15 A high percentage of some of these
16 funds is now held by financial institutions, corporate
17 identities of one kind and another. The thing was
18 not designed for that, for their tax position is
19 a little bit different, but the person you want
20 to attract is the conscientious saver and investor
21 in any income bracket. It doesn't matter.

22 THE CHAIRMAN: You have not indicated
23 that this matter which Mrs. Milne referred to is
24 caused by tax laws or particular sections to which
25 you object. I would have thought because you say
26 your shares gravitate to the sophisticated investor, it
27 would indicate you are not suffering in this respect
28 because of tax laws.
29
30

1 GENERAL MATTHEWS: Dealers who are
2 in touch with their clients about this tell us
3 when they make a suggestion of participation to a
4 client in an open-end trust, he shies away from the
5 taxable feature at times. We do know this is
6 a deterrent in some instances, and I have a hard
7 time substantiating that. It becomes a sort of
8 legendary thing on the street.

9 Now, we have touched on a number of
10 features, the 85 per cent of paid-out earnings
11 and so forth that was not in our brief. For
12 example, this 25 per cent restriction on bond
13 holdings and foreign investment, if you get into
14 trouble sometimes the prudent portfolio manager
15 would go heavily into bonds obviously where mutual
16 funds cannot. It has to go along with the portfolio
17 and redeem. We have to live through thick and thin,
18 and we would hate to be penalized on that basis.
19 I think I would be less than frank if I were to
20 say right now that there have been occasions in the
21 last four or five years when our officers would
22 have preferred to have larger holdings of bonds than
23 we want to. In other words, our prudent type of
24 management was somewhat influenced by the fact
25 our tax load would be much bigger.
26

27 Fortunately the trend in the securities
28 market gave us a pretty clear indication that this
29 was not long-lived, and we did not feel any disservice
30

1 had been done. We would have gone into bonds
2 and paid taxes if necessary, but it is a slight
3 deterrent.

4 COMMISSIONER GRANT: On the other side
5 of the coin, if investment trusts could switch their
6 security portfolio without any restrictions whatsoever,
7 it might well be that in a falling market you could
8 create a very bad stock situation?

9 GENERAL MATTHEWS: Yes. I think that
10 the one who creates it is the mutual fund because
11 he is obliged to sell to redeem. We cannot redeem
12 our shares. You have to ride with them. We
13 would not be liquidating in the general market unless
14 we transferred to bonds.

15 Yes, it is possible that we could make
16 an impact, but not to be compared with other holders
17 of securities. It would not be a significant thing
18 at our present size, but you could not deny the fact
19 in theory that this is correct, yes.

20 THE CHAIRMAN: I have one question.
21 Your proposal that not less than 60 per cent of its
22 gross revenue for the year was from dividends from
23 taxable corporations -- matching that against 20
24 per cent dividend credit, it would seem to me to be
25 a little out of balance in that 40 per cent is from
26 other sources than taxable Canadian corporations.
27 Is that a fair matching against the dividend credit?

28 GENERAL MATTHEWS: I think they thought
29
30

1 it was fair when it was originally introduced. This
2 can be subject to some variations. I agree with
3 Mr. Grant that the increase to the higher figure was
4 one of fiscal policy and there was a great desire on
5 the part of all Canadians to channel any money that
6 was being invested into the Canadian scene.

7 This did create an untenable position
8 for other than emergencies.

9 I think it would be possible to produce
10 a mathematical formula, but I am of the impression
11 that it is pretty equitable to contemplate 60-40.
12 This was an area that we felt we had all the
13 flexibility that could be normally expected, and
14 the fact is you are not right on those figures all
15 the time; you are gyrating somewhere between
16 1 per cent and 40 per cent. I know of trust companies
17 who have not appeared before you who hold nothing
18 but equities. That is why they are not here.
19 They are somewhat of a specialized character although
20 they have shareholders, but they are in it in the
21 knowledge that that is their business. I think it
22 is probably fair.

23
24 COMMISSIONER PERRY: Your proposal
25 envisages continued taxation of this 40 per cent;
26 you would continue to be taxable on bond interest?

27 GENERAL MATTHEWS: Yes, at the invest-
28 ment company rate. This is to protect our share-
29 holders. If we went any further we would have to,
30

1 I think, expect our shareholders to be denied the
2 20 per cent tax benefit.

3 MR. JACKMAN: Actually I think,
4 Mr. Perry, it is 21 per cent. We get into one
5 per cent more -- they throw in another couple of
6 per cents for Ontario. They look upon us as
7 a taxable corporation. We had to do something
8 about the dividend tax credit, and asked to be taxed,
9 but it has gotten us in for a little extra burden.

10 May I first reply to the question of
11 yours, Mr. Chairman? Is the patient really sick
12 of taxation and why haven't we grown, and if
13 taxation has not held us behind, do we need
14 medication? I do not think it is taxation funda-
15 mentally which has kept us from growing.

16 The shares of all these closed-end
17 investment companies sell at discount. Therefore
18 it is a little bit hard to sell a new share at
19 one hundred cents on the dollar when you can buy
20 the old at seventy or seventy-five cents. They are
21 very rare bargains for people compared with other
22 forms of trusts.

23 At the moment we are also engaged by
24 the amount of dividend we have to pay out, and if
25 we have to pay an unfair proportion even though it
26 is not large to the government as against an
27 individual looking after his own affairs, then it
28 does weigh against the price at which the trust would
29
30

1 sell in relation to the liquidated value, and
2 therefore against their growth.

3 GENERAL MATTHEWS: An interesting
4 comparison, Mr. Chairman, if I may refer to it,
5 and I think we are not entirely blameless as trust
6 operators. We are endeavouring now to correct this.
7 In the United Kingdom and in the United States the
8 counterpart trusts in many instances -- not in every
9 one but in a large majority -- have gone up to
10 break-off value, and even in some instances in
11 excess of it. This is particularly true in England
12 where they have never had any tax alteration.

13 I do not hold ourselves blameless,
14 but I do think one of the contributing factors
15 to our discount which we do not particularly enjoy
16 is the area of taxation which they are free from.

17 COMMISSIONER GRANT: Would you agree
18 that your shares being diversified, they are likely
19 to find their way into the hands of the conservative
20 investor rather than into the hands of speculator?

21 GENERAL MATTHEWS: Yes. I think there
22 are other trust investment companies which are
23 not in the hands of the public that are taking a much
24 more speculative view. Two or three smaller ones
25 with only 20 or 30 shareholders. They are really
26 private companies, but for the companies that offer
27 their shares to the public, yes..

28 THE CHAIRMAN: We thank you very much
29
30

1 indeed for bringing this to us and putting it forward
2 so understandably. Have you anything further you
3 would like to say to us?

4 GENERAL MATTHEWS: I believe not,
5 Mr. Chairman. We are indebted to you. This is
6 a very important matter to us, but I realize it is
7 a very small leaf in the economy of the whole country
8 which you have to contend with. We are indebted
9 to you for your courtesy.

10 THE CHAIRMAN: You can be assured
11 we will continue to consider the matter. We
12 will adjourn for about three minutes.
13

14
15 ---A short recess.

1 THE CHAIRMAN: May we continue,
2 Mr. Secretary?

3 THE SECRETARY: I have a brief presented
4 on behalf of the Modern Building Products Company
5 of Toronto. Mr. Louis Mostyn, barrister and
6 solicitor, is representing the Modern Building
7 Products Company here and he will speak to the brief.
8 With him is Mr. M. J. Swartz of this company.

9 I would like to enter this brief into
10 the record as Exhibit No. 91.

11
12 ---EXHIBIT NO. 91: Brief of the Modern
13 Building Products
14 Company.

15 SUBMISSION OF

16 THE MODERN BUILDING PRODUCTS COMPANY

17 Appearances:

18 Mr. Louis Mostyn

19 Mr. M. J. Swartz

20
21 THE CHAIRMAN: Thank you, Mr. Secretary.
22 Mr. Mostyn, we have your submission and have read it
23 with interest. There is no need to repeat that
24 operation. We would be very glad if you would care
25 to speak to it and in doing so I would appreciate
26 your telling us a little bit about the company and
27 say anything you wish to say with regard to the brief.

28 MR. MOSTYN: Thank you, Mr. Chairman.
29 First of all, I would like to thank the Commission
30 for the opportunity to present my brief before them.

1 I realize it was late in coming and I again thank
2 you for this opportunity.

3 The Company that I represent is a
4 home improvement company. It is both a manufacturer,
5 distributor and retailer in home improvements and as
6 such has had personal contact with home owners and for
7 this reason is more familiar, or perhaps more familiar
8 with the subject and this is the reason for them
9 presenting the brief. Now as set out in the brief
10 the purpose of my presentation is a submission to the
11 Commission that expenditures on home improvements
12 should be deducted from personal income tax of home
13 owners. There should be deductions allowed on
14 interest on loans for the purpose of home improvements.
15 Deductions should be allowed as a result of municipal
16 taxes directly attributable to improvement of the
17 home of the taxpayer.
18

19 Now I realize, gentlemen, that you have
20 read over the submission but I would like to make
21 some comments with respect to it. First of all,
22 in the 1961 census an investigation of the census it
23 was observed there was over 1,181,000 homes in need
24 of repair; in need of major repair, 255,414 homes.

25 Now, I spoke personally with the census
26 people at Toronto and they advise me that these
27 statistics came as a result of on-the-spot inspections.

28 Now, the total number of homes in
29 Canada is 4,554,493 homes. This means that 25 per cent
30

1 of the homes in Canada are in need of some type of
2 repair.

3 Now, going down to my second point, the
4 number of homes built before 1920 in Canada now is
5 1,391,719. Twenty-five per cent of the homes in
6 Canada today were built before 1920. This is a
7 substantial number of older homes. Fifty per cent
8 were built before 1945.

9 Now, the point which I wish to make
10 here is that there will be an ever-increasing demand
11 as a result of the age of these homes for repairs.
12 The roof is going to go, the furnace is going to go,
13 the outsides are going to go, the exteriors are going
14 to go. A lot of these homes are frame. What has
15 the Government under the National Housing Act done
16 to correct this? They have allowed Home Improvement
17 Loans and the statistics for 1962 indicate 23,895 home
18 improvement loans were approved during 1962 for a
19 value of \$42,640,000.

21 Now, can we compare 23,895 homes to the
22 1,177,788 dwellings in need of repair, according to the
23 1961 statistics? Here is a need for Canadians that
24 is quite apparent from your 1961 statistics and I will
25 submit that the figure of 23,895 is infinitesimal
26 compared to 1,177,788 dwellings requiring improvements.

27 I have made a note here of 66,092 were
28 repaired other than through N.H.A. Even so, this is
29 also infinitesimal compared with the one million homes
30

1 in need of repair.

2 Now, therefore, the brief so given
3 on behalf of my clients is a plea for the home owner,
4 for the individual taxpayer, and for the family which
5 is, in my submission, the foundation of our society.
6 What benefits the individual benefits society and
7 benefits the nation as a whole. I submit that
8 it is the duty of the Government to take any steps
9 possible to avoid any decay of a home, which again
10 I submit is decay of society, and the Government
11 should take all possible steps to encourage better
12 family life through improving the home.

13 I further submit that due to the decay
14 of a lot of these areas young people are discouraged
15 from going into these areas. One reason is if they
16 sink a lot of money into these homes there is no way
17 of recovering the money, no encouragement or incentive
18 to buy. I would submit that in order to keep the
19 older areas alive and buoyant the deductions I have
20 suggested in the brief be made.

21 Also I would like to point this out to
22 the Commission that at the present time home owners
23 are discouraged in older areas from remaining there.
24 They are more or less encouraged to move out. Now,
25 why is this? When other homes in the older areas
26 become run down and depreciated, the value of the
27 homes depreciate and as a result the individual living
28 in the older area does not want to put any more money
29
30

1 into the home but wishes to sell. When he sells, who
2 buys? The person who buys is one who must assume
3 several mortgages because usually they don't want to
4 put a lot of money into an older home that is being
5 broken down. As a result the house itself further
6 becomes depreciated and more decay results.

7 A further argument that I would like to
8 submit is why should the individual, the personal
9 taxpayer not be allowed deductions when businesses
10 are allowed deductions for the same thing? For
11 example, assume a business rents homes, will they
12 be allowed a deduction for income tax for expenses
13 incurred as a result of repairs? Another example,
14 will businesses be allowed to depreciate homes? Will
15 businesses be allowed to depreciate cars? Will
16 businesses be allowed a wide range of expense accounts
17 which increase their personal income effectively?
18 Will businesses be allowed to deduct insurance? Will
19 businesses be allowed to deduct realty taxes? I think
20 you will agree with me, gentlemen, that the answer is
21 "Yes".
22

23 I would submit why should the individual
24 not be given a fair break with respect to taxes?
25 Again the basis of our society is the individual, the
26 home, and I submit, gentlemen, that the Federal Govern-
27 ment should take the lead in promoting and encouraging
28 improvements to the home, especially in the view that
29 over 25 per cent of the homes in Canada were built
30

1 before 1920.

2 I would submit that every assistance
3 should be given to the individual to help himself,
4 to encourage spending which in turn will promote the
5 home improvement industry, promote the economy as a
6 whole, provide more revenues from which taxation
7 can be ultimately taken, and in effect by giving a
8 deduction to the home owner provide an increase in
9 revenue for the government.

10
11 Now, in my brief I submitted that as
12 a result of home improvement at present, local
13 taxes based on these improvements will be increased
14 and this is one reason why many people do not wish to
15 improve their homes. They realize their taxes are
16 going to go up. Any of us who have sat in a Court
17 of Revision will time and time again hear the argument
18 of the individual home owner. He says "I spend money,
19 I try to beautify my home and what happens --- more
20 taxes. The man who does not do anything is the man
21 that does not have any increase in taxes."

22 My third point in my brief was that
23 although millions of dollars are spent in public
24 housing, I don't think I have to go into the figures,
25 I have the figures here, although millions of dollars
26 are spent on public housing, very small amounts are
27 spent with respect to home improvements. Urban taxes
28 will subsidize slums by no taxation and discourage
29 improvement by overtaxation.
30

1 I submit that the Federal Government
2 can take the lead in recognizing the need to society
3 and encourage the home owner to improve his home.

4 Now I wish to refer to the United
5 States law and I think you gentlemen are all familiar
6 perhaps with the fact that there deductions are
7 permitted in the United States with respect to
8 interest payments.

9 THE CHAIRMAN: Yes, we know.

10 MR. MOSTYN: I think that is about
11 all I wish to amplify, subject to any questions.

12 THE CHAIRMAN: I must say that you
13 have presented this brief very forcefully and ably,
14 Mr. Mostyn. I myself think your submission is
15 perfectly clear and I cannot see any problems in the
16 area of my understanding. I will see if the other
17 Commissioners have any questions.

18 COMMISSIONER WALLS: You said that all
19 the Government had done to assist the situation in
20 repairing homes was in regard to N. H. A. and not
21 in regard to home improvement loans. Did you
22 deliberately overlook the fact that you are exempt from
23 one of the heaviest taxes, you pay no sales tax on
24 all building materials which could amount to well over
25 a hundred million dollars a year.

26 MR. MOSTYN: This fact was not gone
27 into in the brief and I must admit this is a concession
28 for the home owner as far as the cost of his materials,
29
30

1 but it is also a concession in fact to the manufacturer.
2 It is my submission that the amount of savings to the
3 home owner is very small. You take a man who is
4 earning four or five or six thousand dollars a year
5 and if he has a large family, or even if he has a
6 medium sized family, many of us are in this position,
7 if a man has to improve his house he does not have
8 very much money left over to improve his home with
9 even with this concession of three per cent.

10 COMMISSIONER WALLS: It is the
11 Federal Sales Tax of 11 per cent.

12 MR. MOSTYN: Even so I think you
13 gentlemen will agree with me this concession is not
14 enough incentive to the individual home owner to
15 improve his house because he only has so many dollars
16 to spend and if it can be shown that by improving his
17 house he will save on taxation he will be more encouraged
18 to improve his house. In fact, it is my submission
19 that not too many of the home owners are aware of the
20 eleven per cent concession. I think you will probably
21 agree with me on that point.

22 COMMISSIONER WALLS: Maybe you would
23 recommend that we take that off and take it off their
24 income tax.

25 MR. MOSTYN: No, I think this should
26 be an addition. The eleven per cent is fine as far
27 as it goes. Even with this the individual home
28 owner only has so much money he can spend. We are not
29
30

1 talking about a huge industry but a man who has a set
2 amount of income and what is an incentive to a man
3 with a set amount of income and what is an incentive
4 to industry are two different things.

5 COMMISSIONER WALLS: Is it not a
6 fact that the city homes requiring the maximum amount
7 of repairs show up in the 1961 statistics as being
8 held speculatively for sale for business construc-
9 tion with no intention of repairing them?

10 MR. MOSTYN: The reason that they are
11 being held for speculation is that the areas have
12 started to deteriorate first and they have deteriorated
13 to such an extent that people have found it beneficial
14 to move out and not stay in these urban areas. We
15 will take the slum areas of Jarvis Street area in
16 Toronto. These homes have depreciated to such an
17 extent that the better type of individual has moved
18 out of these homes and the properties have depreciated
19 and as a result it has been beneficial for businesses
20 to come in.

21 MR. SWARTZ: The primary interest of
22 our company here is we would like to see home owners
23 themselves -- we are not interested in big capital who
24 buy slums or buy large properties --- we would like
25 to see the home owner, the individual be allowed
26 the saving of taxation so that he could improve his
27 home.
28

29 COMMISSIONER WALLS: Thank you.
30

1 COMMISSIONER PERRY: I wonder if
2 you could clarify the second recommendation. You
3 suggest deductions be allowed on loans for the
4 purpose of home improvement. Did you have in mind
5 the interest on them?

6 MR. MOSTYN: I would amplify that:
7 Loans and/or interest on loans.

8 COMMISSIONER PERRY: Is it the interest
9 cost or principal cost that you had in mind?

10 MR. MOSTYN: I had in mind also the
11 principal cost. Of course, I have to give a wide
12 range for you gentlemen to consider.

13 COMMISSIONER PERRY: I notice too,
14 your first recommendation is in terms of improvements
15 to the exterior of existing homes. Do you have to
16 acknowledge that the survey was --

17 MR. MOSTYN: Would probably include
18 interiors.

19 COMMISSIONER PERRY: Interior improve-
20 ments too?

21 MR. MOSTYN: Yes, I would think what
22 has applied to my recommendation for exterior would
23 also apply to the interior as well.

24 THE CHAIRMAN: Thank you very much
25 indeed, gentlemen. We have considered this and will
26 continue to do so. We appreciate your attendance
27 this morning.

28 ---A short adjournment.
29
30

1 THE CHAIRMAN: Mr. Secretary, I don't
2 want to start the main part of this before Mr. Perry
3 comes into the room. You told me you had a little
4 business, will you get that out of the way?

5 THE SECRETARY: There was a brief
6 received, Mr. Chairman, in Toronto from Dr. W. Glen
7 Sproule and Dr. Harvey Tonken, B.A. This brief was
8 a short brief and they have asked me to enter it into
9 the record on their behalf, which I now do, as exhibit
10 No. 92.

11
12 ---EXHIBIT NO. 92: Brief of Dr. W. Glen
13 Sproule, M.D., and
14 Dr. Harvey Tonken, B.A.,
M.D.

15 SUBMISSION OF

16 DR. W. GLEN SPROULE AND DR. HARVEY TONKEN

17
18 May 13, 1963.

19 Income Tax Commission,
20 Toronto, Ontario.

21 Gentlemen:

22 May I give my opinion please concerning
23 the method of taxing professional men, especially
24 practising physicians, which I consider grossly unjust,
25 and possibly harmful to the public's concept of healing,
26 as well as to the general economy of Canada.

27 As you are no doubt aware, a student
28 undertaking the study of medicine, does so with great
29 sacrifice, particularly if he helps earn his own way
30 through seven long college years. Then he must subsist

1 on salaries from \$25.00 to \$100.00 per month for four years
2 or longer, as a resident doctor in a hospital, in order
3 to become competent in a specialty. By this time, he
4 is at least thirty years of age, and probably married.
5 Some have children.

6 At long last, the young physician, filled
7 with his dream of serving God and humanity, turns to the
8 business of making a living in medicine, only to find
9 during the first year of his practice, that he is expected
10 to open an office, buy equipment, take care of the basic
11 requirements of his wife and children, pay off all his
12 accumulated debts to parents and others, and on top of
13 everything else, pay a huge proportion of his income to
14 the government. Obviously he can save nothing. It is
15 usually five years before a young doctor is out of debt.
16 By this time, he is thirty-five years of age, and
17 because of all his expenses, he is forced to look care-
18 fully at this business side of his profession. He
19 compared himself to the engineering student who has
20 been earning his high income since 23 or 24 years of
21 age; to the dentist, who has had only four years of
22 university training compared to his eleven. Is it any
23 wonder, then, that a good many doctors, realizing that
24 they have only a few years left to work, become
25 mercenary minded, and devote themselves to getting
26 ahead financially? This is not fair either to the
27 doctor, who began with such high ideals, or to the
28 patient, who readily sees that his doctor is making
29
30

unnecessary house calls in order to make more money!
Instead of the doctor's life becoming a joy in
serving God and humanity as he had envisioned, he finds
himself caught in a race to catch up with never-ending
expense. Most doctors have to borrow money from the
bank to pay their income tax during their first five
years of practice.

May I suggest that the following be
considered for all university graduates, but most
particularly for doctors:

1) that the physician be allowed the first two
years after graduation to be completely income tax
exempt, as this is his lowest time of earning power.

or

2) that a university graduate be graded according
to the number of years he has spent at university
studying, e.g., so that the first year working, he
pays a small proportion of his income, the next year
a little more, etc. -- until finally he is paying
his full share, when the number of years is up.

With thanks for your consideration,

Sincerely yours,

(sgd) W. Glen Sproule, M.D.

(sgd) Harvey Tonken, B.A., M.D..

THE SECRETARY: I have one other
item. You will recall, Mr. Chairman, that Professor
Carl Shoup and Mr. J. van Hoorn gave evidence before
the Commission on March 8. A summary of this has been

1 prepared by the editors of the Commission staff and
2 I would like to enter this summary into the record
3 as Exhibit No. 93.

ROYAL COMMISSION ON TAXATION

Report on discussions between

Mr. J. van Hoorn
Executive Director of the Bureau of Fiscal Documentation
&
Professor Carl Shoup
of Columbia University, & U.S. Member
E.E.C. Committee for the Harmonization of Taxes
&
Members of the Commission

held at Ottawa, Friday, March 8th, 1963

Commissioners Present:
Kenneth LeM. Carter, Esq.,
Chairman.
J.H. Perry, Esq., Acting
Chairman.
D.G. Grant, Esq.

1 The object of this discussion was to
2 to gain as much first-hand information possible about
3 the tax problems faced by the European Common Market
4 countries (E.E.C.) and in the seven countries which
5 comprise the European Free Trade Area (E.F.T.A.). It
6 was hoped, when the Common Market was formed, that the
7 progress made in the gradual harmonization of taxes among
8 these widely divergent economies would be of acute interest
9 to a body studying the tax structure of the Canadian
10 Federation. Moreover, as Europe presents one of the
11 most rapidly growing groups of national economies,
12 Mr. van Hoorn and Professor Shoup were asked specific-
13 ally whether tax measures had helped or hindered this
14 progress.

15
16 Both Professor Shoup and Mr. van Hoorn
17 were agreed that, considering the complexity and extent
18 of the various national and international tax systems,
19 surprisingly few studies of any depth had been made.
20 The National Economic Development Office (NEDL) in London
21 was a beginning in that country, and work was being done
22 in French Universities and by the Italian Government,
23 who have used tax measures to promote growth in
24 southern depressed areas. In Germany also there was
25 an awakening to the needs of counter-cyclical policies.
26 Moreover, the Netherlands and Belgium Governments were
27 acutely aware of fiscal policy as an economic weapon.
28 But in Europe, with its rapid rate of growth and
29 burgeoning economy, the need had been rather for a
30

1 brake on inflation than an accelerator for development.
2 It became clear, however, that such moves as had been
3 made, had not produced the detailed data on European tax
4 structures and economics which are needed for accurate
5 study.

6 Professor Shoup confessed that in view of
7 this and the size of the economic problems, economists
8 were reduced to a high level type of conjecture about
9 the effects of tax measures.

10 Passing to specific taxes imposed,
11 Mr. van Hoorn questioned whether Canada could learn
12 very much from Europe. He pointed out that many recent
13 measures introduced into Europe have been or still are
14 present in the Canadian tax structure, and suggested
15 that, rather than Canada learning from Europe, it might
16 be the other way round. Moreover, Professor Shoup
17 agreed that most Europeans do not regard their tax struc-
18 ture as a major factor in their growth, and that while
19 North Americans think that the European tax system has
20 been a paramount growth factor, this view is not so prev-
21 alent in Europe. Coupling this with the acute lack of
22 empirical work upon incentive legislation, it early
23 became apparent that though Europe was making great
24 strides towards a certain amount of unification of its
25 taxes, its problems of cascading turnover taxes, hidden
26 excise subsidies and so on, were very great. The
27 nearest parallel to the Canadian scene would be if every
28 province collected different income taxes and had
29
30

1 separate excise tax barriers.

2 Mr. van Hoorn then stressed the complica-
3 ated nature of most of Europe's tax laws. Many, he
4 said, originated during the First World War and were,
5 therefore, showing signs of strain in view of the rapidly
6 changing commercial structure of Europe today. Nor
7 were efforts to modernize them always successful.
8 Everyone was very happy to see the old Belgian laws
9 replaced by a new system, but it is so complicated that
10 no one can understand it.

11 Personal and Corporate Income Taxes

12 The taxes on personal and corporate income
13 were then discussed in detail. On both of these the
14 methods of taxation varied radically, but all countries
15 had a tax on total income of residents and the domestic
16 income of non-residents. In the corporate field, the
17 picture was infinitely more complicated. France,
18 Luxembourg, The Netherlands and Germany imposed, with
19 certain minor variations, a flat rate on both resident
20 corporations and on the domestic income of non-resident
21 corporations. Italy suffers from an antiquated system
22 of "schedular" taxes on various categories of income
23 at different rates. The U. K. has a profits tax on total
24 income and Switzerland has a federal structure of tax-
25 ation, with levels of tax imposed by the Federal Govern-
26 ment for defence, by the cantons (provinces) and
27 municipalities, in varying degrees.

28 (In Canada, corporation law,
29
30

providing about one-fifth of the Federal Income, is about 20 per cent of the first \$25,000 and thereafter about 50 per cent.)

Net Worth Tax

The next point covered by Mr. van Hoorn was the imposition of a tax common in Europe, but not found here in Canada. "Net worth" tax originated at the end of the last century in Germany. It is a capital levy on both individuals and corporations and was found in Germany, Luxembourg and The Netherlands, but in the latter country only on individuals. The Swiss cantons impose a net worth tax on individuals and corporations while the Italians have a net worth tax on corporations. Also net worth tax is found in Scandinavian countries. In answering questions upon this tax near the end of the day, it became clear that one of its advantages was that net worth tax could maintain spending by bringing hoarded cash into play. Secondly, if it is desired to favour labour income, as opposed to unearned income, instead of giving earned income exemptions, the source of unearned income is taxed. It is, therefore, unnecessary to give exemptions for earned income. Mr. van Hoorn made it clear that opinions in Europe on the merits of this tax were divided.

(Net worth tax does not exist in Canada, nor does any tax on

capital gain, as opposed to
capital, although judicial inter-
pretation of "capital gain"
has been narrowed in past years.)

Taxation in Federal State

Of acute interest to the Canadian
Federal scene were Mr. van Hoorn's comments on federal
taxation matters, both universally and within the
federal states of the E. E. C. He admitted that
federality was one of the most controversial elements
in Europe today, as it always has been in Canada.
While there is nothing comparable to the Canadian
situation, it was heartening to note that others shared
our general problems. Switzerland particularly, where
the cantons have the exclusive right to levy direct
taxes, the Federal Government is kept to a low budget
by the limits of its taxing powers.

Germany is also a federal state compar-
able to Canada. The German states have considerable
revenue raising powers of their own, and are entitled
to two-thirds of the income tax revenue. Moreover,
in all these countries, there is a feeling that taxes
within the E.E.C. are complicated enough, without
adding the sppe of Federal Provincial relations.
There is, therefore, a growing movement towards
centralization. Mr. van Hoorn put forward the view
that it is realized in these countries that fiscal and
stimulating economic policies can be thwarted by too much

1 local autonomy in taxation affairs.

2 (In Canada, the power to tax is
3 divided between the Federal
4 and Provincial Governments by the
5 B. N. A. Act. The Federal
6 has unrestricted powers; the prov-
7 ince may raise money by direct
8 taxation within the province for
9 provincial purposes. This
10 latter has been extended enormously
11 by judicial interpretation.)

12 Incentive Taxation

13 Incentive taxation was then exhaustively
14 discussed. It was admitted at the outset that while
15 many measures had been taken in this field in several
16 European countries, there had been little analysis of
17 results. Taking his native Holland as an example,
18 Mr. van Hoorn stressed that the transition from a
19 principally agronomic society to an industrial one had
20 been aided, -- at least so far as anyone could tell,
21 by extensive incentive tax measures. Moreover, in
22 Germany, taxes were used to foster the building industry
23 to help restore the devastations of war. Most of these
24 incentives, however, were dropped during the 1950's.
25 One method which was used extensively in Germany was to
26 split the rate of income tax upon corporations. The
27 prime purpose of this was to stimulate the distribution
28 of profits. It was a simple scheme whereby distributed
29
30

1 profits were taxed at a significantly lower rate than un-
2 distributed profits. The success of this measure has
3 been challenged, however, on the grounds that the capital
4 market in Germany is still very poor. German shares
5 are difficult to obtain and unpopular.

6 The favouring of certain geographical
7 depressed areas has also been tried in Europe, but
8 it is regarded as discriminatory, and difficulties of
9 application are immediately apparent. Only in Italy has
10 any extensive work been done by the Central Government,
11 and no studies are available to show whether their work
12 has been beneficial. In the U. K., where the problem is
13 acute, little has been done in the tax field, and in
14 the U. S. it is constitutionally impossible.

15
16 (In Canada such methods have
17 been recently instigated, allowing
18 special capital allowances for
19 investments in designated
20 depressed areas. The results
21 are as yet uncertain.)

22 Special concessions for small businesses
23 have been made recently in the E. E. C. Prior to that
24 time, by merging, small businesses were liable for
25 heavier taxation. The new concession in France allows
26 small businesses of capitalization under about \$10,000
27 to establish a holding company for research purposes.

28 Double Taxation.

29 The discussion of small business and
30

1 big business raised the topic of double taxation on
2 an international as well as a national level. This
3 has proved one field in which great efforts have been
4 made to use taxation to implement Government policy.
5 But here again, expert opinion on both sides of the
6 Atlantic is radically divided on its incidence,
7 particularly on the extent to which corporate income
8 tax is passed on to the consumer. In Europe it is not
9 generally accepted that it is passed on at all. In
10 Canada it has been said that as much as 95 per cent of the
11 tax is passed on to the consumer through higher prices.

12 Mr. van Hoorn explained that the general
13 situation in Europe was that there were taxes on both
14 corporations and shareholders, and to say that there
15 was no double taxation in countries like the U. K. is
16 a fairy tale, because although there is no double
17 taxation in the limited field of income tax, surtax and
18 profit tax take ample care of the situation.

19 The most interesting example in Europe of
20 attempts to deal with the problem is found in Germany,
21 where the rate of corporate income tax is 51 per cent,
22 and that on distributed profit only 15 per cent.
23 This split rate has been recommended as the best
24 solution to the problem of double taxation of companies
25 and their shareholders. Similarly, this device also
26 solves other problems. Notably, it will increase the
27 flow of investment capital into channels where it is
28 most needed, thus materially assisting the capital market.
29
30

1 Mr. van Hoorn explained its implication in detail and
2 dwelt on the dangers of this system, particularly in the
3 situation where the parent company is outside Germany
4 and the subsidiary is German. This means that the
5 subsidiary can distribute profits at the cheap rate and
6 then loan money back, so that a 36 per cent (51 per cent
7 - 15 per cent) tax rate can be gained.

8 A second abuse of this system is that
9 many German companies can establish a holding company
10 abroad and have German profits distributed to such a
11 holding company. Thus, all German profits would be
12 taxed at the lower rate. Mr. van Hoorn put forward
13 the view that the German system would be less liable
14 to abuse if the results of double taxation were reduced
15 by a tax credit system whereby shareholders would be
16 entitled to a credit for corporate income tax against
17 their personal tax. Examples of such a credit are
18 found in the U. K. and under the new Belgian Income
19 Tax.
20

21 (A form of tax credit system
22 is already in operation in Canada.

23 A tax credit of 20 per cent of
24 dividends paid by Canadian
25 companies is deductible.)

26 Corporate Accumulation

27 The speaker then dwelt briefly on the
28 taxation of corporate accumulations. This is not a
29 uniquely European situation, nor does it present
30

1 particular problems, save in abuses arising from hold-
2 ing companies where tax treaties are favourable.
3 Measures have been taken to prevent this, but, in general,
4 except for the surtax in the U. K., no provisions exist
5 against the accumulation of profits.

6 Family Income

7 The family income field, the Commission
8 discovered, is radically different in Europe from the
9 situation in Canada. In most European countries the
10 income of the family is pooled, the breadwinner paying
11 all the tax, even if he is not working. It was
12 admitted by Mr. van Hoorn that it was thus cheaper to
13 live in sin and, therefore, in Germany many young
14 people weren't marrying. This lead to government
15 action to split income tax. In England and Holland,
16 the married woman has a larger deduction for earned
17 income which helps even out this inequality.
18

19 (In Canada, married couples are
20 taxed together, unless the wife
21 makes over \$1,250, in which case
22 each can file a separate return.)
23
24
25
26
27
28
29
30

1 The Work of the Neumark Committee

2 At this point, Professor Shoup lead the
3 discussion on to the work of the recent Neumark
4 Committee, and explained in detail some of their
5 findings. The Committee was composed of academic
6 personnel, set up by the Commission of the E.E.C. about
7 two years ago to study public finance. The terms of
8 reference of the Committee were to discover what
9 aspects of the present tax system in Europe would
10 distort competition in the Common Market and
11 how tax barriers could be eliminated. It was recognized
12 that a discussion on this point would be beneficial
13 to this Commission only in certain restricted areas.
14 In fact, Professor Shoup stated that he would leave
15 the relation of the Neumark Report to Canadian
16 affairs to other hands. Although the topics
17 discussed by Professor Shoup were essentially
18 practical and although they contained little, if any,
19 theoretical content, his comments proved of value
20 nonetheless to the Commission. The Neumark Report
21 spent much time examining the practical problems
22 arising from tax barriers between countries and while
23 this bore little relation to the federal-provincial
24 tax structure in Canada, it was of interest from the
25 point of view of Canada's relations with other
26 countries.
27
28

29 Under the universal European system
30 employing the destination principle, each country

1 grants exemption on its exports from the sales tax,
2 and taxes imports and domestic goods at the same
3 level by a domestic sales tax.

4 Various methods of avoiding tax
5 barriers were discussed, such as the concept of the
6 floating exchange rate and the obvious advantages
7 inherent in the truly interior Common Market concept
8 in which there are no excise barriers at all. It
9 was, however, realized that from the European point of
10 view both of these solutions were totally unrealistic.
11 Another solution is the imposition of a heavy
12 retail tax. However, the committee were of the
13 opinion that while the public might accept a
14 5 per cent tax, to double or triple it would be asking
15 for trouble.
16

17 Value Added Tax

18 The main recommendation centred upon
19 the value added tax which is already, albeit with some
20 difficulty, applied in France. The principle is in
21 theory appealingly simple. A tax is imposed at every
22 stage in manufacture and distribution. The manu-
23 facturer pays a tax on the finished product from which
24 he may deduct the taxes paid during previous stages
25 of manufacture or distribution. The advantage
26 of this plan from the Canadian viewpoint is that it
27 is neutral in its effect as the amount of tax will be
28 the same however many stages the goods pass through,
29 always provided the net sales prices are the same.
30

1 A further advantage is that in its administration
2 each level of taxation assesses the previous one.

3 However, Professor Shoup did not dwell
4 upon some of the difficulties of administration
5 and of the collection of this tax. Certainly the
6 French experience has not been altogether happy.
7 However, it became clear that the new concept of the
8 "value added tax" was becoming highly regarded by
9 European economists.

10 The Chairman expressed the view that
11 rather than glean more factual information from
12 the two experts, the floor should be thrown open
13 to members of the Commission to ask questions on
14 general policy and trends in Europe today which might
15 have bearing on the Canadian scene.

16
17 Personal Tax Rate Structure

18 The first point to be raised was whether
19 there was opposition to the exceptionally high rates
20 of personal income tax in the higher income echelons.
21 Professor Shoup felt that the issue was not between
22 proportional and progressive personal tax, but
23 between progressive tax with loopholes and progressive
24 tax without loopholes. He felt that even those
25 suffering high rates were happy to bear it as long
26 as escape hatches were preserved.

27 Capital Gains

28 The distinction between capital gain and
29 income was the next point raised. This has been the
30

1 subject of much litigation in Canadian courts, but
2 Mr. van Hoorn said few cases had arisen in Europe.
3 However, Germany and Sweden have developed rules
4 relating to the time lapse between purchase and
5 sale similar to those in use in Canadian courts.

6 (As has been said, Canada has no
7 capital gains tax as such but
8 people who buy real property, if
9 sold quickly and at large profit,
10 are looked on with suspicion.
11 e.g. see Regal Heights case
12 (1960) C.T.C.46.

14 Net Worth Taxation

15 Professor Shoup was asked why European
16 economists have shown so much enthusiasm for this
17 method of taxation. While he admitted opinion was
18 divided on its merits, he repeated some of
19 Mr. van Hoorn's arguments and added some of his own.
20 First, it is an inducement to put money to work.
21 Secondly, one way in which a higher tax burden can
22 be placed on investment income is to tax all incomes
23 earned and unearned alike at a similar level. A
24 net worth tax can then be imposed separately which
25 will, in effect, be a tax on unearned income. However,
26 one point did emerge. It is impossible to get tax
27 rebate on net worth. On income tax, it is possible,
28 which might mean that income tax was the more
29 conducive to risk taking.
30

1 This lead naturally to a discussion of
2 the so-called tax on apparent wealth. Many stories
3 have been heard, especially from Italy, about
4 people paying tax on the sort of car and house they
5 have. This point was soon cleared up however.
6 It is not a capital levy, but these facets are merely
7 used to indicate income.

8 Another important aspect of net worth
9 tax was then mentioned. Professor Shoup
10 suggested that it could with advantage replace death
11 duties. The concept of death duties in legislation
12 in Canada is based on an attempt at redistribution
13 of capital wealth and the prevention of enormous
14 estates being passed on by inheritance. Trusts
15 and gifts inter vivos, however, have left the
16 ideals of wealth distribution inherent in the death
17 duties taxation very tattered indeed. Moreover,
18 a net worth tax would tax the present generation
19 rather than future ones. Legal complexity is also
20 reduced. Doubts were expressed, however, on the
21 possibility of the imposition of such a tax. It
22 was felt that there would be much hostility from the
23 public towards a tax of this nature, and since the
24 amount of revenue raised by death duties is relatively
25 small, the trouble caused by such a tax might be more
26 than the tax was worth.

27
28 (The estate duty in Canada and the
29 Capital Gains Tax in the U.S. each
30 only raise about 1 per cent of

1 national revenue. A separate
2 department of the Federal Govern-
3 ment is needed to collect this tax
4 because of its complexity.)

5 Value Added Tax

6 As has been mentioned above, the concept
7 of the value added tax was something new to
8 Canadian economists, and the Commission returned to
9 this topic. Professor Shoup was asked what criticism
10 had been made of it.

11 He pointed out that if one disapproves
12 of heavy sales tax, then one disapproves of value
13 added tax for the same reason. One criticism which
14 could be levied was that it had to be raised from
15 a large number of manufacturers, distributors
16 and so on with the attendant administrative costs.
17 Although the French value added tax was extended and
18 refined during the 1950's, world experience of the
19 value added tax has not been greatly encouraging.
20 In Michigan where there is a business receipts tax
21 similar to the value added, it has suffered from
22 amendment and truncation. The only conclusion
23 Professor Shoup drew from this is that the tax is
24 more aptly used by national or international bodies
25 than by state or provincial legislatures.

26 This immediately brought the value
27 added tax into a different perspective from the
28 Canadian point of view. A member asked whether, on
29
30

1 the subject of the value added tax, an analogy
2 could be drawn between the regions of Europe and
3 the economic regions of Canada.

4 Death Duties

5 Death duties in Europe were then
6 examined. Mr. van Hoorn felt that only Switzerland
7 offered an attraction as a domicile from the point
8 of view of death duties. In Europe generally, the
9 death duty taxes varied radically. In Italy, two
10 taxes are levied, one on the estate, the other on
11 inheritance. He then mentioned that valuation at
12 time of death was general for stocks and shares, but
13 the valuation of a life interest under a trust --
14 a legal concept foreign to continental lawyers --
15 was very difficult indeed. However, the problem is
16 much less than in countries governed by the common
17 law.
18

19 (Canada has inherited in nine of
20 the provinces the common law
21 concept of trust. While no "trust"
22 exists under Quebec law, it is
23 simple for a Quebec resident to
24 set up a trust in another province.

25 Depreciation Allowances

26 The LIFO system is now generally
27 accepted in Europe for inventory valuation. Elaborate
28 schemes have been adopted to deal with the problems
29 of depreciation allowance in connection with industry
30

1 since few governments can admit inflationary
2 tendencies in their currency.

3 Business Expenses

4 Mr. van Hoorn stated that most
5 European countries were generous with expenses,
6 even those unrelated to income, such as legal costs.
7 There was a movement following the States to
8 tighten up on expenses, in Germany, Italy and France.

9 (No comparable clamp down on
10 expenses has yet occurred in
11 Canada. There is reasonable
12 tolerance, provided always that
13 the expenses are incurred in the
14 earning of income. e.g. only various
15 headings of legal expenses are
16 deductible.)

17
18 There was, unfortunately, no time to
19 delve in any depth into the problems of the relation-
20 ship between government and business losses. However,
21 it was agreed that Government attitudes towards
22 profit and loss showed large areas of inconsistency,
23 but a prima facie case could be made for Governments
24 sharing in losses as well as profits in some areas of
25 business.

26

29
30

1 THE SECRETARY: Mr. Chairman, we now
2 have a brief presented by Professor K. J. Charles,
3 Assistant Professor, Department of Economics,
4 University of Manitoba. This is a person brief
5 submitted by Professor Charles who is going to speak
6 to it this morning and who tells me that his Department
7 is aware and his University is aware of this brief. I
8 would like to enter it into the record as exhibit No.
9 94.

10 ----EXHIBIT NO. 94: Brief of Professor K. J. Charles.

11 SUBMISSION OF
12 PROFESSOR K. J. CHARLES
13 ASST. PROFESSOR OF ECONOMICS, UNIVERSITY
14 OF MANITOBA.
15

16 THE CHAIRMAN: Thank you. Good morning,
17 Professor Charles. Thank you for your submission to
18 us and for coming here today. Your brief makes
19 extremely good reading, I might say. We have all
20 read it and there is no need to do that again. I
21 enjoyed every bit of it and thank you for it. I
22 assume that you were prompted to present this brief
23 because of your interest in taxation and because you
24 are an economist and you are teaching at the University
25 of Manitoba. Would you care to tell us something
26 about your qualifications and also if you would like
27 to summarize your submission or speak to it.

28

29

30

1 PROFESSOR CHARLES: Thank you, Mr. Chairman.

2 I am grateful to you for affording me this opportunity
3 to appear before you. My main motive in presenting
4 this brief was to represent the viewpoint of the
5 economic theorist. I am aware from public
6 pronouncements and various editorials that have appeared
7 in the public press that there is a great clamour for
8 reduction of taxation in Canada. I am not convinced
9 that reduction of taxation by itself will herald an
10 era of rapid economic development and growth. I
11 believe that taxation has a positive role to play in
12 economic growth as yet. I think this view should not
13 go unpresented.

14 I think the economic theorist is conscious
15 of a gap between economic theory and economic reality.
16 I think he feels this gap at two stages. First, he
17 is conscious of a gap between economic theory and the
18 theory of economic policy. There is a tendency in
19 my profession, I am afraid, to spend a great deal of
20 time building elegant economic models without often
21 trying to see to what extent these models are applicable
22 to economic reality; therefore this type of gap develops
23 in economic theory.

24 A second gap, which I would say is even more
25 serious, is the gap between the theory of economic
26 policy and the policy itself, largely because policy is
27 not in the hands of the economist and he is quite aware
28 of the fact that what may seem right from the point of
29 view of economic theory is not put into practice
30 simply because it is not acceptable to the public or

1 to the effective section of the public.

2 In the case of the contributions made by
3 James Keynes to depressions now I think it is
4 generally accepted capitalist society has been saved
5 from very serious crises because of the application of
6 Keynes policies.

7 I think due to the passage of time and due to
8 the fact that in the world we are confronted with new
9 problems we are now entering an era when the crisis
10 faced by capitalist society is not a simple one to
11 merely maintain full employment, but rather that
12 capitalist society can maintain a stable and high rate
13 of economic growth.

14 This, I think, capitalist society presently
15 faces, and for this the mere application of Keynes'
16 policy would be inadequate because it would deal with
17 short term problems of maintaining full employment.
18 Keynes' theory was related to what you might call a
19 closed model. It did not take into account the
20 various repercussions on the economy such as international
21 trade.

22 In spite of the continuous application of
23 Keynes' policies, Canada has been continuously through
24 the last several years confronted with the problem of
25 rising and persistent unemployment.

26 I would submit the reasons for this are
27 mainly the following: On the one hand you will
28 experience, as shown if you apply Keynes' policies,
29 rising prices and this affects international
30 trade and imports rise very rapidly, as can be

1 seen in Canada in 1956 when there was a sudden spurt
2 in imports. All this has a very serious effect on
3 the balance of payments of the country. Therefore,
4 Keynes' policy has to be chopped off prematurely
5 because we are dealing with not a closed but open
6 economy.

7 Another factor is the fact that while the
8 very success of Keynes' policy is in its application,
9 it introduces an element of inflexibility in the
10 economic system.

11 There was a time when the business man could
12 not be sure of proper policies by a Government to combat
13 depressions, say of the dimensions of the one we had
14 in 1929, and therefore prices had a fairly high
15 degree of downward flexibility in depression or
16 inflation.

17 Today the economy is assured of a certain
18 level of aggregate effective demand. Therefore there is
19 not the same incentive to reduce prices. This is further
20 enhanced by the fact that we have not highly competitive
21 industries and firms in the economy but rather
22 very large types of industries and firms. When you
23 pursue Keynes' policy and increase effective demand in
24 times of unemployment this does not bring about
25 the consequence which Keynes' policy could, assuming
26 an economic crisis, by a high degree of production. His
27 theory is the people will demand more entertainment and
28 more entertainment, more clothes and more goods and those
29 will be produced because of the highly competitive nature
30

1 of the economy.

2 Our modern economy does not have this high
3 degree of competitiveness with the result that when
4 the Government implements Keynes' policies, total
5 effective demand will demand more goods and services;
6 but the incidence of more goods and services produces
7 a situation which would bring more people into
8 employment, industries raise prices on the commodities
9 and, therefore, I think this is one of the reasons
10 for the severity of some of the crises we have had in
11 recent times.

12 We have the spectacle today of overall lack
13 of effective demand combined with an inflationary
14 situation so that this, I believe, is the reason why
15 many persons applying Keynes' model, without taking
16 into account all the factors which I referred to, have
17 tended to say "What is the necessary restriction on
18 the monetary policy and fiscal policy?"

19 I believe society is confronted with the
20 situation that at the same time there is overall lack
21 of effective demand. Keynes' policy requires we should
22 increase effective demand but with increased effective
23 demand drawing more people into employment we find prices
24 going up. This is a situation in the simple Keynes' models.

25 A third factor is the fact Keynes' policy says
26 "If you want to have full employment total effective
27 demand should be of the magnitude that all persons are
28 drawn into employment." Keynes' policy did not
29 set the economy in the text of a time dimension.

30 What happens is when a certain amount of

1 capital is forthcoming this increases the capacity
2 of the nation to produce. Therefore it is not
3 enough if in 1960 we maintain the same effective demand
4 we had in 1959. We need continuous increase in the
5 total effective demand of society. We need continuous
6 increase in the growth of the economy.

7 Here we are confronted with the problem in
8 Keynes' policy. This belongs to the realms of post-
9 Keynes' economics. It has strived to present dynamic
10 systems to analyse the problems of our society.

11 Here we find a certain feature as a paradox
12 of growth. Namely, in times of scarcity of capital
13 business men want to invest more. That seems the
14 profitable thing to do. When investment takes place at
15 too rapid a rate the economy is not able to keep up with
16 it, especially because of leakages through international
17 trade. The total effective demand does not keep pace
18 with the effective demand necessitated by the large
19 increase in the productive capacity of the National
20 so very soon the high rate of investment leads to
21 excessive capacity, the economy is characterized by
22 excess capacity.

E/ET/dpw 1

2 Here, the private entrepreneur, naturally in
3 such an environment, has no incentive to invest more
4 because, from the point of view of the marginal calculus
5 of the private entrepreneur, it is not desirable to
6 invest. On the other hand, it is precisely the time
7 when more investments should be forthcoming so we have
8 a paradoxical situation of requiring more investment
9 precisely at a time when capital is scarce; we have to
10 build more factories when factories show excess capacity;
11 we have to curtail building when we find that capital
12 is scarce.

13 This is one of the important features of the
14 dynamic system, and this, I submit, requires, too,
15 control of the volume of investment. While it is
16 desirable, from the long-term point of view, investment
17 should be continuously growing.

18 It is highly important that short-term spurts
19 in investment should be avoided; excess investment, I
20 should think, is not desirable for any short space of
21 time, especially the growth of investment that the
22 Canadian investment had in 1955, 1956, 1957. This should
23 be avoided, and it seems to me that the policy implication
24 of this is depreciation allowances will be necessary in
25 times when it is in the long-term interest of economy
26 that investment should be encouraged. While depreciation
27 allowances, from a static point of view, may not be
28 desirable, from a dynamic point of view the economy
29 requires more investment precisely at the time when
30 private enterprise is not willing to invest more because
it is contrary to the immediate interest of private

2 1 enterprise.

2 From a long-term point of view, if action of
3 this sort is taken, this will encourage growth of the
4 economy and private enterprise will benefit by it
5 because this is something that should follow from the
6 projection of the collective actions of all entre-
7 preneurs, and this is where the Government is in an
8 advantageous position in this regard, and when this is
9 done the economy can be made to maintain not a high but
10 a steady rate of growth.

11 The other point that I had made: what is
12 desired is not investment per se but rather growth of
13 the economy. I certainly am conscious of the fact that
14 investment is only one element in the economic growth,
15 and I am not sure it is the most important element. A
16 number of studies have shown that it is the technological
17 progress which is the more powerful propellant of
18 economic growth, and therefore our economic policy
19 should be not simply to encourage investment per se but
20 rather to encourage economic growth.

21 For this I submit we require the very great
22 encouragement of technological progress in society.
23 Technological progress, of course, is not a term which
24 can be analyzed very easily because it is something
25 much more intangible than capital investment. Capital
26 investment often goes hand in hand with technological
27 progress, but I think the policy makers should be
28 conscious that although technological progress is impor-
29 tant, education, research, all play a vital role in our
30 economy.

3 1 There is now a recognition of the very high
2 importance that technological progress, research and
3 education have in the economic growth. For the last
4 several years most of the economic people have been
5 treating investment as the sole generator of economic
6 growth. This is, however, being corrected, and I
7 would like to see this corrected in terms of economic
8 policy, as it were.

9 I think, Mr. Chairman, this is the burden of
10 my song.

11 THE CHAIRMAN: Thank you, Professor Charles.
12 We have some questions for you. For myself, I would like
13 to refer to something which you just mentioned: the fact
14 that prices had gone up, or, at least, had not gone down
15 by virtue of lack of competition, restrictive competition.
16 I think it is the experience of foreign investors, inves-
17 tors in Canada, particularly those who have, in fact,
18 started their own companies in Canada, they have found
19 it to be a pretty competitive market, and in many cases
20 these people have not been successful because of the
21 very high degree of competition in Canada.

22 I would think, if we look at statistics of
23 company profits over a period of years, we would see that
24 they have gone down in relation to sales, thus indicating,
25 I would suspect, an increased inefficiency of distribution,
26 perhaps, or manufacture, and, of course, I think they
27 have gone down in relation to capital. Perhaps the
28 best measure of that is the price-earnings ratio we see
29 imposed in respect of shares trading on the stock market.

30 I was curious as to why you would make a point

4 1 that prices have either gone up or not come down as much
2 as might be expected.

3 PROF. CHARLES: Well, I think that in the
4 Canadian economy there are a number of forces operating
5 which have prevented the transformation of the Canadian
6 economy into a full-fledged manufacturing nation. I
7 would say statistics show that in the decade 1950-1960
8 the manufacturing sector of the Canadian economy has
9 not registered really rapid growth.

10 THE CHAIRMAN: I beg your pardon?

11 PROF. CHARLES: Has not registered really
12 rapid growth. It has been growing at a rate of three or
13 four per cent. This, I would submit, is unsatisfactory.
14 We are aware that development of the manufacturing
15 industry could absorb into employment the increasing
16 population of the country, so I feel the growth of the
17 manufacturing sector of the economy was not satisfactory.

18 This is, perhaps, complicated by the fact that
19 foreign interests, when they establish in Canada, they
20 have their eyes mainly glued to the domestic market.
21 Many of them are established by parent companies, and
22 they establish here expressly for the purpose of
23 competing in the domestic market. This, I think, is
24 not in the best interests of the development of the
25 economy in that we feel it is an impediment to the
26 development of Canada's export trade.

27 A substantial segment of the industry is
28 geared completely to the domestic market, and therefore
29 its sights are not turned towards foreign markets.
30 This, I think, exercises a lack of the growth of the

5 1 Canadian export trade.

2 THE CHAIRMAN: That is a disability in regard
3 to capital. However, I would suggest, on the other
4 hand, it does provide employment and as such it is
5 useful to the Canadian economy.

6 COMMISSIONER WALLS: I have some questions
7 on a later part of your brief. Are you going to
8 enlarge more on your brief?

9 THE CHAIRMAN: I think Professor Charles did
10 not expect to say anything more from his brief except
11 to reply to questions; is that right?

12 PROF. CHARLES: Yes.

13 COMMISSIONER WALLS: I would like to jump
14 forward to page 11 where you emphasize the fact that
15 Canada is among the developed countries that rely more
16 heavily on indirect taxes. We received varying figures
17 on this position. I notice in your figures you include
18 customs tariffs, which, of course, was about 574 million
19 last year.

20 Do you really think that is a true picture of
21 the amount of reliance on either direct or indirect
22 taxes, because, is it not a fact that today the customs
23 tariff is primarily, in effect, to protect industry
24 rather than as a revenue-producer, and therefore, by
25 including it, it really does not give a true picture of
26 the amount of indirect taxation. What do you think of
27 that?

28 PROF. CHARLES: I would say in a country like
29 Canada, where international trade is of crucial importance,
30 one should take into account the customs duties as being

6 1 also a lucrative source of revenue. The primary purpose,
2 no doubt, is to offer protection to the Canadian indus-
3 tries, but I would submit that its revenue-producing
4 capacity is quite large and therefore I would say ---

5 COMMISSIONER WALLS: It is not really a tax
6 revenue. I agree the revenue is large, but it is not
7 really a tax revenue.

8 PROF. CHARLES: Oh, well, it is a tax imposed
9 on the import of commodities, and finally the tax is
10 borne - dismissing for the moment the division of inci-
11 dence and so on - the tax is borne by Canadian citizens
12 who purchase goods from abroad and they pay a tax not
13 in a direct way and I think there is justification.

14 COMMISSIONER WALLS: Yet in spite of the fact
15 that you believe we are heavy in indirect taxation, you
16 still go on in your brief to recommend increased duties
17 by the turnover type of tax; is that right?

18 PROF. CHARLES: Yes.

19 COMMISSIONER WALLS: I notice you are quite
20 enthusiastic about France. You say France has been
21 famous for so many imaginative tax innovations, and you
22 go on to what she is doing in regard to turnover tax.

23 Is it not a fact that France has the greatest
24 difficulty of all countries in the world of collecting
25 her direct taxes - I believe it is only 40% of her
26 income tax that she collects each year - which has
27 forced her into the field of indirect taxation?

28 PROF. CHARLES: That is quite possible. Also,
29 I make the point that the study of comparative tax
30 systems is a very new field, and I think it is a field

7 1 which should be approached with a great deal of caution
2 because different tax systems are designed to suit the
3 historical, cultural and economic problems and situations
4 that prevail in different countries, and I have no doubt
5 that the French tax system has been greatly influenced
6 by those forces.

7 Now, having said that, I would say, in France,
8 the French authorities have made many innovations,
9 especially in the field of indirect taxation which, I
10 think, are worthy of at least a very careful study by
11 us. My argument for increased reliance on indirect taxa-
12 tion is not based simply on the French case, but it is
13 based on my conviction that as time passes if you rely
14 more and more on indirect taxes which are not felt so
15 much as direct taxes, this would provide a lucrative
16 source of revenue for the Government when revenue is
17 required, and also it gives a more direct control over
18 the total volume of consumption in society.

19 If our tax systems are going to be geared,
20 not simply for short-term policies, but for the express
21 purpose of encouraging economic growth of the nation,
22 then I think we have to exercise a considerable amount
23 of control over the total volume of consumption so that
24 more and more funds can be released from private consump-
25 tion to private investment as well as to public investment.

26 In the case of indirect taxation it is much
27 more flexible than, say, direct income tax. There are
28 a number of tax experts who suggest that an indirect
29 tax like sales taxes the rate can be varied even on a
30 quarterly basis. I see this as a vehicle of great

8 1 importance.

2 COMMISSIONER WALLS: I presume the reason you
3 are enthusiastic about the turnover tax as being the
4 best method of consumption tax is that you think it
5 will get away from the so-called pyramiding that one
6 encounters. However, would you not accomplish just as
7 much with a graduated retail sales tax as you would
8 with turnover tax. Would it not achieve just the same
9 purpose?

10 PROF. CHARLES: Yes. I have also pointed
11 out in the brief that in the case of Canada there may
12 be constitutional difficulties in the way of having
13 one turnover tax for the whole country, and some kind
14 of compromise may be desirable as long as there is some
15 agreement that this tax should be operated in a contra-
16 cyclical fashion.

17 COMMISSIONER WALLS: Your idea of graduation
18 is more to adjust the economy, is it, than to do away
19 with the excise tax as separate from the sales tax?
20 That is your purpose in suggesting a graduated tax?

21 PROF. CHARLES: Yes.

22 COMMISSIONER WALLS: I am also interested in
23 what you use as a medium of exemption. You mention a
24 number of things. What would be your basis for
25 creating exemptions, or, on the other hand, to add to
26 that, on what basis would you create graduation? Would
27 you set a higher rate on luxury taxes and a lower rate
28 on necessities, or what basis would you use for
29 graduating tax?

30 PROF. CHARLES: I think I would say in the

9 1 case of the essential commodities, the rate could be
2 lower than in the case of luxuries or vanities.
3 However, in both cases I would be more interested in
4 seeing that whatever rate the Government may decide on
5 that it would operate this in a contra-cyclical fashion,
6 so that I would say my private interest is, one:
7 interest in economic growth, and my primary interest is
8 in seeing this would be operated in a contra-cyclical
9 fashion. I would hope that the rate of taxation would
10 be higher on luxuries.

11 COMMISSIONER WALLS: If you are using gradua-
12 tion for the purpose of creating economic growth, what
13 difference does it make - I am thinking of luxuries;
14 it might be something else on which you put the heavier
15 tax - if you are going to use it entirely as a medium
16 that can be changed every six months? Am I not right?

17 PROF. CHARLES: That is right.

18 COMMISSIONER WALLS: Those are all my questions.

19 THE CHAIRMAN: I am not sure I was quite satis-
20 fied with the answer, but I took the meaning of your
21 question to be: what would be the reasons for imposing
22 a higher tax on some goods than on other goods. You
23 did say non-essentials should, perhaps, bear a higher
24 tax. On liquor, high tax is being imposed because of
25 moral reasons - I do not know - but have you a criteria
26 to suggest to us on what the higher indirect taxes
27 should be applied? I think, perhaps, Mr. Walls' ques-
28 tion has not been answered.

29 COMMISSIONER WALLS: The witness stated the
30 main purpose for the graduation was to make it-

10 1 adjustable to the economy; not a matter of taxing
2 luxuries as against necessities, and if you do that,
3 I don't know how you are going to pick out products
4 either.

5 THE CHAIRMAN: Let us ask the witness if he
6 has anything to add.

30

1 PROFESSOR CHARLES: I would say, Mr. Chairman,
2 from purely the point of view of economic growth I am
3 not conscious of overwhelming reasons in favour of
4 heavier taxes on luxuries than on essential except
5 perhaps I would say that a heavy tax on the necessities
6 of life may, by reducing of consumption on things
7 in which people stand in need, reduce the person's
8 ability to work.

9 This probably is not a very serious problem
10 in a prosperous nation but surely in a poorer country
11 this would be of great significance. If you curtail
12 the consumption of essentials you may deprive persons
13 of the necessities of life and thereby affect their
14 ability and willingness to work and save.

15 THE CHAIRMAN: Thank you.

16 COMMISSIONER BEAUVAIS: I have just one
17 question. On page 29 you are talking about investment
18 reserves in Sweden. Can you give me some explanation
19 on how it works?

20 PROFESSOR CHARLES: Yes. I think that of all
21 the devices introduced in recent years to exercise
22 control over the total volume of investment the
23 Swedish one is probably the most daring and challenging
24 of all. They have a long experience in this and in
25 Sweden too the gulf to which I made reference at the
26 outset, the gulf that exists between economic theory
27 and policy, is not so great. Economists have had a
28 direct say in the conducting of policy in Sweden.
29 Sweden now is at the stage, I would say, where they
30

1 have shifted attention from using the budget as a
2 device for maintaining the stability of the economy
3 to exercising control over the total volume of
4 investment itself and for this they have the diminishing
5 balance method. A great deal of freedom is given to
6 the business man in deciding as to what the life of
7 an asset should be for which they claim depreciation.
8 The depreciation reserve which has been created in
9 Sweden encourages the business men to transfer their
10 funds to an investment reserve over which control is
11 exercised by the Labour Market Board. In times when
12 the persons in charge of policy are convinced that
13 there is going to be too much over-investment, which
14 it is the purpose of the economic policy to control,
15 then no permission is given for entrepreneurs to
16 withdraw money from their reserve for the purpose of
17 additional investment.

18 On the other hand, if the policy-makers are
19 convinced that unless increased incentive is provided
20 for investment there would be deflationary effects on
21 the economy then they are permitted to transfer funds
22 for the purposes of investment. An additional ten
23 per cent tax credit is given on these occasions when
24 money is withdrawn in this fashion.

25 I think so far this has proved to be economi-
26 cally successful. In 1958 when many economies in Europe
27 suffered total volume investment decline in Sweden
28 it increased because they are making use of the
29 reserve fund for increasing investment. Many business
30 men feel that a period of recession is the most

1 opportune moment to invest. They are assured the
2 Government is not going to permit a great depression
3 of any severe magnitude; they feel a period of low
4 costs is the opportune moment to undertake investments
5 which they might not otherwise undertake in the absence
6 of the incentives provided by the Swedish system.

7 COMMISSIONER BEAUVAIS: Investment in
8 capital goods?

9 PROFESSOR CHARLES: Yes. It is what you
10 would refer to as capital expenditure as opposed to
11 current expenditure.

12 The Swedish Government also exercises some
13 control as to the type of capital expenditure that
14 can be undertaken. There is a great deal of latitude
15 in their choice of what kind of capital expenditure
16 should be undertaken.

17 COMMISSIONER BEAUVAIS: Is it not a fact that
18 depreciation is an investment reserve?

19 PROFESSOR CHARLES: Yes. In Sweden what
20 they attempt to do is this: The normal depreciation,
21 which is, say, thirty per cent, that depreciation
22 allowance is available for the purposes of capital
23 investment but the Swedish policy-makers are interested
24 in encouraging investment at times when the ordinary
25 incentives provided by the fairly liberal depreciation
26 policy would not be adequate.

27 COMMISSIONER GRANT: It has been intimated to
28 the Commission, Professor Charles, that the Swedish
29
30

1 system of establishing investment reserves has not
2 caught on with any great favour in any other European
3 country and in fact I think there is some measure of
4 doubt how effective or popular it is today in Sweden.
5 Have you any recent information on that?

6 PROFESSOR CHARLES: Well, in the case of
7 Britain they have their policy of investment allowance.

8 THE CHAIRMAN: That is quite different.

9 PROFESSOR CHARLES: Yes. Because they have
10 measures like the Swedish reserve system. Another
11 factor probably is the fact Europe has been extremely
12 buoyant during the last decade and countries like
13 Germany, Italy and France have registered very high
14 rates of economic growth and they probably are not
15 concerned with this problem at this moment so seriously
16 as they would be if they were faced with the problem
17 of recession or lagging rates of growth.

18 THE CHAIRMAN: I have always suspected that
19 this system in Sweden came about because of their long
20 tradition of under-stating assets and profits. It may
21 have resulted in all you think it has. I don't know.
22 I hope before we get through this job we find out
23 very authoritatively. I must say I am interested in
24 your comments on it.

25 COMMISSIONER PERRY: Professor Charles, going
26 back to the previous discussion on the immediacy of
27 the effect of commodity tax influencing consumption,
28 I must say that this is now overshadowed in my mind
29
30

1 by the immediacy of the effect in income tax deductions,
2 which can generally be instituted fairly quickly.

3 I notice you suggest in Paragraph 21 that
4 income tax can only be changed once a year. The
5 deduction system does not make it quite flexible and
6 possibly in view of its immediate effect of putting
7 money into the hands of the consumer it might even
8 have more "bite" than the consumption tax change.

9 PROFESSOR CHARLES: The Americans believe
10 that at the moment, I think.

11 COMMISSIONER PERRY: I think there are good
12 grounds for that argument. We were also discussing
13 the Swedish provision. Doesn't it have the main
14 difference that it takes the investment-making
15 decision process out of the hands of the entrepreneur?
16 We have had it indicated to us by at least two
17 European witnesses that this was the main reason that
18 the business communities in other countries did not
19 like it. They preferred the tax incentive devices
20 which left the decision in their hands. The Swedish
21 system in effect puts the State in the position of
22 dictating when the investment program will proceed
23 and when it will slack off. I think you would have
24 to admit this is a fairly significant difference in
25 the Swedish approach and that of other countries.

26 I have one or two other general questions.
27 Are you familiar with the long and strenuous efforts
28 made immediately after the War by the Federal
29 Government to obtain control of the Canadian tax
30

1 system for this sort of purpose we have now been
2 discussing? Do you think that experience leads to much
3 optimism for the adoption of some of the ideas that you
4 are suggesting for the future?

5 PROFESSOR CHARLES: Yes.

6 COMMISSIONER PERRY: You know the trend has
7 been markedly away from this in recent years?

8 PROFESSOR CHARLES: I think I referred
9 somewhere in my brief to the fact that Canada has been
10 a true pioneer in the operation of the depreciation
11 system in contracyclical fashion. I specifically
12 refer to the policy that Canada attempted during the
13 time of the Korean boom.

14 COMMISSIONER PERRY: I have gone on to
15 something broader. I was thinking in terms of
16 countercyclical movement in the whole tax system,
17 Federal, Provincial and Municipal. Recent history
18 does not give one much reason to believe this would
19 be possible at the present time.

20 PROFESSOR CHARLES: I see.

21 COMMISSIONER PERRY: One could argue about
22 whether it is desirable or not but recent experience
23 does not seem to suggest that it would be possible.

24 PROFESSOR CHARLES: I always like to think
25 that if politics is the art of the possible economics
26 is the art of the impossible. Several times many
27 concepts, which seemed quite unrealistic, later on the
28
29
30

1 judgment of time has been to show they can be brought
2 within the realm of possibility. I am conscious of
3 the fact that some of my policy inferences may not be
4 realistic but as an economic theorist I thought
5 this might be a responsibility that could be
6 permitted to me.

7 COMMISSIONER PERRY: I think it can quite
8 rightly. I only wanted to make sure you knew that we
9 had made some efforts in this direction in the last
10 decade or so with rather disappointing results.

11 PROFESSOR CHARLES: May I make a comment?

12 COMMISSIONER PERRY: Yes, by all means.

13 PROFESSOR CHARLES: Regarding the income tax
14 being used in this fashion and the rates being varied.
15 I think I would agree it is quite possible to rely
16 solely on the income tax but I have one or two
17 observations. One, is the fact that the income tax
18 as presently constituted is not effective.

19 Secondly, suppose in times of inflationary
20 pressure we withdraw, say, one hundred million dollars
21 by additional taxation, we are not reducing consumption
22 by a hundred million dollars, we are reducing
23 consumption by one hundred million dollars times
24 whatever the propensity to consume is. To that extent,
25 purely from that point of view I would say this makes
26 income tax reduction, or evaluation in income tax
27 an instrument which is slightly more blunt than control
28 of consumption taxes.
29
30

1 For instance, if we withdraw one million
2 dollars to that extent you have curtailed consumption
3 and I have some reservations as to whether manipulation
4 of income tax rate could have the same effect
5 because of the fact we are also taking away a certain
6 amount of savings of the community, added to the fact
7 income tax is a direct tax burden. I don't know how
8 the psychology of the tax payer would react to
9 variations in income tax rates.

10 COMMISSIONER PERRY: In that last connection
11 I think you quite properly comment. We do indeed have
12 to know a great deal more about the psychology of
13 the taxpayer before we can predict the effect of many
14 of these things.

15 Do you have a further point to make?

16 PROFESSOR CHARLES: Yes. In the case of
17 income tax I wanted to refer to fiscal psychology.
18 I think if variations in income tax rate are coupled
19 with measures of the exercise of fiscal suasion, if
20 the use of moral suasion in policy can be regarded
21 as a legitimate instrument, I don't see why we should
22 not apply this in fiscal policy and make use of fiscal
23 suasion and limit the total fiscal policy, especially
24 I think in our present society as it is structured.
25 Because of the number of uninflexibilities in the
26 system, to which I made reference, our economy is not
27 so sensitive and simply by operation of the monetary
28 policy we can bring about the desired effect.
29
30

1 It is quite possible. Some years ago this
2 prevailed and it undoubtedly prevailed in Canadian
3 history when the monetary policy could be relied on.
4 I am not saying it is completely unreliable. I think
5 the efficacy is limited by the number of inflexibilities
6 introduced into the economy. Therefore, if varying
7 grades of income tax is coupled with the fiscal suasion
8 I would be inclined to think variations of the income
9 tax could be very effective.

10 COMMISSIONER PERRY: I think the point is
11 well made. I think you would have to consider that
12 the Governors of Central Banks are more autonomous
13 than Ministers of Finance!

14 THE CHAIRMAN: You have left me behind a
15 little bit. Give me an illustration, if you can, of
16 the exercise of fiscal suasion? I thought you said
17 moral suasion or fiscal suasion.

18 COMMISSIONER PERRY: "Moral suasion" is
19 a very unfortunate expression. It implies some other
20 course of action would be immoral. There is no
21 element of that involved at all.

22 THE CHAIRMAN: I was curious how you used
23 morals to persuade taxpayers....
24
25
26
27
28
29
30

1 PROFESSOR CHARLES: I think moral suasion can
2 be exercised in the fiscal run by a variety of processes.
3 One is for the fiscal authority to keep the public - this
4 is pre-supposing it is a fairly sophisticated public -
5 to keep the public informed of the rationale behind the
6 policy that the fiscal authorities are pursuing, so
7 that if there is a very small increase in the rate of,
8 say, commodity taxation, the public would be able to
9 interpret it as an indication that the Government wishes
10 to restrict consumption and, therefore, it is quite
11 possible that many persons in the public would have the
12 desire to curtail their consumption because they wish
13 to co-operate with the fiscal authority.

14 COMMISSIONER PERRY: We may have to leave
15 this to the Professors of Economics rather than to
16 politicians. I do not say that entirely facetiously. There
17 has not been enough fiscal education tried even in this
18 country.

19 COMMISSIONER MILNE: I was going to ask
20 Professor Charles about this very point and I think it
21 really has been answered. This varying of the rates of
22 tax. This seems a rather intriguing aspect to me.
23 Commissioner Perry has brought out that he would feel
24 your idea could not be accomplished under our present
25 structure.

26 Supposing that such a committee or group, some
27 form of government, could bring this concept into being
28 so that we would then be following your ideas here, do
29 you expect the tax rates will vary often? Sometimes a
30 mistake could be made in anticipating what is to be the
effect on the economy.

1 COMMISSIONER PERRY: Even the Swedish people
2 make mistakes.

3 PROF. CHARLES: Yes. I do think that I
4 demand of a fiscal policy a very high degree of resi-
5 liency. Here, I think timing would be very crucial,
6 and I am sure there are a number of cases where the
7 fiscal authority would be required to embark on a defla-
8 tionary policy almost to a period of recession and
9 embark on a policy at probably even the height of an
10 inflationary situation because I am conscious of the
11 dynamic system where we place the economy not in a static
12 sitting but in the long stretch of time, and therefore
13 the fiscal authority has to be very careful to follow a
14 policy that is not appropriate to the present but to
15 the immediate future. Therefore, timing would be the
16 essential part of it.

17 Normally, I would say, if you want to iron out
18 the fluctuations in the economy this may not require
19 variations too frequently. Certainly not more frequent
20 in some cases, and in others I can visualize, judging
21 from the experience of other European countries in
22 other matters like depreciation policy and so on, they
23 may follow an expansion program for two or three years
24 and then they feel this has been carried to an adequate
25 point and this is the point to apply the brakes. So we
26 need a very vigilant fiscal authority, conscious of the
27 dynamics of growth of the economy.

28 THE CHAIRMAN: Do you consider that it is
29 necessary to retain corporation tax in order to provide
30 suitable economic stimulants? We have had several

3 1 people who have indicated corporation tax should be
2 suspended.

3 PROF. CHARLES: Well, I would feel very
4 strongly that the corporation tax should be retained,
5 and I expressed the view in the brief earlier that
6 across-the-board deductions of corporation tax would
7 not be desirable especially for a country like Canada
8 with a heavy foreign element in the economic picture.

9 On the other hand, I also feel, apart from
10 this, that there are other reasons like the fact that
11 the corporations now spend about 80% - more than 80%,
12 I think, according to the latest studies that have
13 been made, of capital investment comes from their
14 retained earnings plus depreciation allowance. There-
15 fore, to the extent that they rely so heavily even with
16 the current level of taxation on earnings for investment
17 activity, and in view of the fact that the corporation
18 tax serves a very definite purpose in withdrawing
19 purchasing power from the economy when it is necessary,
20 I would say that the case for abolishing the tax is
21 non-existent.

22 COMMISSIONER PERRY: I am thinking this is
23 an echo of what was said fifteen years ago when these
24 ideas were not only talked about by economists but by
25 the Minister of Finance. Nearly every budget speech
26 read like your brief. As a result of one mishap or
27 another we may see it reviving, of course, again with
28 the renewed interest in economic growth. On the other
29 hand, there is a legitimate body of economic opinion
30 to the effect, as you know, that a thing as massive as

4 1 the national government is pretty unwieldy and there is
2 not a great deal you can do with it. It will sail along
3 almost on its own course. These fine adjustments you
4 have in mind are very difficult to make and very distur-
5 bing to everyone, including the taxpayer. They are
6 usually the first to complain even when you are making
7 a tax reduction. They have not been expecting that it
8 will happen.

9 PROF. CHARLES: I think it is true that the
10 very magnitude of fiscal operations has, I think,
11 imposed a pattern of inertia.

12 COMMISSIONER PERRY: It is a dilemma. Its
13 very magnitude would make the body more effective as
14 an instrument; on the other hand, it makes it more
15 difficult to use as an instrument. Whether or not we
16 can unlock this dilemma is another thing.

17 COMMISSIONER WALLS: I notice in your
18 comparison of the percentage of the population that pays
19 income tax that European countries are quite high with
20 Sweden about 54% of population, whereas in Canada it is
21 only 26%.

22 We are getting a great many recommendations
23 for increased exemptions to income tax. In view of
24 these figures would you recommend that we enlarge the
25 exemptions to income tax which would result in a still
26 smaller percentage paying income tax?

27 PROF. CHARLES: I have taken the view that
28 the present system of exemptions has favourable effects
29 on economic growth. There is, I think, an increasing
30 opinion that we should remove all these exemptions and

5 1 have just a broad-based income tax. Quite a number of
2 writers have been saying these exemptions have the
3 effect of reducing the volume of revenue. I do not
4 subscribe to that view.

5 I take the view that exemptions are very
6 desirable if they are properly designed. I think
7 they instil in the taxpayer the feeling that fiscal
8 operations are conducted with a great deal of considera-
9 tion of equity and legitimate allowances are given
10 when they are considered desirable.

11 For that reason I have expressed myself in
12 favour of granting exemptions wherever exemptions seem
13 necessary. In principle, I am in favour of giving
14 exemptions where they seem necessary.

15 COMMISSIONER WALLS: That is not quite the
16 answer to my question. What I asked you was: were you
17 in favour of increased exemptions?

18 PROF. CHARLES: My answer to that is: to the
19 extent that I am in favour of exemptions in principle.
20 Whether I am in favour of a particular exemption would
21 depend on the merits of that particular case.

22 THE CHAIRMAN: Well, Professor Charles, we
23 have had an interesting time, indeed. The brief you
24 have submitted and your comments will be very helpful
25 to us, and we will continue to ruminate on what you
26 put before us. Thank you very much, indeed.

27 PROF. CHARLES: I am very grateful to you,
28 sir, for your courtesy and patience.

29 THE CHAIRMAN: Thank you. Have you any more
30 business to put before us, Mr. Secretary?

6 1 THE SECRETARY: Mr. Chairman, this concludes
2 2 the business for this series of sittings of the Commis-
3 3 sion. The next sittings are scheduled, as you know,
4 4 for August.

5 5 THE CHAIRMAN: Have you a date in August?

6 6 THE SECRETARY: August 7th at St. John's,
7 7 Newfoundland.

8 8 THE CHAIRMAN: Thank you. We will stand
9 9 over until August 7th.
